Analysis of Reichenbach Fall Plan - Page 67

Season 1,Episode 1

Introduction of episode

The series begins with a man named John Watson, who, after serving in Afghanistan, came to London looking for an apartment, while walking through the park, John meets an old friend named Mike, with whom he trained as a military doctor, John says that he is looking for an apartment in London, Mike says laughing that John is already the second person in a day who needs an apartment, John asks, who was the first?

Next, Mike takes John to St. Bartholomew's Hospital, to the premises of the chemical laboratory. Mike and John studied at this place. Mike introduces John to a man named Sherlock Holmes.

Sherlock's conclusions about Watson: 1) Tanned face and hands, Watson was abroad but did not sunbathe. Upon entering, Watson was limping heavily, but Watson stood as if he had forgotten about his leg = psychosomatic pain = the circumstance of the injury is traumatic, that is, the wound was received in battle.

Combat wound - Afghanistan or Iraq. Sherlock received a clue in the form of Watson's words "Everything has changed here", which means Watson was trained in the hospital where the laboratory is located = Watson was trained as a Doctor, Watson also has the haircut and bearing of a military man, which means a military doctor.

I concluded that Watson is looking for an apartment (How Sherlock came to this conclusion: Sherlock told Mike that he was now looking for housing, Mike returns after a while with a man who fought in Afghanistan, that's the conclusion).

Sherlock asks for Watson's phone, since Sherlock has no connection. Sherlock: Watson has a phone with Internet access and a player, and Watson can't handle an apartment alone, which means the phone is a gift, there are a lot of scratches on the phone, which means the phone was in his pocket with keys and change, but Watson is not the one who would treat a luxury item like that, Turns out it's the previous owner.

There was an engraving on the phone: "For Harry Watson from Clara." The telephone is a youth thing, we don't take our father, perhaps a cousin - but Watson is a war hero who has nowhere to live, Watson hardly has a large family, that means only relatives - that means the telephone belongs to his Brother.

But who is this - Clara? The Engraving says "Kisses" - Romantic feelings, the phone is an expensive thing, unlikely to be from a girlfriend, the conclusion is that the phone is from the Spouse.
The phone is new, the model is only six months old = The marriage is in danger, six months and everything has collapsed, if she left him, he would have left the phone, but he got rid of the phone, Brother wants to keep in touch.

But why didn't Watson turn to his brother for help? -> There are a lot of scratches near the phone charging connector, which means Brother Watson has trembling hands = Brother is an alcoholic, because of this Watson did not ask him for help

(Detective skills:Observation, Pattern Recognition, Cold Reading

Analysis:Data analysis Reasoning:Induction,Abducton
Thinking:Analytical Thinking, Linear Thinking, Concrete Thinking, Abstract Thinking, Holistic Thinking
EQ:EQP, EQU)

Sherlock and John agree to live together in an apartment on Baker Street; one of the London police officers (Greg) approaches Sherlock with a request for help in the case of 4 suicides

Watson learns from Sherlock that Sherlock works as a private detective consultant.

Sherlock was very happy when the case of 4 suicides gained momentum and the police began to turn to Sherlock, Sherlock likes to reason and solve puzzles related to

murders.(EQ:EQE, Motivation)

Case: Study in Scarlet

Sherlock and Watson arrive at the crime scene. .

Sherlock was able to determine by the smell that Sergeant Donovan's and Sergeant Anderson's deodorant were identical = Donovan spent the night at Anderson's, and concluded that Anderson's wife had left for some time, Sherlock also joked about Sergeant Anderson and Sergeant Donovan, saying that it looked like Sergeant Donovan was scrubbing the floors all night, judging by the state of her knees (hints at physical intimacy)

(Detective skills:Observation, Cold Reading, Perception

Reasoning:Induction
Eq:EQU
Thinking: Analytical Thinking, Linear Thinking)

.

Sherlock and Watson enter the building in which a woman (name: Jennifer) was killed. Jennifer was dressed in pink, and the German word Rache was scratched on the floor with her nails

.

Sherlock translated the German word Rache (revenge)

Conclusions about the dead woman in pink:

1) Based on the condition of the ring, I determined that the marriage lasted more than 10 years and the woman's marriage was unhappy.

2) A woman over 30 years old, has a profession, judging by the clothes in the media, arrived today from Cardiff (Sherlock understood where the woman was going from the condition of the coat, its dryness and humidity. And by the unused umbrella) for one night, which clearly makes it clear her size

suitcase (a suitcase that was not at the crime scene, but Sherlock still assumed that

the woman took the suitcase with her). 3) All the woman's jewelry was regularly cleaned except for the wedding ring, the conclusion is that the Woman cheated regularly, but she could not hide the marriage from one lover for a long time, the conclusion is that there were quite a lot of lovers

Sherlock's entire Analysis lasted about two minutes. Further, Sherlock concludes that all 4 deaths are connected, and they definitely were not

suicides, the dead people are victims of a serial killer

(Detective skills:Observation, Cold Reading, Connecting the dots Analysis:Data analysis

Reasoning:Induction

FSIQ:VCI,PSI
EQ:EQP
Thinking: Analytical Thinking, Convergent Thinking, Non-Linear Thinking, Concrete Thinking, Abstract Thinking, Holistic)

.

Sherlock in a house on Baker Street thinks about the woman's suitcase, he calls it a mistake that the killer took the woman's suitcase. Sherlock asks Watson to write an email to the phone number that Sherlock left on the table.

It turns out that the message will be addressed to Jennifer Wilson. Sherlock asks Watson to write messages to Jennifer's number, this is what Sherlock dictates: "What happened in Lauriston Gardane? Apparently I fainted, please come to Northumberland St. 22" (Sherlock suggested that Jennifer either planted the phone with the killer or the Killer took the phone himself victims)

Sherlock's strategy is aimed at instilling fear in the killer, the fear that Jennifer was not really dead - But how could Sherlock know that the Killer would fall into a trap?

1 Sherlock, observing, probably realized that the woman died without signs of a struggle, that is, the woman had no bruises or similar manifestations by which one can understand that there was physical contact with the victim, that is, a fight. The absence of signs of a struggle was also indicated by the inscription that the woman scratched on the floor, if the killer had gotten into a fight with a woman, it is unlikely that she would have had time to scratch something on the floor (and given that the victim was not shot, this only reinforces the guess that the killer did not make physical contact with the victim)

2 If the victim died without signs of a struggle and without direct physical contact, One of the options is that the killer committed the murder using poison, in which case the victim could really survive, at least according to Sherlock's plan, the killer should have thought about this - the killer should I thought that Jennifer might not have died. That's why

Sherlock's plan to lure out the killer is very effective, based on reasoning from above

3 Sherlock presumably knew that the killer would fall into Sherlock's trap because if Jennifer had actually survived, the killer would have wanted to get rid of her as quickly as possible

(EQU, Social awareness,Observation, Perception, Pattern recognition, Concrete Thinking, Abstract Thinking, Linear thinking, Induction, AbductionFabrication, Indirect Manipulation, Emotional manipulation, Individual manipulation, Setting trapsPlanning preparations, strategy efficiency/foresight/deception)

Next, Sherlock takes out Jennifer's pink suitcase, Sherlock explains how he found it: The killer brought a woman to Lauriston Gardens and accidentally left her pink suitcase in the car, anyone with such a suitcase would attract attention, especially a man, the killer wanted to get rid of the suitcase as soon as he was discovered, presumably the man found the suitcase 5 minutes after Jennifer disembarked. Sherlock looked at all the streets 5 minutes from Lauriston Gardens, and found the suitcase in the right trash heap in less than an hour.

Sherlock notices that neither dead Jennifer nor the woman had the woman's phone in her suitcase. Sherl says that Jenny had a lot of lovers, she was careful and did not leave her phone at home. Sherlock concludes that the killer currently has the phone.

(Detective skills:Pattern Recognition, Connecting the dots, Observation

Analysis:Data analysis, Social analysis
Reasoning:Abduction
Thinking: Analytical,Abstract,Holistic EQ:EQU
Deception:Setting Traps Manipulation:
Indirect,Emotional SQ:Social intuition, Social
awareness)

.

After Sherlock sent a message to the killer on behalf of Jennifer, he and Watson go to a cafe on Northumberland St. 22, waiting

killer.(Foresight:anticipation)

.

Sherlock notices that all the victims of these murders literally disappeared into the crowd. Sherlock asks himself the question: “Who is trusted when a stranger, Who remains unnoticed wherever he goes, Who hunts in the thick of the crowd?”

.

Sherlock notices that a taxi has stopped near the house on Northumberland St. 22, Sherlock and Watson run out of the cafe, they are noticed by a passenger in the back seat and the taxi begins to move forward.

Sherlock begins to visualize and predict the movement of the car, taking into account all the traffic lights, crossings and road signs he remembers in this block.

Sherlock’s visualization of the Taxi path: “To the right, only straight ahead, traffic light, bus, crossing, only to the left, traffic light” (Visualization of the Taxi path was carried out 8 seconds after the start of the taxi path)

Sherlock calculates in his head the shortest route to catch up with the Taxi. And

Sherlock and Watson, thanks to Sherlock’s calculations, were able to beat the taxi by a couple of seconds.

Taxi path visualization:

Sherlock's visualization of the shortest route for him and Watson, taking into account the taxi route:

.

Sherlock catches up and opens the passenger door of the Taxi, realizing that the passenger is not the man who killed Jennifer. The Passenger had a ticket from the airport, the passenger had just arrived from Los Angeles.

.

Sherlock and John return to Baker Street, Greg meets them at the house, Greg says that they discovered Jennifer's only daughter, whose name was Rachel, Rachel died at birth 14 years ago. Sherlock tries to find a connection, why was Jenny scratching her daughter's name on the floor? Jennifer was in pain, she was dying, and it took effort to scratch the inscription on the floor.

Sherlock says that Jennifer, running around with lovers, was smart, she was trying to say something. Mrs. Hudson (the owner of the house that Sherlock and John rented)

comes into the room and says that a taxi is waiting for Sherlock - But Sherlock doesn't pay attention

Sherlock further suggests that Jennifer deliberately planted the phone on the killer, knowing that she was heading towards her death.

Sherlock says Rachel is not a name. Jennifer had a tag on her suitcase with

Jennifer's email, Rachel is the password for Jennifer's email, Sherlock says that the smartphone has GPS, which means if you lose it you can find the smartphone online.

Mrs. Hudson reminds Sherlock about the taxi again.

John uses his laptop to find the location of the smartphone - it turns out that the smartphone is at 221 Baker Street, that is, right now the phone is here.

Sherlock doesn't understand how a smartphone can be in their house.

(Detective skills:Pattern recognition, Connecting the dots, Guesswork
Analysis:Data analysis
Reasoning:Induction

.

Sherlock again asks himself questions: "Who is trusted when a stranger is unknown, Who remains unnoticed wherever he goes, Who hunts in the thick of the crowd?"

Sherlock receives a message on his phone: "Come with me." Sherlock tells John that he is going for a walk. Sherlock leaves the house and meets a man, the man says that the taxi for Sherlock Holmes is ready. Sherlock says: "You are the driver who stopped at Northumberland St, you are the killer - not your passenger."

The driver says; "If you call the police, I won't run away, I'll get into the car and they can arrest me, but if you call the police, you won't know how the victims died."

Sherlock gets into the Taxi. The Chauffeur says that he recognized Sherlock when Sher was chasing the Taxi, the Chauffeur was warned about Sherlock, the Chauffeur also says that he went to Sherlock's website. Sherlock asks who warned the driver about Sherlock? The driver answers: "The one who noticed you."

They arrive at their destination, and They go to the empty college building they

arrived at. John's laptop again picks up the GPS signal from Jennifer's smartphone. Sherlock and the driver sit at the table opposite each other

friend, the Driver takes out 2 tablets and says that a Sherlock admirer told about Sherlock's website, the Driver says: "You are brilliant, you are an unsurpassed genius, the Theory of Deduction is true thinking." The Driver says that one tablet is good, the other is bad, no matter what Sherlock I didn't choose the capsule, the Driver chooses the remaining one.

.

Sherlock analyzes the driver: "You have shaving foam behind your left ear, but no one said, you live alone. In the car there is a photograph of children without a mother, because you tore off part of the photograph with their mother, the picture is old but the frame is new, you are thinking about the children , but you are not allowed to see them, the mother took the children, but you love them, you are still in pain. The jacket has been recently washed, but all your clothes are at least 3 years old, you maintain your appearance but don't make plans, and now, like the Kamikazes rushed to kill, you don't have long to live." The driver reports that he has an aneurysm in the brain. Sherlock says: "You killed not because you are in grief - grief is paralyzing. Love is a much more serious motivator; murders are connected with your children."

(Detective skills:Observation, Cold Reading, Perception
Reasoning:Induction, Abduction

)

John wants to find the place where Sherlock is, but he arrives at the building next door to the college where the Chauffeur and Sherlock were located, John sees Sherlock and the Chauffeur through the window, Sherlock is already preparing to take the pill, but John shoots in the Chauffeur's shoulder (Sherlock does not see the shooter)

Sherlock puts pressure on the Driver's wound and asks the name of the sponsor of the murders, the Driver answers - Moriarty.

The police and Greg arrived at the crime scene, Sherlock asks if the police have found the shooter, Greg replies that there is not a single lead, and Sherlock says: "The bullet was fired from a pistol, a fatal shot from such a weapon and from such a distance can only be made by a real fighter who his hands don't tremble, which means he's clearly accustomed to violence, he only shot when there was danger, which means he has strict moral principles (Then Sherlock concludes that the shot was committed by Watson, Then Sherlock tells Greg to forget everything Sherlock said) "

(Detective skills:Observation, Cold Reading

Analysis:Data analysis Reasoning:Induction

EQ/SQ:Social Awareness, EQP,EQU)

Next, an unknown man arrives at the crime scene to Sherlock and Watson, Sherlock says that this man is an older brother named Mycroft, who has influence in the British government.

Case: Study in Scarlet - Solved by Sherlock Holmes

Season 1,Episode 2

Introduction of episode

Sherlock reads Watson's mail, John is surprised that Sherlock is using John's computer, and says that there is actually a password set on the laptop. Sherlock says that he discovered the password from Watson's laptop in a minute. .

Case:The Blind Banker

Sherlock's former classmate Sebastian (now an employee of a large bank) asks him to come and help deal with a strange incident. Sherlock and John go to the bank and meet Sebastian.

Analysis of Sebastian by Sherlock: On Sebastian's watch the time is correct but the date is not, it is two days behind, he flew a day ahead twice but did not change the date, Sebastian has a "Breinling" watch, the watch came out in February, so Sherlock realized that the flights were twice in a month.

Thinking: Analytical Thinking, Critical Thinking, Linear thinking, Convergent thinking, Abstract thinking

)

Sebastian says that there was a break-in in the office of Sir William (the former president of the bank), someone entered the office and left a message in the form of graffiti on the portrait: A yellow line crossing out the eyes in the portrait and an unknown symbol next to it.

Sebastian shows the bank's plan and says that any opening of the door is recorded.

Sherlock examines the area and concludes: The graffiti is a message to the bank trader. Sherlock says that columns and screens located in the office will help identify the trader to whom the message is addressed; there are not many points from which the message can be seen, this significantly narrows the search; Sherlock learns that the message was written 26 minutes before midnight. Traders work around the clock, transactions with Hong Kong are

often done at night, the message was sent to someone who arrived at midnight. I came to the conclusion that the message was sent to a certain Edward Van Kun

)

Sherlock gets to Van Koon's apartment and discovers Van Koon's body in the bedroom, Sherlock assumes that Wang Koon was threatened, why use a graffiti code? After discovering Wang Kun's body, he concluded that he was left-handed (due to the location of household items), and Wang Kun had blood on his right temple, so Sherlock ruled out suicide because it would be difficult to shoot.

But the door was locked from the inside - how did the killer get in?

Sherlock learns that Van Kun studied at Oxford, and also that Edward lost five million and returned it a week later.

(Detective skills:Observation, Pattern recognition, Info gathering, guesswork

Analysis:Data analysis, Conceptual analysis Reasoning:Logical, Cause reasoning, Systematic reasoning
Thinking: Analytical Thinking, Critical Thinking, Linear thinking, Convergent thinking, Abstract thinking, Logical Thinking

FSIQ:FRI

Others:Intuition

)

Soon a similar murder of a journalist (name: Brian) occurs: Sherlock noted the similarities with the previous murder, being in Brian's House, he concluded that the criminal climbed the stairs and entered the house through the window, based on the fact that the doors were locked from the inside. Then he concluded that the killer got to Wang Kun through the balcony - and got into the bank through the Cornice

(Detective skills:Observation, Pattern recognition, guessworks Analysis:Data analysis, Conceptual analysis
Reasoning:Logical, Cause reasoning, Systematic reasoning, Analogical reasoning Thinking: Analytical Thinking, Critical Thinking, Linear thinking, Convergent thinking, Abstract thinking, Logical Thinking

)

Sherlock wanted to find out what connected the two victims, and found a book from the journalist from the West Kensington library, noting that the date on the stamp of his books coincides with the date of Brian's death. going to this

library, thanks to Watson, Sherlock discovered another similar sign on the shelf

Sherlock decided to meet Van Koon's Secretary at Van Koon's workplace, this is what Sherlock managed to find out: when he inspected Van Koon's workplace: Eddie left home on the day of his death in a taxi, for 18 pounds he would have gone to Vincent. Sherlock saw a ticket for metro bought in Piccadilly, left by metro because he was transporting something heavy, because it's inconvenient to carry things on an escalator, somewhere in the area of Piccadilly station, and then went to have a snack at the Piazzo Espresso Bar. (I made conclusions thanks to finding various receipts and cards on his table , that is, he restored the picture of Eddie's movement)

(Detective skills:Observation, Pattern recognition, info gathering Analysis:Data analysis
Reasoning:Logical, Cause reasoning, Systematic reasoning
Thinking: Analytical Thinking, Critical Thinking, Linear thinking, Convergent thinking, Abstract thinking, Logical Thinking

)

Sherlock goes to the Piazzo Espresso Bar and meets Watson, Watson finds out from Brian's diary that Brian was also here, Watson says that Brian and Wang Kun went to some Chinese shop.

John and Sherlock go to this shop and find another symbol on the mug.

Sherlock says that these symbols are the ancient “Hanzu” number system, and it is used by street vendors, the symbols are written in ancient Chinese, Sherlock learns that in Chinese the horizontal line is the number - 1.

(Detective skills:info gathering)

Sherlock asks the question, how could Wang Kun lose 5 million and get it back a week later? Watson suggests that Van Koon is a smuggler. Sherlock Analysis: “Van Koon is a businessman who often travels to Asia. Brian is a journalist who writes about China. Both smuggled goods and carried them to the store with cats.”

Watson asks why kill them if they are doing their job? Sherlock suggests that one of them might have stolen something. And John concludes that the killer, not knowing who exactly, decided to kill both.

(Detective skills:Pattern recognition, Guessworks, Connecting the dots

Analysis:Data analysis
Reasoning:Logical, Cause reasoning, Systematic reasoning

Thinking: Analytical Thinking, Critical Thinking, Linear thinking, Convergent thinking, Concrete thinking, Logical Thinking

)

Sherlock realizes that the burglar is still in the apartment, the burglar attacks Sherlock from behind, then the burglar strangles Sherlock, but then the Thief suddenly runs away, then Sherlock discovers a black flower in his pocket.

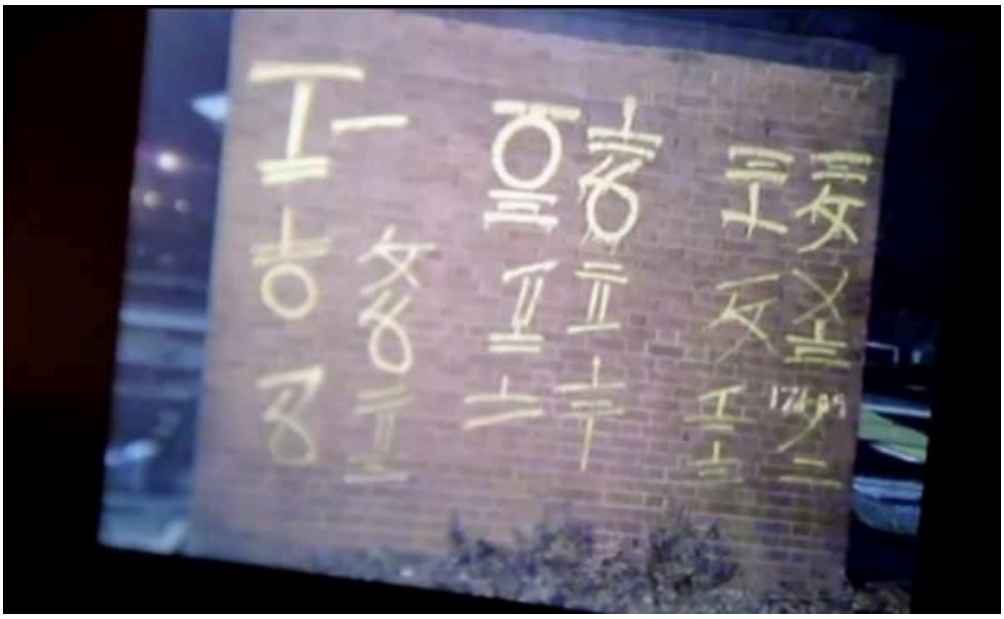

Sherlock goes outside and tells Watson that a certain Su Lin Yao left the apartment in a hurry for 3 days - she needs to be found.

Sherlock finds a letter for Su Lin from a certain Eddie: “Su Lin, please call me, from Eddie.” The letter was sent from the National Museum of Antiquities, John and Sherlock went there.

Eddie reports that Su Lin was last seen 3 days ago, Eddie was informed that she suddenly quit. Eddie says that Su Lin performed performances for tourists, tea ceremonies, Eddie takes Johnlock to where Su Lin left the devices after the performances, there they discover a new sign.

Johnlock went in search of new evidence. John, on one of the railways, discovers many symbols on the wall - similar to those they met earlier. John calls Sherlock to this place, but

the symbols are no longer there, they were painted over, but John filmed everything on his phone.

Sherlock deduces that someone does not want Sherlock to know about the symbols. Sherlock wonders why the code was written so close to the railway? And he concludes that the one who killed Brian and Van Kun wants to contact his people to return what was stolen by Van Kun or Brian

Sherlock translates the code from the wall into numbers, but realizes that without Su Lin the code cannot be solved.

(Detective skills:Guesswork, Pattern recognition Analysis:Data analysis
Reasoning:Logical, Cause reasoning, Systematic reasoning
Thinking: Analytical Thinking, Critical Thinking, Linear thinking, Convergent thinking, Abstract thinking

FSIQ:FRI

)

Sherlock returned to the museum and found out that Su Lin's job is to brew tea in special teapots to preserve the shape of the teapots: Thanks to observation, I realized that when he and John visited the museum last time, only one teapot was shining (tea was brewed in one teapot), today two are shining teapot. The conclusion is that Su Lin is still in contact with the museum, and will probably return to it again.

Su Lin returned to the museum at night, where Sherlock and John were waiting for her.

(Detective skills:Pattern recognition, Observation Analysis:Data analysis

Logical,Cause,Systematic
Thinking: Analytical Thinking, Critical Thinking, Linear thinking, Convergent thinking, Abstract thinking
)

From night to morning, Sherlock worked to try to decipher the messages in the smugglers' books, but he never found the right books.

Sherlock asks the question, what book can anyone own?

Sherlock invites John to go for a walk, John replies that he has a date (John got a job and met a girl named Sarah there), John says that he and Sarah are going to the cinema, but Sherlock gives John tickets to the Chinese show “Red Dragon”.

John and Sarah go to the show, and John meets Sherlock there. Sherlock meets Watson's girlfriend. Sherlock says he needs Watson's help.

John and Sarah are watching the show, and Sherlock goes backstage, Sherlock finds exactly the same paint that was used for the graffiti cipher, suddenly Sherlock is attacked by a man in a suit, they fall onto the stage, and John helps Sherlock.

John, Sherlock and Sarah go to Baker Street and Sarah finds out that Sherlock is a consulting detective, Sarah asks about the symbols, Sherlock replies that these are numbers in ancient Chinese.

Sarah says: “All the numbers are a code, and a couple of numbers are a word.” Sherlock asks Sarah how did she know? Sarah says that two words have already been deciphered, Sherlock realized that Su Lin had already started decoding, but he didn’t even notice. Su Lin deciphered the word: “Nine Million.” Sherlock goes to the museum where Su Lin worked, he realized that the book that will lead to solving the code should be on Su Lin's desk, suddenly Sherlock meets tourists with a guide to London, Sherlock remembers that he saw a guide to London

from both Van Kun and Brian ,Sherlock Realized that the books containing the message are a guide to London, Sherlock asks tourists for a guide, and begins to decipher the message that Sherlock managed to decipher: “Nine million, forward, for a jade hairpin, Dragon’s Lair, Tram.”

(Detective skills:Info gathering, Observation, Pattern recognition Analysis:Data analysis, Conceptual analysis Reasoning:Logical, Analogical
Thinking: Analytical Thinking, Critical Thinking, Linear thinking, Convergent thinking, Concrete thinking, Focused

Case:The Blind Banker - Solved by Sherlock Holmes

Season 1,Episode 3

Introduction of episode

Case: Big Game

Sherlock and Watson spend time in a house on Baker Street, Watson posted a blog about Sherlock called "A Study in Pink," Sherlock says that he did not really like the vlog, since Watson wrote that Sherlock sees through everyone, but is ignorant in some matters, for example, Sherlock does not know that the earth revolves around the sun, Sherlock says that he "Deletes" unnecessary and not applicable information for him.
Sherlock: "The brain is a hard drive, it makes sense to store what is useful there. People fill it with all sorts of rubbish, which makes it difficult to find what they need."

(Others:Memory organization

)

Case: Big Game

Then John goes to spend the night with Sarah, and a few minutes later an explosion occurs in Sherlock's house. In the morning, John turns on the TV and sees that there has been an explosion on Baker Street, John goes to his and Sherlock's house, there he discovers Mycroft and Sherlock, Mycroft discusses with Sherlock "a matter of national importance," but Sherlock refuses the case, saying that he doesn't have enough time.

Mycroft shows the case to John: "Andrew West, a civil servant, was found on the tracks this morning with a broken head. The Ministry of Self-Defense is working on a new anti-missile system, all the plans were transferred to a flash drive, the information was lost, West took the flash drive with him, and we cannot allow it fell into the wrong hands."

Next, Greg calls Sherlock, John and Sherlock go to Greg. Greg starts talking about the explosion that happened on Baker Street, says that the explosion is an imitation, and at the site of the explosion they find a message in an envelope addressed to Sherlock.

Sherlock realized that the envelope was made of Bohemian paper, the sender, and also realized that the woman was writing with an ink pen. After opening the envelope, Sherlock discovered a pink phone, very similar to the phone

from A Study in Pink, after which 5 beeps came from the phone, and then in the SMS Sherlock found some photo

)

I concluded that this was a warning, Sherlock's words: "The secret society sent out watermelon seeds, also in five pieces, as now - five beeps, we were notified that an explosion would happen again." Sherlock says that he saw a room in a photograph somewhere.

Johnlock and the police are on Baker Street, Sherlock leads to Mrs. Hudson's apartment, he points to the locked door, and then asks for the keys to the door, Sherlock concludes that the door has already been opened. They enter the door and discover exactly the same room as in the photo, there were unknown shoes in the room, and a call is heard on a pink phone.

(Detective skills:Pattern recognition

)

A very frightened and tear-stained female operator speaks into the phone: "Hello Handsome, I'm sending you a small puzzle as a greeting."

Sherlock: "Who's talking? Why are you crying? "

Operator: "I'm not crying, I'm writing, and this pathetic, stupid crybaby just reads out loud." 12 hours to solve my puzzle, keep in mind that I can very quickly and seriously lose my belt."

Sherlock goes to St. Bartholomew's Hospital (where Molly works), Sherlock conducts a shoe analysis: “He loved these sneakers, washed and changed the laces 4 times, traces of skin are visible on the laces, the owner had Eczema, the sneakers were worn inward, flat feet. The boy’s owner came to London 20 years ago and for some reason left them here. He loved them, he couldn’t leave them, something happened,”

)

Sherlock remembers a man named Karl-Powers, John asks who is this? And Sherlock replies that this is Sherlock's first case.
Sherlock: “20 years ago, Young Carl, here in London, during a swim in the swimming championship, drowned in the pool. It was an accident and no one had any doubts except me. He had an attack in the water, they didn’t have time to save him. All his clothes were in the closet, but his sneakers weren’t found there until that day.”

.

Sherlock conducted another chemical analysis of Sneakers through the machine, and discovered clostridium botulinum - one of the deadliest poisons on the planet

Sherlock: “The guy had eczema, there’s nothing easier than adding poison to his shoelaces, a few hours later he arrives in London - the poison begins to act, paralyzes the muscles, and Karl drowns. The poison is difficult to detect, and it never occurred to anyone “

Sherlock posts a post on his website saying that the Sneakers belonged to Karl Powers.

Suddenly the pink phone rings. Operator: “You are really strong, come to me and free me”

Sherlock asks the woman for her address and the police free her.

Greg reports about a woman hostage: “She lives in Cornwall, two people in masks broke into her, took her to a parking lot, and hung so many explosives that they could destroy her house.”

A message comes to the phone, this time there are 4 beeps, in the second message there was a photo again, the photo showed a car

Sherlock gets a call again, which the operator says: “I’m not offended that you went to the police, but don’t count on them too much, you’re smart and you were right about Karl, I always hated him, he laughed at me but I silenced him, this It's just your business and mine. Sherlock lives in this city, but don’t worry - I’ll fix it soon. You solved my last puzzle at 9 o’clock - now you have 8.”

The police find the car shown in the photo.

Greg: “Yesterday, a certain Ian Montfort, a bank employee, rented a car, paid in cash, said that he was going on a business trip, but did not return.”

.

Sherlock approached Ian's wife: "My name is Sherlock Holmes, I was your husband's friend, we grew up together."
Wife: "Excuse me, who? I don't remember him talking about you."
Sherlock: "I had to, definitely. I can't believe his death, I saw him the other day, just like he used to be - cheerful and carefree."
Wife: "Sorry - but my husband has been depressed for several months, who are you?"

Sherlock: "I rented a car, so strange." Why? In my opinion this is very suspicious"

Wife: "Not at all, he forgot to pay the tax, that's all." Sherlock:

"That's what Ian is all about - he's such a bungler."
Wife: "He wasn't like that"

Sherlock and John leave and Watson asks why Sherlock lied. Sherlock: "People don't like to tell, they like to contradict you, I spoke about her husband in the past tense - she too, albeit prematurely, even though the body was not found. "

.

Sherlock and John go to the owner (Mr. Ewert) of the rented center. : Sherlock assumed that the Director often goes on vacation, but the Director explained

that he just often visits the Solarium, Sherlock realized that the director was lying thanks to a trick with change (Sherlock, under the guise of wanting to take a pack of cigarettes from the store, asked the director to borrow change, thereby looking into the wallet where there was foreign currency)

Sherlock's general conclusions about Ian: Ian got into an unpleasant financial situation and did not see a way out, but since he disappears, and a Mazda in which blood is found on the road, then he is in Colombia. In Mr. Ewert's (director) wallet there are 20,000 Colombian Peso bills, when Sherlock asked about the Cars, he clearly saw the edge of the tan (who sits in the Solarium in a shirt?), he scratched his hand, it irritates or bleeds, he was recently vaccinated, probably against Hepatitis B, Conclusion he returned preparing Ian for a new life in Colombia

Ian's wife, having received insurance for Ian's life, gives a share to the director of the rented cent.

Sherlock publishes a post on his website entitled: “Congratulations to Ian on moving to Colombia.” The hostage is rescued.

John and Sherlock are sitting in a cafe, Sherlock receives a message again, the message included a photograph of the actress Mrs. Coney.

The bell rings, this time the operator is the grandmother, and she says: “This

one’s health is not good, I’m sorry, she doesn’t see, this is the next puzzle, I’ll give you 12 hours.”

Sherlock learns that Connie Prince died 2 days ago, she was found dead in the house where she lived with her brother. Sherlock goes to the morgue to analyze Connie's body.

.

Sherlock: “2 days ago, according to her servant Raoul, she injured her hand with a rusty nail in the garden, tetanus bacteria entered the bloodstream. “
Sherlock’s conclusions after examining Connie’s body: “John, with a deep cut on the arm there should be a lot of blood?”

John answers yes. Sherlock: “And her wound is clean, very clean. John, what is the incubation period for tetanus bacteria?”

John: “8-10 days”

Sherlock understands that the wound appeared after death, but how did the virus end up in the body of a dead woman?

(Detective skills:Observation

Johnlock arrives at Connie's house under the pretext of an interview.

John supported Connie's cat, sniffed his hands after her and smelled the smell of disinfectant, John concluded that his brother had caused an infection on the cat's claws.

.

Sherlock explains that this is too smart for her brother, John says that his brother wanted to get rich, Sherlock says that the killer wants revenge. Raoul, Connie's servant, needed revenge. Raoul was the target of her ridicule - she literally launched a campaign of persecution, in the end his patience ran out, Connie threatened to deprive him of his money, and Raoul was already accustomed to leading a large life. John asks about disinfectant on the cat's claws. Sherlock: “Raoul cleans the house every day, everything is polished and disinfected. The cat can be crossed out. We need to find Raoul’s online purchases.”

Sherlock goes to Greg, this is what Sherlock says: “Raoul De Santos is your killer, their servant in the house, a repeated autopsy showed that it was not a rusty nail that killed Connie, the lady was poisoned with Botulin, as in the first case with Karl Powers. Botox injections - Botox is a diluted form of Batulin, among other things, Raul De Santos had to give Connie regular injections, my man at the ministry found out that Raul was purchasing Botox via the Internet, for many months, Raul bided his time and administered a lethal dose. “

Sherlock again publishes an entry on the website with a solved case. The bell rings and the grandmother begins to describe someone: “He was so tall, as if...” And then there is an explosion.
Sherlock says that he killed the old woman because she began to describe him, only once he stood in the line of fire, usually he looks at everything from above, organizes everything but does not come into direct contact with anyone.

John: “Connie Prince was killed like he said?” People come to him for a

crime plan, like for a ticket to a travel agency?”

John also asks why the puzzle organizer is playing with Sherlock? Sherlock: “He probably wants to have fun.”

John: “I hope you will be happy together, you have people’s lives at stake, do you care about them in any way?”

Sherlock: "Worrying won't help anything, so I'll avoid that mistake."

.

Sherlock receives a message again with a photo:

Sherlock immediately determined the location from the photograph and went there with the police. The corpse of a man is discovered, Greg asks if Sherlock has any ideas, Sherlock replies that about 7 ideas (about 10 seconds after Sherlock saw the corpse) Sherlock asks if Greg has heard anything about the golem? Golem is a serial killer, real name Oscar Dzundza, a terrible and cruel mercenary, this is his signature style.

Based on the man's corpse, he determined: "He is a Security Guard, has a sedentary and active lifestyle at the same time, varicose veins confirm this, he regularly worked the night shift, the buttons on the watch are hard, they have not been touched for a long time, the man worked in a well-known place, the killer tore the badge off his shirt. Sherlock found ticket stubs in his trousers and concluded that the museum or gallery was the man's place of work."
Sherlock went online and found out that the Hickman Gallery reported the disappearance of one of the servants, Alex Woodridge, today the newly acquired Vermeer (painting) is being exhibited at the Gallery, but why hire a serial killer to kill the Security Guard? The murdered man knew something that would prevent the owner of the masterpiece from receiving 30 million pounds, which means it's definitely a fake.

Sherlock goes to the gallery. Sherlock entered the gallery under the guise of a security guard and is looking at the same painting “Vermeer”, a certain Curator Miss Vincentless approaches Sherlock.

)

Sherlock: “Aren't you worried that the canvas is fake? Fake is the only possible explanation. Alex Woodridge knew that the painting was a fake and someone hired a golem to remove it - wasn’t it you?”

Miss Vincentless: “Golem? What are you talking about?”

Sherlock: “You work for someone, for him it’s a fake. There must be some flaw in your Vermeer.”

Sherlock leaves the gallery. And in the evening, Sherlock learns from his homeless assistants that the golem may be hiding in the Vauxhall Arches (at the homeless communication point). They see his shadow, but the Golem runs away, John and Sherlock rush after him, but the Golem manages to get away. John says that during the day he visited the wife of the murdered guard, and a message came to the guard’s phone saying that a certain Professor Kens was waiting for him at the astronomical planetarium, perhaps the Golem had gone there.

The Golem goes to kill Professor Kens, Sherlock and John come to the rescue, but the Golem manages to get away.

Sherlock and John are again in the museum to investigate the Vermeer painting: The phone rang, and Sherlock said into the phone that the Canvas was a fake, but for Moriarty this was not enough, and a 10-second countdown started from the phone, Sherlock had to find evidence of the fake: Thanks observation Sherlock saw that the picture depicted a supernovaVan Buren, which appeared in the 19th century, and the canvas was from the 17th century. (At the time of the battle between Sherlock and John with the Golem, a recording was playing in the planetarium, which actually talked about a supernovaWang Buren,how Sherlock, in the last seconds, went online and found out that the painting was from the 17th century, and the supernova originated in the 19th century).

Case: Andrew West Death - Solved by Sherlock Holmes

Season 2,Episode 1

Introduction of episode

Inspector Greg Lestrade turns to Sherlock for help in a very curious case: yesterday in Germany, Dusseldorf, there was a plane crash in which all passengers died.

What is curious is that one of the passengers was found in the trunk of a car in Britain, Southwark. How did he miraculously survive the plane crash? And why did he die immediately after that?

Case: Red Tourist

Next, a frightened male client turns to Sherlock for help and asks to help prove his innocence: he stalled on the highway and

I saw a tourist nearby near the river, then again unsuccessfully tried to start the car, after which the stranger was already lying dead.

John goes to the crime scene in the morning without Sherlock, Sherlock is on Skype with Watson trying to figure out what's wrong, John says that the victim was not shot, but hit with a blunt object, and then the object and the killer disappeared, where around 8. One of the policemen says that you need to suspect a man whose car has stalled, what Sherlock says about the client: “Morbidly fat, the right hand of an Internet porn lover, obvious signs of advanced vascular and heart disease, an insignificant opinion of himself, IQ is close to retardation, and you think that he is capable like this? Look by the river “

Case: A Scandal in Belgravia

Two men in business suits enter the house and interrupt Sherlock, and then take him to Buckingham Palace. And then John is sent by helicopter to Buckingham Palace. Next, Mycroft comes to the palace and the Employer of the woman who turned to Sherlock. The Employer says that an influential person, who wished to remain anonymous, turned to detective geniuses with a request to obtain compromising photographs of an intimate nature. They are in the possession of a rather extravagant person - Irene Adler, known in close circles as “that woman.” Just this year she was at the center of two political scandals and destroyed the marriage of a famous writer. Irene also has a rather specific profession - she takes money for giving pleasure through pain and humiliation.

Mycroft says that Irene is not asking for anything for the photographs, Irene said that she does not intend to use the photographs for money or extortion. Sherlock conducts an analysis of the employer: Dog lover, good rider, elite school, gets up early, prefers the left side of the bed, father does not smoke, reads a lot, half- Walian, loves tea (Analysis was completed in about 5 seconds). John and Sherlock go to

Irene Adler. When Sherlock wanted to go home to Irene: Sherlock asked Watson to hit him, and then he rang the bell at Irene’s house and in a frightened voice said that he was attacked and he needed help, and he also began to cry, and John said that the doctor was there and saw how Sherlock was attacked.

Sherlock walks through the hall, and then a naked Irene Adler comes in.

Irene says that she was waiting for Sherlock, and then John comes in and says that he found ice for Sherlock, John sees Irene and Sherlock.

Anti Feat: Sherlock can't use deduction on a naked Irene Adler.

Irene also asks how the case of the tourist with a broken head is going, Sherlock says that is not what he came for, Irene knows that Sherlock came for the photographs, but Irene says Sherlock will not get them. Sherlock says that the tourist was not killed, and also says: “The deceased was an excellent athlete, he recently returned from abroad, and the photographs that you are hiding are in this room.”

Irene: “How did you know?”

Sherlock: “So they're in this room? Thank you"

Sherlock again begins to analyze the case of the tourist, and also visualizes the crime scene: “The driver is unsuccessfully fiddling with the engine, and the tourist is standing in the distance looking up at the sky, looking at the birds? Something is about to happen, but what?

Irene: “He will die from a blow”

Sherlock: “No, this is the result, what should happen? The exhaust is loud, noise sounds are important - they reveal a lot.”

Next, an alarm sounds in the area of the window in the hall where Sherlock and Irene were; it turns out that John intentionally set off the fire alarm so that Sherlock would find out where the photographs were. Sherlock: “Hearing the alarm, a mother saves her child”

Sherlock finds the safe, but then men with pistols burst into the house and threaten John. Sherlock says that he advises using the safe with gloves in the future - the most fatty layer is on the three, which means it was pressed first, but what next?

Judging by the brand of the safe, the code should be six digits, it can't be your birthday, don't be offended, but you were clearly born in the 80s, and it looks like the number 8 wasn't touched."

Irene: "I could tell you the code - but I already did it"

Then men burst into the hall and threaten to kill John if Sherlock does not open the safe. John says it's better to ask Adler for the code - one of the men says that she knows the code to automatically call the alarm. The man begins the countdown to Watson's shot - 3 seconds. Sherlock looks at Irene, and then begins to enter the code - 322434, and the code turns out to be correct. The man asks to open the safe

- Sherlock again looks at Irene who is looking at the floor, Sherlock says "Vatican cameos" (This was John's warning about the danger), There was a pistol in the safe which, after opening the safe, began automatic shooting.

Sherlock and Irene deal with the military. Sherlock takes Adler's phone, but there is a code on the phone, Sherlock says that he believes that the photographs are one of a kind, but Irene says that this is not so, Sherlock replies that if the photographs had copies, they would have to permanently block access to the Internet if so stored in the phone is not unique - cannot be sold, Irene says that the phone is her life, she would rather die than give it away, John screams and calls Sherlock to the second floor, John finds Irene's assistant unconscious, then Irene injects Sherlock with something, taking her telephone.

Irene tells John that the code to the safe is Irene's body parameters. Irene runs away from home. The scene with Irene and Sherlock shifts back to the tourist case: Irene: “Don't get up, I'll do the talking. So the exhaust is coming out of the carburetor, the tourist is looking up, it seems to me that you are saying something about birds, but he is not looking at them, he is looking at another flying object, when the exhaust is released the tourist looked back, less than a minute passed while the driver was fiddling with the car, and when the driver again The tourist raised his head; he was already dead - and what killed him fell into the river; the excellent athlete returned from abroad, bringing with him a boomerang. Did you really understand this right

away?”

Case: Red Tourist - Solved by Sherlock Holmes

Baker Street, Mycroft arrives in the morning, Sherlock says that the photographs are in a safe place - Irene’s plans do not include blackmail. Sherlock: “Did you know that others were after her, Mycroft? I'm guessing these are CIA assassins."

Mycroft leaves for a couple of minutes, and then comes in and says to someone on the phone: “Boteair will fly, it’s decided.”
Sherlock asks: “What else is on Irene’s phone? The Americans wouldn’t be hunting for her because of a couple of compromising photographs, there’s something more serious there.”

Mycroft: “Irene Adler is no longer your concern - you must stay away from her.”

Christmas comes, John, Greg, Sherlock, Mrs. Hudson and Molly gather in a house on Baker Street.

Anti Feat: Sherlock: “I see you have a new friend Molly, congratulations. You go on a date with him, with a gift. Didn't you notice the gift in her bag? A beautiful ribbon, a bow, everything else is wrapped hastily, it means it’s for someone special, the color of the wrapper matches the color of the lipstick, an unconscious association, perhaps a call, in any case, Miss Molly Hooper thinks about love, and her intentions are serious, she says so herself the fact of the

presence of a gift, there is hope for a long romance, the fact that a date today is hinted at by makeup and clothes. Sherlock looks at who the gift is addressed to - and sees that his name is written there. Sherlock apologizes and says he's sorry."

Sherlock receives a message from a phone with the text: “Mantel.” Sherlock looks there and discovers a gift - Irene Adler’s phone. Sherlock leaves and calls Mycroft, Sherlock: “You will probably find Irene Adler dead today.”

Molly, Sherlock and Mike go to St. Bartholomew's Hospital, Molly says that the face is disfigured and identification will not be easy, Sherlock looks at the body and says that it is Irene.

Mycroft asks Sherlock where is Adler's phone now? But he receives no answer. Sherlock leaves, and Mycroft calls John and asks, “Did you find anything?” “But John says no. Sherlock comes home and says: “I hope you didn’t mix up all my socks this time.”

Sherlock understands that John, on Mike's orders, was searching for Irene's phone. (Observation, Thinking)

The next morning, Sherlock plays the violin and John says he's going for a walk. A black car drives up to Watson, he thinks that it was Mycroft who asked to pick up John, John got into the car and they arrived at an abandoned building, John stood up and saw Irene Adler.

John is surprised that Irene is alive, she reports that she should have disappeared. Irene says that she made a mistake and sent one thing to Sherlock for safekeeping, she asks for help to return this thing.

Then it turns out that Sherlock secretly followed the car in which Watson was driving to Irene, soSherlock found out that Irene is alive. (Disguise,Info gathering, Observation)

Sherlock returns to the house on Baker Street,he sees that the door lock is a little broken, entering the house Sherlock sees things left for cleaning by Mrs. Hudson, there are traces of black shoes on the stairs, and fingernail marks on the staircase wall.Sherlock enters the room and sees Mrs. Hudson, who has a gun to her head, he sees three men, the same CIA assassins, burst into the house. The man asks for Irene’s phone number, Sherlock asks to

leave them alone, the man goes to check if Sherlock has a weapon, Sherlock splashes something in his face, and then knocks him out and saves Miss Hudson.

Sherlock in the laboratory (St. Bartholomew's Hospital) takes an X-ray of Irene's phone through the machine, and understands that if you open the cover of the phone, it will explode.

Sherlock returns home and discovers Irene Adler at home.

Irene reports that they want to kill her, Irene says that she needs a phone. Sherlock gives Irene's phone, she enters the code, but it doesn't work. Sherlock says that this is a duplicate of the phone in which you entered the code 1058.

Sherlock enters this code into the original phone - but the code does not match.

Further, Irene says: “I had a client, an official from the Ministry of Defense, I knew his weaknesses, the most important of them was boasting, and he showed me an important email, and I managed to photograph it while he was handcuffed with a blindfold, he said this will save the world, I showed the cipher to one of the best cryptologists, but it was hanging upside down, but what can you do, Mr.

Holmes?:”

Sherlock's analysis: "Here it is reported that 747 flies from the Airport tomorrow at 630 pm to Baltimore. This is not a code but the arrangement of seats in the airliner, there is no letter A and since it can be confused with one, the last letter K is the width of the aircraft is limited, the numbers in this row are randomly, the arrangement of letters has its own system, spouses and couples sit together, only the plane “Jumbo” is so Big that there is the letter K and more than 55 rows, since there is a 13th row we remove all northern airlines, having flight number 007

we remove a few more, and since message from Britain, which is logical to assume given the source of information, the only plane that meets all the criteria flies to Baltimore tomorrow at 630 pm from Heathrow Airport. The analysis was completed in about 10 seconds.(CPI, FRI,Deductive, Overall Thinking) (video sped up 2 times) - https://drive.google.com/file/d/1bbfewXwlH2X5bTEj5b_8Z3b9D2DhR5fR/vie w?usp=sharing)

John: “Yes, you’re right, flight two zero seven.”

Irene sends a message to Moriarty: “Tomorrow 630 pm, Heathrow Airport.” Sherlock

remembers Mycroft's words: “Bot Air will fly, check with Coventry.”

Mycroft receives a message from Moriarty: “Jumbo Jet, come on, Mr. Holmes, come on.”

Evening comes, Sherlock talks about Coventry to Irene: “In World War II, the Allies learned that Coventry would be bombed because they had revealed

German cipher, but wanting to hide the fact of decryption from the Germans, they allowed the bombing.”

Mrs. Hudson says that someone came to Sherlock, these are people from

Buckingham Palace again. The man gives Sherlock the same ticket to Heathrow Airport. Sherlock takes a taxi and goes there to the airport, Sherlock realized that there would be a bomb on the plane, the British and American governments know about this, but they want to allow an explosion, so as not to reveal the source of information, the plane will explode. Coventry - history repeats itself. (Inductive, Overall Thinking)

Sherlock boards the plane and meets Mycroft. Mycroft: “Coventry puzzle, what do you think of my solution? Dead Man's Flight”

Sherlock: “The plane will explode in the air - the terrorists’ plan has been carried out, hundreds of corpses, but no one will die.”

Mycroft: “We recently completed the same project with the Germans, but one of

the passengers did not fly, it seems you already met him, a case that you could not solve” (Beginning of the episode)

Mycroft: “The plane will not take off, and never. The project was cancelled, and someone informed the terrorists that we know about the bomb, now we won’t be able to fool them.”

Antif feat: Sherlock didn't know that Irene was working with Moriarty because of this
Moriarty knew about Sherlock's actions

Then Irene appears

Irene: “Microphot Holmes, on my phone I have all the secrets, photos and scandals that could turn the whole world upside down, what chaos can I create, there is only one way to stop me, unless of course you want your owners to find out that the source of the leak is your junior Brother.

Mycroft says that they have specialists capable of working on the phone, Sherlock says that the phone has 4 additional parts, with acid or explosives. Mycroft says that they have people capable of extracting the password from Irene.

Sherlock: “There are 2 passwords, one to unlock the second one to burn the memory”

Mycroft: “Then we will destroy him.”

Irene: “Good idea, but the lives of many British citizens depend on information on the phone”

Irene says to Sherlock: Jim Moriarty sends his regards to Sherlock. Irene: “Thanks to the villain consultant - he gave me a lot of ideas on how to beat little Holmes.”

Mycroft: “The dominatrix who brought a nation to its knees, well, you win.”

Sherlock: “No, you got carried away, the game was too difficult, and you enjoyed yourself too much, sentiment is a chemical defect leading to loss.”

Irene: “What are you talking about”

Sherlock: “About you”

Irene: “Do you seriously think that you are interested in me? Because you are the great Sherlock Holmes, a smart detective in a funny hat?”

Sherlock: “No, because I counted your pulse, you could have chosen any random number and got everything today, but you couldn’t resist, right? I always thought that love was a dangerous flaw.”

Judging by the dilated pupils and rapid pulse, I realized that Sherlock was really attracted to Irene,and thanks to this, he revealed the password to Irene’s phone when there was only one attempt left (Password: SHER).

(EQP, Social awareness,Abductive, Overall Thinking, Decision making,FRI)

Case: A Scandal in Belgravia - Solved by Sherlock Holmes

Mycroft meets with John, Mycroft says that he told Sherlock that everything is fine with Irene, she was put under the witness protection program, but in fact she was captured by terrorists 2 months ago and beheaded. John asks that she has already hidden her death, Mycroft says that he checked everything - and it’s definitely her.

Mycroft says that only Sherlock could have fooled him, but Sherlock wasn't there.

John comes home and says that he met with Mycroft, Mycroft wanted to transfer Irene’s case to Sherlock, Sherlock asks for Irene’s phone number, although everything on the phone was erased.

.

It turns out that Sherlock found out that they wanted to execute Irene, and saved her (the details do not say how this happened). (Info Gathering, Concealment, Info Control,Overall Planning)

Season 2,Episode 2

Introduction of episode

The episode begins with Watson in a house on Baker Street looking for new cases for Sherlock, Sherlock is very annoyed that there are no interesting cases that he could take on, and asks Watson to give him at least one cigarette, Watson refuses, saying that Sherlock himself paid to all traders within a radius of 3 kilometers so that they do not sell cigarettes to Sherlock.

Then Mrs. Hudson comes in, and Sherlock turns around and realizes that Mrs. Hudson was at Mr. Chatorzha's: A new dress, but there is flour on the sleeve, Miss Hudson doesn't dress like that when she's baking something, there are traces of foil on her nails and Miss Hudson's perfume is too spicy for Monday morning. (Cold Reading, Observation, Induction,

Concrete/Analytical/Critical/Convergent/Linear Thinking)

Then the bell rings, Sherlock says that the pressure on the bell was maximum, the ringing itself lasted 0.5 seconds, and understands that it is a client

The client asks Sherlock if he knows a place called Dartmoor, the client says that it is an amazing, slightly gloomy place, the client says that as a child he and his father were walking through the forest at night, and suddenly his father was attacked by a huge werewolf that looked like a demon and killed his father , the client doesn't remember anything else, the client was found in the morning near a swamp, but the father's body was never found.

Sherlock's conclusions about the client: "You came from Devon in the morning on the first train, had a bad breakfast, drank a cup of black coffee, met a girl sitting across the aisle, became interested in her, but then changed your mind, and you are desperate to smoke your first cigarette."

This is how Sherlock figured out the information about the client: "The napkin you used to blot up the spilled coffee, you can see from the stain that it is without milk, traces of ketchup on the napkin, around the lips and on the sleeve - the conclusion is a ready-made breakfast that is served on the train, probably a Sandwich, the number is written on the napkin telephone, the handwriting is female, she wrote her number on a napkin and judging by the tilt, she was sitting in the aisle opposite you, after she left you wiped the spilled coffee with a napkin and accidentally smeared the numbers, circled the last 4 with a pen, which means you wanted to save the number,but now you've blown your nose on a napkin, which means you're not that

interested in the girl, then there are traces of nicotine on your fingers, on your shaking fingers, I know that smoking is not allowed on the train, apparently it didn't work out in a taxi either, You

at the limit, a convenient train from you to London leaves in an hour, but you got on the first one you came across, which means something important happened yesterday" (Cold Reading, Observation, Inductive,

Concrete/Convergent/Analytical/Linear/Thinking,EQP)

The client confirmed Sherlock's words, and Henry also says that, on the advice of the psychotherapist, he again went to the ravine where his father died, said that in the ravine he was overtaken by an inexplicable fear, said that he saw many traces there, right around the place where his father was attacked.

Case:The Hound of the Baskervilles

John and Sherlock go to Dartmoor, they stay in a tourist hotel, John enters a cafe and asks the bartender if he has seen a monster dog alive, the bartender answers no, but knows that a man named Fletcher has seen Hound alive. Fletcher was just having breakfast near this cafe, Sherlock comes up to him and says that Fletcher is lying about what he saw Hound, and Fletcher says that he doesn't care whether Sherlock believes it or not, John approaches Sherlock and Fletcher, and Sherlock tells John that the bet is cancelled.

Sherlock tells Fletcher that he and Watson bet for 50 pounds, Sherlock says that Fletcher did not see any dog and if this is so, Sherlock wins 50 pounds, Watson quickly realized that this was Sherlock's tactics, and confirmed that he heard in the bar that Fletcher saw the dog and, and can even prove it.After hearing this, Fletcher says that he really saw the dog and not even a month after he saw him, and even showed a photo, but Sherlock, seeing the photo, says that this is nonsense, but then he says that in a place called Baskerville there is a certain secret object, Fletcher says rats the size of dogs and dogs the size of horses are bred in Baskerville's secret laboratories. (Social awarenessVerbal deception, Triangulation, Individual manip, Psychological manip, Direct manip,Info gathering)

Sherlock and Watson go to this very secret base in Baskerville using the pass that Sherlockstole from Mycroft a long time ago(Sherlock's older brother, who has good influence in the British government), They are met by one of the soldiers who guards the secret facility,Sherlock introduces himself as an inspector, says in a rough voice that an immediate check is needed, Watson introduces himself as

captain of the 5th Northumberland Regiment, and says that the test is an order. Sherlock and Watson enter the laboratory, Sherlock meets Dr. Kirsty Stapleton, Sherlock recognizes this surname (At the beginning of the episode, Sherlock tells Watson that on Sherlock's website he was contacted by a girl named Kirsty, whose rabbit name began to glow, and then he disappeared), Sherlock says this name (Jingle Bell) to Dr. Stapleton, and then Stapleton asks Sherlock: "Have you talked to my daughter?" Sherlock asks why Bell died, he was locked in a cage and then suddenly disappeared, Sherlock also notices that the rabbit the fur glowed. But Stapleton says he has no idea what Sherlock is talking about.

Sherlock, after the doctor's answer, says that the check is over and that they need to go (Sherlock knew the exact time when it would be revealed that the pass was not his).

(Info Control, Disguise, Concealment, Verbal deception, Direct manipulation, Emotional manip,Logical prediction, Anticipation) And when Sherlock and Watson were heading towards the exit, the door became blocked, and one of the military employees reports that their identities have not been confirmed. But suddenly one of the laboratory assistants (Dr. Franklint Bob) says that he knows these gentlemen, and is glad to see Mycroft (Sherlock) in the laboratory, apparently there was a mistake, but it's really Mycroft who says Bob.

They go outside and Sherlock thanks Bob, Bob says that he is a fan of Sherlock's site, Franklint gives his number to Sherlock and says that if he needs help, he can contact

Sherlock and Watson discuss Bell and Stapleton,Sherlock suggests that Stapleton extracted the fluorescent gene

from one organism and then injected into a rabbit,and he wants to find out if Stapleton is working with someone worse than a rabbit (Knowledge) Sherlock and Watson arrive at Henry

Knight's house. Henry says the word "Liberty In" is in his head.Sherlock suggests that this may be a play on words that means: "Freedom from death, escape from everything." Sherlock says that at night they need to go to the ravine where Henry's father died, maybe Henry will remember something.

Henry, Sherlock and Watson are in Duer's Gully: In the ravine, Sherlock sees large dog tracks, and an unknown creature runs between him and Henry. Henry tells Watson that he and Sherlock saw Hound, but Sherlock denies this.

Henry is angry with Sherlock, Watson escorts Henry home.

(VCI)

.

Next, Watson and Sherlock decide to go to the cafe: Sherlock is incredibly excited, and Sherlock admits to Watson that he also saw Hound, Sherlock says that he has always been able to renounce ridiculous feelings,but now he is scared. (EQU, Self Awareness)

Watson says that Sherlock is just on nerves now, and logic has refused him, he just needs to calm down, Watson says that even the huge Hound can be explained, maybe it was just a dog. Sherlock shouts at Watson saying, "There's nothing wrong with my head," and turns his attention to a table at the end of the cafe where a man and an elderly woman were sitting, he says that he will start his investigation with them, since Watson believes that it was just a dog:

"A sentimental widow and her son, an unemployed fisherman. They have a fox terrier named "Whiskey".The son's sweater is not worn at all, he doesn't like it, maybe the sweater is too tight or the son doesn't wear it because of the ridiculous pattern. The sweater is a Christmas gift from his mother, which means he wanted to please her, of course because of the money, her dinner is plentiful and his portion small, he wants to impress her but saves on himself, he has a small plate - he practically licked it, but she didn't finish her cake, he's clearly hungry and not rich, this can be seen from his sleeves and boots, the scars from hooks on his arm indicate that he is a fisherman, the scars are old and one can assume that he has been unemployed for a long time, he cannot find a job and turned to his widowed mother for help, his mother has a chain around her neck with her late husband's wedding ring, it's too big for her fingers, she's well dressed but her jewelry is cheap, and finally the dog—the hair on her trousers that her dog is rubbing against, there's no hair above the knee, which means the dog is small, maybe a terrier, but more likely a fox terrier,

How did I find out the dog's name? We were traveling on the train together and she said the dog's name."Watson asks to listen to him, because they are friends, and Sherlock replies that he has no friends.

(Observation, Cold reading, Inductive/Abductive, Overall Thinking,EQP) The next day, Sherlock drops by to see Henry in the morning. Sherlock asks Henry why he calls the devil dog Hound, because there are many other words

But Sherlock, without waiting for an answer, leaves the house, then Sherlock meets with Watson, andSherlock said that he experienced not only fear, but also doubts and uncertainty. Previously, he always trusted his brain, but now he cannot believe what he saw,further Sherlock apologizes to

Watson for what he said yesterday, and tells him that perhaps "Hound" is probably an abbreviation or acronym.

(EQU (Self Awareness)

John and Sherlock went to a nearby cafe, and as an apology, Sherlock made Watson coffee with sugar, although Watson drinks without sugar.

Johnlock returns to Baskerville's secret base again, only this time Sherlock simply asked Mycroft for help.

Sherlock said that Watson would have to look for the hound alone in the laboratories of the secret base, and Sherlock himself would go to Major Beymer (chief manager of the security department of the secret base). Sherlock asks to be given unlimited access to the laboratories, and receives consent.

Watson enters one of the laboratory compartments, suddenly the light begins to blind, Watson tries to leave the compartment, but the door is locked. The light goes out and Watson examines the room with a flashlight, and he sees several cages, and one of them turns out to be broken, as if someone got out of the cage.

Suddenly a loud roar is heard, and Watson hides in one of the cages.

Sherlock calls Watson, Watson says that Hound is somewhere near him, Watson says that he is in the very first laboratory, and asks Sherlock for Help. Sherlock asks what Watson sees, Watson replies that he doesn't see, but hears him, and suddenly a shadow appears near the cage, and Watson says into the phone that he sees Hound

But it turned out to be Sherlock who freed Watson from the cage. Sherlock replies that Watson only presented the image of Hound that Sherlock inspired in John, Sherlock set up this show.

(Sherlock says that Henry, Watson and Sherlock himself were not on drugs of their own free will)

Sherlock also said that everyone ate and drank the same thing except for coffee, which John drinks without sugar, so Sherlock, when he and Watson were in a cafe, decided to add sugar to John's coffee, but in the end nothing was found in sugar

(S/t Strategy,Strategic Deception,Planning preparations,Guesswork, Observation, Overall Thinking, Abductive)

Johnlock goes to Doctor Stapleton, Cher asks for a microscope, and in the laboratory he analyzes the sugar from Henry Knight's table. Sherlock says that he wanted to detect a drug in sugar that causes hallucinations, but found nothing.

Sherlock explains that he saw Hound because his imagination told him.

The most important reason why Sherlock shouldn't have believed his eyes was the drug. Henry also saw Hound, and only John did not see him in Duer's ravine, Henry, Watson and Cher drank and ate the same thing - except for coffee, which John drinks without sugar. Sherlock is sure that the drug affects their consciousness, but how? Sherlock asks to be left

alone, saying that he needs to go to the "mind palace"In the mind palace, Sherlock manipulates his mind to find the answer he needs.

(

https://drive.google.com/file/d/1b3yfTkDcLAbJFQBGPNhufHXdDgUhjfq3/vie w? usp=sharing)
(VSI,Overall Memory)

As a result, Sherlock Holmes finds the answer in his mind, Sherlock concludes that Hound is a project, an experiment at the CIA Branch in Liberty, Indiana (Sherlock remembered that the word Liberty In often came to Henry's mind, and on this basis he made a conclusion)

(Inductive, Abductive, Overall Thinking, Pattern recognition, Connecting the dots)

. Sherlock asks Stapleton to look in the computer archive about the Hound project, but the project turns out to be classified and a password is needed, Stapleton says that the password is known to Major Benimore. Sherlock enters Major Beymer's office and begins the analysis: "He is an old-fashioned man, a traditionalist, and does not use children's names for passwords. There are a lot of books, he is a fan of Churchill's books, there are also books about Thatcher's biography on the shelves, in the office there is a photograph of father and son taken around the mid-80s, in the photograph Benimore the Elder (Major's father) has a medal and an order for impeccable service, Watson concludes that if this is the 80s, then the father most likely fought for the Falkland troops." Sherlock concludes that a guy like Benimore uses names as passwords, and the password itself is Maggie (short for Margaret Thatcher) (Overall Thinking, Inductive , Abductive, Intuition,EQP, EQU, Social Observation/Awareness)

, the password turns out to be correct and Sherlock gains access to the Archive. Sherlock, having gained access, learns that the Hound project is the development of a new Drug that suppresses the will, the drug has an extreme degree of suggestibility, this is a new type of weapon that causes fear and disorients the enemy, in 86 the project was curtailed and the data was classified, under the influence of the drug people became uncontrollably aggressive. Watson concludes that the project

someone restored it. Sherlock says that someone is trying to improve the drug. There was a photograph in the archive with the project participants, and in the background Cher

recognizes Bob Franklin (the laboratory assistant who left Sherlock a phone number after helping Sherlock). John received a call from a psychotherapist who worked with Henry, and John learned that Henry had severe hallucinations and had left his home. Sherlock assumes that Henry went to the ravine, and he and John went there. Henry wants to commit suicide, but Sherlock arrives at the ravine and asks to stop, Sherlock explains that it was not an animal, he asks Henry to remember that night, because Henry has already begun to put the fragments together.Then Henry was a child, and for him a huge monster was the only reasonable explanation, but now Henry's memory has returned, andthe killer needed to stop Henry, drive Henry crazy.

And suddenly a giant dog appears, with red glowing eyes, Sherlock sees Bob creeping up from behind, Bob was wearing a gas mask, and Sher realizes that the drug is in the fog (the ravine was well foggy). But the giant dog turned out to be an ordinary dog.

Each time Henry returned to the ravine, his mind was more and more under the influence of chemical weapons, which is what Bob needed.

(EQU,Pattern recognition, Deductive, Overall Thinking,FRI)

Case:The Hound of the Baskervilles: Solved by Sherlock Holmes

Season 2,Episode 3

Introduction of episode

The episode begins with several scenes:

1) Sherlock returned the stolen painting called "Reichenbach Falls" to the museum, and he was given a gift. Sherlock, taking the wrapped gift, realizes that these are diamond cufflinks.

2) Sherlock saved the kidnapped boy and was given a gift. Sherlock took the gift and realized that it was a tie pin.

3) Sherlock captured one of the most dangerous criminals on the Interpol list, and Greg gave him a gift - a hat

Next, John and Sherlock spend time in a house on Baker Street, andWatson says that Sherlock has very little time left before he becomes world famous, and Watson says that he needs to be more careful, Sherlock understands

that Watson is worried about what people will say about Sherlock. (EQP, Social Awareness)

Case:The Reichenbach Fall

Next, we are shown a scene in which Jim Moriarty enters the London Museum (Tower of London) and, by pressing a button on his phone, triggers an alarm in it, a guard runs up to him and demands to leave the museum, Moriarty sprays something at the guard and the guard loses consciousness. Moriarty presses the button on the phone again and breaks into the vault of the Bank of England, Moriarty presses the button on the phone again and the security system in Pentonville prison fails.

Special forces arrive at the museum, and Moriarty sits on a throne with a golden crown (Moriarty broke the special protective glass in which the royal throne and royal crown were located), but Moriarty is not going to escape.

A message from Moriarty arrives on Sherlock's phone, and then Sherlock goes to the museum itself.

Sherlock is informed that Moriarty was somehow able to destroy the special protective glass that contained the royal throne and crown. Sherlock replies that glass can be broken with crystalline carbon, which is what Moriarty did. (Knowledge)

Next, news comes out in the newspapers about the crime of the century, a man named Jim Moriarty was able to break into the Tower of London, an English bank and Pentonville prison.

Next will be a trial with Jim, and Sherlock is called as an expert witness.

Before the court hearing, Sherlock meets a woman in the toilet who introduces herself as a Sherlock fan. Sherlock realizes that she is lying, and tells her that she is not a fan at all: “There is a mark on your hand from the edge of the table, you often type in a hurry when they are chasing you to submit an article, there is an ink stain on your wrists, and the left pocket of your jacket is bulging, the stain has been placed purposely to test my abilities." Sherlock sniffs the stain and says: "Oil base, printing ink, the stain was applied with your index finger." (Inductive, Abductive, Overall Thinking, Cold reading, Observation)

The woman introduces herself as Kitty Riley and says she's glad to meet you. But Sherlock understands that they are expecting an interview from him and decides to leave the toilet, but Kitty stops him, Kitty says that there are rumors about Sherlock

there are a lot of rumors and gives him her phone number, saying that someday he will need a person who will write the truth, Kitty says that she is very smart and that Sherlock can trust her. But Sherlock replies that since she is smart, then let her read Sherlock, and no interview is needed, but Sherlock receives silence in response.

Sherlock says it's his turn then: "I see a man who will never succeed in the service, you’re wearing a rather expensive skirt, but it’s been altered, twice, this is your only going out skirt, and you can’t afford frequent manicures, I conclude that you’re more hungry than smart, and you definitely don’t inspire confidence in me“, Sherlock says that he will still give a short interview, takes Kitty’s recorder and says: “You disgust me,” and then leaves.

(EQPInductive, Abductive, Overall Thinking, Cold reading, Observation) Next, a hearing takes place on the Moriarty case, the judge asks Sher how he could describe a man named Jim, to which Sherlock replies: “Jim is not a man, but a spider, he is in the center of a criminal web, in his paws there is a huge number of threads, and he knows absolutely exactly how each thread works." Next, Sherlock conducts an aloud analysis of the jury who were in the courtroom: "1 Librarian, 2 teachers, two have stressful jobs - probably finances.

The doctor was chosen as a foreman, judging by her handwriting, she studied abroad (Sherlock was able to visualize what the woman was writing, and from about 10 meters, and

Sherlock carried out all the observation while being 8-10 meters from the sitting jury), seven are married, two have had an affair, and they were just drinking tea and biscuits, and the teacher was eating waffles."(Cold reading, Observation,VSI)

The judge interrupts Sherlock, saying that can Sherlock go without drawing for at least five minutes? But Sherlock just laughs and is taken to a cell nearby, but soon Watson takes Sherlock away.Sherlock says: “if Moriarty wanted to take something, he would have taken it, if Moriarty wanted to release the prisoners, he would have released it,” so he went to prison because he wanted it, it’s part of his plan.(

Abductive,Pattern recognition,Social awareness)

The second court hearing takes place, but only Watson appeared. Watson informs Sherlock that Moriarty appeared without a lawyer and was still found innocent.

Sherlock puts down the tea and takes out two mugs. And he starts playing the violin, and after a while Moriarty comes to Sherlock. (Sherlock predicted that Moriarty would go to Sherlock's house after the trial)

Sherlock understands how Moriarty was able to be free - Moriarty threatened the jury members so that they would find him innocent.Moriarty asks if Sherlock knows why Moriarty did the break-ins but didn't take anything? Sherlock replies: “You didn’t take anything because you didn’t need it, you will never need to take anything again, because nothing in the English Bank, the Tower and Pentonville can exceed the value of the key that let you in.” And Moriarty says that can open any door with a few lines of computer code. Moriarty says he can start a nuclear war with the code if he wants(Social Awareness, Social prediction, EQU,Abductive, Pattern recognition, Observations,Anticipation)

Time moves forward to two months later: A black car drives up to John, and he realizes that it is Mycroft.

Mike informs John that several assassins live opposite the house where Johnlock lives.

Mike asks to beware of Maury as Maury said that he intends to destroy Sherlock

John arrives at 221B, and near the door of the house he sees an envelope containing sand. John comes home and sees Sergeant Donovan, Greg and Sherlock there. John is informed that the children (Max, Kladet) of one of the US ambassadors have been kidnapped; the children live in St. Aldate, a luxurious boarding house in Suren.

During the holidays, the children went home, except for a few children, including Max and Kladet, the Ambassador asked Sherlock for help. Johnlock goes to the boarding house.

They meet Madame who is crying, Greg says that this is Miss McKendy, Nanny, Greg asks not to put pressure on her.

Sherlock comes up to her and says: “Miss McKendy, you are responsible for the safety of the children, yesterday you left everything open here, ARE YOU AN IDIOT, AN ALCOHOLIC, OR A CRIMINAL, ANSWER.” Miss McKendy says: "The

doors and windows were bolted, no one entered their rooms yesterday, not even me, please believe me."

Sherlock replies that he believes, he just wanted to speed up the process, and also asks to give the nanny sedatives. (Direct manip, Emotional manip, Acting skills, Verbal deception,EQM, EQE) .

Sherlock first goes into the room where the girl Puts was that night.Next, Sherlock goes to Max's bedroom: "The boy slept here every night,The boy had the only source of light from the corridor, he recognized

every shadow, anyone who wanted to enter.He couldn't have been alert when a stranger approached the door, perhaps he even saw the outline of a weapon, what would he have done? He had a few seconds until he entered the room, perhaps he used them somehow. "

Sherlock sniffs the room and catches the smell of linseed oil, and then asks to call experts with ultraviolet equipment. Using ultraviolet light, Sherlock sees an inscription on the wall: “Save us,” Sherlock understands that linseed oil was used not only as an inscription, but also as a guide, Sherlock sees marks on the floor that were formed due to spilled oil.

Sherlock realizes that the kidnapper tiptoed the boy in front
(Sherlock says this is a sign of fear)
Next, the Kidnapper put a gun to the boy's head, and dragged the girl behind him, clasping her throat (Sherlock understands this from the tracks), and in the middle of the corridor the tracks end.

Sergeant Anderson says the tracks don't lead to anything after all. And Sherlock says: "Nothing except shoe size, height, gait and walking speed."

Sherlock breaks off pieces of traces from the floor.

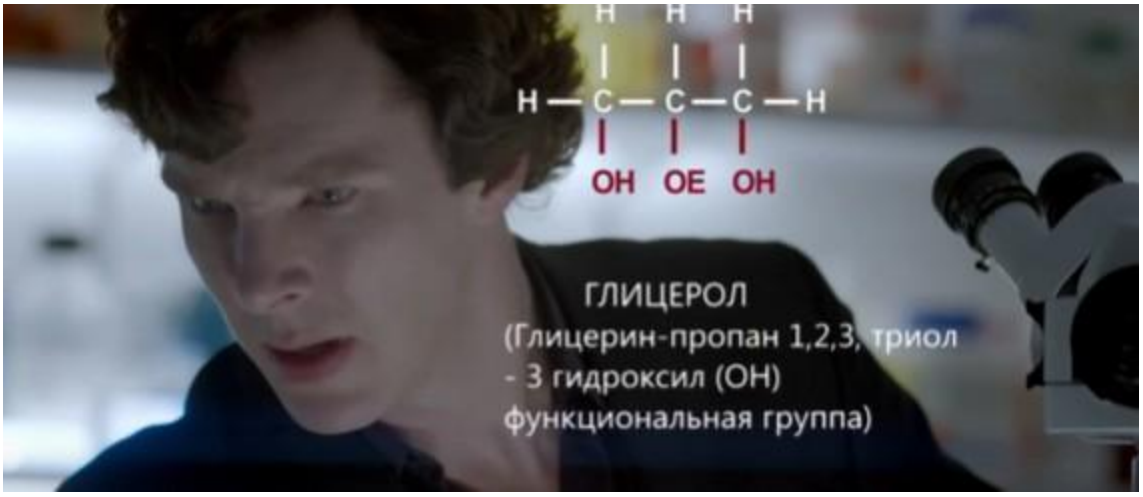

Sherlock says that the kidnapper entered when the doors were open, he assumes that the crime was committed at the end of classes, when many parents and students had gathered together, he just had to enter and find somewhere to hide.

(VSI,Observation, Pattern recognition, Data analysis, Overall Thinking, Connecting the dots,EQU)

Johnlock arrives at St. Bartholomew's Hospital, where Molly worked, Sherlock asks for help.

Sherlock analyzes the footprints: "The oil that was on the kidnapper's footprints will lead us to Moriarty, the isotopic analysis of what was on the soles will help us find where he hides the children." Sherlock and Molly conduct a chemical analysis, and Sherlock finds out what was on the sole of the kidnapper: Asphalt, Chalk, Brick dust, Vegetation. Sherlock understands that the fifth fragment of the kidnapper's footprints contains a glycerin molecule, but Sherlock cannot understand the fifth fragment of the footprints itself. (Knowledge)

During the analysis, Sherlock also mentally visualizes the molecule
Glycerol (VSI)

Watson further tells Sherlock that the kidnapped girl had a stamped envelope in her locker, and this afternoon Watson found a similar envelope at the door of their house. Sherlock, having opened the envelope, sees that there are bread crumbs in it, and understands that the trail of bread crumbs isThis is a message from the fairy tales of the Brothers Grimm: “An evil father took two children into the forest and they threw crumbs to find the way” (Sherlock, when he went into the room of a kidnapped girl at the boarding house, found an envelope in her closet, in the envelope was a book about the fairy tales of the Brothers Grimm, Sherlock opened the middle of the book, flipped through about 10 pages in a second, and then after a while

photographically reproduced the desired fragment in the laboratory). After this, Sherlock realizes that the kidnapper thinks the crime is fun, since he plants evidence,Sherlock understands that the fifth component is connected with the fairy tale - the Witch's house.Sherlock deduces that the fifth trace fragment is Polyglycerol polyricinoleate, which is used in the production of chocolate.

Johnlock goes to the police headquarters, and Greg reports that an hour ago he received a message from the kidnapper: “Hurry, they are dying.”

Sherlock reports that you need to find a place in the city that contains these five components: Asphalt, Chalk, Brick dust, Vegetation, Polyglycerin polyricinoleate, that is, you need to find an abandoned confectionery factory, a brick building from the 50s.

Sherlock begins to narrow down the range of geology and begins searching for a suitable location in his mind, literally visualizing a map of Great Britain.

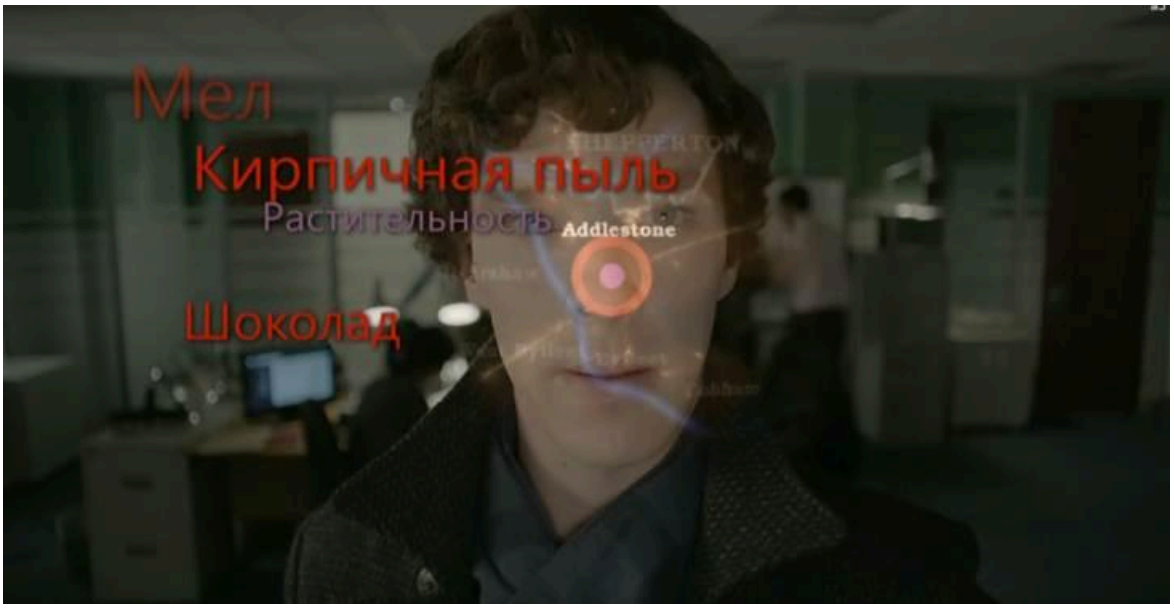

(video, accelerated 2 times - https://drive.google.com/file/d/1TDlGJtI3bfCv0nLwZ9eWquKG7Xbcl11i/view? usp=sharing)

(CPI, VSI,Deductive, Pattern recognition, Observation, Connecting the dots, Overall Thinking)

Sherlock reports that he sent people (the Homeless Network) in search of people, thanks to the information that the homeless collected for him, he was able to understand that a suitable place that has all 5 components is

Eddleston (homeless people sent photos of various Factories to Sherlock's phone), an abandoned factory between the river and the park. (Influence, Info gathering)

John and Sherlock and the police went to Eddleston, they enter the Factory building, Sherlock discovers an extinguished candle and candy wrappers: Sherlock touches the candle and realizes that it was burning a minute ago, the children were here just recently. Next, Sherlock takes a candy wrapper and licks it, he understands that the candies are covered with poisonous mercury, but this is not enough for a lethal dose, however, it would gradually kill them, and the criminal would not have been present when the children died. The children are taken to the hospital. Next, Sherlock enters the children's room, but suddenly a girl named Kladet screams loudly, and Sherlock is asked to leave the room.

Sherlock leaves in a taxi (without Watson), There is a mini TV in the taxi, Sherlock

asks to turn it off, but a moment later Moriarty is shown on the TV, and Moriarty leaves a message for Sherlock - Moriarty wants to pass Sherlock off as a great deceiver and criminal, Sherlock runs out of the taxi and comes up to the driver's window and sees Moriarty himself there, Moriarty drives forward, Sherlock runs after him, but does not have time to catch up.

Sherlock is standing in the very middle of the road - and a car is rushing towards him from behind, but an unknown man saves him, Sherlock says thank you and shakes hands, seconds later the man who saved Sherlock is shot, and the man dies.

Next, we are shown a scene of the police conducting an investigation at a crime scene where a man died. Watson is also present at the crime scene. Watson sees a dead man and says

that the man is one of the hired killers that Mike was talking about. Sherlock says that he was killed for shaking his hand. He saved Sherlock and didn't try to kill him, but why?

Sherlock assumes that Sherlock has something that the assassins need, but as soon as one of them approaches Sherlock, the others immediately kill him.

Next, Cher asks Mrs. Hudson what exactly Mrs. Hudson wiped in this room this week, what the killers need to look for where there is no dust, Sherlock says: “You can’t bring dust back - it’s a great clue,” Sherlock, looking around the room, understands that in There are cameras in the room, they are being watched, and the camera itself was on one of the bookshelves. (Observation, Abductive, Overall Thinking)

Then Greg comes into the house, and Sherlock immediately says “No Inspector” (Sherlock understands that Greg came so that Sherlock would go with him to the station because of the incident with the girl’s scream. Sergeant Donovan and Sergeant Anderson

Greg was informed that we should not rule out the possibility that Sherlock was involved in the kidnapping. And Sherlock understands this). Sherlock understands that the Girl's Scream is Moriarty's first move to destroy Sherlock's personality, and the second move is a photograph of Sherlock being taken to the police station for interrogation. (Inductive, Pattern recognition, Connecting the dots, Overall Thinking) Sherlock then assumes that Greg, Sergeant Anderson and Sergeant Donovan will return with a warrant for Sherlock's arrest, and Sherlock turns out to be right, Greg writes a message to John, Greg warns them that the police are already heading to Sherlock's house. (Foresight, Anticipation)

A moment later, Mrs. Hudson comes into the room and tells Johnlock that Some

guy brought a package, and the name of the package messenger is strange, like something from a fairy tale. The bag contains a dried man.

Then the police break into the house and arrest Sherlock, the police chief comes in, and Watson hits the chief on the nose.

He and Sherlock are taken outside and pressed against a car, handcuffing both of them. Sherlock breaks free and grabs a gun from one of the policemen, and asks everyone to kneel, taking Watson hostage. And then Johnlock escapes. (Threats)

Sherlock notices that in addition to the police, one of the hired killers is chasing them. Sherlock decides to run in front of the bus with Watson, and the killer saves them, Sherlock takes out a gun and asks what the assassins want from them, the killer says: “Moriarty left this in your apartment, the computer code is the key.” Next, the Hitman is killed. Sherlock assumes that Moriarty planted the code while he was at Sherlock's house. Johnlock is again hiding in one of the neighborhoods, and John picks up a Newspaper that says: “Exclusive from Richard Brooke, The Shocking Truth about Sherlock.” Johnlock goes to Kitty Riley's house, Sherlock asks who Richard Brooke is, a few seconds later Moriarty enters Kitty's house, Kitty says that this is Richard Brooke, her boyfriend, Watson is at a loss, Kitty says that Richard Brooke is the actor whom Sherlock hired to role of Moriarty.

Richard (Moriarty) is very scared and asks Watson not to hit him.

And then Kitty takes out a newspaper, which says that Cher invented his enemies, first invented all the crimes and then the villain Moriarty. Watson says that this is nonsense and Moriarty was even on trial, Kitty says that it was Sherlock who paid for the trial.

Next, Kitty shows Watson Richard's resume, which says that he works on a children's channel and tells fairy tales.

Sherlock gets angry and attacks Moriarty, but Moriarty runs to the second floor of the house and manages to escape through the window.

Johnlock leaves Kitty's house.

Sherlock goes alone to Molly's laboratory, Sherlock tells Molly that he might die soon.

John goes to Mycroft and accuses Mycroft of revealing information about Sherlock to Moriarty. Mycroft reports that they are monitoring special people, such as Moriarty, Mycroft says Jim has the most dangerous criminal mind, and now he has in his hands a code key that can open any

door. Mike reports that they interrogated Moriarty for weeks, and nothing. And only one thing could shake him up - Sherlock Holmes. Mycroft says he's sorry.

Sherlock asks John to come to the laboratory, Sherlock tells John that they need to get into Moriarty's records and destroy Richard Brooke.

Sherlock recalls the moments when Moriarty was in the house to find a clue to the code, John receives a call and is told that Mrs. Hudson was shot, he tells Sherlock that they need to go to the hospital to see Mrs. Hudson, but Sherlock says that he will not go because he needs to think. John leaves shouting at Sherlock.

Sherlock receives messages from Moriarty with the words “I'm waiting.”

The next day, Sherlock climbs to the roof of the houses, Moriarty is already waiting for Sherlock.

Moriarty says that Sherlock had drive, but now he has lost his drive because he crushed Sherlock.

Sherlock understands that Richard Brooke is consonant with the German “Reichenbach” (VCI), Sherlock says that this case made him famous (the Reichenbach Falls case at the beginning of the episode).

At the time of Moriarty and Sherlock's tea party, when Moriarty was in Sherlock's

house, Moriarty, during their conversation, tapped his knee with his fingers, as if creating a melody, and Sherlock realized that the blows are numbers, each blow is 1, each skip is 0, this is a binary code (Sherlock exactly remembered and visualized the moment when Moriarty tapped his knee with his fingers), Sherlock understood why the killers saved his life - because the code is in Sherlock’s head. Sherlock says that now that the code is

him, he will be able to expose Moriarty, but Moriarty disappoints him, saying that there is no code. Moriarty says: “Do you really think that a few lines of computer code will destroy the world? I'm disappointed in you."

But how then did Moriarty break into the Tower, Pentonville and the Bank?
Moriarty explains that he only needed partners in crime.

(https://drive.google.com/file/d/1lG4W12ky-2fCv-ZkYlLyI44WoTX5KfTu/view? usp=sharing) (VCI,CPI)

Moriarty says that they need to end the show, and Sherlock understands that he needs to commit suicide. Moriarty says that if Sherlock does not die, his friends will die, only Sherlock can save his friends by jumping from the roof, Sherlock says that he will make the jump, and asks to give him one a minute alone, then Sherlock laughs and says that Moriarty cannot kill Sherlock's friends.

Moriarty then thanks Sherlock, saying that he really had fun with him, Moriarty says, “As long as I live, your friends will live,” then Moriarty shoots himself in the head, committing suicide.

Watson drives a Taxi to the house on the roof of which Moriarty and Sherlock were, Watson calls Sherlock, Sherlock asks Watson to leave, but Watson is not going to leave Sherlock. Sherlock asks to look at the roof of one of the buildings, Watson sees Sherlock on the roof.

Sherlock asks for forgiveness and says that everything they say in the newspapers is true, Sherlock just created Moriarty. Watson does not believe Sherlock, but Sherlock replies that no one can be that smart, Watson says that in their first meeting he learned everything about Watson, to which Sherlock says that he studied Watson to impress, it was just a trick. Watson walks towards the house, but Sherlock asks Watson to stay put.

Sherlock Says that this phone call will be the last note (Verbal deception, Gaslighting, Acting skills,EQE, EQM)

Sherlock jumps from the roof of the house, Watson rushes towards him, a cyclist crashes into Watson and he hits the Asphalt hard, Watson still approaches Sherlock's body, touches his pulse, but Sherlock's heart does not beat. Watson witnesses Sherlock's death.

Watson and Mrs. Hudson arrive at Sherlock's grave, Watson asks to be left alone with Sherlock, He further says that Sherlock was the most humane person he knew, and no one can convince him that Sherlock lied, Watson says that he owes a lot to Sherlock, and asks Sherlock to be alive.

Case:The Reichenbach Fall - Solved by Sherlock Holmes

Season 3,Episode 1

Introduction of episode

2 years have passed since Sherlock's death, Sherlock's reputation has been restored.
Next we are shown Mycroft and Sherlock, Sherlock spent 2 years working on the complete destruction of the Moriarty network. (Info Control,Concealment,Long Term Planning,FRI)

Mycroft asks Sherlock for a favor, a terrorist organization has appeared in London, Mycroft needs Sherlock's help. Sherlock wants to surprise Watson, and Sherlock learns from Mycroft that John has booked a table at a cafe tonight.

Sherlock enters a cafe and meets a man at the entrance to the cafe, and immediately understands that the Man's Wife is expecting a child. (Cold Reading, Observation) Sherlock "Accidentally" spills water on one of the cafe visitors, apologizes and steals his tie, then another cafe visitor leaves his glasses on the table, Sherlock steals them too. Sherlock sees a black marker in one of the visitors' purses, steals it and draws a mustache for himself.

Sherlock approaches Watson's table, Sherlock asks in a foreign accent how he can help. Watson asks what champagne the waiter (Sherlock) can recommend, Sherlock says that he recommends the last champagne on the menu list, Sherlock leaves to get champagne, and at that moment a woman sits down at Watson's table . The woman's name is Mary, and Watson wants to propose to her, but at that moment Sherlock comes to their table, brings champagne and finally reveals his identity to Watson.(Fabrication, Acting Skills, Verbal deception, EQE, EQM)

Watson says that for 2 years he thought that Sherlock was dead, and then Watson attacks Sherlock.

Next, John, Sherlock and Mary sit together in a cafe and Sherlock says how he planned his suicide: “I saw 13 scenarios when Moriarty and I ended up on the roof, we had to choose a real way to avoid death, the first scenario was falling on a parked hospital truck with bags, but it will be difficult since the angle is too large (Sherlock visually calculated the angle) "

Further, Watson says that he didn’t care how Sherlock pulled it off, he wants to know why he didn’t tell Watson that he was alive

Sherlock says that he was afraid that Watson would unwittingly give Sherlock away. Sherlock says that a terrorist attack is being prepared in London, and that he needs Watson’s help: “You haven’t had enough of chasing criminals,” but Watson hits Sherlock again.

Next, Mary tells Sherlock that she will talk Watson into helping Sher. Mary and Watson leave by taxi.

Sherlock and Mycroft spend time in a house on Baker Street discussing the London Underground Terrorism

Next, Sherlock offers to do “Deduction”; on his table there was a hat that the client left, they begin the analysis:

Mycroft: Client Nervous, sentimental, a slave to his habits, bad breath, recently had his hair cut (hairs stuck to sweat stains inside his hat), the fact that he is sentimental is clear from the fact that the hat has been darned many times

Sherlock says that, to be more specific, the hat was darned 5 times, and this speaks of obsessive-compulsive neurosis, but Mycroft refutes Sherlock's words, saying that the client forgot the hat, and this does not look like a person with obsessive-compulsive neurosis

Mycroft notices that the top of the cap is badly burned, most likely in Peru.

Sherlock says the hat is made from Icelandic sheep yarn, Sherlock has a blog about the stretchability of different natural fibers.

Mycroft: The pompom on the left string is all chewed up, which indicates Neurosis. Sherlock says that Mycroft thinks that the client is a slave to his habits because the client did not chew the right pompom. (Observation, Cold reading, EQPAbductive,Overall Thinking,knowledge)

Anti Feat: Sherlock says that Mycroft missed the fact that the client is lonely, because lovers of stupid hats most often have difficult relationships with people. Mycroft says that perhaps he just likes to look like nothing at all, and this does not mean that the person is lonely. (It later turns out that the Client has a girlfriend)

John works at the hospital and Mary helps him. Sherlock collects information about individuals who may be involved in a terrorist organization. Sherlock invites Molly to take Watson's place.

(

During a female client's stay at Sherlock's house:

But suddenly the letters from your friend stopped coming, and you thought that he was the one - the only one

The love emails were from her stepfather; when he stopped writing, he broke her heart, she lost confidence in herself, and sits at home. He lives on her salary.

)

Greg calls Sherlock, in one of the apartments the police found a skeleton in a wig and suit, sitting at a desk.

Sherlock analyzes: “The death occurred six months ago,skeleton dressed in a cheap Victorian costume from a museum, The costume was displayed on a mannequin for many years,at the window facing southeast, judging by the way the fabric has faded. It was sold at auction after the fire, a week ago” (Sherlock first made an assumption about the sale at auction, then confirmed his guess by finding information on the Internet) (Inductive, Observations,Knowledge,VSI, Overall Thinking

Sherlock also discovers a book in the locker that was located in the desk: “Jack the Ripper.” How I did it"

Case: The Empty Hearse

Sherlock and Molly go to the client, Sherlock returns the Hat (the Hat that Sherlock and Mycroft discussed), Sherlock asks what question the Client is interested in.

The client says that he works on the District Line subway, his job is to erase CCTV footage after watching, on the last recording: A man enters the last car at Westminster station in the subway (The man was the last passenger), and on the next station “St. James's Park” carriage is already empty

The client reports that the driver of the train in which the man was no longer works, according to the neighbor, the driver went on vacation, Sherlock suggests that there could be a bribe.

Sherlock: Since the driver is involved, the passenger could actually get out. The client says that (this is a direct passage along the district line between two stations and there is nowhere to go) there are no branches or stops between stations, only one tunnel

Sherlock mentally visualizes the recording and literally zooms in on the person's face, and then says that this face is familiar to him (4555 - 4601).

(Sherlock visualizes the subway plan (4605 - 4635)

He then remembers that this journey usually takes five minutes, this time twice as much, from Westminster station to St. James's Park 10 minutes.(VSI,WMI,Overall Memory)

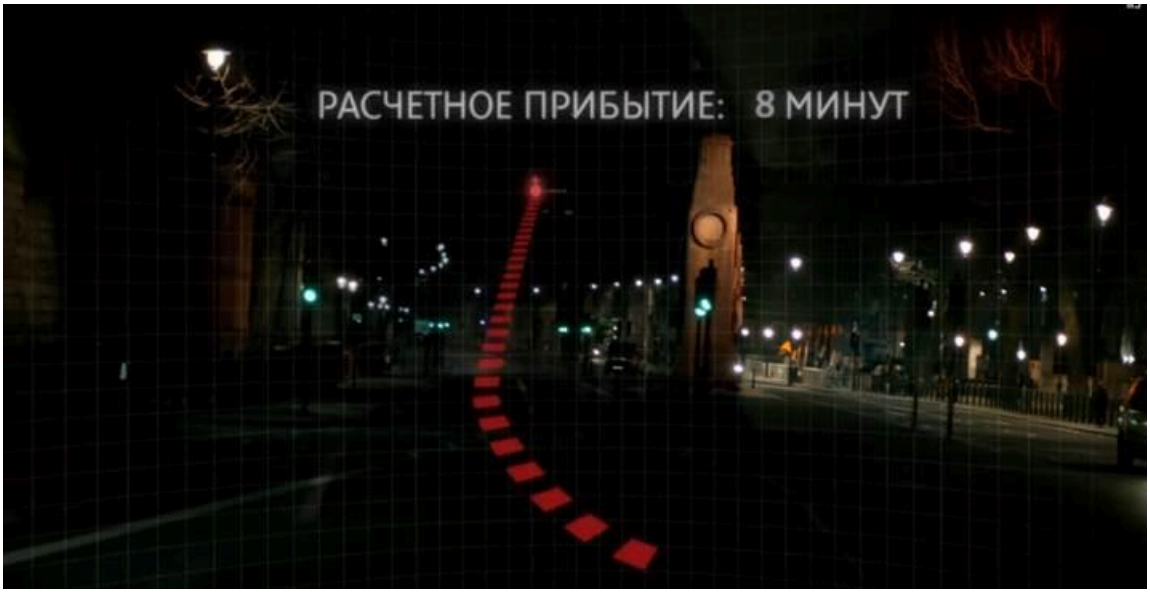

(Sherlock asks Molly for any subway plans)

John Watson approaches the house where he and Sherlock previously lived, but is kidnapped.

A strange message arrives on Mary's phone:

"Save your soul! John or James Watson. Saint or Sinner? James or John? Younger or Elder?"
Mary hurries to Sherlock's house and reports that it looks like John has been kidnapped and shows the message,Sherlock understands that the message is encrypted: Save John Watson, Saint James the Younger.(VCI,Pattern recognition Sherlock realizes that Watson is in the Church of St. James the Younger, Sherlock steals a motorcycle and he and Mary rush there.At the moment of movement, Sherlock also visually calculated the approximate time of arrival to the Temple.

The police want to stop Sherlock, but Sherlock calculates a new route to arrive at the Temple in about 4 seconds

(VSI,CPI,FRI)

Sherlock and Mary arrive at the Temple, they see: many people are lighting a scarecrow, the scarecrow in which Watson was. Sherlock runs to the scarecrow and saves John

After this, Watson and Sherlock in a house on Baker Street are discussing who could have done this to Watson, Watson makes the assumption that perhaps the kidnapping was committed by members of the terrorist organization that Sherlock was talking about

But Sherlock does not see any connection between the Terrorists and the kidnapping, Sherlock does not understand why the agent gave his life for such insignificant information (Mycroft previously reported that one of their agents found out that a Terrorist underground organization was preparing an attack on London, the agent gave his life for information).

Sherlock again returns to the discussion of the missing man on the subway, Sherlock tells Watson about this man: “Lord Moran, Peer of England, Minister of International

Development, Pillar of Society, has been working for North Korea since 1996," and then Sherlock shows video from the camera of the disappearance between stations Moran.

Sherlock understands that Mycroft's words are absolutely specific, the terrorist organization is not underground, but underground.

And Sherlock returns to the video again: "7 carriages leave Westminster station, but only 6 arrive at St. Jame's park", Moran remained underground in the carriage, the Driver took the train somewhere and uncoupled the last Car. (Observation, Connecting the dots, Overall Thinking)

Sherlock connects the dots: the carriage disappears between stations, Lord Moran along with him, at night Watson was almost burned along with an effigy of Guy Fawkes. Sherlock concludes: "Lord Moran is a peer of the kingdom, he should be in the House of Lords, today is a hearing on the new anti-terrorism law, but Moran will not be there, because today is the fifth of November. Gunpowder, treason and conspiracy" Next, John and Sherlock video call with the Client to whom Sherlock was returning the Hat, and Sherlock learns that the "Sumatra road" station is not in the plans, it was closed before it was opened. Platforms and stairs were built, but due to disagreements, construction was stopped .

Sherlock realizes that right above this page is the Palace of Westminster, in an

uncoupled carriage there is a bomb.(Inductive, Connecting the Dots, Overall Thinking, Pattern recognition,FRI)

John and Sherlock go to the ghostly station, Watson wants to call the police, but Sherlock decides to act on his own, they Johnlock illegally go down to the station, but do not find any Carriage, Sherlock visually imagines how an explosion could engulf the Palace of Westminster (10410 - 10444), thanks to visualization Sherlock understands in which direction the Carriage is located. (VSI)

They find the Carriage, Sherlock realizes that the Carriage is the bomb, Sherlock finds the mechanism that is responsible for the operation of the bomb, but tells Watson that he does not know what to do with it,

Watson: "Think of something, you are Sherlock Holmes, smarter than anyone in

the world.” Sherlock: “However, I don’t know how to defuse the Giant Bomb.” Suddenly, a timer of 2 minutes 30 seconds starts on the trigger mechanism, Watson blames Sherlock for being Sherlock never trusts the police, but Sherlock says it's too late anyway.

Sherlock asks John to leave, but John says that there is no point in leaving, and if they don’t try to defuse the bomb, a lot of people will die.

Watson asks Sherlock to use the palace of the mind, because Sherlock knows everything in the world

Sherlock: “You think I just shoved the answer to the question of how to defuse a

bomb?” Sherlock still uses the mind palace, but nothing works. Sherlock apologizes to Watson for all the pain he caused. Sherlock cries and says: “If it weren’t for me, you wouldn’t be standing here now, you would have a good future with Mary.”

Watson: “You were the best and wisest of those I know, I forgive you”

Watson is already preparing to die, but Sherlock just laughs; it turns out that even during the first inspection of the mechanism, Sherlock found the switch and successfully eliminated the bomb, Lord Moran was detained. (Acting Skills, Verbal Deception, Persuasion,EQE, EQM)

—

Next, we are shown a conversation between Sergeant Anderson and Sherlock about Sherlock’s plan, Sherlock’s words: “Moriarty’s criminal network covered the whole world, and we came up with a plan, Mycroft leaked information about me, Moriarty, in turn, gave us hints, only hints of how wide his web. We let him go because it was important for us to let him know that he had the advantage, I watched Moriarty destroy my reputation step by step. Moriarty had to believe that I was defeated, that he had won, and then he would have made the wrong move,

we had 13 scenarios for the development of events when Moriarty and I would end up on the roof of the house, each scenario was worked out in detail, each had a code name, Moriarty wanted not only to destroy my reputation, according to Moriarty's plan I had to die. The only thing I didn't consider was how far Moriarty was willing to go, he wanted to die. I knew I didn't have much time, so I contacted my brother and everyone got to work." When John arrived at the house on the roof of which Sherlock was standing, Sherlock asked John to stand still and not look away (Sherlock said that he needed John to stand where Sherlock stopped him, since his view was blocked by the ambulance station).

At that moment, a huge trampoline was brought to the place where Sherlock was supposed to fall, on which Sherlock fell, time was of great importance, at the moment Sherlock landed, the assistants quickly removed the trampoline and Sherlock disappeared, but John had to see the body, and Molly, who participated in the plan, dumped the Corpse someone like Sherlock. John, running to Sherlock, still saw Sherlock's fake corpse, and then the Cyclist briefly took John out of the game, giving time for Sherlock to switch places with the corpse on the sidewalk, Sherlock was made up and Sher used a squash ball under his armpit (If you put more pressure on the ball, it will stop for a while pulse), and Watson, approaching the lying Sherlock, became convinced that Sherlock had died.

Sherlock realized that the girl (A girl named Klebet from season 2, episode 3, who Sherlock saved) was screaming because Moriarty had found

a person similar to Sherlock in order to sow suspicion, and having fulfilled his role, this person had to leave the stage, and Molly in one of the morgues found the corpse of a man similar to Sherlock.

What about the killers who were supposed to kill Sherlock's friends - Mycroft's people got rid of the killers. For the plan, also at Sherlock's request, the street was blocked off by homeless people.

Sherlock says that, however, he did not come to Anderson to give an interview, Sherlock understands that it was Anderson and his fan club who arranged the case about the skeleton

Sherlock tells Anderson: "You wasted police time, committed an illegal act, and

distracted me from a terrorist attack that could have destroyed parliament and killed hundreds of innocents.” Anderson cries and apologizes, but then Anderson suspects something in the words Sherlock doesn’t agree: How could Sherlock be sure that John wouldn’t move? What if the cyclist hadn’t hit him? And in general, if this were true, Anderson would have been the last to know about it.

—

Johnlock, Mary, Greg, Molly, Tom (Molly's new boyfriend) and Mrs. Hudson are talking in a house on Baker Street, it turns out that Mary and John are going to get married.

–

My Analysis of Sherlock's "Reichenbach Fall" Strategy(WIP)

The Trial Against Moriarty / First

I want to start from the moment of the first court hearing of Sherlock against Moriarty and the second court hearing where Moriarty was found not guilty at trial

It is worth considering that initially, according to Sherlock's plan, Moriarty should be free

1 At the first meeting, Sherlock said the phrase: “We saw each other twice, for a total of five minutes, and tried to kill each other.”

After this, the judge says that Sherlock cannot act as a witness if he has only known Moriarty for five minutes.

Next, Sherlock analyzes the jury members, the Judge says that Sherlock needs to stop showing off his abilities -> after which Sherlock is kicked out

Sherlock's steps at the first court hearing were necessary for the second hearing to take place - but why? We were shown that it was published in the newspapers: “Sherlock will be in court against Moriarty as an expert witness,” that is, Sherlock’s presence: 1) Either it was mandatory, and Sherlock deliberately postponed the trial by his actions (so that

Moriarty could prepare for his release) or 2) Sherlock voluntarily arrived as a witness in order to postpone the trial in any case. The main goal remains unchanged - so that Moriarty has time to prepare to be found innocent

In both cases, Sherlock's goal is to postpone the trial so that Moriarty prepares to be found innocent

(Sherlock's goal after Moriarty broke into the Tower, the Bank and the Prison was for Moriarty to be free. Sherlock planned for Moriarty to crush Sherlock so that people in the Moriarty corporation would think that Sherlock no longer poses a threat, it is also possible that Sherlock's plan originally included that Moriarty must disappear along with Sherlock -> It is worth considering that the hacking of the Tower, Prison and Bank was aimed at attracting Sherlock's attention, because Moriarty left a message: “Bring Sherlock” -> Then Sherlock probably realized that Moriarty intends to finally crush Sherlock)

2 When the second trial was going on, Sherlock was at home, sending Watson to court alone - when the judge announced the verdict, Sherlock said exactly the words of the judge (the words that the judge spoke at the time he sentenced Moriarty), and when John announced that the jury had acquitted Moriarty - Sherlock immediately began to prepare for Moriarty's arrival at the house on Baker Street.

3 When Moriarty was already talking in the house on Baker Street with Sherlock, Sherlock, while talking with Moriarty, said the phrase: “Have you reached the jury? "

Sherlock at that time already knew that Moriarty would manipulate the jury so that he would be acquitted. Perhaps Sherlock did not appear in court because the jury could ask Sherlock for help, but according to Sherlock’s plan, Moriarty should be free (It is also possible that Sherlock could not appear in court and for another reason that would prevent the release of Moriarty)

(Strategy[Execution control],Planning Preparations,Strategy Building,Risk Assessment,Strategic Analysis, Planning Intricacies,Planning Processing)

Meeting with Moriarty/Second

1) Confirmation that Sherlock could know that Moriarty's plan is to crush Sherlock: When Sherlock and Moriarty were talking together in a house on Baker Street, Moriarty said: "It won't be long before the fall of Sherlock, the fall will be Sherlock" -> Perhaps just in At this point, Sherlock confirmed his guess that Moriarty was finally going to crush Sherlock

2) We saw that after the judge declared Moriarty innocent, Sherlock began to prepare for the arrival of Moriarty, that is, Sherlock knew that Moriarty would come to Sherlock -> Perhaps Sherlock's plan initially included that Sherlock would be able to get a hint directly from Moriarty about that Moriarty intends to crush Sherlock: Sherlock sees in the news that Moriarty has broken into the Tower, Bank and Prison and also sees that Moriarty left a message - "Bring Sherlock" -> Sherlock assumes that Moriarty's plan is to crush Sherlock

-> Based on this, Sherlock begins to build his plan, Sherlock's plan includes the fact that Moriarty must get rid of Sherlock -> Sherlock disrupts the trial so that Moriarty can prepare to be freed from prison -> Sherlock expects that Moriarty will come to Sherlock's house and give a hint as to whether his plan really is to destroy Sherlock

3) But why did Moriarty arrange everything to end up in prison? -> Mycroft in one of the scenes, when meeting with John, informs John that several killers have settled near the house of Sherlock and John -> Also, Sherlock in one of the scenes informs John that the killers are not hunting for Sherlock, but are protecting him, since what the killers need to be in Sherlock's head, they need the code that Moriarty told Sherlock when Sherlock and Moriarty met on Baker Street (The code was the sound that Moriarty created by tapping his knee. Sherlock said this when they met on the roof.) -> Moriarty deliberately set himself as a person who has a code capable of cracking anything, Moriarty probably predicted that

when Sherlock was indirectly told the code, the Killers, knowing this, would protect Sherlock, perhaps even Moriarty himself told the killers that the code was in Sherlock's head -> But what if would killers kidnap Sherlock? This is unlikely, since Moriarty must have known that Mycroft was constantly keeping an eye on Sherlock

This was probably Moriarty's first step, to ensure Sherlock's protection. Also, the killers, while protecting Sherlock, could strengthen the main

Moriarty's strategy to frame Sherlock, because by protecting Sherlock Sherlock literally becomes an accomplice of these same killers

(Sherlock himself says this while the police are hunting for him. It is also worth considering the madness of this achievement from Moriarty, since the code itself is nothing more than fiction) -> Planning

preparations/intricacies/versatility, Fabrication, Strategy Resilience/Foresight/ Deception/Shielding/Analysis/Effectiveness, Indirect manipulation feats to Moriarty

—

Child Abduction/Third

Moriarty's Second Step was the kidnapping of the British ambassador's children. 1) Moriarty should have predicted that this case would be transferred to Sherlock.

2) And Sherlock had to wait for some event from Moriarty for Sherlock to

“launch” his plan

In one of the scenes we can see that Greg personally talks with Sherlock about the kidnapping of children, Greg says that the children of the British Ambassador were kidnapped from the boarding house and a case of such magnitude was transferred to Sherlock -> Moriarty probably predicted that the case of the kidnapping of the children of the British Ambassador was straight from the boarding house will be transferred only to Sherlock
-> Sherlock, after this case was transferred to him, realized that the case was transferred to Sherlock according to Moriarty’s plan (In season 2, episode 3, episode 3536, it is confirmed

that Sherlock realized that the abduction of children was the work of Moriarty, he tells Watson about this)

Sherlock could only do what he always does - solve the case, in this way he would bring the implementation of Moriarty's plan closer.

Sherlock's frame/fourth

After the kidnapped children were found, the girl screamed when she saw Sherlock.

At this point, Sherlock gets the final idea of what Moriarty's goal is - Framing Sherlock. 1) indeed, at this stage of Moriarty’s plan, the police began to suspect Sherlock (We can understand that Sherlock knows that the police will come to detain Sherlock, because Sherlock tells Watson about this). 2) Sherlock in one of the scenes gets into a taxi, in this taxi the mini TV turns on

a video that described how Moriarty wants to ruin Sherlock's reputation and expose him as a liar. Moriarty wants to make sure that Sherlock's boasts about his intellectual abilities are perceived as a lie -> Next, Sherlock gets out of the car and sees that the driver is Moriarty himself

Moriarty's strategy could have been strengthened by the fact that Sergeant Anderson and Sergeant Donovan had a negative attitude towards Sherlock, and the fact that the girl screamed at the sight of Sherlock even though she had never met him before only strengthened Sergeant Anderson and Donovan's doubts that Sherlock might be a liar (Sergeant Anderson and Donovan themselves insisted on detaining Sherlock) -> Strategy

Efficiency/Resilience/Shielding/complexity/deception, Planning

preparations/invincibility/intricacies/versatility

, Fabrication, Misdirection, Indirect/Emotional/Mass Manipulation feat to Moriarty

Further, when Sherlock and John are in the house on Baker Street, Sherlock receives an envelope from Moriarty, in which there was a gingerbread man from the Brothers Grimm -> Based on this parcel, Sherlock probably realized that Moriarty's final goal is Sherlock's suicide, since according to fairy tales Brothers Grimm, the gingerbread man jumps into a well and disappears

After Sherlock is detained by the police, Sherlock allegedly takes Watson hostage

work in progress

Season 3,Episode 2

Introduction of episode

The episode begins with the wedding of Mary and John, which also includes Sherlock as best man.

Sherlock meets his friend Mary (Name: Janine). A waiter passes through them serving drinks, Janine notices the waiter's sweet scent of perfume.

Sherlock says: "The trail from two branded perfumes suggests a problem with an unpleasant odor that manifests itself during times of stress" (Observation, Inductive,EQP)

Next, Major Sholto, John's friend, comes to the wedding

Mary tells Sherlock that John said: Sholto is the most unsociable person in the world.

Sherlock is given the Best Man's word: Sherlock says that when John first brought up the issue of the Best Man, Sherlock was embarrassed, John's request slightly discouraged Sherlock. Sherlock says John has many wonderful qualities. Sherlock did not understand the offer to become best man because Sherlock did not imagine that he could be the best friend,

and certainly not the best friend of John - the kindest, bravest and wisest man whom fate had sent Sherlock as a gift.

Sherlock goes on to say that John and Sherlock took on unusual cases, for example:

(Case:The Sign of Three)

The Case of the Bloody Guardsman:

We are shown a scene in a house on Baker Street, Johnlock and Mary are in the house, Sherlock and Mary are discussing the wedding and reception.

Mary asks about where her cousin will sit, Sherlock's answer when he saw his

cousin's acceptance letter: "I can't stand you with all my heart, second class mail, a cheap postcard, bought at a gas station, licked the stamp 3 times, she has a terrible dry mouth on her nerves." soil", and Mary says that her cousin will sit near the toilet.

(Observation, Inductive,EQP)

Next, John and Sherlock are interested in one case sent to Sherlock's phone: "Dear Mr. Holmes, my last name is Bembridge, I am a private in Her Majesty's Household Guard, I am contacting you with a personal question, I don't want to bring it to the attention of the command, it will seem like such a trifle. I think someone is watching me, I'm used to tourists, this is my job, but this is different, someone is watching me, he takes pictures of me every day, I don't want to complain to the major, but this is driving me crazy."

Johnlock is sent to Private Stephen Bembridge. Sherlock is sitting on a bench next to the court guard where Bembridge serves.

Sherlock asks about Major Sholto, John replies: He led a squad of recruits into battle, but everything went badly, Sholto survived and all the others died, they gave him hell.

John and Sherlock enter the building of the court guard, John is interested in Bembridge at the Senior Major's, John says that Stephen turned to Sherlock and John with a personal question. Sherlock too

asks the privates about Bembridge, Sherlock asks to inform Bembridge that Sherlock and John have arrived.

Next, one of the privates goes into the shower to tell Bembridge that Sherlock is asking him, the Soldier discovers Bembridge dead in the shower. The private goes to the Major and tells him that Bembridge has been stabbed to death in the shower.

The Major and John go to the shared shower, John wants to examine Stephen's body, but the Major orders John to be seized, then they bring Sherlock and report that Sherlock was collecting information here. The Major says that while John was talking with the Major, Sherlock committed murder. But Sherlock asks to inspect them; John and Sherlock do not have any weapons.

Sherlock says that Bembridge is all wet and that he has shampoo in his hair, he went into the shower and then they stabbed him, Private reports that the cabin was locked from the inside, and they had to break the door. (Observation, Pattern recognition)

John nevertheless examines Stephen and reports: There is a deep penetrating wound on the back, a very thin cut, John reports that Stephen is still breathing, John asks Sherlock to give him a scarf, asks to call an ambulance.

The scene switches again to the wedding, Sherlock's words: "Guardsman Bembridge had just returned from the Guard after spending many hours in front of tourists without any incident, and literally five minutes later he found himself dying from a wound in the stomach. There were no weapons around, where did they go? It was the most ingenious murder, which miraculously turned into an attempted murder."

Next, Sherlock wants to move on to another topic, but Greg asks for the answer to the riddle, but Sherlock replies that, unfortunately, he did not solve the crime. The next case Sherlock moved on to is called "One-Day Man."

The scene begins with Sherlock and Watson drinking heavily, and then spending time in a house on Baker Street, a Client comes to them

She says that she met a man, they went on a date, exchanged phone numbers and addresses, but then suddenly the man disappeared.

The woman says that she went to the address the man left, but he wasn't there either. A woman thinks she went on a date with a ghost. The woman found out from the owner of the house that the man who lived there had died. And the woman met with him a week after the funeral, and on the Internet she found something like online communication of girls who met with people from the afterlife.

Sherlock and Watson go to inspect the house whose address the ghost man left for the woman.

Sherlock examines the house, but Sherlock was very drunk and fell asleep on the carpet. The owner of the house wants to call the police and wakes up Sherlock, Sherlock vomits on the carpet.

John and Sherlock end up in a prison cell, but Greg gets them out. Sherlock again

decides to take on the ghost case, Sherlock tells him that other deceived girls will appear, ghosts more often live in lonely houses, this one, on the contrary, prefers company.

Sherlock in a laptop wrote in a chat on the Internet asking questions to women who encountered a ghost man, and then Sherlock visualizes the courtroom and four women, Sherlock asks the names of the women - Gail, Charlotte, Robin, Vicky.

Sherlock's first question - How did you two meet?

Answers: Gail: Came up at the pub. Charlotte: We go to the same gym. Robin: We talked on the bus. Vicky: On the Internet

Sherlock's second question - The man's name

Answers: Gail: Oscar. Charlotte: Mike. Robin: Terry. Vicky: Naughty Sherlock's third question - where did you meet?

Answers: Everyone answered that they met in the man's apartment.

Sherlock's fourth question - What attracted women to him

Answers: Gail: He was fascinating. Charlotte: He listened. Robin: He was nice. Vicki: He's so polite

Sherlock's fifth question - describe it

Answers: Gail: Blonde. Charlotte: Long dark hair. Robin: Red. Vicky: I can't say, I was wearing a mask

Sherlock's conclusions about the ghost man: He assumes the identities of the dead, takes their names from obituaries, all bachelors or widowers, occupies their apartments knowing that they

will be empty for some time. He changes his appearance, steals someone else's house and someone else's identity. (Info gathering, Observations, Connecting the dots, Inductive, Overall Thinking)

Next, Tessa joins the chat. Sherlock's sixth

question is your job

Answers: Gail: Gardener. Charlotte: Cook. Tessa: Nurse. Robin: Security. Vicky: Servant.

Sherlock's sixth question - the perfect date

Answers: Gail: Skeet shooting. Charlotte: Dance. Tessa: Photography. Robin: Wine in front of the TV. Vicky: Cave. Sherlock's sixth question - cosmetics

Answers: Gail: Laurence. Charlotte: Number seven. Tessa: Maybelline. Robin: I don't use it. Vicky: whichever is cheaper.

Sherlock's sixth question - perfume

Answers: Gail: Chanel. Charlotte: Chanel. Tessa: Chanel. Robin: Chanel. Vicki: Estee Lauder.

Sherlock's sixth question - The ideal man

Answers: Gale: must be Domovity. Charlotte: Good kisser. Tessa: George Clooney. Robin: Caring. Vicky: So as not to argue.

Sherlock understands that in his hobbies he follows a certain system.

Sherlock's sixth question - Do you have a secret that no one knows
Answers: Everyone answered no

Sherlock says that they refuted the obvious too soberly. Why does a ghost date girls and then not answer their calls? And why does he change identities?

(Video where Sherlock visualizes the hall https://drive.google.com/file/d/1TEb_L5vbYMiV6ra1KoEvyMMxBwI-cip9/vie w?usp=drive_link)

John suggests that the man may be married

The story of the ghost man ends and the scene switches back to the wedding

Sherlock asks to raise a glass to the great adventures of Mary Watson and John Hamish Watson. Suddenly Sherlock seems to freeze and drops the glass he was holding.

Sherlock is again transported to the courtroom that he visualized, and remembers: Sherlock and John got drunk, spent time in the house whose address was left by the ghost man to Tessa, when the owner wanted to kick Johnlock out, Tessa said that these were famous personalities Sherlock Holmes and his partner John Hamish Watson.

How did Tessa know Watson's middle name? He doesn't tell him to anyone. He told Sherlock a couple of years later. John also called his middle name Irene Adler.

And only once was his middle name made public - at the wedding invitation. Tessa not only knew about the wedding but also saw the invitation, fifty people saw it, and the ghost met with only five girls, one person in both groups. Someone went to great lengths to find out about the wedding, they lied, gave false identities, which means

malicious intent. More importantly, a ghost man is present at the wedding today

.(Pattern recognition, Connecting the dots, Inductive)

The scene shifts again to the wedding. Sherlock walks around the hall and asks the audience: “Who will go to the wedding? Who will make every effort to be invited?”

Next, Sherlock focuses his attention on a random man and his girlfriend: “His girlfriend, dressed in a new and very tight dress, did not bother to remove the thread from his jacket and the dirt from his neck, it is clear that he will go home alone. He is also a fan of comic books and science fiction “(Cold reading, Observations, Abductive)

Sherlock writes a message to Greg on his phone behind his back: Greg must block all routes, and then Greg goes to the “toilet.”

John suggests cutting the cake already, Sherlock says he never misses an opportunity to discuss the “Vatican cameo.”

Mary doesn't understand what the "Vatican cameo" is, John says it means combat readiness, it means someone is in danger (VCI)

Sherlock invites the audience to play murder: Imagine that someone you would choose is killed at a wedding? Who can only be killed at a wedding? Most people can be killed anywhere, as a mental exercise, he planned the murders of friends and colleagues, but Sherlock would have poisoned John, John is a promiscuous eater, Sherlock slipped him chemicals and John didn’t even notice

It is clear that the possibility of murder is rare, since the chosen setting is a wedding. This is someone for whom a planned outing into society with a prior invitation is an exception. The crime must be committed secretly, go into the wilderness where no one will reach or no one will know,that's why we're looking for someone who's obsessed with their own safety.

Sherlock understands that the killer's target is Major Sholto.(Inductive, Observations, Pattern recognition, Overall Thinking, Connecting the dots,EQU)

Sherlock writes on a piece of paper “It’s you” and quietly hands it to Major Sholto. Major Sholto leaves the wedding.

Next, Sherlock tells John that Major Sholto will be killed, but Sherlock does not know how or by whom

Johnlock and Mary go to Major Sholto's wedding hotel room, but the door is

closed, Sherlock reports that the room is unsafe, but Sholto does not open the door. Sherlock says he doesn't know

how the invisible woman does it, so Sherlock will not be able to stop the criminal

Sholto says that if Sherlock finds out how the criminal did it, Sholto will open the door.

Mary asks Sherlock to solve the case.

Sherlock connects the dots and understands how the murder of Bembridge was committed and how the murder of Sholto will be committed: “Major Sholto, the killer will not come to

you, you were already killed some time ago, do not touch your belt, Bembridge was stabbed long before we saw him - through belt, a tight belt pressed on the belt, it's easy to prick with a thin blade through the fabric - you won't feel it. While the belt was fastened, it connected the flesh, and by removing the belt, Bembridge opened the floodgates."(Observations, Pattern recognition, Inductive/Abductive, Overall Thinking)

Sholto says: "When many want you dead it is impolite to contradict them, Mr.

Holmes I think you and I are alike." Cher: "I guess so."

Sholto: "After all, there is a time for death." Cher:

"Of course"

Sholto: "We must accept her when she comes, like soldiers."

Cher: "We should, but not at John's wedding, we wouldn't do that, we wouldn't do that to John Watson."

Sholto opens the door and is given medical assistance (Social Skills) Next, Sherlock and Janine rehearse the Waltz, Sherlock asks to bring a photographer, and Greg brings him, Sherlock looks at the photographs that the photographer took. Sherlock says that the problem is with the person who is not in the photographs.

Jonathan Small, who replaces today's photographer, is known to us as a one-day man - his brother was one of the Recruits who died in that Attack (Sherlock talks about the Recruits who were Commanded by Sholto, when everyone except Sholto died), he planned to commit retribution, talked with Sholto's servants and found something - what is needed is an invitation to a wedding, the only opportunity to see Sholto, And so he made a plan and rehearsed the murder, working out everything to the smallest detail.(Inductive, Connecting the Dots, Overall Thinking, FRI) Next, Sherlock swears an oath that he is ready to rush to help Mary and John and always be where they need to be.

Sherlock approaches Mary and John reports that today he used deduction in some places: "Mary's appetite has increased, her preferences have changed,

She had been feeling sick since the morning. All the signs on your face are signs of three, Mary, I think you should take a pregnancy test. “(Observation,EQP)

Season 3,Episode 3

Introduction of episode

Someone knocks on Mary and John's apartment, John opens the door and meets a woman neighbor named Kate, Kate comes in and cries, saying that her son (son's name: Isaac Whitney) was out at home again, and that he is a drug addict, she says that they have a place where they gather and use drugs.

John decides to get Kate's son out himself and Mary takes John to a hangout where drug addicts gather. John finds Isaac and is about to leave there with Isaac, but he meets Sherlock in the brothel.

John says that John has been gone for a month and Sherlock is already a drug addict, but Sherlock says that he is just leading the case and is working undercover. John and Sherlock go to the house on Baker Street, where they are met by Mycroft, whom John called

Next, Sherlock talks about Charles Magnusson, Mycroft says that Magnusson is not Sherlock’s business, Mycroft says that Magnusson is under Mycroft’s protection, If Sherlock goes against Charles, then Sherlock will soon discover that he went against Mycroft

Sherlock goes into the shower, and then Janine comes out of Sherlock’s bedroom and also goes into Sherlock’s shower.

John says he has questions. Sherlock says he and Janine are together now.

Sherlock about Magnusson: “Magnusson is like a shark, you can’t describe him more precisely. I’ve dealt with many people, I’ve come across psychopaths, terrorists, murderers, but inside I feel numb only from Charles Augustus Magnusson “But John again asks about Janine, whether Sherlock really has a relationship with her, Sherlock says it’s true. Janine invites John and Mary to dinner together.

Sherlock speaks about Magnusson again: “You know Magnusson as the owner of newspapers, but this is a small part of his activity, he uses power and money to obtain information - the more of it, the stronger his power, perhaps I will not exaggerate by saying

that he knows the pain points of all influential people of the Western world, and perhaps everything in general." Next, Sherlock shows John a photograph of Magnusson's house - an impregnable fortress, the place where Magnusson stores all his information. This is the greatest repository of information, truly

the Alexandrian library, everything is only on paper and hidden in a hiding place under the house, and while it is there - the personal freedom of any person is just a fantasy.
And suddenly Mrs. Hudson says that someone came to Sherlock, and then Charles Magnusson himself comes in.

Sherlock says: "Lady Elizabeth Smallwood asked me to act as a mediator in negotiations with you regarding her husband's letters, as I know you used them for Blackmail, she wants you to return the letters back. "

Magnusson says that he is not going to give the letters, says that they are extremely funny and shows the letters, and then leaves.

Sherlock says that Magnusson did something exceptional - he showed the letters. Since he brought the letters to London, then Charles is ready for negotiations, Charles has his own method - Find out a person's pain point and put pressure,I convinced him that I was a complete drug addict and did not pose a serious danger.And since he's in London today, he'll leave the letters in his safe in the London Office while he has dinner with a group of marketers from 7 to 10.(Abductive,Pattern recognition,info gathering,Planning preparations, Strategic deception, Strategy efficiency,Prediction)

In the evening, John and Sherlock went to the London office, Sherlock says that Magnusson's office is located upstairs directly above his private apartment, between us there are 14 levels of security, 2 of which are generally illegal in the country. Magnusson has a personal elevator directly to the penthouse and office; only he can call it using a personal key card; if someone else tries to do this, security will be automatically notified. Sherlock has a key card to the other elevators, Sherlock stole it yesterday. If you use this card, an alarm will go off. If you press the card to your cell phone for a couple of hours, it will demagnetize and stop working, the security system will not work when Sherlock uses such a card, the system will no longer recognize it as

someone else's - but as damaged, and if it is damaged, where does it come from? should they know that Sherlock is not Magnusson? Would the security rush at Sherlock in such a situation? John suggests that most likely not, they will check with Magnusson to see if it is. Sherlock says that for this purpose there is a camera to the right of the door. The user of the card will immediately be seen by whoever is in Magnusson's office - someone from his staff, that is, people who can identify him, now there is almost certainly only his secretary

John asks what will help us?

Sherlock says that the human factor and the purchase of Sherlock will help them.

Sherlock approaches the elevator, puts the card in - and then John hears Janine's voice: "Sherlock, are you crazy, what are you doing?"

Sherlock: "Hello Janine, let me in quickly" Janine: "I can't, you know, don't be a fool" Sherlock: "What do you want to do this here, in front of everyone?"

And then Sherlock takes out the engagement ring, and Janine opens the door. John understands that Sherlock proposed to Janine just to get into the office.(Info gathering,Strategic thk,Strategic analysis, Strategic deception, strategic foresight, Strategy Effectiveness, planning intricacies, planning preparations, planning processing,Seduction, Love Bombing, Verbal Deception, Acting skills, Direct Manipulation, Emotional Manipulation,E.Q.E.FRI)

Sherlock and John go up to Magnusson's office, but for some reason they don't find anyone. And then John finds Janine unconscious, someone hit her on the head.

Sherlock examines Magnusson's chair and says that the chair is warm, it looks like Magnusson is still here, his dinner is cancelled, he is upstairs.

Sherlock smells Claire de la Lune perfume, but it's not Janine's. John says that Mary uses such perfume, Sherlock asks who besides Mary can use such perfume?

Sherlock hears something upstairs and goes there. Magnusson is kneeling and Sherlock hears someone loading a gun, but does not see the face of the person loading the gun, Sherlock enters the room and says:

“If you're about to commit murder, you should change your perfume, Lady Smallwood. “

But Magnusson says that this is not Lady Smallwood.

The man with the gun turns to Sherlock and Sherlock sees Mary. Mary asks if John came with Sherlock? Sherl says that John is downstairs, Sherlock: “Mary, I don’t know what came over you, but let me help.” Mary: “Don’t come closer Sherlock, otherwise I’ll kill you.”

Sherlock: “No Mrs. Watson, I don’t think so.”

Next, Mary shoots Sherlock, Mary says that she is sorry. And then time seems to stop around Sherlock:

.

Molly appears near Sherlock and says: “It’s not like in the movies, right? The blood does not flow like a fountain and you did not fly back, The size of the temporary pulsating cavity is small - the side impact is minimal, you stand motionless, the bullet enters the body, the probability of death is high, we need to concentrate, The palaces of the mind are not bad, but you only have 3 seconds to use them take advantage, think - what will finish you off” Sherlock says that this is blood loss

Molly: “The main question now is forward or backward. We need to decide exactly how you should fall.”

Anderson appears near Sherlock: “One hole or two?” Molly: “Is the bullet still in there or is there an entry hole? It all depends on the gun"

Sherlock begins to go through and visualize different models of pistols, but Mycroft appears and says: “For God’s sake Sherlock, what difference does it make what gun? Don’t be so

stupid - you've always been so stupid, I'm disappointed in you. When you entered, you saw the whole room - remember what was behind you when you were killed, if the bullet had gone through so you could hear?" Sherlock remembers that there was glass behind him, and if a bullet had passed through, Sherlock would have heard the glass crack.

But there was no crack - accordingly, the bullet was still in Sherlock.

Anderson: "So you have to fall on your back, now the bullet is like a cork in a bottle."

Molly: "The bullet itself saves you from losing blood" Anderson: "But any impact on the wound can dislodge the bullet" Molly: "When you're on your back, gravity works for us, fall on your back" Sherlock falls on his back, suddenly Sherlock is conscious loud sounds are heard

Molly: "This shock is the next thing that can kill you." Sherlock:
"What's the solution?"
Mycroft: "Don't go into a state of shock, of course, perhaps there is something in your palaces of the mind that will calm you down, remember, the east wind is coming Sherlock, it will carry you away"

And Sherlock remembers his dog from childhood - Redbird

Molly: "Now you will feel pain, the bullet has made a hole in you, you are bleeding internally, you have to control the pain."

Sherlock in his mind visualizes a mental hospital cell with Moriarty who is in chains, Sherlock asks Moriarty: "You never felt pain, right? Why didn't you feel pain?"

Moriarty: "You always feel pain, Sherlock, but you don't need to be afraid of it. Pain, sadness, loss, death - all this is good."

(CPI,VSI,FRI,Overall ThinkingPain Control) (Link to video (video sped up 2 times) - https://drive.google.com/file/d/1KesgvDDMDGORbs3ptu22d4XU-1C4e1V2/vie w?usp=sharing)

The scene then switches to John Watson, who finds Sherlock, John asks Magnusson what happened, and Magnusson replies that Sherlock was shot. Next, Sherlock is taken away in an ambulance in critical condition without a pulse. Still, Sherlock manages to be saved.

John is in the clinic where Sherlock is, and Mary comes to John, John tells Mary that Sherlock is alive.

Mary enters Sherlock's room and tells Sherlock: "Don't tell him." In the morning, Janine comes to Sherlock and says that he is an unscrupulous manipulator and a scumbag.

In the evening, Greg and Watson drop in on Sherlock and discover that Sherlock has escaped from the ward.

Sherlock finds Mary on the street in Lannister Gardens, and through a homeless friend, Sherlock gives her an earpiece. Mary asks how Sherlock found her?

Sherlock says: Mary will talk to those whom others will not pay attention to. (Prediction, Anticipation,Social awareness, social prediction, EQU)

Houses 23-24 on Lannister Gardens are empty houses, they were demolished many years ago to build a metro line, only the facades remain. Sherlock asks Mary to come into the house

Mary: "Are you the owner of the house?"

Sherlock: "I won it at cards from the Cannibal from Clarence House, I almost lost my kidneys, but luckily I got a Royal Flush. "

Mary sees Sherlock's silhouette at the end of a dark corridor, and Sherlock says: "Mary Morston was actually born in October 1972, she could be in the Chiswick Cemetery, where five years ago you stole her name, date of birth, and therefore her identity, so you have and there are no friends from ancient times (Mary, while they were selecting invitations to the wedding, told Sherlock that she was an orphan and had no relatives), this is an old trick known to people who can determine the code at first glance (Sherlock means the moment when in Season 3, Episode 1, Mary received code messages on her phone and Mary realized from the message that John had been kidnapped). "

Mary takes out the gun again, Sherlock says: “If I am found dead in a house with your face on the façade, even Greg will understand something.”

Sherlock asks how good a shot Mary is?

Mary tosses a coin and uses the gun he had to hit the coin in the air.

Sherlock appears behind Mary - and says, you shot at me from a distance of two meters - and did not kill me, it was not a mistake, it was surgery.

Sherlock says he is taking Mary's case and asks why Mary didn't immediately contact Sherlock

Mary says because John shouldn't know that Mary I lied to him. Suddenly Sherlock turns on the light, and at the end of the corridor there was Watson.

(Planning VersatilityVerbal Deception,Threats,Setting traps)

John and Sherlock, along with Mary, go to a house on Baker Street, and John asks: “Is everyone I care about turned out to be psychopaths?”

Sherlock says: “You are a doctor who went to war, after a month of peaceful life in the suburbs, you broke into a drug den and attacked a harmless junkie, your best friend is a sociopath for whom an alternative to drugs

- deduction. Your owner (Mrs. Hudson) was a secretary and stripper for a drug cartel. John, you’re hooked on a certain way of life, you have an abnormal appetite for risk and everything connected with it, so it’s surprising that the woman you fell in love with fits into this pattern”(EQP,EQU,Social Awareness,PsychoAnalysis)

Next, Mary takes out a flash drive called “AGRA”, Mary says that these are her initials - on this flash drive all the information about Mary

Mary asks Watson not to read the flash drive in front of her, because when he sees what’s on the flash drive, Watson will stop loving Mary. Mary asks Sherlock what he already knows about Mary

Sherlock: “Judging by your skill set, you are a former intelligence agent, you speak without an accent, but you are unlikely to be British, I suspect you are on the run and hiding from someone, living under a different name. Charles Magnusson knows your secret, so you decided to kill him, I think you have become friends with Janine to get to him “(Inductive, Connecting The Dots, Overall Thinking) Sherlock: “So, Mary, what Charles is hiding threatens your life, so it needs to be confiscated and destroyed.”

Mary: “Are you offering to help?”

Sherlock: “Of course, because you saved my life. When I entered the room in which you were holding Magnusson at gunpoint, the solution was simple - kill both of them and hide, but my feelings took over. One precise shot to neutralize me, hoping to win in time, and then secure my silence. You couldn’t have killed Charles

- given that we illegally entered the building, John would probably have been suspected, so you correctly calculated that Magnusson would prefer to use this fact and would not report information to the police, but save it for later “(EQP)

John: “How did she save your life?”
Sherlock: “Called the emergency services”
John: “But it was I who called her”

Sherlock: “She called earlier, you found me five minutes later - if it weren’t for Mary, I would have died.”

Sherlock says that John can trust Mary, then the rescue service arrives, which Sherlock called in advance, since Sherlock’s condition has worsened.

The scene then switches to Christmas at the Holmes house, with Mycroft, Sherlock, their mum and dad, Sherlock's homeless friend (Wiggins), John and Mary. Mary asks John if he read the flash drive? But John simply burned the flash drive in the fireplace, saying that he was happy with his wife the way she was.

Mary and John reconciled.

Suddenly Mary loses consciousness, Sherlock enters their room and tells Mary not to drink tea, John sees that everyone in the house is unconscious, except for Sherlock and Wiggins, it turns out Sherlock asked Wiggins to add something to the tea.

Next we are shown a scene when Sherlock was still in the hospital, where Magnusson and Sherlock meet in the hospital cafeteria. Sherlock offers Magnusson an exchange - Magnusson must show his house, and Sherlock offers Mycroft in return.

Next, the scene switches again to the Christmas house, Sherlock takes the laptop from the sleeping Mycroft, which stores a lot of information. A helicopter arrives and Johnlock goes to Appledore (Magnusson's mansion), then John and Sherlock meet with Magnusson, and it turns out that it was Charles who arranged the burning of John, but Magnusson

He says that he wouldn't let John burn, Charles's people were already ready. Magnusson needed to find Scher's weak spot.

Magnusson goes on to say, "Let me explain how leverage works, John Watson, those who are privy to the matter know that Mycroft Holmes is the most powerful man in the country. Mycroft's pain point is his brother - detective and drug addict Sherlock, Sherlock's pain point is his best friend John Watson, John Watson's pain point is his wife Mary, by getting John Watson's wife I will get Mycroft."

Sherlock gives Mycroft's laptop to Magnusson, Sherlock says that he will tell the password to the laptop if Charles gives all the materials concerning Mary.

Magnusson says that Sherlock made a mistake, a mistake that will destroy everyone Sherlock Loves. Magnusson takes Sherlock and Watson into the depths of Appledore.

They approach an unknown door, Magnusson says that he keeps everything behind this door.

Charles opens the door, Johnlock sees only a white room with a chair in the middle

John asks where are the basements? Charles says that there are no basements in the building, all information is stored in Charles's head, Appledore's treasure is in his mind palace.

Magnusson “I close my eyes and then go down to the basements, I am well oriented in my bins, in my memory, now I will look into Mrs. Watson’s Files” Magnusson visualizes in his mind how he reads information about Mary.

Magnusson opens his eyes and says: “Tomorrow you will become famous in the news as people who tried to sell state secrets, let’s go out, they will be here soon, I can’t wait to see you arrested.” John asks if Sherlock has a plan? But Sherlock is silent.

A whole special forces squad arrives at the Magnusson Mansion in helicopters along with Mycroft.

Sherlock pulls out a gun and shoots Magnusson in the head. Sherlock tells John: “Say hi to Mary, she's safe now.”

The scene switches to the Airport, Sherlock tells Watson that Sherlock will be sent on some mission to Eastern Europe. Sherlock tells Watson that these were the best of times, and they say goodbye.
Sherlock flies away.

Suddenly, after a few seconds, we are shown a scene where Moriarty appears on TV in a bar, with the words, “Did you miss me?” Mycroft calls Sherlock and says: “I hope you learned your lesson, you are needed here.”

And Sherlock returns again.

Season 4,Episode 1

Introduction of episode

Sherlock assumes that Moriarty is still dead, concludes that Moriarty knew that he would die on the roof and decided to prepare a posthumous game for Sherlock (Abduction, Guesswork, Critical Thinking, Analytical Thinking, Convergent Thinking)

The Six Thatchers Case

David Welsbrough celebrated his fiftieth birthday at his home. David's son called, there was strong interference, the son said that the interference was probably due to the fact that he was now in the mountains in Tibet. The son asks his father to come to his car on the street (to his son's car), and then the call stops. A week later, a drunk driver turned towards David's house and crashed into the same Son's car, a fire broke out, after putting out the fire, a charred skeleton was found in the car. The skeleton belonged to Charlie Welsbrough, David's son. Sherlock also learns that two types of Vinyl were found in the burnt-out remains of the car, a forensic examination showed that when the body was discovered, Charlie had been dead for a week

Sherlock goes to the Welsbrough house, Sherlock greets Charlie's parents, and then notices that on the table there is a figurine and a portrait of Margaret Thatcher, intuition tells him that something is missing on the table, Sherlock says: "This figurine is regularly corrected after the servants wipe off the dust , and the portrait too, and in the middle there is an empty space, from here something has recently disappeared "
David's wife says that the bust of Thatcher was recently broken, Sherlock notices that there is a small distance from the floor to the table, and also that the table is located on a thick carpet, how could the bust break? David says that someone broke into them at night and broke the bust, and the fragments found on Sherlock's porch, also interested in why only the bust was broken

Sherlock asks: Was the room dark that night when the bust was broken? David: "Yes"

Sherlock: At the entrance I noticed a damaged motion sensor, I think the light there is always on. When your son called you on your anniversary, he was not in Tibet.

The first part of your conversation was pre-recorded, two types of Vinyl were found in the burnt-out remains of the car - the first was

the seats are covered, and the second type is a copy of it, Charlie put it on himself like a suit, he wanted to arrange a surprise, I think Charlie had some kind of attack - he died there and then. After the accident, the vinyl copy melted and the body was discovered"(Intuition, Observation, Critical Thinking, Analytical Thinking, Concrete thinking, Abstract Thinking,

Linear thinking, Convergent Thinking, Pattern recognition, Connecting the dots, Abduction, Induction,FRI)

Next, Sherlock talks with a client in a house on Baker Street: “Your right hand is almost a size larger than your left - the result of manual labor. Fight smoking - you have 9 disposable electronic cigarettes in your shirt pocket, if you just wanted to smoke, you would buy an electronic pipe, but you you are convinced that you can quit, you buy disposable cigarettes thinking that each one will be your last, you had an affair with a Japanese woman, she meant a lot to you, but not now - you have a Japanese tattoo on your hand with the name “Akako” and you tried to remove it, if you completely wanted to forget her, you would remove the name completely, but it seems Now you don't really care. Your wife left you because you stink and you wear her underwear”(Cold reading, Observation, Overall Thinking, Induction/Abduction,EQP)

Next, Greg brings fragments of another Thatcher bust, which was smashed in another part of the city.

Sherlock goes to a programmer friend and finds out that the Busts were delivered from Tbilisi, there are 6 Busts in total.
Greg tells Sherlock that the busts have been broken again - this time there are 2 busts and a murder was committed in an attempt to steal the busts
Sherlock quietly sneaks into the house of one of the owners of the Thatcher Bust, Sherlock hides for 2 hours, then a man sneaks into the house who was in a hurry to pick up the bust, a fight begins, Sherlock breaks the bust, it contained a flash drive with the inscription AGRA (exactly the same as Mary’s) (anticipation)

Sherlock finds out that the robber knows Mary, the robber reports that he intends to kill Mary, since she is a traitor

Sherlock goes to Mary and reports that he found a flash drive with the inscription AGRA. Mary says that there were 4 agents like Mary, each had such a flash drive, it contained all the information about each of them, so it was almost impossible to betray, in Tbilisi there was an operation to free hostages from terrorists, the word “AMMO” was heard on the phone, and then something went wrong and the operation failed, Mary says

that only she managed to escape. Sherlock reports that one of the agents intends to kill her, he shows a photo of the agent with whom he fought, Mary recognizes him as AJ.Mary puts Sherlock to sleep and goes to Iran, having written a farewell note for Watson in advance.

But Sherlock implanted a tracking device into the flash drive in advance, so Sherlock and John easily found Mary. (Prediction, Anticipation)

Then someone shoots at Sherlock and John - It was Ajay, a meeting takes place between Mary and Ajay.

Anti Feat: AJ followed Sherlock and found out where Mary was. Mary tells AJ: “I thought you were dead, I swear.” I thought I was the only one who got out.

Why do you want to kill me"

AJ: “Do you know how long I was held captive, what they did to me? The whole time I was there I listened to the whispers, to the conversations, so I know that we were all betrayed by you.”

Sherlock: “AJ, what did you hear?” AJ: “What did I hear? - AMMO”
Sherlock: “What makes you think that Mary betrayed you?” Ej: “They said that, they said it was an Englishwoman.” Next, Aj is killed by unknown people

Next, Sherlock discusses the word “AMMO” with Mycroft, Mycroft says that “AMMO” means love in Latin, Mycroft knows the person who introduced the operation in Tbilisi under the code name “Love” - Lady Smallwood, Mycroft conducts an interrogation, but Lady Smallwood denies involvement in the betrayal AGRA Group

Sherlock collects the puzzle, he remembers Mary’s words: “Secretaries know literally everything,” then AJ’s words: AJ said that terrorists reported that he was betrayed by an Englishwoman

Sherlock goes to the London Aquarium, writes to Mary to come to the Aquarium too. At the Aquarium, Sherlock meets an elderly woman and says: “The office said that I would find you here.”

Mary comes up and Sherlock says: “Mary, let me introduce - AMMO” Woman: “Lady Smallwood gave the order, and I sent another order to the terrorists, with a little hint about her code name, in case someone was digging, and it seems that It worked"

Sherlock: “You carried out the operation in Tbilisi for the secretary perfectly (it turns out that the woman’s name is Vivian and she is Lady’s secretary

Smallwood).It’s probably not easy to always be in the background, knowing that you are smarter than many of those who work nearby, a boring routine - every day the same thing, life is in full swing all around, and you go home from work to your small apartment on Wigmore Street - they are repairing the pavement and removing the asphalt, you have a characteristic soil on your shoes, you can’t get away with your salary, almost all the money went to the cottage - right? Besides, you are a widow or divorced, your engagement ring is about 30 years old and you wear it on your other finger,Conclusion - your feelings are alive but you are not married. Considering the number of cats in your life, I vote for the fact that you are a widow, a widow is trying to fill the emptiness in the house, you do not have a new man, otherwise you would not spend evenings at the Aquarium, this may be caused by problems with alcohol, your hands are shaking slightly and red wine stain on the upper lip - so yes, I think that envy was the main motive, the desire to assert oneself”(Observation, Logical Reasoning, Connecting the Dots, Cold reading, Pattern recognition, Analytical Thinking, Concrete Thinking, Abstract thinking, Non-Linear Thinking, Convergent Thinking,EQP,EQU,Social Awareness) Next, Vivian shoots Mary, Mary dies

Case:The Six Thatchers - Solved by Sherlock Holmes

Season 4,Episode 2

Introduction of episode

The episode begins with a scene where we are shown a meeting organized by the famous person Calverton Smith. Calverton says he wants to share a secret that no one will know about. Participants are given a drug called “TD 12,” which is used for minor surgical

procedures and affects memory. Calverton says: “I want to take the burden off my soul. What you hear now will shock you, but you will forget it. I have to kill someone"

A girl named Faith comes to Sherlock, who reports that her father held a meeting a long time ago, where he said that he wanted to kill someone, but she doesn’t remember who, since before the meeting, her father injected the meeting participants with a drug that literally erases memory over a certain period time. All the girl has left is a piece of paper with the inscription “Kill Someone”

Sherlock: “You live in isolation and don’t communicate with anyone, it’s obvious that you are poor and saving money and you have a tiny kitchen, which is doubly offensive because you cook well, you moved to a smaller apartment

after losing your job, or maybe after breaking up with your partner. You haven’t had physical intimacy with anyone for quite a long time.”

Girl: “You couldn’t tell it from a piece of paper” Sherlock:

“But I did it”

.

But Sherlock refuses to take the case, and throws the girl’s bag, she is already preparing to leave, but suddenly Sherlock says: “Your life does not belong to you - Don’t do this. There is a mark in the form of a stripe on your dress, such a mark could only remain if you pinched the dress at the car door

, the trail on the left means you were not sitting behind the wheel, but in the passenger seat. I looked and there was no taxi waiting for you on the street. You left without even thinking about calling him and you arrived without a coat in such rain, Sherlock, your bag is too heavy, I didn’t take your file and you are leaving clearly not intending to return home - there is a gun in your bag.All this would not matter if you didn’t have scars on your left hand that you are constantly trying to cover up. Do you want to commit suicide”(Observation, Cold reading, Thinking [Analytical, Convergent, Linear, Concrete, Critical] ,EQP) Girl: “You didn’t see the scars”

Sherlock: “I didn’t see it, thanks for confirming my hypothesis” (Verbal deception, Bluffing)

Sherlock and the Girl go to a cafe, Sherlock says about the piece of paper: “You see the fold in the middle, for the first few months you hid the folded piece of paper in a book, judging by the crease - on a tightly packed bookshelf,it means you were hiding it from a person living with you under the same roof, and you are in a close relationship that does not imply the presence of secrets, Conclusion - Lover.But then a mark from the button appears at the top of the sheet, which means you didn’t hide it in recent months and it was hanging on the wall - Conclusion: The relationship ended, the paper was exposed to Steam and Smelled of food, which means it was hanging in the kitchen. - You are suicidal, not rich and lonely.And yet you cook with imagination, which means you know how to prepare food. The kitchen is the most visited place in the house and yet no one asked you about this piece of paper, which means you don’t have guests, you are isolated from everyone, the paper has not faded much,but enough to understand that the kitchen window faces east (Sherlock visualizes the view from the window into the girl’s kitchen). Usually we place the board for notes at eye level, where there is natural light, the sun illuminated only the lower two-thirds of the sheet, but the line is even, which means that the board hung directly opposite the window, but since the upper part was not faded, it is clear that the sun's rays fell on the board at an acute angle. If the light could

Penetrate into the Room when the sun was lower, the leaf would fade evenly, If the light could penetrate into the room when the sun was lower, the leaf would fade evenly, but the light penetrates when the sun is at its zenith. And I conclude that you live in a narrow street on the first floor. If sunlight falls at a steep angle on the wall opposite the window at eye level, then what size is the room - It is small (Sherlock visualizes the view from the window to the girl’s kitchen)” Girl: “How did you know that I haven’t had sex for a long time?”

Sherlock: “Looking at the blood stain, it remains from that evening. You see the ink marks above - obviously you discovered that pain stimulates memory and tried again and again.I think your lover must have seen that the number of scars has increased over the past few months, which means you haven’t had an intimate relationship for a long time.”

Sherlock thinks about Calverton’s words: “I will have to kill someone,” and concludes that Calverton is a serial killer, he will not kill anyone in particular, he will kill anyone (

Observations, Cold reading, Logical reasoning, Pattern recognition, Connecting the dots ,Overall Thinking,EQU)

Sherlock publishes an article on his website with the title - “Calverton Smith

- Serial killer "

John Watson is having a conversation with a girl as a psychotherapist, Sherlock interrupts him and he and John Watson go to Calverton Smith at Calverton's invitation

Sherlock learns that Calverton made an advertising campaign from Sherlock's statement: “Calverton Smith - Cereal Serial Killer”

Sherlock says: “Serial murders are manifestations of power and ego. Hiding the need to kill, these criminals have an irresistible desire to be seen, in addition, serial killers are easy to identify - they are usually social outcasts with defects

development” (Psychological Analysis, Criminal Profiling, Social Awareness, EQU)

Calverton invites Sherlock and John to his favorite place - and they go to the Mortuary. Sherlock says that he sent Faith a message (Calverton's daughter from the beginning of the episode) to come to the Morgue too. Sherlock wants to tell Faith that her father is probably a serial killer. Sherlock says: “I spent the whole evening with Faith, she was on Baker Street.”

Faith appears, but Sherlock does not recognize her as the girl who was then with him on Baker Street. Sherlock does not understand what is happening and unknowingly takes the scalpel, John knocks the scalpel out of Sherlock's hands

-

Strategy to catch Culverton Smith

Sherlock is transferred to Calverton Smith Hospital due to the fact that Sherlock has recently begun to use drugs too often

John spends time on Baker Street with Mycroft and Mrs. Hudson, John finds Mary's last message (video disc) in the house.

Mary in the video says: “I entrust you with the Sherlock case, perhaps the most difficult in your career, save John Watson, no one can do this, only you. You have only one way Sherlock - force Watson to save you, challenge the criminal, put yourself at mortal risk. If he understands what you need, he will come.” Then John rushes to the hospital where Sherlock is, he tells Greg that Sherlock is in danger

Calverton Smith enters Sherlock's room through a secret door. Sherlock says: “I want you to kill me.” If you increase the dose of morphine 4-5 times, toxic shock will kill me within an hour, and then you change the dose again.”

Calverton: “How do you feel?” Sherlock:
“I'm scared”

Calverton increases the dose of Morphine

Calverton asks what he owes Sherlock for such pleasure. Sherlock: “I wanted to hear your confession. Find out if I'm right. The morgue is your favorite place - you talk to the dead, you confess to them.”

Calverton decides to strangle Sherlock by covering his nose and mouth.

Suddenly Watson bursts into the room, Sherlock says that he got a confession from Calverton

Calverton Smith: “What are you talking about Sherlock? Sorry, I accidentally discovered three recording devices in your coat pocket.”

Sherlock: “Maybe there really is something magical about the number three,
everyone calms down after three.”

The cane that Watson brought to Sherlock when he was hospitalized for drugs contained a voice recorder. Sherlock also asked the nurse to change the drip; because of the change, Sherlock could not have died due to an overdose of Morphine.

1 Sherlock's first step was to publish an article with the headline that Calverton Smith is a Serial Killer. Sherlock knew that Calverton could not ignore this article, and would try to settle this by inviting Sherlock to his place.

2 After meeting with Calverton, Sherlock realized that Calverton intended to kill Sherlock. Sherlock used his addiction to drugs and his serious condition, knowing that he would be transferred to Calverton Hospital, since Calverton would want to kill Sherlock with his own hands, and Sherlock knew for sure that Calverton would want to kill Sherlock (Because Calverton could simply refuse Sherlock's request for murder, but Calverton still increased the dose of Morphine) (Without drug addiction, Sherlock would not have been able to be transferred to the hospital, although Sherlock's transfer to the hospital could have been under the pretext of the injuries that Watson inflicted on him)

3 Sherlock knew that John would find Mary's recording and understand that Sherlock was now in danger and would come to save him. John realized that Sherlock would put his life in some kind of danger so that John would save him, which is what Sherlock Sherlock was counting on in the situation with Calverton . If Sherlock had simply asked John to help him capture Calverton, John could have simply refused

4 Sherlock predicted that John would bring his cane into the ward, having previously placed a bug in this cane.

5 Sherlock, having predicted that John would go to save Sherlock and by changing the IV, could not have died at the hands of Calverton

6 Sherlock achieved: John still forgave Sherlock because of Mary's death and Calverton was sent to prison

/

Sherlock is transferred to Culverton Smith Hospital because Sherlock has been using drugs too much recently

John spends time on Baker Street with Mycroft and Mrs. Hudson, John finds Mary's last message in the house.

Mary in the videotape says: "I'm giving you a job Sherlock, perhaps the most difficult of your career, save John Watson, it can't be done by anyone but you. You have only one way Sherlock, get Watson to save you, challenge the criminal, put yourself at mortal risk. If he realizes you need him, he'll come."

John rushes to the hospital where Sherlock is, he tells Greg that Sherlock is in danger.

Culverton Smith enters Sherlock's room through a secret door.

Sherlock says, "I want you to kill me. If you increase the dose of morphine four or five times the toxic shock will kill me within an hour, and then you change the dose again."

CULVERTON: "How do you feel?"
SHERLOCK: "I'm scared."

CUlverton increases the dose of Morphine. CUlverton asks what he owes Sherlock for this pleasure.

SHERLOCK: "I wanted to hear your confession. To see if I was right. The morgue is your favorite place - you talk to the dead, you confess to them."

CUlverton decides to strangle Sherlock by covering his nose and mouth. Suddenly, Watson bursts into the room, Sherlock says he's gotten a confession from Culverton.

Culverton Smith: "What are you talking about, Sherlock? I'm sorry, I accidentally discovered three recording devices in your coat pocket."

SHERLOCK: "Maybe there really is something magical about three, everyone calms down after three."

The cane Watson brought Sherlock when he went into hospital for drugs had a tape recorder in it. Sherlock also asked the nurse to switch the drip, because of the switch Sherlock could not die because of Morphine overdose.

1 Sherlock's first step was to publish an article with the headline that Calverton Smith was a Serial Killer, Sherlock knew that Calverton would not be able to ignore the article and would try to settle it by inviting Sherlock to his house.

2 After meeting with Culverton, Sherlock realized that Culverton intended to kill Sherlock. Sherlock took advantage of his drug addiction and his serious condition, knowing that he would be transferred to Calverton's hospital because Calverton would want to kill Sherlock himself, and Sherlock knew for a fact that Calverton would want to kill Sherlock (Because Calverton could have simply

refused Sherlock's request to kill him, but Culverton did increase the dose of Morphine) (Without the drug addiction, Sherlock could not have been transferred to the hospital, although Sherlock's transfer to the hospital could have been on the pretext of Watson's injuries)

3 Sherlock knew that John would find Mary's tape and realize that Sherlock was in danger and would come to save him.John realized that Sherlock would put his life in danger in order for John to save him, which is what Sherlock was counting on Sherlock to do in the Calverton situation. If Sherlock had simply asked for John's help in capturing Calverton - John just might have said no

4 Sherlock predicted that John would bring his cane into the ward by placing a bug in the cane beforehand.

5 Sherlock predicted that John would go to rescue Sherlock and by tampering with the drip there was no way John would die at the hands of Culverton.

6 Sherlock Achieves: John did forgive Sherlock over Mary's death and Calverton was imprisoned

Culverton Smith Case: Solved by Sherlock Holmes

Sherlock is discharged from the hospital, concludes that it seems that Calverton Smith's daughter was a hallucination (when he spent time with her on Baker Street) and perhaps the drugs opened a certain “Door” in Sherlock's mind.

In the house, Sherlock finds a note left by the very girl with whom he spent time, believing her to be Calverton Smith's daughter. John again talks with a psychotherapist. The therapist says: “We spent a wonderful night with Sherlock, eating chips. Calverton gave me a real note from Faith, we were introduced to him by a mutual friend, I added a couple of details for Sherlock, he quickly found them.”

The girl takes out a gun and introduces herself as Eurus Holmes, the sister of Mycroft and Sherlock. And then shoots John.

Season 4,Episode 3

Introduction of episode

Mycroft spends time in his personal cinema, suddenly a recording of Mycroft's childhood turns on, and then the inscription "I'm Back" appears. Mycroft tries to leave, but the door does not open. The lights in the house have completely gone out and Mycroft hears someone's footsteps.

Mycroft says: "Maybe you'll finally show yourself? I don't have time for games. Who are you?"

Mycroft hears someone's childish whisper: "We have time, dear brother, we have time." You know who I am"

Mycroft: "It's impossible, you can't get out" Voice: "Nothing is impossible"

Suddenly a Clown appeared, Mycroft pulled out a gun, but the gun was unloaded

Mycroft tries to escape, Sherlock suddenly appears and says: "The experiment is completed - conclusion, I have a sister." Conclusion two - my sister Eurus Holmes is in a strictly guarded institution, conclusion three - you are mortally afraid of her."

Then John appears and says that Eurus is free, Eurus shot John with a tranquilizer

Sherlock: "Moreover, she was John's therapist."

(Psychological Manipulation, Fear Mongering, Indirect Manipulation, Complex Manipulation, Emotional Manipulation, Strategic Effectiveness, Strategic Deception)

Mycroft reports that this is impossible - Eurus is in a strictly guarded facility called Sherrinford.

Sherlock wonders why he doesn't remember his sister. Mycroft says that Eurus was the "Genius that defines our age." Mycroft says that Sherlock liked to spend time among strange fake tombstones with wrong dates - a terrible architectural joke. Sherlock had a dog named Redbird, Eurus locked him in a place where no one could find him and refused to say where he was, Eurus said that the key to freedom was in this song: "And somewhere was lost, go

look for me, and dig a hole where the old Beech grows, the east wind blew, it wants to help me, you trust the wind, it will lead you to the goal." Redbird was not found, and Sherlock was so depressed that it was as if he had completely forgotten about the existence of Eurus.

Next, Eurus burned the house in which the Holmes family lived, and Eurus was taken away. Now Eurus is on an island called Sherrinford.

Mycroft, Sherlock and John go to Sherrinford, they steal a boat, Mycroft dresses up as his grandfather and they get to Sherrinford in order to infiltrate there, they arrive on the island, the guards immediately arrest them and take them to the director of the island, the Director of Sherrinford sends Mycroft and John to camera for interrogation, the chief gives the guard his pass and asks him to carefully monitor Eurus. The director suggests that the grandfather is Sherlock in disguise.

But in fact, Sherlock was dressed as a security guard. (Strategy alignment, Strategic Deception, planning preparations,Disguise,Misdirection)

The boss asks Mycroft why this performance was needed? Mycroft says that now no one can be trusted, perhaps Eurus got out of Sherrinford and left the island.

Sherlock goes down to Eurus, she is playing the violin, Eurus is in a room without protective glass - it was a trap, she attacks Sherlock and leaves him unconscious.

It turns out that Eurus got out of prison by manipulating the guards and employees; the guards took John, Mycroft, Sherlock and Director Sherrinford hostage.

They are locked in a closed room with a TV. Suddenly a girl's voice is heard in the room, she says that she is on a plane and that they will soon fall, the connection is interrupted.

Eurus appears on TV, she has the prison director's wife hostage, Eurus says that they have a gun in the room, and the wife can only be saved if John or Mycroft kills the director himself. Neither John nor Mycroft decide to kill, the director takes the gun and commits suicide. But

Eurus kills his wife anyway. A secret door opens in the room, Eurus says that there are a couple more tasks for them. In the next Room there was an envelope and a rifle on the table

Eurus says: “Six months ago, a certain Evans was killed, he was killed from a distance of 300 meters from this rifle, there are three suspects - the brothers Garrideb, Nathan, Alex, Howard. The envelope contains their photographs. Who shot? Eurus also reveals that she took the Garrideb brothers hostage, whoever Sherlock points at will be killed. (There was a window in the room where Sherlock was, Eurus hung the Garrideb brothers on ropes so that Sherlock could see them) Sherlock: “Nathan wears glasses, Evans killed from 300 meters, with such a caliber the recoil will be very large, Nathan has no cuts or scars, which means neither Nathan fired. Sherlock examines Howard - pale skin

, red porous nose, attacks of delirium tremens, it is doubtful that he hit from 300 meters. Alex - quite obvious dents on his temples indicate that he wears glasses, a crease between the eyebrows - he has been squinting all his life” Mycroft: “Alex had myopia, he recently had laser correction, look at his clothes”

Sherlock:"Alex has a great suit, He took off his glasses and suddenly saw himself in a different light, he even has a self-tanner on his face, but he’s clearly not used to taking care of himself, this can be seen from the condition of his nails and his hair is coming out of his ears. But the Vision is improved and the hand is steady to pull the trigger - he killed Evans.”

Eurus says Sherlock is right, but she kills everyone.

(Cold reading, Induction, Overall Thinking[Analytical, Concrete, Critical, Convergent, Linear], Pattern recognition, Observation, Connecting the Dots,EQP)

In the next room there is a coffin in front of Sherlock, he must find out who this coffin belongs to.

Sherlock: “The coffin is intended for someone who is short, most likely a woman.”

John: “Not a child?”

Sherlock: “A children’s coffin would be more expensive, this coffin is in a different price category, but still the best in its class. This is a practical and informed choice,

the balance of probability suggests that the coffin is for an unmarried woman who is not close to her family,this is evident due to the economical design, people are aware of the loss but treat the funeral procedure without stupid conventions”

Mycroft: “Wouldn’t it be easier to look at the coffin lid?” On the lid was written “I love you”

Sherlock deduces that the coffin is for Molly Hooper (Observation, Pattern recognition, Overall Thinking,EQP)

Eurus: “Her apartment will explode in 3 minutes if I don’t hear the saving code from her lips, I’ll call her from your phone, she must say that she loves you, but you must not mention that her life is in danger.”

Molly tells Sherlock on the phone that she loves him

They enter the next room, Eurus says that from now on there will only be two people left.

Mycroft: “Sherlock, you won’t start a discussion, say goodbye to John and shoot him, there is no doubt who should continue the game, any game requires brains Sherlock, shoot without sparing. Sherlock - you've always been a stupid pathetic idiot, everyone's disgrace, that's why I've always despised you, for once in your life do the right thing.”

Sherlock: “Don’t listen to him John, he just wanted to make it easier for me to shoot him, but now it will be much more difficult” (EQP, Social Awareness)

Sherlock aims at his head and starts counting to 10. Darts with sleeping pills fly into their backs, and they fall asleep(Sherlock, presumably knowing that Eurus would not allow Sherlock to kill himself, decided to commit such a bluff)

(EQU)

Sherlock wakes up in an unknown room, and Watson is in a well. John says that he is in a well, Sherlock does not understand where the well comes from in Sherrinford, he understands that the walls in the room are false - he ended up in his childhood home.

The Girl calls Sherlock again, Sherlock asks the girl to go into the cockpit with the pilots, it turns out that the pilots are also sleeping, the girl says that she sees a river and a big wheel.

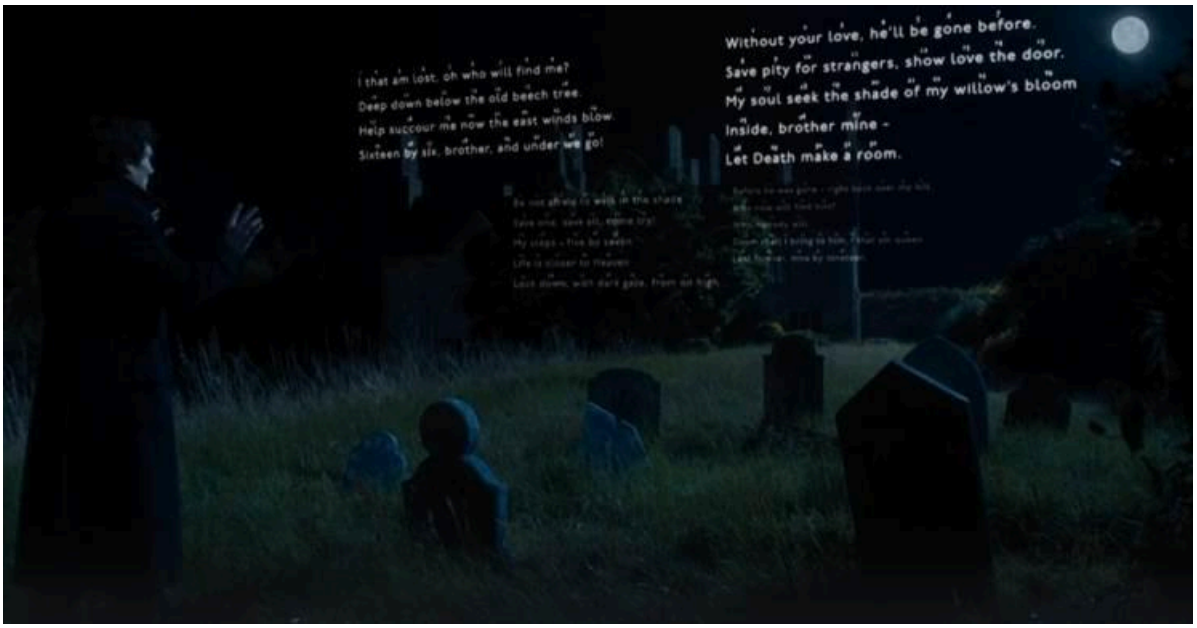

Eurus says that Sherlock will have to solve the case with Redbird, otherwise John will be drowned. John says that he found bones at the bottom of the well, but the bones are not dog bones - these are the bones of a child. Sherlock remembers a friend named Victor Trevor, he was Redbird, Eurus says that because of the loss of Victor, Sherlock was so upset that he invented a fairy tale for himself. Eurus says that she also wanted a friend, but she didn't have anyone.

Sherlock remembers one tombstone: "Nemo Holmes" - Nemo is Latin for "Nobody"

Sherlock realizes that the gravestones with incorrect dates (which Mycroft spoke about at the beginning of the episode) are the key to the solution.

Sherlock realizes that Eurus used the wrong dates as the cipher key, and the cipher was a song about the East Wind.Sherlock visualizes the songleaves the words of the song that match the numbers on the tombstones. Sherlock is left with the words: " I'm lost, save me brother. Without your love, save my soul, look for my room"

. Sherlock finds the answer and saves John.(11810 - 11910, VSI,VCI,Pattern recognition, Connecting the dots, Deduction, Overall Thinking) Sherlock visualization:

Sherlock runs back home, Sherlock asks the name of the girl who was on the plane, but the girl says that she doesn't give someone else's name. Sherlock enters some room in the house and says: "But I'm not a stranger." I found you Eurus, I am your brother."

Eurus: "Are you playing with me now, Sherlock? We're playing a game." Sherlock: "A game, yes. The song was never a set of instructions." Eurus: "I'm on the plane, I didn't crash. Will you save me?

Sherlock: "Your brilliant mind came up with just the perfect metaphor. You are all alone in the high sky, and you understand absolutely everything how to land, and I'm just an idiot. But I am on earth, I will bring you home."

Eurus: "No, it's too late" Sherlock:

"Don't be afraid of anything"

Eurus: "Closing my eyes all the time, I found myself on the plane, I was lost, I was completely alone, no one could hear me."

Sherlock: "Open your eyes and see that I'm here, and you're no longer on the plane, you're no longer lost, tell me how to save my friend, let's save John Watson."

Sherlock saves John, Eurus is taken away by the police.

Eurus Holmes Case: Solved by Sherlock Holmes
