FANG YUAN
CHAPTER 1 DOCUMENT

Made by : Herald

Red - misc

Brown - FSIQ , Thinking
Green - Manipulation, EQ ,AQ ,SQ
Blue - Foresight
Orange - Knowledge , Reasoning
Purple - Planning, Foresight

Introduction:

This Chapter 1 document is made to avoid misconceptions about Fang Yuan's feats while at the same time using it to showcase what feats he really did in Chapter 1 in a chronological order

Anyway, if you find any flaws in this document, you can contact me in Discord.

PRE CHAPTER 1 LORE:

Fang Yuan did a 30-year plan resulting in the deaths of thousands of people to refine the spring-autumn cicada, a gu insect that can make its user teleport his will and soul to the former self of his past. It's the same kind of feat as creating a low-tier time machine, but it's more complex because of the conditions RI has for one to create the gu (Long term Planning, Knowledge , Thinking)

1. Creating a rank 6 gu insect is an impossible task for a gu immortal as it requires a high amount of knowledge in other paths, luck, other skills, and decision-making abilities. (Knowledge, Intelligence)
2. This particular insect has a success rate of 1-10% even though it got used perfectly because of the limitations heavens gave it. (Risk assessment, knowledge, intelligence)
3. In the RI verse, time is regulated by a spiritual concept called the river of time, which holds the infinite dao of time, and one must move against the current of the river of time to go to the past. ("DEPENDS ON THE SCALING IT SCALES TO 6D TO OUTERVERSAL , ANOTHER IMPORTANT THING TO UNDERSTAND IS THIS

SENTENCE DEFINES NOTHING ABOUT FANG YUAN'S COSMOLOGY AS I ONLY INCLUDED THE COSMOLOGY OF THE GREAT RIVER OF TIME HERE ")

4. An immortal gu casually has at least 1000+ steps, which the gu master has to do in perfect harmony to create the gu with no errors. (CPI, faster thinking, multitasking)

Fang Yuan has to perfect his rank 6 gu insect to beat all these conditions to move his present self to the past.

Debunk attempt: Fang Yuan replicated the methods of Red Lotus Demon Venerable, so it's not acceptable.
Truth: Red Lotus is a rank 9 gu master, and most importantly, he's the person who held the dao of time, while Fang Yuan at that time was a rank 6 who held the grandmaster attainment in blood path, so it's the same as a 5-year-old doing research about university-level quantum physics.
Also, Fang Yuan has no one to help him directly to make this gu successfully.

DEMON JUDGEMENT BOARD: Since fang yuan became a gu immortal of blood path, an organisation named demon judgement board is dedicated to neutralising him, and they keep sending gu immortals (rank 6) and mortal gu masters (rank 4.5) to chase after fang yuan and to make him perish, which fang yuan anticipated their moves most of the time and escaped from, and his goal of creating a spring autumn cicada is also linked to him escaping from this organisation (foresight, planning, AQ))

CHAPTER 1 LORE:

Fang Yuan is ganged by 10 immortal sects of the central continent, and they were talking about how he ran under their noses for many years while causing chaos and how he killed thousands of people to create a spring-autumn cicada. (This proves my pre-chapter 1 lore explanation as it gives fang yuan CPI, EE, AQ, Planning,, Foresight.)

Fang yuan before 300 years did woo a girl and killed her family along with her 9 generations (one generation = 20+ years) consistently for 200 years by his plan.
(Long-term planning, risk assessment)

Fang Yuan looked at the people who were desperately waiting to kill him. Numerous deep wounds keep spilling his blood to colour the ground. They were too bad; in fact, they were already flowing so fast, indicating they were indeed deep and painful wounds, but Fang Yuan still maintained his composure without even caring for a

millisecond (EQ, EM, AQ, mental fortitude).)

Fang yuan about his situation clearly, yet he still cares about nothing, and his emotions and expressions never changed a single bit (EQ M, EQ E, AQ, self-awareness, intelligence (existential)).

Fang yuan even after being injured heavily stalled Thousands of gu masters who have killing intent over him to fear him and stalled them for 6 hours. (Social awareness , Charisma , Fear inducement , Interpersonal Emotional Management)

Fang yuan even at this vile moment , recited a poem by himself explaining about his own self awareness and the nature of the world (VCI , existential intelligence)

[NOTE : HERE FANG YUAN SEEING HIS LIFE AS FLASHING IMAGES IS JUST A DRAMATIC HYPERBOLE AND AT MOST IT CAN BE ONLY INCLUDED AS A MEMORY BASED FEAT BUT NOT CPI OR OTHER FSIQ CATEGORY]

AFTER REGRESSING BACK TO 500 YEARS

Fang yuan was once an unknown named Chinese scholar in modern earth (estimated age: 20), where he got sent off to the gu world by mysterious means and got transmigrated inside baby Fang yuan from gu yue village.

Even after being reborn into a baby fang yuan's cognition level is high as he still held the memories of his original life inside his baby self. (Mental fortitude, long-term memory)

And after Fang Yuan got reborn in his first life, he learnt how to make poetry in the Gu world's language, and he's also skilled in Tang and Song Dynasty's poems in his earth self. (VCI, Intelligence)

He himself recreated many poems of the earth in the world's language and got himself a name in his childhood itself to avoid the bullying of his stepparents, aunts, and uncles.
(Minor scale trap evasion)

His 15 yr old self got forcefully injected with the memories of 535+ year old fang yuan and his 15 yr old self still had the ability to hold up most of the information about his future self in his 15 yr old self (Long term memory , Overall memory , Mental cognition)

Debunk : It’s hax
Truth : The injection of his future memories is the hax ability of spring autumn cicada but the ability to hold memories is based on the user.

END OF THE DOCUMENT , THANKS FOR READING
