Very small RICHTOFEN Outsmarting DOC

Intelligence terms from here.
Made by:Banesmanifold

Red: FSIQ & FSEQ

Cornflower Blue: Strategy + Planning
Green: Reasoning + Thinking
Purple: Deception + Manipulation
Black: The Story
Light Green: FSSQ + Psychology
Orange: Foresight (Prediction and/or Anticipation)
Pink: Crystallized/Fluid/ = General Intelligence + Academic Intelligence, Knowledge, and Multi-Tasking
Gray: Elaboration
Dark Blue: Info-Gathering/Control, Perception, Seeing Through People, Trap Evasion, Setting Traps, Decision-Making, Influence, Intuition, Problem-Solving, Creativity, Observation, Cold Reading, Hot Reading, and Connecting the dots.

WARNING: this doc will not contain every single Richtofen feat. Considering how big the lore is and how much gameplay there is to the Call of Duty games. I will only mention all the bigger feats presented in this video right here:
The Complete Unabridged Timeline of Call of Duty Zombies (World At War -...
Thank you to everyone who reads the doc.

When he was part of the Nazis, Richtofen used to use psychological torture to get the information out of his victims. The methods we do not know of sadly however what we do know is his stuffed animals. He would pose most of these stuffed animals for 2 reasons. 1. To give the victim an uneasy feeling as they are tortured so he could have an easier job at gaining that information. 2. Uses it as a way to make the victim feel fear before they eventually die. Making sure they do NOT have a happy death.
(EQU, Associative Thinking, Psychological Insight, Information Gathering, Emotional Manipulation)

Richtofen is currently trying to make a Time Machine. Which he is so confident and so interested in that he will use himself as an experiment to see if he was right or wrong.
(EQE, Charisma)

When Richtofen was teleported to Shangri-La he quickly adapted to his surroundings, finding the tribes there. Which he started manipulating by introducing them to modern technology. Since they were very much, not developed in terms of technology they viewed him as some sort of god. When he was at this status he convinced them and rather easily to start mining. So that he can discover more about Element 115 and just this place in general.
(Adaptability, Leadership, Planning Aim, Direct Manipulation, Mass Manipulation, Logical Manipulation, Persuasion, Non Verbal Deception, Influence, probably more)

Richtofen overtime realized Maxis's goals wasn't to do research however to simply help the Nazi party. So instead of helping Maxis, he helped himself. As studies showed the pyramid is able to suck in souls of something that has been killed. So he contacts America and Russia for trusted scientists. It works and now finally Maxis helps with the teleportation. They did 5 tests before, however on the 5th test we see how Richtofen has psychologically damaged Maxis. So much to the point where Maxis starts using his own dog for test #5, however test #6 is where we see Richtofen's full plan come into fruition. Truth is he planned for test #5 to be the dog. He knew that Maxis would call test #5 a failure as the dog disappeared but never reappeared. He makes sure that Samantha also goes in the room. He knows she would go in there as she would be looking for the dog. He knows the emotional connection she shares with the dog as Maxis has been avoiding Samantha leading to Samantha only relying on the dog for support and comfort. When Samantha goes into the room, Richtofen closes the door. He ends up turning on the teleporter, as now they are his 6th test subject. Where they went he didn't care. He hoped it killed them outright but all he knew is that now they are gone. To never be seen again.

Edit: I almost forgot to add this, however also during this he makes sure to make his main emotion naiveness. As that would lead Maxis into saving his granddaughter instead of letting Richtofen be the only one to do it. He focuses on managing his own emotions as well through out this entire plan. When he was helping Maxis with plans he made sure he seemed as obedient as possible and as loyal as possible

(WMI, FRI, EQU, EQE, EQP, Psychological Insight, Psychological Warfare, Long Term Planning, Planning Aim, Planning Intricacies, Tactics, Memory, Knowledge, Crystallized Intelligence, Analytical Thinking, Holistic Thinking, Critical Thinking, Multitasking Thinking, Inductive Reasoning, Abductive Reasoning, Setting Traps, Prediction, Indirect Manipulation, Emotional Manipulation, Non Verbal Deception, Strategic Deception, Practical Deception, Cunningness)

(Since there are 2 different sections here. Imma use group to describe Hollywood and crew to describe Richtofen and his teammates)

Richtofen is able to convince a group of Hollywood actors to help him find a secret artifact he needs for his machine. When he got there along with his crew he already knew that the group he sent there were in a time loop. So since he didn't have a key he needed to use the groups infinite time loop to his advantage. Richtofen is aware of how dangerous his traps are so he used them and killed them over and over again to get rid of the traps.

(VCI, Crystallized Intelligence, Trap Evasion, Short Term Planning)

Richtofens plan against Samantha is a rather interesting one. So it starts pretty simple. Use the machine he just built to put his soul into the machine. He knew plan A would never work, He also knew about the Maxis's plan B and his plan to counteract/evade that one is to simply just do it better then he does. This would boggle down to who could manipulate/persuade better. Even while Maxis had the huge advantage due to his ability to merge with electricity. Maxis's manipulation is rather flawed as the people who he were controlling eventually broke out of it due to them KNOWING he's lying to them. Richtofen on the other hand could only communicate through Zombies. Which made it a LOT tougher for him. However, to make sure Maxis didn't win. He started to control a group called "The Flesh" . This group is known for eating zombies. Because of them

eating zombies Richtofen is able to communicate with them. Because of this he starts using his own influence to manipulate them. This sadly led to Richtofens men being killed in the process. There is still one survivor named Stu. Stu is apart of a group and they start working in Maxis favor by turning on polarization devices. To combat this Richtofen teleports them through the dark ether in numerous places, Like Chinatown. However so that he keeps them in check and doesn't fuck up his chances, he makes sure to teleport them so they can do favors for Maxis. Sadly this all fails and Richtofen loses. To make sure he doesn't die he puts his soul in a zombie.
(Foresight, Setting Traps, Trap Evasion, Overcoming Limitations, Versatility, Leadership, Influence, Mass Manipulation, Emotional Manipulation, Planning Contingencies, Emotional Understanding)
NOTE: this does NOT count as an anti-feat for Richtofen. Neither is Maxis>Richtofen. Simply put, Maxis had a huge advantage over Richtofen. Being less mentally deranged and having more to his favor largely helped him.

NEW TIME LINE: this should be noted however after these feats there's a new timeline we have to follow. Since this Richtofen is considered smarter in terms of everything compared to the other Richtofen.

Richtofen makes sure to study Maxis for a year. He is skeptical of what Element 115 can do. He makes sure to remember every single moment of Maxis life and compare it to now. He also makes sure to compare it to the world around him. He's aware of how zombies come back so he preserves Maxis's brain just so he can make sure he doesn't turn into a zombie as well.
(FRI, EQU, EQP, Observation, Memory, Information Gathering. Visual Perception, Abductive Reasoning, Crystallized Intelligence, Critical Thinking, Convergent Thinking, Holistic Thinking, Associative Thinking)

Richtofens plan throughout albatross is a unique one. So the past version of Richtofen makes sure his future version has witnessed everything in albatross. Since he gains the knowledge of the future Richtofen due to the paradox he is in.

He manages to gain access to the warden, which is important because the Warden worshipped the Shadowman. The reason why he does this is simple. He knows that if the Warden kills the 4 people in the prison, the Shadowmans trap against Richtofen will succeed. As if the Warden kills the 4 people in the prison, the prison would turn into a pocket dimension. A purgatory basically. Richtofen does not succeed in this plan and it does indeed turn into a pocket dimensions but we will see why later.

Richtofen gains access to the Kronorium and reads it all. This book contains quite literally EVERYTHING in history together. With that being higher dimensional plains of existence, infinite sized universes, all possible futures etc. Richtofen gains access to everything.
Edit: forgot to mention this, however this allows him to see EVERY possibility and EVERY timeline at the same time. Being able to visualize them perfectly and instantly.
(MASSIVE CPI, MASSICE VSI, MASSIVE knowledge, Foresight,)

Richtofen is able to quickly tell who the Shadowman has been manipulating. The Reporter has appeared at his secret base and Richtofen tied him to a chair. He deduces quickly that this is a henchmen of the Shadowman. Mainly due to the fact that the reporter knows where the secret base is and the fact he's only searching for a metal artifact. Which is what Richtofen has.
(FRI, Cold reading, Logical/Deductive Reasoning)

After Richtofen kills the reporter he simply waits. He predicts that the Shadowman will go through with his plan and will successfully manipulate the 4 people into helping him. He also predicts the 4 people will soon realize that they are being manipulated but the Shadowman. I feel like I should mention this. Everything from the Reporter feat(the one above that one) to now was a giant plan. So that he could gain the key and come closer to saving the universe. He set up a big trap for the Shadowman and ends up doing to him what the Shadowman tried to do to Richtofen back all the way in Mob of the Dead.

Edit: We understand now why Richtofen allowed The Shadowman to make his purgatory dimension. He purposely put himself in those traps and allowed the Shadowman to do them so he would get overly cocky and so that Richtofen would become more unpredictable to The Shadowman.
(Divergent Thinking, Critical thk, Logical thk/rsn. Prediction, Concealment, Fabrication, Misdirection direct and emotional manipulation and planning all cats except versatility, and contingencies)

Richtofen makes sure to keep his intentions secret. So instead of making it obvious the first time, he just puts the orb up next to the body and takes the soul. Which nobody knows that he took the soul so they are all wondering what happened.
(Non-Verbal Deception, Practical Deception)

With blood vials he has found a way to cheat death. These blood vials contain the blood from people in totally different dimensions that were no longer going to exist. Which is the purpose of the base in Alcatraz he built long ago. The blood was gonna protect Richtofen. With the blood vials in possession, it would preserve their lives and create a time paradox.
(Long Term Planning, FRI)
