This is a Star Constellation Immortal Venerable Doc

Star Constellation Immortal Venerable, Xing Su, is a Wisdom Path Gu cultivator from the novel Reverend Insanity

Major Spoilers AHEAD! Read with Caution!

Narratively speaking, Wisdom Path gu cultivator are proficient in planning, foresight, Cognitive Abilities, making deductions, and manipulating/understanding emotions (and since SCIV is the pinnacle of this path, she would be, theoretically, better than FY in all of them, of course narratively speaking)

Check out my other doc to get more insight on how my docs work: https://docs.google.com/document/d/1GgxRAjRxcTB4eYIUAW3R-rhkHWatV6DMn3_I2ti5Q04/edit?usp=sharing

Before Volume 6:

Assimilating with Heavenly Dao to maintain the advantage of Humans as the supreme rulers of the five regions and two heavens

Indirect Manipulation/Knew/Planned/Guided FY to “work” with Spectral Soul Demon Venerable and then “destroy” the sovereign immortal aperture gu

After Volume 6:

Foresaw that someone would destroy Fate Gu and planned to have some of Heavenly Courts arrangements in Limitless’ Crazed Demon Cave to maintain an advantage if that were to happen(Doesn’t state that it was her exactly, but more like Heavenly Court, however, the fact that her three spirits were there means that she has to have something to do with it or planned most of it in advance)

Starting at chapter 2183 Star Constellations Revival

Entering Primordial Domain arc chapter 2184→

After revival decided to enter Primordial Domain because she didn’t want to be obstructed by Limitless’ method

Star Constellation and Giant Sun selected the refinement path area to fight as it would hinder Fang Yuan if he came

Observation with finding Fang Yuan’s body even while fighting Giant Sun and directly attacked

Activated a killer move that split up multiple of her illusions so that SCIV could conceal herself

Pattern recognition with the multiple dragons of FY attacking her but being able to stabilize the situation and counterattacking with her myriad of illusions

Trap evasion Retreating wisely as her illusions started to die revealing her main body as FY was gaining the advantage plus there was numerous soul path dao marks which FY could’ve used as a battlefield killer move to trap SCIV

Tactics This time Xing Su used star light with a homing ability to directly attack FY it would then multiply as more got hit onto him and then waiting for a battle of attrition once she realized that FY was switching killer moves

While FY was busy fighting Xing Su, she decided to change tactics and start absorbing the Primordial Domain around her

Once FY started attacking Xing Su again completely slowing down Xing Su's advance in gaining Primordial Domain, she decided quickly to switch tactics again and start attacking Primordial Domain
SCIV quick decision making with her understanding that it was low chance of them obtaining Primordial Domain so she decided to just go into Primordial Domain (this is talking about what happened in chapter 2184)

SCIV misdirection with her using an illusion to cover up her real trace as she went inside the rank 9 formation that made up Crazed Demon Cave

EM with SCIV being able to easily hop through the truthful floating ice even as it began giving hard emotions

Observation knowing that FY was catching up to GSIV

HLL challenging people arc chapter 2188 (its been happening for a while)→

AC/EM for resisting the strong emotions from the ninth layer of Crazed Demon Cave without the use of fortitude gu

SCIV pretended to be injured/activating the three counterparts of her and then made FY and GSIV lure out to the edge of the center of the Truthful Floating Ice and then she opened her eyes and trapped FY and GSIV; Basically, she lured FY and GSIV to the edge of the Truthful Floating Ice and then trapped them

Basically she infiltrated a lot of Crazed Demon Cave and its formation and used that as her trap for FY and GSIV, once they were trapped, SCIV escaped into the eighth layer and started to overturn the tides of the great world war, eventually coming victorious

Crazed Demon Cave Eighth layer fight chapter 2191→

Xing Su decided to use Humble Reciprocation, basically it returned the attacks of enemy gu immortals to themselves in an opposite attacking manner, to reflect all the damage Longevity Heaven and FY did pretty much neutralizing the battlefield even heavily outnumbered→Xing Su then fought FY by herself because Humble Reciprocation couldn't counter compound killer moves as the conflicting dao marks would make the reciprocation very weak

Xing Su multitasking holding Book Mountain, fighting FY, and using Humble Reciprocation

Xing Su decided to conceal the gu immortals within HC's graveyard to then have them counterattack later (however it failed because of FY)

Graveyard fight mini arc chapter 2191→

EU SCIV understood FY, as crafty and cruel, after he started to invade the graveyard and knew that FY would start taking advantage of the graveyard weakness

SCIV used the illusion move to move past GSIV

Assumption feat: leadership, Xing Su might've incited the HC graveyard formation so that FY and GSIV could fall into a passive state

Used a wisdom path method to forcefully contain the painting/human path graveyard formation from breaking apart by FY and GSIV

After Shen Shang broke through Divine Emperor City, SCIV quick decision was to bring all the HC gu immortals into the door of Life and Death

Door of Life and Death/SSDV's reawakening mini arc chapter 2192→

Xing Su told SSDV to wake up and deal with GSIV and the others

Xing Su provoking FY and GSIV as they try and desperately defend against SSDV, Spectral Soul Demon Venerable, by saying that their valiance surprises her and that she would leave, which he did

Xing Su was able to "control" SSDV like her puppet

Xing Su made FY and GSIV trapped fighting SSDV so that it would spare her time to unite the three worlds without any resistance→FY lured to another trap

Xing Su understood Limitless' heaven and earth refinement method well enough to know that it would turn into the winds of assimilation once it reaches its peak after the three worlds combined

Deciding to cooperate with Limitless all those years ago so that she could comprehend Limitless' Heaven path research through Crazed Demon Cave thus gaining benefits→Xing Su was able to control SSDV due to heaven path research
FRI/Connecting the dots/Thinking/Long Term Planning
Using her wisdom path attainment to connect different resources that Heavenly Court had such as Book Mountain, Primordial Domain, Crazed Demon formation, and the door of life and death to maintain her advantage against both FY and Longevity Heaven's alliance→as a result, all of HC's hard work paid off when HC united the three worlds pretty much letting half the Crazed Demon formation fall to Star Constellation Immortal Venerable's hands

Chapter 2194

SCIV moves unhindered in Crazed Demon Cave arc chapter 2194→

Leadership with SCIV leading HC to the truthful floating ice and having the members use the control method of the truthful floating ice→its revealed that SCIV wanted to forcefully accelerate the Crazed Demon Formation→because Not immortal as well as the other three demon eccentrics where in the middle of the Crazed Demon Formation, SCIV realized that even though she thought that she sealed Limitless' will, Limitless' scheme was deeper than she had imagined enabling the three demon eccentrics to manipulate practice gu but SCIV still had a back up plan→SCIV realized Limitless' intentions as he was a rule path gu immortal and not a wisdom path thus invading HC to make a bet with SCIV→by speeding up the process through her wisdom path attainment, SCIV could get results faster from the formation→When the three demon eccentrics told SCIV that she could just take the practice gu from them, SCIV said that she doesn't want to forcefully enter the formation just in case it might destroy one of the truthful floating ice causing a malfunction in the final deduction results→thus by being in control of half the formation, as well as having HC members outside to prevent an unexpected situation, can SCIV speed up the formation→SCIV multitasking by instructing the HC members what to do to control the truthful ice while slowly using her methods to speed up the results this causes the outer ice pieces to melt while the central truthful floating ice, containing the derivation results, start to grow→understanding that the one truthful floating ice piece would contain the result to get eternal life

PEIV's revival mini arc chapter 2195→

Xing Su understanding PEIV's ploy that PEIV cultivated another path which was heaven path and used the destruction of his earth grave to revive him→she also knew if Yellow Earth Great World were to assimilate the other worlds then PEIV would've had venerable strength, right now PEIV had pseudo-venerable strength

Xing Su understanding that she needed to focus on the Crazed Demon formation instead of going to attack PEIV

Revealed that SSDV's emotions might be tampered by XIng Su using a powerful wisdom path killer move that even the pseudo venerables/venerables couldn't break (some type of EQ cat or EQ manip involved)

Emotional control/Emotional Manipulation with SCIV screwing up SSDV's emotions and thus being able to control him and Fairy Feng Ya being able to deduce Limitless' arrangements

Xing Su lured FY's group in because SSDV couldn't leave Door of Life and Death, so this was just a stalling tactic

Outside of the door of life mini arc chapter 2198→

Xing Su arranged a method that would protect the graveyard in advance so that when fy and his gang throws killer moves at the graveyard the door of Life and Death absorbs it

Xing Su with her chessboard gu house/formation was able to transport HC gu immortals with amplified stats to counter the pseudo venerables in FY's group

Multitasking with Xing Su fighting GSIV but also controlling chessboard gu house to counter the other pseudo venerables, somewhat effectively, she was even teleporting HC members with similar path moves so that there killer moves don't conflict and had a greater effect in countering FY's group→she did not use her full strength so she was able to control the whole battlefield including her fight against GSIV

Xing Su was prepared for a flaw which FY used that restricted Constellation Chessboard via Limitless' countermeasure, if someone within the chess pieces of the board was implicated by the Limitless' countermeasure→she used starry lights to subdue Limitless' chains→due to her deep infiltration of Crazed Demon Cave

Using the advantage of homeground against all of FY's group

Being able to multitask with fighting GSIV, preventing Limitless' chains from growing, supporting HC, fighting FY

Deciding to take out Book Mountain for Zhou Xiong Xin to control and then release GSIV's luck path methods, assuming its from Humble Reciprocation, to temporarily stop GSIV and then SCIV used that time to attack FY

Expected that FY would stop fighting, to avoid Limitless' retaliation, and retreat into the five region smoke qi→Xing Su counter acted with this by using a killer move to trap the five region smoke qi so that FY couldn't escape out of it

Xing Su set a trap for GSIV where when they were in a stalemate she utilized Golden Hooped Great immortal, consuming his whole accumulation of cultivation into a hoop, and Qin Ding Ling to suck all the luck out of GSIV with gambling gu, this was because she knew that once Limitless' arrangements let go after the completion of the eternal life research results and GSIV and SCIV could use their full power, because of GSIV's crazy luck he would have great strength

Her leaving to deal with FY and showing a weakness and her reinforcing this weakness by activating Book Mountain (basically pretending that she was incapable of dealing with both FY and GSIV) was just an act to pretend like she was weak, in reality she was setting up the killer move with Golden Hooped Great Immortal and Qin Ding Ling→In essence, she used FY as a piece to lure GSIV

Chapter 2200

Assumption feat: Assuming that SCIV was the one who orchestrated the gamble gu with Qin Ding Ling, this meant that first of all she knew GSIV's combat system well, which relied on large and good luck, she knew that Qin Ding Ling had less luck than GSIV thus no matter if GSIV won the gamble, in this case he would get Qin Ding Ling's bad luck, or lost the luck, the Qin Ding Ling would gain GSIV's vast amount of luck, then GSIV would be losing. Even though GSIV had ways to turn the bad luck into good luck, he was still fighting SCIV and she would take advantage of GSIV splitting his time to do so

Xing Su had a great combat system, even with a "lacking" in the offensiveness which was having only one killer offensive move, but even though she didn't have diversity, she wasn't using as much energy on that one killer offensive move and instead using it to strengthen her wisdom path, aka deductions etc. this caused her to have a better grasp on the battle situation→thus she could use her surroundings to the limit

Risk calc/decision making SCIV knew that it was hard to move Qin Ding Ling because the starry paths she created were inflicted by PEIV, so once FY escaped and took PEIV with him and SCIV ended up sacrificing her to FY to deal massive damage onto GSIV

SCIV realized that Blood Sea Ancestor was GSIV's clone when GSIV used a blood path formation to completely revive himself before SCIV used her killer move

Being able to cooperate with GSIV to destroy the bystanders wanting to get benefits of their own

GSIV and SCIV works together mini arc chapter 2203→

SCIV used the chessboard to slow down FY's speed, while FY was evading

SCIV quickly targeting PEIV as he started to attack her chessboard as PEIV was an unknown variable that cultivated Heaven path, something she knew little about compared to him

Used Divine Emperor City to counter FY

Xing Su trapped the sea clone so that GSIV could inflict damage against himself (could possibly not be true)

When the eighth layer was destroyed, Qin Ding Ling made graveyard go to her immortal aperture at the same time having Qin Ding Ling and Golden Hooped Great Immortal attack GSIV with the same sequence of moves

Antifeat (ig its pretty much negligible) Xing Su forgot to take into account Heaven Luck Suppression palace which then took a backlash on Xing Su's chessboard as it inflicted Limitless' chains which was connected to the chessboard

Xing Su used a mysterious secluded domain of heaven and earth to inflict massive emotions on GSIV who was already closing in on the last truthful floating ice piece

SCIV decided to help HC gu immortals that were struggling against the pseudo venerables (because chessboard was gone in SCIV's aperture) but GSIV blocked, he then took out calamity luck alter and made it carve the last truthful floating ice, however SCIV countered by using the mysterious domain of heaven and earth lamp which altered the emotions of others

SCIV held onto the weakness of GSIV, who he cared about his descendants, Bing Sai Chuan, from being inflicted by this lamp. (for ex. BSC was crying and trying to commit suicide)

SCIV knew that she had to recruit FY in order to have a great chance to get the eternal life research results. She was willing to trade with FY all of Primordial Domain and multiple true inheritances

Limitless Revives mini arc chapter 2207→

Xing Su quick thinking of dodging Limitless and moving extremely far back due to his power

Xing Su realized that Limitless used the outside "chaos", or outside the world boundary, to fuel Crazed Demon Cave thus why she couldn't deduce Limitless' revival method

SCIV realized the intentions of Limitless as he needed HC as an assurance in case the tiny hole, which was chaos, expanded and started to destroy stuff, HC would have to come in and help stop it

SCIV decided to use the lantern secluded domain of heaven and earth to instill deep emotions into the immortals and then used Book Mountain to reciprocate the methods that the immortals used previously onto themselves

SCIV "Consumed 10 billion thoughts" PSI→deciding strategically to grab a piece of truthful floating ice with immortal gu in it→immediately after she focused on defense

SCIV realizing that PEIV, since he cultivates heaven path, used the truthful floating ice to raise his cultivation close to rank 9 every second

FY becomes venerable mini arc chapter 2210→

Realized that FY held back the move in which he could refine the dao marks of the starry killer move until this moment in the battle of crazed demon cave→he prepared a killer move long in advance that would refine the dao marks but refused to activate it causing SCIV to think that FY couldn't counter her starry killer move→she realized that FY decided to suppress his aura so that when PEIV was reaching rank 9 she would focus on him other than FY

SCIV was able to use reasoning to analyze FY's strategy to become venerable: taken from my FY doc, "Explanation: FY realized that he could attain supreme grandmaster in refinement path without the Primordial Domain→Thus he let GSIV and SCIV destroy the part of the refinement true attainment in Primordial Domain, this let GSIV and SCIV think that FY couldn't attain supreme grandmaster attainment→the reason why he did this was because going through tribulation to become a venerable, FY needed to break the heavenly dao and it would be a very big risk, thus if FY was openly a supreme grandmaster then GSIV and SCIV would've been on guard against FY, but that wasn't the case because they thought they destroyed FY's chance at being a refinement path supreme grandmaster→then he didn't become a venerable quickly during the three world fusion because of Limitless' retaliation method, meaning FY's strength would be capped→being a "pseudo venerable" had its benefits as GSIV and SCIV would subconsciously ignore FY and be more focused on themselves→FY held back his trump cards to have a better understanding of the whole situation before making his move"

SCIV used the door of life and death to suck FY into it once Fy was able to take the last piece of truthful floating ice

Hei Lou Lan vs Chu Du mini arc chapter 2213→

FY returns back to Eastern Sea mini arc chapter 2215→

Great Love Alliance creation mini arc chapter 2219→

Fusion of Two Heavens mini arc chapter 2220→

Understanding that SCIV would need to us her Yellow Apricot Beads, rank 9 immortal essence, wisely as she didn't have a lot left→she still had injures from Crazed Demon Cave

Understanding that she also needed to refine the natural wisdom dao marks as well as HC's dao marks to gain power

SCIV calculated that GSIV had the most immortal essence because he still had a lot left over from Longevity Heaven once he died, the reasoning being that SCIV was a venerable a long time before GSIV and that her immortal essence was used over time by HC and also knew that FY had the least amount because he just became a venerable

SCIV's emotional understanding of FY and how he didn't have any pride and was very shameless unlike the other venerables which had their own pride. For ex. FY declared that he was going to be righteous but one that didn't have benefits he would then go back to being demonic but then once righteous path had benefits he would switch again

Understanding the huge predicament SCIV is in due to FY's tactic of refining gu for others, as once they realize that FY was actually doing what he was telling then the five regions would probably favor him a lot more than HC

Contest Between The Three Venerables Arc chapter 2224→

Because Xing Su wasn't able to counter FY's great love refinement, she decided to do the next best thing and have He Feng Yang (Immortal Crane Sect gu immortal from volume 2) do more public transactions with FY to gain benefits, as FY exposed that he made transactions with He Feng Yang→Either FY would reject the claim and lose his credibility or he would do the transaction but HC would stay indifferent toward the ten great sects letting them raise their power through open transactions

Xing Su immediately understanding why Wu Yong(idk if they say why, probably because Wu Yong wanted more benefits, chapter 2225) wanted an open transaction with HC even though he fought against them in the Fate War→Showing that she was tolerant with any transaction that FY made and wasn't scared to also seek transactions with the same people that transacted with FY and secondly she wanted to pull Wu Yong to her side

She was spying on FY already in Eastern Sea

Understanding that she still needed to stay on guard from GSIV because her immortal essence was less than his

Using Obscured Heavenly Secret mini arc chapter 2228→

Not directly stated but implied: SCIV figured out that GSIV went to Eastern Sea to refine luck dao marks(cause she knew he knew that FY was weak at the moment) but also he did it in Icy Sea area which is the western most part of eastern sea closest to Central Continent where SCIV was located, thus GSIV is also threatening the Central Continent. Additionally, SCIV deduced that GSIV is not ready to take on a fight showing that his battle strength hasn't risen by that much

SCIV deciding to contact FY via Yellow Treasure Heaven to request refining gu for her→flying to northern plains to show her sincerity to FY→this was to refine northern plain's wisdom dao marks(as GSIV wasn't present at the time)

Understanding that she couldn't attack Longevity Court because it was hard to locate it (Grotto Heavens are condensed to a point), hard to break in, and it would take too long to destroy causing GSIV to come and defend his homeland ultimately benefitting FY

Being aware that SCIV had to be mutually wary to FY and GSIV as she didn't want either person to get more advantage→thus SCIV had to be aware of both people's development speed and if she didn't consider her actions rationally, it could mean that she pretty much was courting death→knowing that if SCIV attack with just the right intensity that she would be able to get an advantage over the stalemate between venerables→most cases SCIV would not attack but react to the actions of others

Understanding that FY's situation wasn't good as he was maintaining Heaven Form while expending immortal essence, and his problems with Heaven Form would only increase by then→additionally she was seeking benefits from FY(refining immortal gu) and showing her sincerity by again benefitting herself (going to Northern Plains to weaken GSIV and refining wisdom path dao marks)

Refining Heaven treasure lotus gu mini arc chapter 2231→

SCIV noticing that the heaven vein nodes were fusing to the two heavens at its peak decided to let out SSDV from the door between life and death and follow her to the two heavens to confront FY as SSDV swallowed the immemorial black heavenly spirit→thus he could sense the other heavenly spirit within heaven form (cause apparently black and white heavenly spirit can sense each other. Edit: because both heavens are fusing black and white heavenly spirit are also fusing thus they can sense each other)

SCIV realized that FY used a battlefield killer move to conceal himself and decided to team up with GSIV to kill SSDV as if SSDV regained his sanity then there would be another chess player on the board but also she contacted FY as well

SCIV quick decision of blocking the killer move FY released which would've pierced through the heavenly qi wall and attacked Central Continent

SCIV asking GSIV to cooperate and fight FY as he was the weakest among all three. But then wisely retreated as there was no point in fighting FY or SSDV

Deciding to refine HC's wisdom dao marks as FY hid in the battlefield killer move

Xing Su observing that FY was trying to refine dao marks (assessing that FY has the least immortal essence but the highest efficiency in refining dao)

Being cautious after inspecting the gu FY gave to her but ultimately understanding that she needed to change her combat system and killer moves to stand a chance against FY and the wisdom path gu that FY gave her was crucial

FY refining dao/venerables race for dao marks mini arc chapter 2238→

Inside the sovereign aperture mini arc chapter 2243→

Wise decision back then to contribute her immortal aperture to HC as now that HC has developed for a long time, SCIV has abundant of access to wisdom path dao marks

Understanding that she would need to refine all the wisdom path dao marks to then be able to conceal information about HC from GSIV and then break truthful floating ice and retrieve derivation gu

Attack on Wan Clan mini arc chapter 2247→

SCIV realized that Fang Yuan might've fueled the situation in Western Desert with the conflict between Wan clan and Fang Clan, noticing that Fang Clan's strength rose sharply indicating FY's involvement→SCIV realized that FY's true motive was to use Fang Clan as an example to the other forces in the world because by Fy distributing immortal gu, he could make any force's strength rise greatly, destroying the power balance between the various forces→realizing that Fang Clan joined the great love alliance

Understanding that HC needed to intervene against Fang Clan to prevent more super forces joining the great love alliance and uphold the righteousness of Western Desert

Understanding that if FY had more influence over the five regions, specifically western desert and southern border, then he could use them as cannon fodder against central continent meaning that SCIV would have to intervene giving them advantage to FY

Counter attack of Wan Clan mini arc chapter 2253→

(indirect feat) HC decided to send Wan Gu Chou(revived by HC and killer move sorrow eye modified by SCIV) to be stationed, strongest rank 8 of Wan clan but supposedly dead, to stabilize the situation between Fang Clan→then used Wan Gu Chou as a pawn for SCIV to lead a western desert alliance (Wan Gu Chou forced the other forces within anti-fang alliance to submit to HC under the name of righteousness;additionally, by showing that Wan Gu Chou revived under HC this gave superforces the option to not join great love alliance and get immortal essence, lent immortal gu, and a chance for revival under HC)

Statement/ambiguous feat but SCIV observed the whole heaven court with one glance

Fusion of the two heavens/Situation with Hua Yi mini arc chapter 2266→

Recalling of information about Immortal Hua Yi(profound literature grotto heaven owner) to conclude that SCIV could make Hua Yi betray the great love alliance

Understanding why Hua Yi had a deep attachment to his grotto-heaven→this was shown by Hua Yi not disrupting Jun Shen Guang when he was transporting the heaven veil, which would be considered a huge merit within the love alliance, putting his grotto heaven above the love alliance

Understanding why Fang Yuan didn't annex some of the grotto heaven because his sovereign aperture was unstable (not directly stated but implied)

Deducing that FY was making earth veins within his immortal aperture

When FY took in six mermaid gu immortals, SCIV realized that FY lacked manpower

Realized that the best moment to convince Hua Yi to switch sides was right at this moment because he hasn't reported the matter to the great love alliance

Being able to understand why Wan clan didn't join FY

Understanding that if HC (so indirectly, SCIV) supported Fang Clan then it would raise the legitimacy of Great Love alliance as Fang clan was directly associated with FY→understanding that right now the righteous path had the upper hand but if Fang Clan were to liquidize their property to FY that could change thus she chose people to Zhou Xiong Xin, who cultivated information path, to survey/look for clues of FY's action

Understanding that SSDV was also a great threat at the present moment, aimlessly attacked HC gu immortals from collecting stars and if he gained his sanity…,(idk this was in chapter 2265/2266) so SCIV decided to track down Fairy Zi Wei

Predicting that Fang Clan would've sold all their resources/relocated their blessed land to FY thus sending an information gu immortal

Idk if this was SCIV's tactic or not but by selling Fang Clan gu masters as slaves it gave the impression if you joined Fang Yuan, you would be classified as demonic and have your gu masters sold as slaves→making joining FY more unfavorable

(Assumption feat) Prediction Maybe SCIV predicted that Qin Ding Ling would use a luck path method to influence Flickering Light Grotto Heaven (which she predicted that Qin Ding Ling would try to influence Hua Yi but then have to move to Flickering light Grotto Heaven) and also predicted that SSDV would target Flickering Light Grotto Heaven after HC gu immortals defended Fairy Zi Wei, using SSDV to convince Flickering Light Grotto Heaven to join HC leading Hua Yi to join HC thats why she sent all those HC gu immortals to do those specific tasks. Additionally, this event with Flickering Light Grotto Heaven would ruin FY's prestige by a lot

SCIV deduced SSDV's movements about destroying Heaven pillars, heaven veins, and heaven nodes as they held up immemorial white heaven thus she might've coordinated a scheme to get Flickering Light Grotto Heaven to join HC because of that

Probably predicted that through gaining Flickering Light Grotto Heaven's support, HC could gain all the human grotto heaven support in the two heavens

Idk if chapter 2274 in the beginning is a feat with the formation of derivation gu and a formation to amplify heavenly courts offenses as well as speed up human path development

Deciding not to attack Fang Clan as the more Fang Clan attacked, the more clues SCIV would gain from it→deciding to conserve HC troops, as well as using the ten sects to help with the star formation array calculation formation (idk what that is, it could be the derivation gu formation, chapter 2274), instead of sending it over to deal with Wu Yong, as he wasn't pseudo venerable yet

(more statement feat) Deducing that there would be a huge change in the future (also commenting that SSDV's actions were dictated by Heavenly Dao)

EP SCIV sensed the emotions of the lords of human grotto heavens that defected from FY, some were feeling angry about their predicament

Preparations of refining rank 9 heaven secret mini arc chapter 2275→

Understanding that pretty much no one from FY's alliance was loyal to it, for ex. Human grotto heavens defected immediately or eastern sea forces submitted because he was the venerable in their territory

Understanding that FY contacting her was a threat towards her, probably because she was at a vulnerable moment in setting up her formation and didn't want any interference with other venerables(idk why 2277)

(Stated from FY's perspective) SCIV gave Primordial Domain to FY as she didn't know that FY could retrieve Primordial Domain but thought that Primordial Domain wouldn't help FY during the time she made her superformation

Being able to create starry array formation as it was the most amount of strength that SCIV could make without giving the concern of the other two venerables (meaning in exchange for personal benefits, the other two venerables wouldn't attack it)

SSDV destroys the sun/Wild Rank 9 gu mini arc chapter 2277→

Critical thinking with questioning that You Tian Guang, the immemorial beast inside the sun with rank 9 gu in it who was initially thought as dead, actually faked its death in front of PEIV or if it was part of PEIV's arrangement→realizing that this was extremely likely to be PEIV's move as he was cultivating Heaven Path and the Sun was a Heaven Node (this was wrong however, for some r

EM for smiling at FY while snorting coldly inside

EP Detected the emotions of You Tian Guang and realizing that You Tian Guang was not lying when he said that he didn't like PEIV

Using the fact that Light Gu, the rank 9 immortal gu, was still wild and not part of You Tian Guang to target You Tian Guang with starlight specks to suppress both Light gu and YTG

Identifying that Light Emperor was an acquaintance of GSIV based on the luck path dao marks he had

Being able to recognize Light Emperor

SCIV made plans long before because she predicted that with SSDV's state of mind, he would destroy the sun, causing all the five regions to go dark, thus she came up with this starry array formation to illuminate Central Continent→however the main purpose of the formation were to gain information and to mobilize Central Continent forces

SCIV multitasking by healing herself from the battle over rank 9 gu, refining Central Continent dao marks, handling affairs of HC, and controlling the starry array formation
Massive FSIQ/CPI feat with SCIV being able to process all the information from Central Continent using the starry array formation including the structure of places, gu immortals and their locations and conditions, arrangements of different forces, etc.

EP/EU Being able to sense the emotions of Central Continent using the formation with the ten great sects having higher morale, understanding that they have already seen the situation in the other regions→understanding that the formation path was still in its initial phases, however, understanding that the formation was the bottom line of the venerables (meaning that if SCIV developed more, she would be attacked by the other venerables)

Decided to let some of the ten great sects conceal information as if she did not, then she would lose support of the people overall

SSDV/FJG Situation mini arc chapter 2285→

Able to deduce that FJG's destiny song contained both profundity of uncertainty and certainty

SCIV made arrangement for the ten children to delete their memories(to prevent derivation formation from being found out) of them obtaining their respective gu recipes from the derivation formation and then meticulously altered them so they would gain bursts of inspiration to "create" the gu recipes for themselves (probably for them to develop even more in human path to promote creative thinking in that path) →for everyone who touches derivation formation, SCIV deleted their memories

Immortal Ascension/recuperation mini arc chapter 2288→

SCIV knew the downsides of having derivation gu in heavenly court as Heaven Will was infused in it due to HC taking in fragments of the nine heavens thus Heaven Will can see derivation gu formation, however SCIV didn't mind as Heaven Will didn't favor any of the venerables at all (two of them revived which Heaven Will didn't like and there is FY…)

Manipulating emotions using Mental Domain, secluded domain of heaven and earth which SCIV used during the fight of Crazed Demon Cave the one which could inflict bad emotions on people and was called mysterious, to drain negative emotions in central continent's ten great sects and replace them with positive ones

By having Star array collect information, it allowed the gu immortals from the ten great sects to undergo transactions more optimally because star array formation could use the information sent by the gu immortals to see what the gu immortal wanted→this in turn had smaller sects wanting to contribute their own information to SCIV and star array formation

Sovereign Immortal Fetus/Heaven Path Dream Realms Appear gets hungry mini arc chapter 2300→

Figuring out that it was Heaven Path dream realms that were floating in the sky, which was the ploy of Heaven Will and that if SCIV could capture Ying Wu Xie, it would be valuable against SSDV

Had a backup plan which was to have Fairy Maiden Soul to nourish/nurture/manipulate Bo Qing's soul→because he was a SSDV clone, however this was difficult because sword path wasn't common and she needed a high cultivated gu immortal as the body (decided to go with rank 8 first supreme elder of Lin Clan)

SCIV thought that these heaven path dream realms are natural things of the world such as beasts and plants

It was risky to send herself to spectral heaven as she would be barging into SSDV's territories, provoking him

Info Gathering with SCIV knowing that both Genesis Lotus and Primordial Origin venerable had revive methods within Central Continent, however she couldn't probe for them as the other venerables were watching

SCIV modifying the battlefield formation Rumor Cage to counter all the escape methods of Liu Clans first supreme elder

SCIV deduced that Lin Jian Xing was an otherworldly demon

(not stated but implied) SCIV ordered the HC gu immortals to attack in the style of Fang Clan to confuse the anti fang clan before they pursued lin clan's first supreme elder

SCIV intuition realizing that SCIV needed to take action and fight against FY

Finding out FY's intentions of going to Spectral Heaven to retrieve Heaven dream realms

Venerables Fight again mini arc chapter 2207→

Using two moves to have each one compliment each other in defending to create a battlefield killer move to trap FY

SCIV countered the five restriction qi by sending out star beasts with apertures and human like intelligence out as they weren't affected by the five region qi and she nurtured quite a lot of them to counter FY's killer move

When the immemorial desolate beasts were weakened SCIV used star path killer moves to heal it up and when the immemorial desolate beasts died, they would turn into star path dao marks which would help other immemorial desolate beasts as well as contribute to star path killer moves

SCIV switching tactics by taking Mental Domain to attack FY's emotions

SCIV decided to retreat when she encountered FY's compound killer move Departure of Year Wave Dream and Dang Hun Sound

SCIV decided to use her Mental Domain as it was the only thing that could compete with the Dang Hun killer move but it was able to bypass most of FY's defenses(mainly reverse river flow veil) as well as take emotions and wisdom path dao marks away from FY, basically countering Reverse River Flow killer moves

Aware that FY didn't mind losing the battle as long as he got the heaven dream realms he would be fine

SCIV used a method chaotic intent dispels dreams to counter FY's dream path killer move, however she used it on the dream realm Meng Qiu Zhen(FY's dream path clone) was in

SCIV observed the heaven dream realm and realized that MQZ was still alive when the dream realm turned back to its original size→however didn't attack because of her lack of attainment in dream path

SCIV gave benefits to GSIV to have him continue attacking FY

SCIV lured SSDV to the dream realms, however SSDV did nothing to them

SCIV was able to adapt to the situation with all three venerables chaotically fighting and gained the advantage

As SCIV saw that she couldn't do anything to the situation as FY was using SSDV to attack both venerables, SCIV decided to use GSIV as a shield

SCIV didn't go back to reinforce star array formation because she knew she would fall for FY's trap by doing so→thinking that it was possible for FY to keep on attacking SCIV if she went back to Central Continent to divert attention from Meng Qiu Zhen in the heaven path dream realm

SCIV decided to take the brunt of SSDV to let GSIV target FY

EU SCIV trusted GSIV's words after his killer move attacked Central Continent because GSIV was a man who loved his family and obviously had some morales, other than FY
Personally paying Lin Jian Xing to have Nine Spirit Fairy released (she must be important later on or out of the kindness of her heart idk)

EP with SCIV sensing the emotions of GSIV as he turned worried for his son which had just been kidnapped by You Tian Gu, who escaped Longevity Heaven

In response to FY's clone rampaging Central Continent, SCIV used hero among people and hope among people to amplify Central Continents power

SSDV decided to team up with GSIV to attack SSDV as that was the unknown variable that really benefitted FY

SCIV realized that FY would never try to save SSDV due to his nature

Attack on Central Continent mini arc chapter 2320→

Understanding FY's scheme of going to Central Continent and putting MQZ into his immortal aperture, however she had to fall into FY's trap

SCIV used a counter measure to trap QSA by using Star Chessboard to drag him into HC, which the entrance into HC was open for a prepared, set amount of time

Reviving Primordial Origin Venerable mini arc chapter 3224→

It was explained that SCIV knew/deduced that Lin Jiang Xiang already knew that he was a pseudo venerable and an otherworldly demon long time ago, but decided to hide it in secret before she sent the HC members to fight him as it was all "part of her plan" →she sent the HC members to fight him, the goal was to use phantom methods to capture the power of his sword path moves, when LJX used his killer moves it inflicted dao marks on the phantom apertures of

the HC immortals, and basically SCIV wanted to contain these dao marks to replicate LJX's killer move in the future→which was used on QSA who lost his footing and was taken by Star Chessboard. SCIV decided to keep it a secret from the HC gu immortals because that would inflict their emotions when fighting LJX→LJX's killer move had sword dao marks as well as qi dao marks thus being able to target QSA

Using Mental Domain to attack FY as he was focused on killing his own clone

Concealing the fact that she had methods to counter FY's compound killer moves but decided to not use them. For ex. She used Mental Domain to take down Arrival Dragon Snake with Dust Fog and Explosive Soul Wind

SCIV expected FY to attack fiercely when she trapped QSA

SCIV's goal was to revive a venerable→this SCIV trapped QSA so that she could turn him back into a Qi Harvest Fruit and revive Primordial Origin Immortal Venerable

SCIV created the Star Array formation to quicken the cultivation of Central Continent but also to lure QSA in coming and destroying it→after seeing the Heaven Path Dream Realms, SCIV knew that FY would come to absorb it, so she used them as bait as she couldn't do anything to the Dream Realms→understanding since FY moved so quickly to gain these dream realms, he already had sufficient strength to fight SCIV, even guessing that FY had attained Wisdom Gu again

SCIV anticipated that FY would use Central Continent as his hostage to trade for QSA

SCIV planned in advance that FY would likely try and capture Central Continent thus moving the ten great sects' blessed lands into HC in advance

SCIV anticipated that QSA would attack the star array formation while FY went to the dream realms

AQ For the greater benefit of changing the situation in Central Continent, SCIV decided to stay and revive Primordial Origin and let countless lives be submitted to FY→she told this to QSA because she wanted to gain the sympathy of the ten great sects on why she was abandoning Central Continent (she even said that she was a great sinner that would repay the Central Continent back with all her power)

SCIV was prepared since Crazed Demon Cave to revive Genesis Lotus and Primordial Origin by creating Primordial Domain of Wood path and Qi Path so that if either venerable revived they would be close to Supreme Grandmaster in their respective paths

Infallible blessed land was destroyed in advance by HC (Could be SCIV ordered that to prevent FY from taking it)

It was revealed that during Crazed Demon Cave, SCIV held back when she was about to kill QSA

SCIV realized that since GSIV went back to longevity heaven, Giant Golden Hooped Immortal's plan of recruiting GSIV as their HC king affected GSIV's deposition on HC→She understood GSIV's nature of being inherently Righteous

SCIV quickly suppressed QSA's immortal gu to prevent them from being exploded→being vigilant to inspect the immortal gu to see if they weren't tampered by FY→using an immortal formation to suppress all these immortal gu and secluded domain of heaven and earth because she wasn't sure of FY's refinement methods and how it could effect these gu→if FY were to do such a thing then SCIV would be immediately detected by the formation and be able to stop it

Because refinement path was well known, SCIV had some confidence in understanding FY's method thus she wasn't that concerned that FY tampered with the immortal gu aka making fake immortal gu instead of the real deal(it was better to check however)

After taking out QSA's soul, SCIV inspected the qi currents that made the qi harvest fruit and didn't find any problem

SCIV noticed that the Qi Harvest Fruit was slowing down in growth so she immediately started to become cautious for anything wrong, however she didn't use a powerful investigative killer move in fear that it would hinder the process of POIV's revival→easily understood why this happened, as POIV wanted to use qi path methods within HC to fuel the growth of his Qi Harvest Fruit however since these qi methods were expended during previous battles the growth of the Qi Harvest Fruit declined without its fuel→she decided to compliment this by having a qi path formation be activated refueling the growth of the fruit→however HC's reserves fell drastically and weren't able to suit the expenditure of the fruit→quick thinking/deduction when she decided to open HC's entrance and let heaven and earth qi rush into HC refueling the slowed down Qi Harvest Fruit

EU SCIV knew POIV pretty well knowing that POIV would not admit that he was too old (I mean she had been his disciple)

HC was exploded mini arc chapter 2328→

When the Qi Harvest Fruit exploded, quick thinking with SCIV to block a majority of the explosion using star path methods→SCIV then pushed the remaining Qi currents into Qi Harvest Fruit revitalizing it for some period giving the HC gu immortals hope of reviving POIV→ multitasking/decision making when she activated those killer moves to protect herself and HC she also used a killer move to suppress Qi Harvest Fruit from destroying completely→Using a star fog to counter SSDV's soul fog and then using Illusions to hide her main body while SSDV smashed the illusion

Huge battle in HC final mini arc chapter 2333→

SCIV determined that FY was the most suspicious in turns of the Qi Harvest Fruit explosion→realizing that FY used refinement methods to tamper with QSA

SCIV staying calmed and composed while fighting three venerables/Mental fortitude for persisting even though most of HC was blown up

Fang Yuan Vs Xing Su (narratively+statements) imo

FSIQ: Xing Su

FSEQ: Xing Su

FSSQ: Fang Yuan (debatable)

FSAQ: Fang Yuan (IMO, it would go to Xing Su if controlling Heaven's Will was mentally demanding in any case)

Intelligence: Xing Su

Thinking: Xing Su

Logical Reasoning: Xing Su

Manipulation: Xing Su (debatable)

Deception: Fang Yuan

Strategy: Fang Yuan

Planning: Xing Su

Psychology: Fang Yuan

Foresight: Xing Su

Field Skills: Fang Yuan

Tactics and Methods: Fang Yuan

Insight: Xing Su

Counteraction: Fang Yuan

Miscellaneous: Xing Su

Xing Su Wins IMO

Proven ability, Fang Yuan wins by a long shot
