lets Start With “All mythologys are entire galaxies/universes/multiverses”

So basically,in this video https://youtu.be/qvd-n4cN5II?si=RFkB3HfT3ktO0BfL&t=0:04 has cory barlog explaining how Mythologys are separated but the thing Is people mistook this and said “Cory barlog says that Entire Mythologys Are Galaxys” Which is not true at all since He was referring how they are “Divided JUST like how galaxies are divided” like Mythologys are scattered around the world just like how galaxies are scattered in a universe he doesn't say that they are actual galaxies it wouldn't make sense because the comics say kratos sailed from Greece to Egypt here

And Clearly we can see that kratos traveled to Egypt by boat and also we still have more scans on this https://youtu.be/qvd-n4cN5II?si=Nscqe_1_9xm4rs69&t=1m13s we can see how cory barlog says that All mythologys exist on earth and here we can see that all the mythology rulers were walking on earth https://youtu.be/qvd-n4cN5II?si=Nscqe_1_9xm4rs69&t=5m12s and there also are in-game painting in gow 2018 or raganork which shows kratos traveling by sail
And tyr traveled to other pantheons by boat
https://youtu.be/tnwDQDmG_aw?si=IqKiHlpDzrnI7EVS&t=39m41s and kratos got to norse by shore or boat https://youtu.be/tnwDQDmG_aw?si=T_qAsac43jP7kwCv&t=40m59s

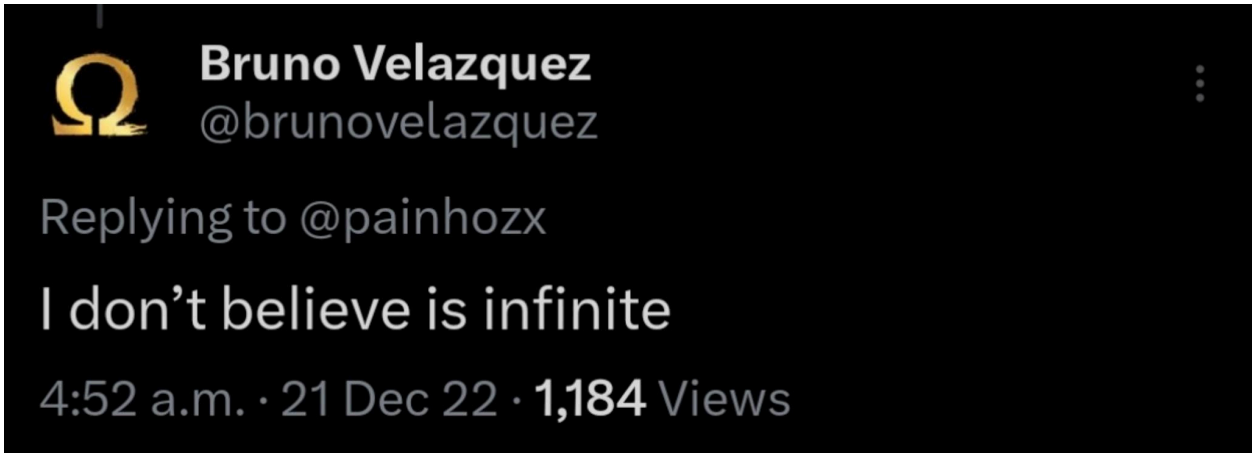

Now lets Start With the nine realms,so the nine realms are stated to be infinite and it is stated that kratos flipped the 9 realms which isn't true first let's use a statement that is NOT

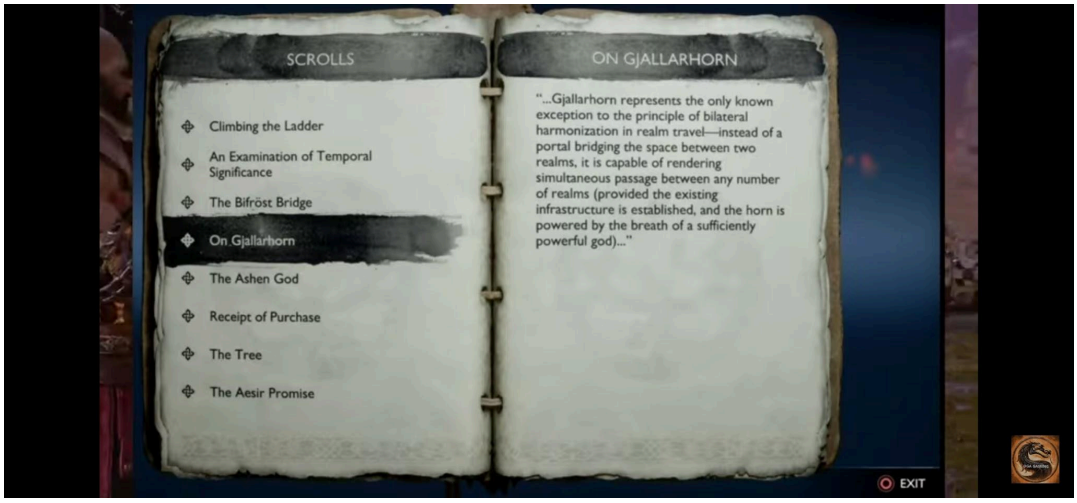

contradicted by anything keep in mind that brunos other contradicted statements do not contradict all his statements and if u still don't wanna trust bruno Velaquez then here basically if kratos flipped The temple then all of gow would have been flipped and raganork wouldn't even happen the realms Are literally flipped and the realms aren't even infinite they all exist in the same physical space and the same reflections https://youtu.be/QEPhQh0q_KY?si=z5ftpyE3CAdTIAgg&t=1m52s and physical space is a 3 dimensional space https://www.google.com/url?sa=t&source=web&rct=j&opi=89978449&url=https://www.sciencedirect.com/topics/engineering/physical-space%23:~:text%3DThe%2520physical%2520space%2520is%2520a,%252C%2520mass%252C%2520speed%252C%2520etc.&ved=2ahUKEwj-9LzV6cGMAxVAhv0HHQCFPYcQFnoECBEQBQ&usg=AOvVaw0ePLMBoC8jDx4gtVOUUy0V https://www.google.com/url?sa=t&source=web&rct=j&opi=89978449&url=https://en.wikipedia.or

g/wiki/Three-dimensional_space%23:~:text%3DSpace%2520has%2520three%2520dimensions%2520because,combination%2520of%2520three%2520independent%2520vectors.&ved=2ahUKEwj-9LzV6cGMAxVAhv0HHQCFPYcQFnoECBUQBQ&usg=AOvVaw0JuCLdFRS2JAXL2AUW4z9d and about mimirs statement on how time moves Different in the realms it's basically time dilation https://youtu.be/QEPhQh0q_KY?si=hjwEl5TTRDioBGgY&t=2m21s And since the nine realms exist in the same 3d physical space Then it CANNOT be infinite at all as it's not logical and for yggdrasil being It's already debunked by the game and this also debunks the nine realms aswell https://youtu.be/_H8OA7hHRGM?si=JOi0XZD9NrhpjOw3&t=1m34s and we can see the giants destory a branch of the yggdrasil tree and clearly yggdrasil Has a tip and the nine realms With edges and this is further supported by the icons/logos that resemble the real nine realms 

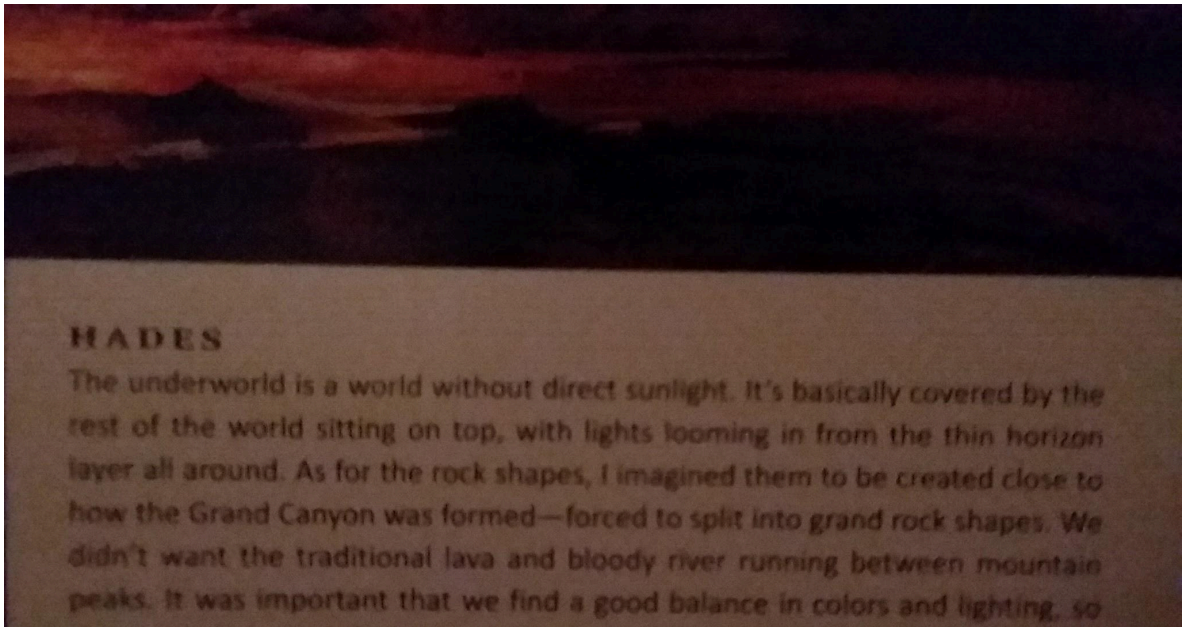

And all of this is further supported by Bruno Velaquez

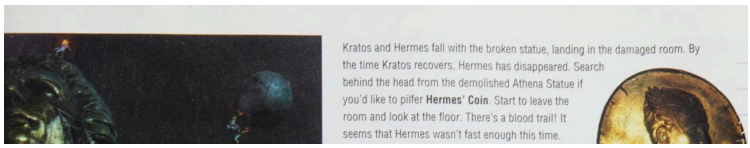

Here it Is also debunked in game
https://imgur.com/cp2eg7H
And u might say that the 3d physical space is yggdrasil but that literally means that all the realms exist inside yggdrasil tree and we know it exists in the branches not in the tree and another thing and here we can see in this scan here

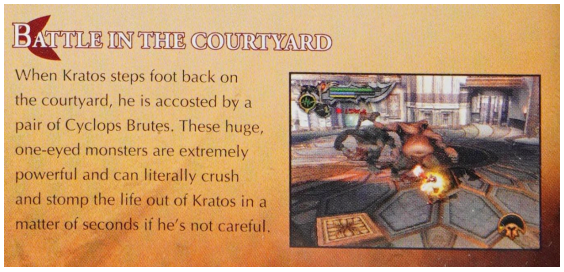

It states That the portals bridge the space between the realms and this means the realms are in a physical space and here we can see https://youtu.be/tnwDQDmG_aw?si=WymEk-qVLuyWUODf&t=44m40s it states that the 2 realms meet which Further supports the fact they exist in the same physical space
And we can also debunk Infinite Speed kratos basically first Of all heilos Light being dodged by kratos doesn't give him infinite speed because reaction speed ≠ travel speed Or speed and basically it covered the rest of the underworld But the thing is That the underworld isn't infinite it had a edge

And here we can see (Hermes who is literally faster then kratos failing to dodge a falling statue)

And here we can see that a brute can kill kratos in seconds if he's not careful

And Atlas NEVER held the entire universe or all of creation literally
He only lifted the world proven ingame

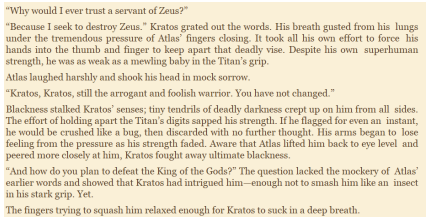

https://youtu.be/mWVSUGRsMks?si=Vmm7DLoLHkTM6deB

And also stated here

And he Never Overpowered,Atlas was holding back

"Why would I ever trust a servant of Zeus?"

"Because I seek to destroy Zeus." Kratos grated out the words. His breath gusted from his lungs under the tremendous pressure of Atlas' fingers closing. It took all his own effort to force his hands into the thumb and finger to keep apart that deadly vise. Despite his own superhuman strength, he was as weak as a mewling baby in the Titan's grip.

Atlas laughed harshly and shook his head in mock sorrow.

"Kratos, Kratos, still the arrogant and foolish warrior. You have not changed."

Blackness stalked Kratos' senses; tiny tendrils of deadly darkness crept up on him from all sides. The effort of holding apart the Titan's digits sapped his strength. If he flagged for even an instant, he would be crushed like a bug, then discarded with no further thought. His arms began to lose feeling from the pressure as his strength faded. Aware that Atlas lifted him back to eye level and peered more closely at him, Kratos fought away ultimate blackness.

"And how do you plan to defeat the King of the Gods?" The question lacked the mockery of Atlas' earlier words and showed that Kratos had intrigued him—enough not to smash him like an insect in his stark grip. Yet.

The fingers trying to squash him relaxed enough for Kratos to suck in a deep breath.

And we Can debunk midgard having infinite timelines https://youtu.be/tnwDQDmG_aw?si=WymEk-qVLuyWUODf&t=47m30s pretty nice? And it Is believed that Kratos destoryed the entire world at the end of gow 3 but he only destoryed Greece Not the entire world https://youtu.be/qvd-n4cN5II?si=XtFwvAdH1GZQOtNg&t=36s and

Kratos never regained the blade of Olympus power and it remained in the blade

He stood, threw back his head to face skyward, and bellowed, "Do you see, gods of Olympus? Do you need more proof than this?"

The whistle of metal in the air brought him around in time to see the Colossus collapsing toward him. Kratos thrust up the blade, but the bronze hand of the statue smashed him flat and sent the weapon sailing through the air.

As the Blade of Olympus left his hand, Kratos knew despair. All his godly power had been drained into it. Without it in his grip, he was mortal. Only mortal. He moved and felt liquid movement within his body. Organs had been ruptured. His muscles were puny and refused to obey. But even as a mortal, Kratos had more than simple physical strength. Indomitable will pulled him from under the bronze hand pinning him to the stone floor.

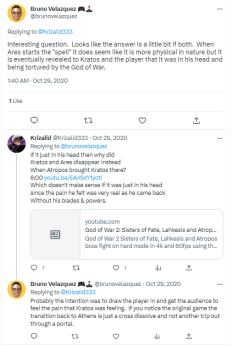

And Ares never created a universe to trap kratos it was a illusion

Instead of meeting Kratos hand to hand, the god tapped some dark and eldritch power that washed over Kratos, and into him, and seized his mind entirely. The temple, the mountain, Athens, and the god himself were all wiped from before Kratos's eyes, replaced by a village in flames.

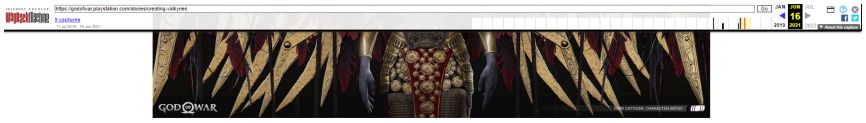

He fell to his knees. He knew this terrible place. He suffered it nightly in his dreams, in the visions that racked his days and filled every instant of his life.

Mocking laughter rang in his ears. *"I taught you many ways to kill, Kratos. Flesh burns, bones break—but to shatter a man's spirit is to truly destroy him."*

And this is further proven by Bruno Velaquez

people Also say “Valkyries have infinite speed because they traveled between realms” and this is easily debunkable as they have Instant teleportion and teleportion Never counts as speed

Conjuring Magical Weapons

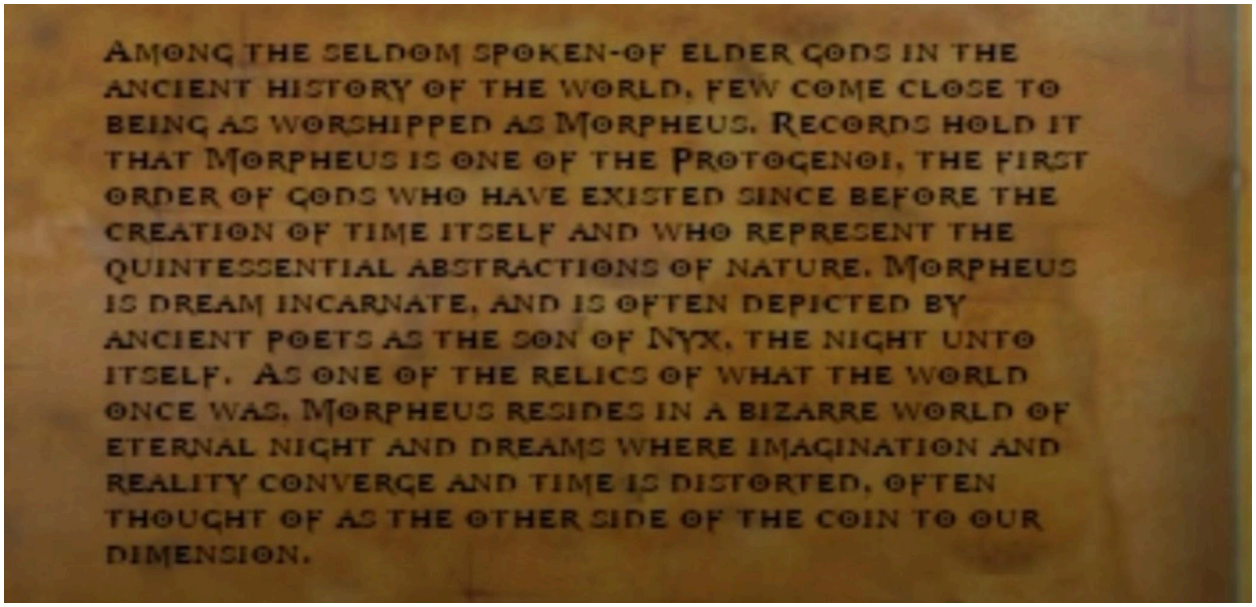

The weapons as well were carefully designed and came through a deep collaboration with our combat team. Our art team would work closely with the other combat designers on how the Valkyries' toolkit would be represented in each of the characters. This would be in contrast with Kratos and Atreus to showcase the more complex mastery that the Valkyries had of being in the Norse realms. Dela stated, "We were told that when Kratos and Atreus use the Bifrost, it's very physical, and they're still learning it. The Valkyires, though, have mastered it, and that's why you see them use a variety of weapons so quickly, so when you see them in combat you'll see they come down with clubs or projectile weapons with a sickle flawlessly."

The Valkyries' unique usage of the Bifrost in this way was important to the rest of their design as it would dictate what toolkit was used. Raf mentioned, "That was something we really tried to play into with the design as well…how we were going to utilize the Bifrost, which was being designed at the same time that these characters were being created. Even the weapons could be materialized and pulled from different realms. All of this was being played into, the combat designers and us - working closely with them to make the characters."

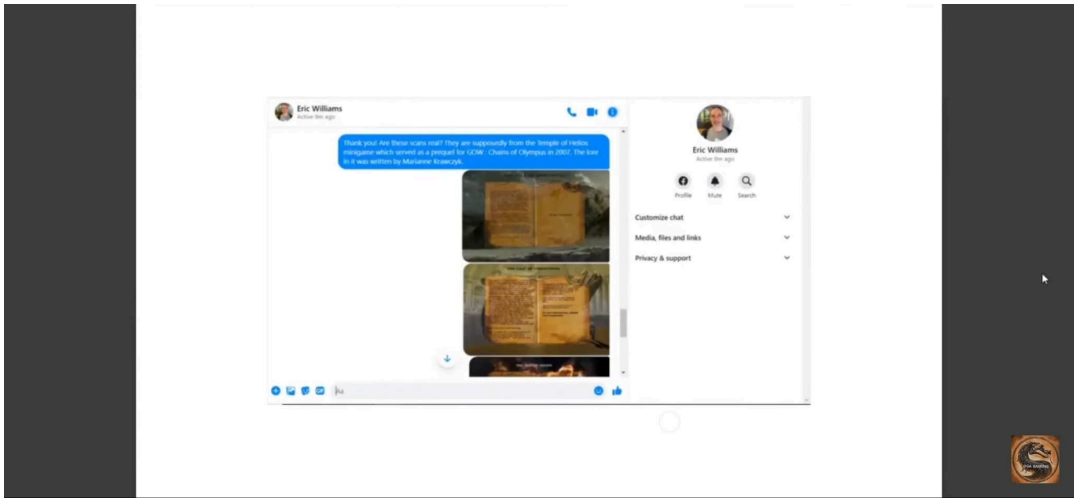

And literally they Were at par with humans
https://imgur.com/pYaQG9n
And also primordials only created the Greek world (not the entire planet but just greece)

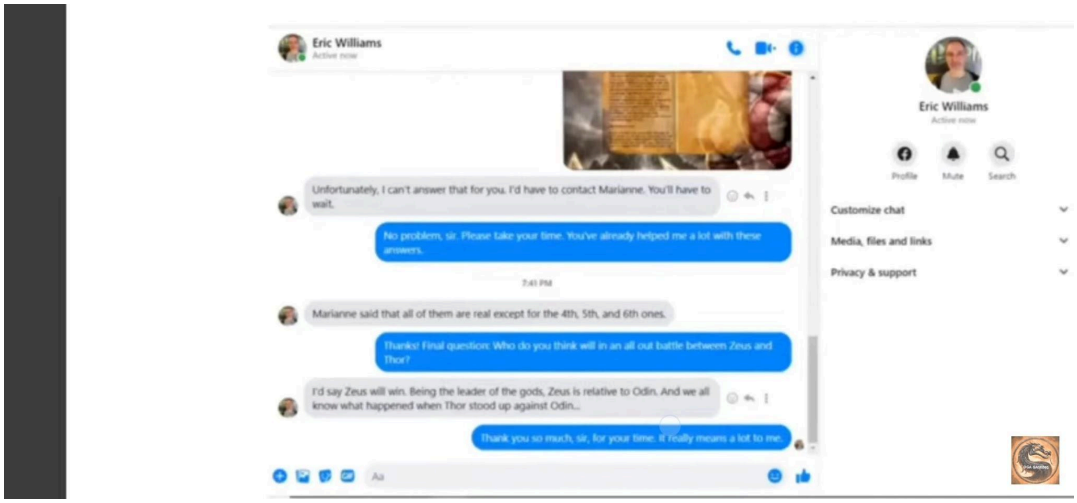

They never created the universe and now lets talk about this scan

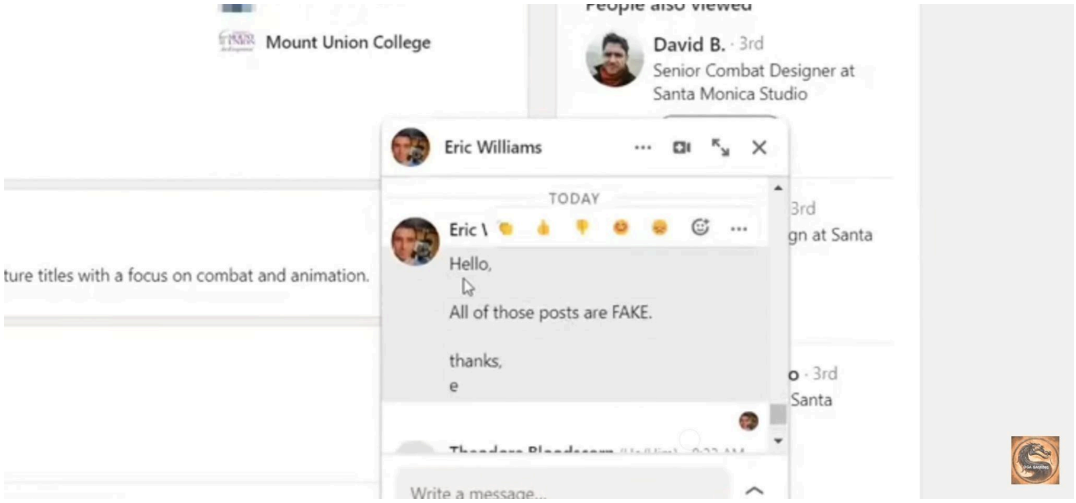

This scan is the most popular gow scans which Is believed to help make kratos outerversal but the thing Is this is **FAKE** literally Yes it's proven by the author by the name of “Eric Williams”

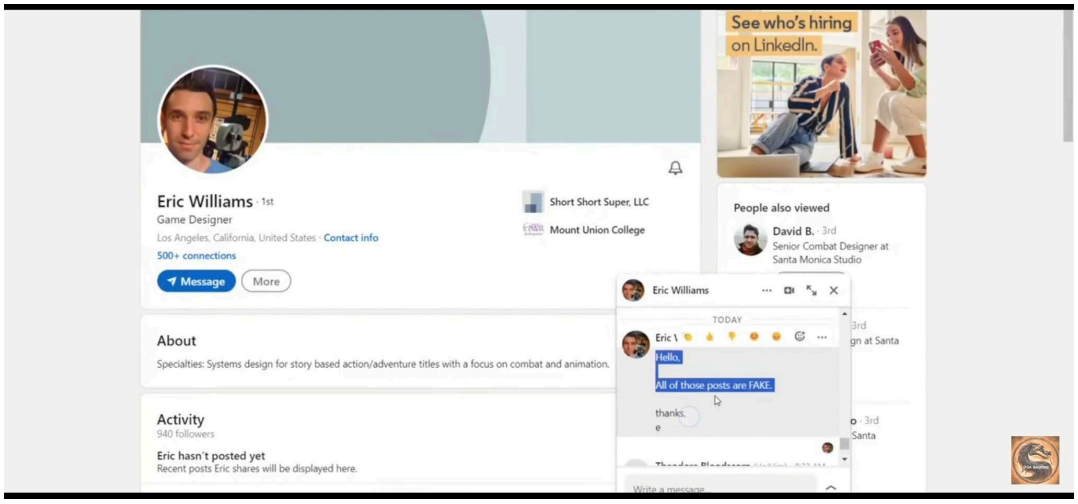

These scans show that the author is saying that “these are real expect for 4th 5th 6h ones” basically this means that the outer scan of kratos as Showen before Is real But HOWEVER this Is a FAKE Eric Williams The real Eric Williams is https://www.linkedin.com/in/eric-williams-2bba72?utm_source=share&utm_campaign=share_via&utm_content=profile&utm_medium=android_app

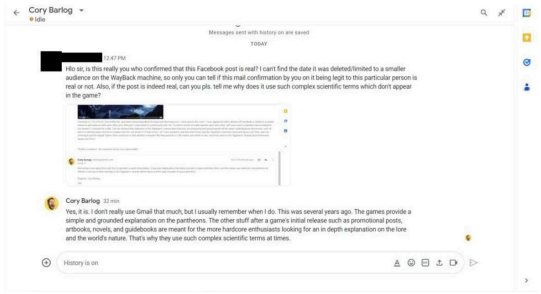

And The real Eric Williams has Said “ALL OF THESE POSTS ARE FAKE”

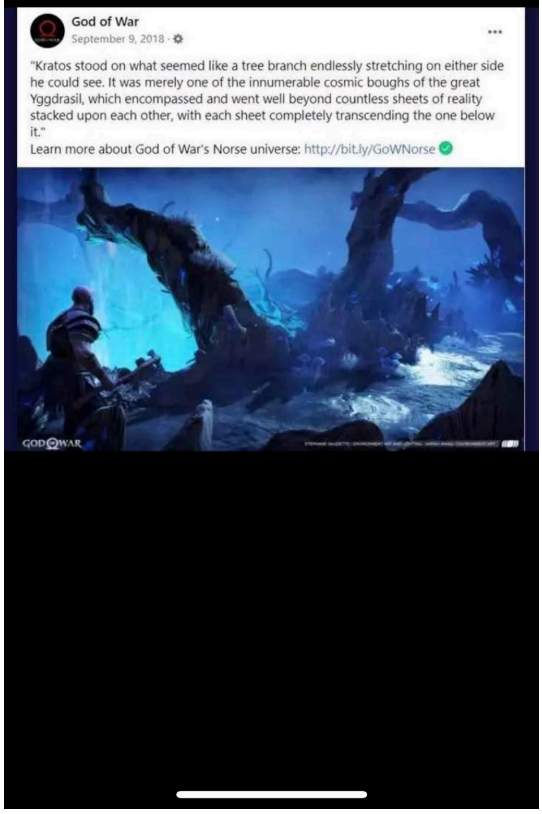

he Literally said the images of him saying “these are real expect for the fourth fifth and sixth ones” is a fake dm message and u go this scan is indeed fake but however u may try to use the other tale of morpheus scans in internet archive which is already debunked by dga http://youtube.com/post/Ugkx1lLYCUhL4LHw1bj8ODGA6IpSDS_KqMQv?si=Jy6XSdxgJEG48pbM

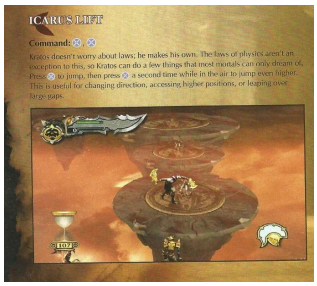

And if u don't wanna open the link for no reason then basically he says how someone uploaded fake tale of morpheus images in 2023 and labeled them as “released in 2003” (forgot where it is labled) and they made a fake santa moncia studios to make this btw And another outer kratos scan are these ones

Hlo sir, Is this really you who confirmed that this Facebook post is real? I can't find the date it was deleted/limited to a smaller audience on the WayBack machine, so only you can tell if this mail confirmation by you on it being legit to this particular person is real or not. Also, if the post is indeed real, can you pls. tell me why does it use such complex scientific terms which don't appear in the game?
Cory Barlog 22 min
Yes, it is. I don't really use Gmail that much, but I usually remember when I do. This was several years ago. The games provide a simple and grounded explanation on the pantheons. The other stuff after a game's initial release such as promotional posts, artbooks, novels, and guidebooks are meant for the more hardcore enthusiasts looking for an in depth explanation on the lore and the world's nature. That's why they use such complex scientific terms at times.
History is on

Greetings sir. I'm a HUGE God of War fan, and while researching about its deep and interesting lore, I came across this scan*. It was apparently either deleted off Facebook or limited to a smaller audience and replaced with some other post. Although I understood its content quite well, the "countless sheets of reality stacked upon each other, with each sheet completely transcending the one below it" confused me a little. Can we interpret that statement as the Yggdrasil's innumerable branches encompassing and going beyond infinite higher spatiotemporal dimensions, each of which is infinitely larger and more complex than the one below it? Is that correct, sir? I also wanted to ask that when Freya said the Yggdrasil's branches transcend Space and Time, was she referring to just the regular Space-Time continuum or their abstract concepts? My final question is if the realms are infinite in size, since they exist on the Yggdrasil's strands which transcend Space and Time?
Thanks in advance. You response will be much appreciated.
Cory Barlog <cbarlog@gmail.com>
to me
18:31 (34 minutes ago)
Rich knows more about this stuff, but I'd say that's a valid interpretation. Freya was talking about the literal concepts of space and time there, and the realms can indeed be interpreted to be infinite in size due to them existing on the Yggdrasil's strands which transcend the said concepts (of space and time.)
Regards, Cory Barlog.

God of War
September 9, 2018
"Kratos stood on what seemed like a tree branch endlessly stretching on either side he could see. It was merely one of the innumerable cosmic boughs of the great Yggdrasil, which encompassed and went well beyond countless sheets of reality stacked upon each other, with each sheet completely transcending the one below it."
Learn more about God of War's Norse universe: http://bit.ly/GoWNorse
GOD WAR

And again no proof that these are real posts or images these can easily be faked and Eric Williams again confirms it's fake https://youtu.be/4NAZB-nIsAk?si=uHLm4NEt8Pt0zgQC and another one is basically “Kratos Ripped apart the fabric of reality and reality is a concept” which is bullshit since literally destorying the reality of a verse isn't even outer it depends on what the verse scaling is or is like for example “dragonball is Low Multiversal Therefore if u destory it's reality u scale to low multiversal” and also in Gow realm tearing is basically magical like portals between realms,So yes none of this is actually outerversal and this scan here

Can't be considered part of kratos power since literally it's a Fucking tutorial which are never canon and him making his own laws literally needs context Like what type of laws? And this is the end of the document there's nothing really good to add.
