PATRICK JANE TEAM REVIVE STRATEGY:

MADE BY Hassan Mustafa

(LONG TERM PLANNING,COVERAGE,INTRICACIES,FORMULATION SPEED, INVINCIBILITY, SENSORY,STRATEGY FORESIGHT,STRATEGY COMPLEXITY,STRATEGY SHIELDING , INDIRECT MANIP, LOGICAL MANIP, FORESIGHT)

-Episode starts with jane being rehired back into the cbi due to his gift for closing cases and he is assigned to a new team jane starts planning right from the start of the episode
-Jane meets ray hafner and starts working on the cases jane deduces info but does not tell the team sabotaging them in there investigation

-Jane meets lisbon and asks for info about Ray Lisbon tells jane that he is tough and by the book and his speciality is surveillance
Jane remembers this as and implements this into his strategy proving his versatility and process
-Jane meets rigsby and he tells him that cho is also getting his job be it temporarily jane again inputs this into his long term plan and strategy and also van pelt has yet to hear about her job jane tells rigsby that to tell cho and van pelt they are gonna have a secret meeting but later

-As jane enters his cbi office Niskin his new team member says to another new team member Tork that he is 20 “Short” on tuesday Man up Jane notices this and uses it against Niskin even if he didnt mean it like Jane made it to be

-Tork Asks jane that he used to be in the circus jane says not really as he notices Tork Wearing Lifts realising his insecurity and using Niskin’s Words To verbally Deceive him framing Niskin Which would make jane not a suspect as he would swiftly move out of the situation which will also cause there boss to not listen to them as will happen and be explained later (giving insight to jane deception and strategy complexity and shielding as well as His EP EU Logical Manip Indirect Manip)

-Jane compliments Tork on his lifts then proceeds to gaslight Tork by saying that he doubts that Niskin meant that he was “short” and that he doesn't agree if Niskin meant it like that to which Tork agress as jane is making Tork Be on his good-side dividing and conquering

-Which further works when Hafner asks for a report and Tork goes to listen playing with the ball and Niskin tells him to stop doing that which further improves jane’s strategy

-Hafner Ask’s jane that his thing is reading people and shows him a picture and he is standing at least 10 feet away and jane perfectly sees the picture and all the little details and perfectly profiles the man in the picture as a narcissist with perfect cold reading and sensory and eye for detail as he saw details in a picture at least 10 feet away

-jane wants to go with hafner as cho arrives saying hafner wants to talk to him hafner and cho go to his office

-hafner bribes cho that he can get his job back if he keeps and eye on jane since cho made hafner a little salty when he asks if jane is smarter than him as cho says yes hafner then pushes cho as cho agrees to keep an eye on jane

-As we come back to jane he is at Niskin’s table looking at his sons picture he waits till the moments tork goes out but is in range to see and hear what niskin is doing and but not hear intimate conversation from the kitchen which is also a VSI feat as jane is advancing his strategy jane asks if his sons is as tall as Niskin because Niskin is very tall to which he replies No then jane says so what he is about tork’s size causing him to laugh out making tork hear as Niskin points with his hands how tall his son is to which tork sees and thinks that Niskin is making fun of his height since he can't hear the convo of jane which is perfect manipulation and gaslighting emotional manipulation as jane is not even physically present there to gaslight tork but do to his thinking ahead he has created a mole inside tork’s head that niskin is making fun of him and there could be no other possibility which again is as jane planned from the first time he talked with tork framing Niskin and is insane indirect emotional logical manipulation and gaslighting and him not even being physically present is manipulating both parties to perfection through suggestion and mind control

-Jane comes out and puts his tea cup looks with a disappointed face to Tork as tork asks that if Niskin was talking about him Jane says he needs to make an important phone call further gaslighting tork and ignores him which further makes him believe that Niskin was making fun of him and is perfect though process and mind control from jane

-Jane makes a phone call and asks for a special item

-Jane goes to the gym with hafner he then asks how many clients was the victim sleeping with as the lady manager there says that she has no names to which jane replies except ur own to which she says yes many years ago which honestly cant even be put into words how insane STP this is jane managed to see through her and found her relationship with the victim years later and u can find relationship b.w people if they broke up in a short time span seeing through many year old relationship which doesn't even have body language clues or anything jane managed to see moments in meeting with the manager insane EP EU displayed by Jane She even says that she briefly had a thing which makes it more insane

-Jane then roams around the gym finding a lady and asking her how good was the victim in bed again insane STP and deduction causing the lady to fall on the treadmill

-Cho goes to interview her as she asks how did jane knew cho says that her eyes were puffy

-Now as the interview ends Niskin Cho and Jane return to the office as Tork Screams Niskin and raises a bag saying u think this is funny and takes out a pair of white female lifts and the bag has a note on them saying “Tork try these lifts” tork goes to Niskin asking if he thinks this is funny Niskin replies laughing that he doesn't know about his lifts but these are real funny causing Niskin and Tork to have a fight All orchestrated and manipulated by Jane and perfectly anticipated and predicted by jane due to his innate understanding of both characters and his perfect manipulation of there emotional level this causes Tork to be fired

-This is insane indirect and logical manipulation from jane to basically explain jane firstly started manipulating tork and Niskin dividing both of them gaslighting tork into believing that Niskin was making fun of him while simultaneously making Niskin believe that everything is alright now by further gaslighting tork he makes him go off the edge but before this jane perfectly anticipates hafner by understanding his though process that he will higher cho to keep a look on him not telling cho about his plan also manipulating hafner through cho by making him think that cho wants his job and that he will surely report each and everything to hafner this is before there secret meeting which jane has planned and will be explained later which jane yet has not conducted perfectly anticipating each and every move then he after

he pushes tork of the edge he perfectly anticipates larouche’s thought process that he would want to bring in van pelt back to the job to which hafner can do nothing indirectly manipulating him thorough larouche who dosent even know what is going on which also shows jane’s purely insane strategizing ability as he had planned all of this from the start even him telling rigsby about the secret meeting and not cho was planned since it could tip hafner off and now hafner knows that this is all due to jane’s doing he cant do anything which is again insane complexity shielding resilience aspect of his strategy as well as foresight jane has indirectly manipulated tork niskin cho larouche hafner rigsby and this concludes his first part of the strategy as his strategy dosent end here

-To explain Janes Phenomenal Complexity And Resilience part of his strategy which is so perfectly executed that even if hafner tells larouche about what jane did larouche cannot do anything as it would make hafner be deemed unfit for the job

-Even hafner not telling larouche or bertram is just outstanding strategic Resilience To uphold a strategy and present it in front of a person knowing well that they cannot do anything to break it also presents us with the admirable complexity regarding this strategy also

- Jane Manipulating Tork And Niskin To have a fight → Leaving a mark on the leadership of hafner and controlling of his men → making hafner be in a vulnerable position where he cant take any action against jane → where jane has all the control of his strategy → Even if hafner decides to tell larouche or bertram about this this will only make things worse for him → bertram would just take hafner out of commission make jane easily reunite his team back again but since hafner cannot let this happen → hafner does not tell anyone about what has just happened causing van pelt to come back as part of the team again leaving hafner with no choice to work → Even if hafner decides he doesn't want to work with van pelt or make a case van pelt’s expertise in the area is required which is precisely why jane used this strategy because bringing lisbon would mean that team needs a new leader which hafner already has cho is already back on the team and rigsby has a short time job leaving only van pelt to fill in the blank which is perfect decision making by jane → Lastly If hafner decides he again dosent want to work he will be ruining the job and life of another fine agent masterson which is again calculated by jane causing him to not take action of this nature this shows that no matter what steps hafner takes he ends up in a perfect loop which is brilliant and the immense strategy complexity and resilience made by jane through manipulation and this also causes him again perfectly execute his next sequence of the same strategy

(COVERAGE,INTRICACIES,INVINCIBILITY,STRATEGY COMPLEXITY,RESILIENCE,SHIELDING,STRATEGY ALIGNMENT, FORESIGHT,MANIPULATION,DECEPTION,FRI,REASONING)

-Larouche brings back van pelt into the cbi as hafner can do nothing about it showing jane’s strategy resilience hafner does realise what jane is trying to do which amps his strategy more

-Larouche asks hafner if everything is alright to which hafner says yes jane also predicts this since him admitting that he can't handle jane would take him out of commission which is also again perfect strategy resilience from jane since knowing what hafner does he still can't do anything about it

-Hafner confronts jane and warns him to not do this again to which jane changes the subject to baseball

-Next part of jane’s strategy is to get hafner the other person masterson to go out so rigsby and lisbon can get back jane has covered all of his steps till here perfectly

-Jane goes over to Kuzmanko house hafner stops him and sends masterson with him perfectly as jane anticipates

-Jane and masterson go to the house as jane starts looking for clues boring masterson as he sits on the sofa jane tells him that jane likes to take a break now and then take it easy close his eyes and shut the day as he slowly starts flipping the pages and says that he rests and relaxes and let time stops with his blissful voice slowly hypnotising masterson making a cautious man such as him close his eyes in front of jane causing him to get hypnotised and sleep for well over some time he then wakes up from a huge sound he then accuses jane that he hypnotised him to which jane again understanding his personality says u do know that only weak minded and easily manipulated people get hypnotised gaslighting him to a thing that happened in front of him is insane reality shifting as well as perfect EU

-they get up and leave as jane now at this time calls for the secret meeting which he stated at the start of the episode meaning he planned and covered his steps up until now from the start of the episode

-jane sits with cho van pelt and rigsby telling them to solve the murder without hafner using that as leverage to get lisbon back jane tells them about the victim and his perfect profiling he has done and says that they need to find his record of his sexual partners because the victim was a compulsive record keeper Cho rigsby and van pelt are all in

-Cho goes to hafner seemingly betraying jane and telling hafner what he was doing

-As rigsby and van pelt go to that place they open the door and find hafner already there since cho has betrayed jane and he has found the diary which jane was saying about

-hafner then calls rigsby van pelt and jane into the office saying exactly what jane said in his profiling saying that it is a good chance that women in this diary killed him but jane wasn't going to tell him this Jane says no

-hafner says that jane really thought that he wasn't watching and said that he would have worked with him given the chance and now he is gonna take this to bertram saying that all of them should leave seemingly destroying janes strategy

-As jane steps out of the office along with rigsby and van pelt cho appears and asks did he go for it jane says oh did he which means that jane has perfectly anticipated all of this and planned to minute detail and perfectly anticipated him working with cho even before hafner called cho to work with him as shown in the start of the episode where he only told rigsby about the meeting knowing cho’s profile and that hafner would call him and not rigsby is perfect foresight anticipation prediction trap setting and evasion on top of the Perfect EU

-Jane then goes to lisbon with the rest and tells lisbon that hafner has to address book but it is a fake but lisbon asks how did it get there to which jane says when he went to the home with masterson and he hypnotised him then he copied the names

(An overlooked point in jane’s planning intricacies coverage and shielding is that there is a reason why jane also made hafner go to the house is to also indirectly silence masterson since he can tell hafner that jane hypnotised him which could break his strategy but by doing this makes masterson think that he wasn't hypnotised further gaslighting him and potently shielding his strategy from hafner which could be overlooked and adds more points to jane strategy and manipulation)
-Jane then explains that he put the book where hafner would find it then cho says that he told hafner that jane did this to lisbon asks why so he tells her that hafner’s all about surveillance and he knew that he would be following them so he threw him off again indirect manipulation

-Now lisbon and the team will find out and solve the case and is insane multi-tasking from jane

-jane then guilt trips lisbon into agreeing with him

-Now jane says that he needs to catch the killer as he and lisbon are going to the gym and he asks for the glowy spray stuff that the crime scene people use

-jane goes to the gym and then seeks everybody's attention then lisbon explains that the victim was killed by those weights and if they spray on them it is gonna detect trace elements by glowing even after they have been cleaned which is a mass scale bluff by jane then he tells them to sit tight as this is happening a lawyer says they cant pin that to anyone jane says there are fingerprints to which the lawyer replies that there are more fingerprints and his on everyone of those weights jane then in quick sucession says that as a hypothetical to keep his strategy and method intact says that what if he hid the weights in his car office or house to which the lawyer replies that yes if they find the weapon in his car to which jane says is it in his car the lawyer says no then jane says pointing to the lady manager at the start of the episode who jane saw through says that it is in her car

-jane perfectly and quickly adapts his methods and improvises which proves his fluid methods and fast thinking is first plan was to bluff out the killer by the spray but due to the lawyer he in seconds comes up with a new way which is insane and adapts

-lisbon then asks that lady if she killed markus by the weights and that she hid it in her car when they were coming over she says no jane says come on u practically jumped out of ur skin at the mention of car she says no jane says yes u did then they say there's only one way to settle this as they open her car and they find weights lisbon sprays on them finding blood catching the killer through a simple Method by perfect EU

-Jane has now solved a case while simultaneously framing hafner and his team making his team comeback and indirectly manipulating and anticipating every action of other people and solving a insane NCPS by multitasking

-Hafner is with bertram as he tells that hafner said to him that this book contained the names of the people the victim was sleeping with this list has very famous people which jane heard at the start of the episode and he also implemented this into framing hafner which is practically insane if u think jane used elements of an unsolved case used those elements to frame hafner and essentially solve the case which is just insurmountable in terms of problem solving

-Jane knows that bertram doesn't like any media criticism so again this amounts to his ability to understand people and perfectly set a trap for hafner to fall in from an unsolved case since he knew that making scandals of politically prominent women is gonna be bad for bertram and he is going to take it out on hafner bertam says that he called all of those people and said that they might take action which is a nightmare but then lo and behold this diary is a fake

-To understand what jane did he used hafner’s own special ability which is his surveillance and used that to put him into a meticulously crafted trap jane practically used someones special ability against him which amounts to jane’s perfect trap setting as making someone go against their own particular talent requires and even more extraordinary talent which jane just did

-Jane predicts hafner’s behaviour as well as bertram’s as he fires hafner saying that he thought hafner could handle jane

-Now bertram says that he has a problem that he wants to fire jane but his skills make him not too so jane suggests that he brings lisbon back to which bertram has no choice as he has to do what jane says

-Jane now has managed to bring his whole team back, solve a case, manipulate all of those people right into his perfect trap and leave no choice for them to do what jane says with his perfect deception And NCPS.

MANIPULATION:

-Jane starts by first manipulating tork and niskin he firstly abuses torkes insecurity about his short height gaslighting him into believing that niskin was talking crap behind his back and making fun all the while leaving niskin in the dark not letting him onto anything so that he and tork can talk it out building the fire then jane further gaslights tork and brings him new women lifts causing tork to have a fight with niskin which indirectly manipulates larouche and hafner into brining van pelt jane also did this through cho not letting him onto any info shielding his strategy from hafner jane manipulated cho hafner tork niskin larouche this does not end here jane then further tries to manipulated hafner into making masterson going with him which causes jane to directly hypnotise him after he wakes up jane again gaslights and reality shifts him in front of him of something that happened in front of his eyes is absurd gaslighting jane and masterson then go back but during this jane sets a trap when masterson was hypnotised by leaving a fake diary with influential people jane then calls for the secret meeting laying out his plan then he makes cho go to hafner knowing hafner already has cho keeping a eye on jane and making hafner go to the house before rigsby and van pelt causing him to bring the diary to bertram of course it is a fake but since bertram dosent know this he will call all the people on that diary laying the ground work to fire hafner and his partner 2 birds with 1 stone after jane solves the case it is found out that the diary is a fake through cho who jane manipulated causing him to manipulate and anticipate hafner next move indirectly manipulating him to move to the house also manipulating rigsby and van pelt to go there without them knowing causing them to be surprised further strengthening his strategy which further would manipulate him to go to bertram predicting bertrams behavious to indirectly fire hafner and his partener because the diary is a fake this is insane in terms of indirect and logical manipulation and it is seemingly moving through many many people and cant be done without perfect EU of the people jane knows

- Manipulate Tork → Manipulate Niskin Into Having A Fight → Manipulate Larouche To Fire them and bring back van pelt → Manipulating hafner into keeping a stronger eye on jane sending Masterson with him → Manipulate Masterson Into hypnosis causing him to sleep set a trap to later manipulate hafner into then gaslight Masterson as he wakes up → Call the secret meeting making cho betray him indirectly causing hafner to go to the house → Further Indirectly gaslighting Masterson into believing what jane told him and not tell hafner which would ruin the trap → Make Rigsby and Van pelt go there uninformed about hafner Indirectly causing them to act like they don't know what happened further strengthening the Trap → Which Indirectly manipulates hafner into going to bertram → Indirectly manipulating bertram into calling all the politicians digging hafner's grave while jane solves the case → Solving the Case proves the hafner book was forged and wrong as jane predicts which indirectly causes bertram to fire hafner and his partner making lisbon comeback and complete his plan

-This Is All the indirect manipulation done by jane and this is not done in long steps rather this is a full chain which jane planned through his strategy and all happened as jane wanted

STRATEGY:

-Jane First Hearing About His team change starts strategizing to further his plans and reunite the team which he know when he first talks with bertram not giving into his emotions knowing very well nothing can be done

-jane heads to lisbon to gather info regarding this hafner guy he learns that he has a knack for using surveillance and hearing this jane forecasts that he will use cho since he is the only one in the office right now and whom jane trusts also cho is professional so there is a chance that hafner will think that cho will do everything for his job which is exactly what jane anticipates and predicts shown extremely good understanding of another person who he just briefly had an encounter with

-Jane has already crafted a perfect plan which is apparent when he only tells rigsby about the secret meeting and then tells him to tell the other but later assessing the risks that might follow if someone else catches wind of this plan

-Jane knows that if he tells rigsby to tell everyone now → cho will find up and if he heads to hafner offices when he will asks cho to keep and eye out for jane hafner who is a veteran might sniff out deception from cho → which will cause him to keep another men in his team to be on the lookout for cho makes jane's plan execution harder → cho not finding out and being the in the dark will hook hafner long enough for jane to implement more parts of his strategy into action which is exactly what happens → when jane takes out tork even if hafner finds out at that time then he will be on the loss since van pelt will be back and he cant keep track of cho nor van pelt since he has less manpower and he also has to work on cases

-This is extreme cautious and meticulous planning from jane as he predicts and assesses many risks his plan might have and how to eliminate them making his shielding and risk assessment sublime and his strategy complexity will make it harder for hafner to get a read on what is happening since it will be impossible for him to do anything once things get underway is also perfect EU

-Keeping in Mind that jane formulated this insane strategy in the same time he hears info and executes it during the same time is insane

-Jane then furthers his plan by Manipulating Tork and Niskin and solving the case piece by piece in such a manner that hafner has no clue what to deduce or how to solve it in the meantime hafner calls cho and bribes him baiting them all into his plan

-Cho agrees to help hafner just as jane predicts now later during this jane basically mind controls tork into believing what jane wants him to see and hear gaslighting him into a extreme edge against niskin buy making fun of him with niskin but tork can't hear or interpret what they are saying so due to jane's gaslighting he basically hears what jane wants him to hear and see that is niskin making fun of him which jane again strengthens the fact by acting quite and evasive of tork which further makes tork think that niskin is against him

-After an interview Jane puts lifts on torks table leaving a note that would infuriate him against niskin causing them to fight making tork be taken out of commission

-After this hafner catches wind of this basically knowing what jane is downing and he cant do nothing against him he has the key to break this strategy but he cant which jane perfectly predicts and is insane

strategical resilience and shielding basically hafner wont tell larouche what happened making him deemed unfit for handling jane all within not even a day would a blow to his ego so he wouldn't tell larouche who would tell bertram jane has managed to perfectly shield his strategy from hafner larouche bertram all of the higher ups and successfully manages to get back van pelt

-jane now has a one up against hafner and continues his march toward victory by again perfectly anticipation hafner’s next move which is doubling down on jane through direct methods and not indirect surveillance basically sending another agent masterson to go to the house for investigating jane first suggests this then as he is about to go hafner sends masterson with him jane smiles as he perfectly anticipates it

-as now both are them are both in the house jane sets the ground work for a perfect trap but he first must gaslight masterson and reality shift him and change his perception which is extreme level of manipulation and gaslighting jane first starts to hypnotise him and does it and reaches a state of hypnosis in near a minute so deep only a genius Hypnotist can reach which is somnambulism to explain it briefly u could call it the last stage of hypnosis its so deep that the person will act according to what u suggest him and not only this only a chosen few are able to achieve this state and this doesn't stop here his mastery over this is so great he made a person such as masterson who was very very high alert against jane basically was watching janes every movement jane made him go so deep into hypnosis in a minute or less which is insane since master at their craft hypnotising someone for the first time so deep takes quite a lot of time but as they keep coming back they get more accustomed to it jane on the other hadn had been hypnotising him for the first time and managing to do this is insane LA and shows his mastery over his subjects

-Jane Hypnotises him into sleep and plants a fake diary in the house for hafner to find later and then wakes masterson up again gaslighting him into believing nothing happened this is unreal because everything happened in front of him and jane gaslight him so good he basically didn't believe anything like that could ever happened and him being in hypnosis for a long time is impossible

-This sequence of events leads him to believe that telling hafner something like this isnt worth the risk since if nothing like what he thinks happened then he would get fired since the last time tork trusted jane and fell right into his trap now if masterson thinks that jane wants him to think that he has hypnotised him for a long time thus making him unaware of the events the happened when he was asleep would make him insanely vulnerable to jane’s brutality and trap thus getting him fired but jane absolutely saw through this and knew that masterson wouldn't tell hafner thus rendering him useless as an informant jane completely saw through his though process entirely and acted accordingly which is just insane foresight he wanted hafner to think what he wants and he thought exactly as jane wanted him to jane is in hindsight 2 steps ahead each and every time bamboozling each and everyone that crosses his path

-Now since masterson has not told hafner jane then sends vanpelt and rigsby to go check for the diary obviously knowing that hafner would be there when rigsby and vanpelt see him they act completely shocked now since rigsby and vanpelt did not know what jane really intended with this step this makes their acting completely real and not fake making hafner believe that he has evaded jane’s trap when in truth he has actually fallen for jane’s trap

-Hafner brings the diary to his office telling all of this to jane and his team and as they are scolded and hafner tells all of them to leave the office and that he will tell bertram about this jane leaves and he meets cho and cho asks him did he fall for it and jane says “oh did he” resulting in a perfect strategy execution from jane’s part and beautifully aligned strategy to make hafner fall for a well crafted trap perfectly forecasting what hafner thinks and wants and understanding his self to perfect detail which is absurd EU EP

-Hafner tells bertram and bertram acts accordingly as jane anticipates meanwhile he gathers the team and lisbon and guilt trips her into joining and solving the case

-Jane improvises and Sees through the murderer instantly and that was the same person jane saw through at the start of the episode Insane STP jane practically knew who the killer was right from the start via sheer seeing through ability EP and Methods To further acknowledge this jane right after going to the gym stopped working on the case because he knew who the murdered was when he saw her which is again insurmountable STP and Ability

-Jane solves the Case and as a result hafner’s diary is proven a fake all according to jane’s plan and he is fired and lisbon is brought back resulting in a Perfect Strategy Execution as jane brings back his 4 Team

members eliminates 4 Members Sees through the culprit at the start Perfectly predicts and anticipates all of this right from the start Manipulates the entire cbi hierarchy to dance at his tone and solves the case

-To further prove that jane predicted and saw so far ahead from the start

This is at 5 minutes into the episode and jane tells him something this far ahead completely aligns with jane foreseeing that many steps ahead

-Janes Perfect Systematic Arrangement of his tactics leads him to accomplish his desirable aim and execute a complex strategy not only did this strategy include many layers of complexity it had to be innately resilient in its methods to have succeeded which it did

-As A perfect strategy cannot be made with good critical Thinking and logical reasoning jane’s prowess for both of these and foreseeing steps much further gave him the perfect edge to form such a strategy

-Jane’s Complex Strategy had many incorporated layers and dimensionality as this allowed jane to manipulate and deceive and more so made the strategy incredibly hard to read or decipher by anyone As jane’s strategy showed amazing potential for said things because he implemented all of these schemes in a said order and achieved what he aimed for speaking for the layers implemented in said strategy not only did jane perform various manoeuvres to keep his strategy in the dark he also seemingly increased his strategy success rate which is correlated with his complexity as jane accounted for many many scenarios and prepared for each

-Janes Strategy Was Very Resource Effective as he wasted little to no resources to achieve his desirable outcome not only this his execution of various tactics which include cho betrayal niskin and tork manipulation etc caused him to align his strategy and perfectly orchestrate a field around him which brought his strategic vision to life jane used no resources to advance his strategy and made his vision come to life while facing multiple adversities managing to create a perfect scenario where he gets to control people into them making decision where jane cannot that example being bertram at the start of the episode jane couldn't say anything to him but at the last moments bertram perfectly danced to jane’s tone knowing well that he can do whatever he wants but due to jane’s potency he had to do what jane wanted him to do

-Janes Strategy is build in a very special way he uses each and every thing he has at his disposal as efficiently as he can resulting in defeating many adversities he faced with no influence on them (Hafner Masterson Niskin Tork Larouche Bertram) these people couldn't do anything unless they had something directly related to the strategy or jane resulting jane in picking them off one by one Despite being faced with these many challenges jane strategy formulation resulted him in realising his goal one way or another Definition of overcoming limits

-Countless layers of fabrication to humiliatingly misdirect someone who tries to interfere with janes strategy even with hafner finding out with all the clues jane gave away hafner had to turn to using other

methods rather then telling bertram which is via jane’s perfect understanding of ones self in this case hafner

-Lastely The Alignment Or Logistical Part of this strategy is Insanely Good because every step in janes strategy from telling rigsby about the meeting to cho betrayal was all aligned perfectly to what he foresaw would be the end as in this case hafner’s downfall and align exactly with his predictions and foresight resulting in impeccable foresight basically Jane from 5 minutes in aligned each and everything perfectly to what he foresaw till the end or 40 minutes in which is just insane
