RIKU DOLA IS A DIFFERENT PERSON

Disproving Reincarnation Theory with Sora and Riku Dola

[Explaination]

They're not the same person as Riku is definitely a different person from sora and the implications of reincarnation theory which wouldn't even make sense as riku's ether (a person's concept) legit dissolved,Tet even said that reincarnation isn't possible &

completely impossible in this world.Also The ex-machina recognize Sora at the end of the volume 9 as a different person, and even have statements such as Riku Dola and Schwi being able to do what Blank cannot and vice versa, There are also many reasons and statements to think that they are not the same, even methodologically their methods in strategies and planning, also other actions are completely different.

Tbh It doesn't make sense for Riku Dola to look so similar to the main characters like Blank if there's no connection[Even the appearance itself,as all of the story and everything is told from Tet's point of view,the actual appearance is definitely different that we seen] and tbh they both are completely different beings/characters as I literally told(and this whole connected worlds crap just sounds stupid) if we look at statements
