FULL BATMAN DEBUNK [On Going]

Classification for colors

Pink-Verses feat

Text in this color are feats that other characters have done that match a certain character such as batman

Blue-Normal feat

A feat that does what it said a text in blue is a feat that is actually true and happened these feats are able for use and are justified

Red-Debunked feat

A red colored text will index a feat or event being taken out of context or wronged about these feats in these colors should not and cannot be used due to the feat being misleading

Green-Amp feat

A green colored text will indicate a feat being able to amp a certain character these feats can be used for debating and can even amp a character

Normal text-me talking and covering the feat

Information and debunks made by DDY

Designs, Fonts and Corrected words and supported by Aryan

Note, the Doc updates and it's still ongoing so better check it up while you can, debunk applies for WIS and SCD alike

For some odd reason Batman has been getting way too much recognition even though he is not all that smart and Batman is a character who reminds me of Ayanokoji They are both very smart MCS but they are taken way to much out of context for me to name and it's getting very very annoying batman is smart as a matter of a fact I think Batman is very much capable of beating up to 40-60 percent of anime but like every other character he has limits and these limits are often ignored Now this debunk is going to be focused toward the anime section as most people who do the whole comic vs anime debates have not even touched a single comic so let's cover some basic common rules for how comic scales work a common theory and scaling and that is automatically assuming a character is better than another if they win in a fight/battle this way of thinking I'd say is very stupid for many reasons the reason why is 1)context and the situation need to be taken into consideration for example if person A beat person B In a outsmarting battle that does not equal to person A being stronger than person B it only means he is smarter 2)the feats a character puts up this correlates to the first reason if person A beats person B but person B has more and much better feats than context need to be evaluated and taken into consideration and or we need to look at said persons feats and if the feats are significant by a larger margin than it can still be assumed that person B (AKA person with more and better feats) is still better even though he lost I'm saying this for many reasons People think just because Batman triumphs over some characters and wins vs them that automatically makes him better than them However they would ignore contexts and the other said persons feats I'm going to cover and debunk some of those right now the first instance is Superman Batman throughout comics has clash and on more times than not actually beat Superman this leads to peoples thinking Batman is smarter than Superman in Iq so the feats Superman have done Batman is able to outsmart this type of thinking is straight up bs first and foremost in a canon comic named hush when Superman is tamed by poison Ivy and controlled its alter revealed by Batman himself that no matter how much prep he has if Superman were to go all out than Batman would be dead instantly let's take a look into context at this point batmans had a good understanding and studied Superman at this point batman had kryptonite on him so he had sups weakness and just later we see Batman get pummeled this would mean every battle Batman and Superman had is with sups not going all out

But I'm not done let's take a look at some of Superman's feats Superman held the heavens on his back

Superman blew the entire solar system with sneeze Superman was immune to the powers of dr Manhattan Superman cannot be erased by Mxy reality warping It was said superman was the center of dc multiverse Yesssss just taking a look at a couple of Superman's feats it's already pretty obvious he scapes higher than Batman I mean Superman has done feats such as being immune to dr manhattan and Mxy to put that in perspective manhattan had wiped the entire JL and sweeped them with ease including Batman and done a feat where he killed owlman(a smarter Batman) when he sat on the Mobius chair manhattan also down a feat where he neg RF and this was after RF neg diff bats so even though sups had lost to batman that does not equal to Batman being stronger as due to feats superman has better feats And he has context to back up all of the loses vs bats As I said the constantly is important as is in order for a feat to hold up to its max it needs to be shown to be consistent

For example in a scene we see Batman vs wonder women so hard it knocked the wind out of her

Now to a normal scalers eyes this would mean Batman has AP on par if not slightly lower than WW
However this is FALSE
This feat happens once and is not constant with just batmans AP alone
Now yes sure this feat can still be used and actually amps Batman high but it's not going to put him in the same tier as ww at best this would put Batman slightly a tier below but it's not going to put him on EXACTLY the same tier this would only amp him but nowhere near the same tier as what WW called
To put this in perspective wonder women is the same girl who is the same girl who is able to break super girls nose and keep up with Superman

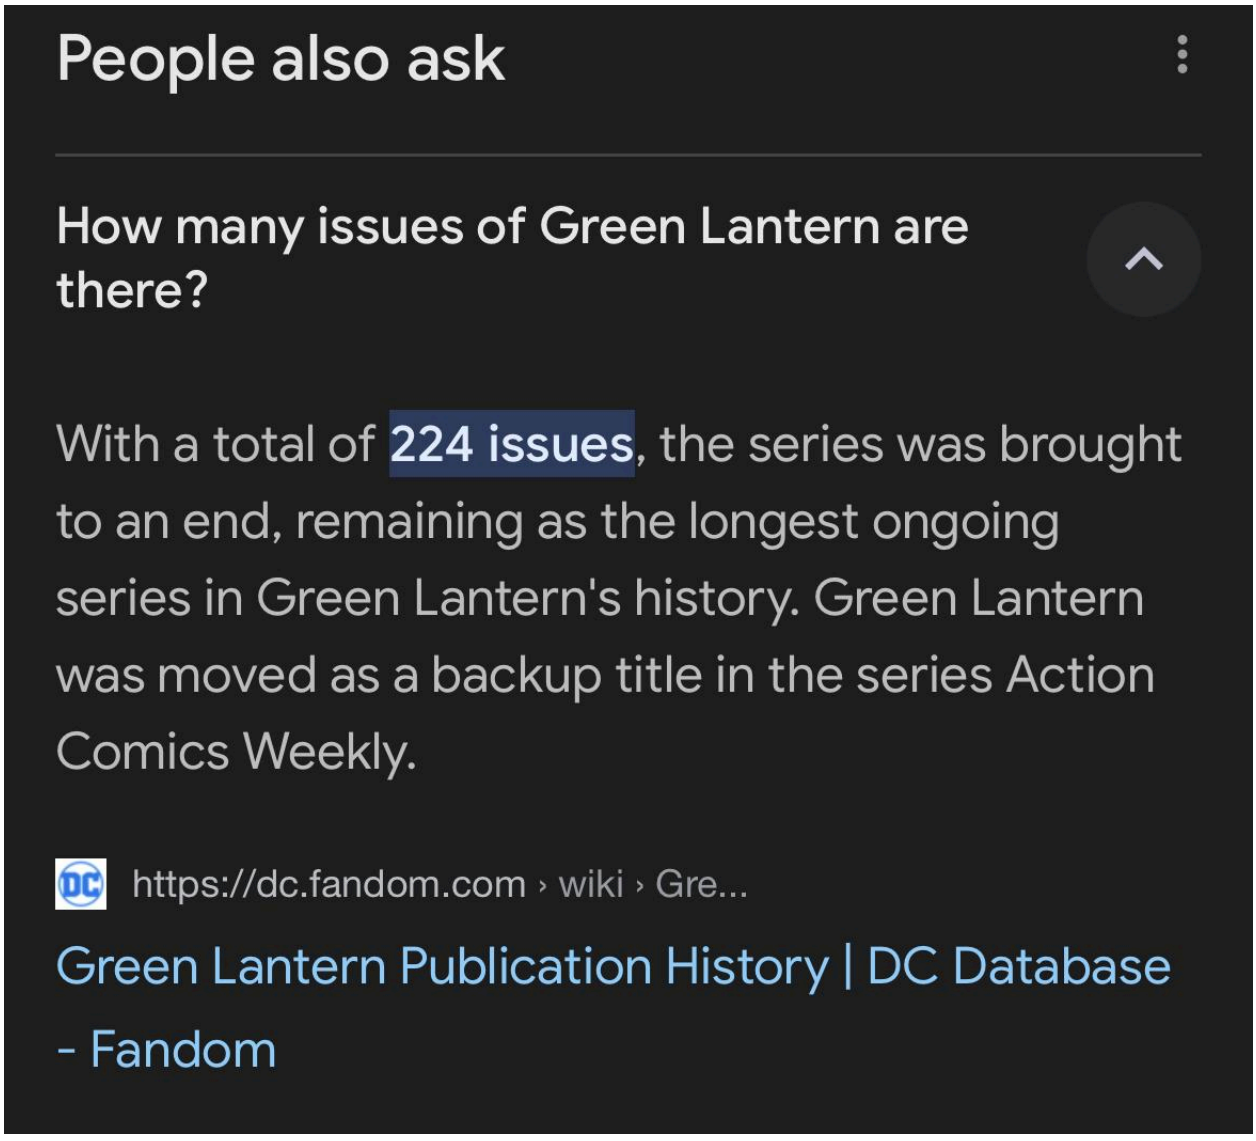

SUPERMAN. I NEED YOU HERE.
CAN'T GO YET--I NEED TO FINISH HERE. I CAN BEAT THIS GUY, AND DIANA'S--
BATMAN JUST CALLED YOU, RIGHT?
I SAW YOU REACT.
IF HE NEEDS YOU, GO AHEAD. I'LL HOLD THE LINE.
BUT HE'S NOT DOWN--WE'VE BARELY STARTED WEARING HIM OUT, AND--
GO, SUPERMAN...
...I CAN HOLD HIM!
KRAKOOOM

Now to put this in comparison supergirl is on par with Superman and Superman is the same exact MF to do a feat where he sneezed moved the entire solar system

AND SO...
?!?!... SOMETHING'S POURING OUT! MY MICROSCOPIC VISION DETECTS IT ISN'T A DEADLY GAS! ULP!... IT'S...!
BWWAMM
SNEEZING POWDER! PEOPLE BELOW ARE... SNEEZING!... OH, NO! HERE COMES MR. MXYZPTLK, THAT SILLY PEST FROM ANOTHER DIMENSION WHO LOVES TO PULL MAD PRANKS ON ME!
TEE-HEE! I DID IT ALL, WITH MY 5TH DIMENSIONAL MAGIC, SUPER-SAP!
CHOOO!
AAA-CHOO-OOO
AAAA-
AS THE MAN OF STEEL SWIFTLY STREAKS ABOUT METROPOLIS, THE MISCHIEVOUS IMP SPEEDS IN PURSUIT...
DON'T CALL ME SUPER-SAP!!
I'M SWIFTLY INHALING ALL THE SNEEZING POWDER IN THROUGH MY NOSTRILS!
OKAY, SUPER-HAM! YOU ASKED FOR IT! YOU'RE INVULNERABLE TO EVERYTHING--EXCEPT MY MAGICAL POWERS!
ABRUPTLY...
GASP! TH-THAT MAGICAL SNEEZING-POWDER IS ABOUT TO MAKE ME S-SNEEZE! I MUST LEAVE EARTH QUICK... B-B-BEFORE...!
FAR, FAR OUT INTO THE COSMOS FLASHES SUPERMAN AT INCREDIBLE SPEED, TO A DISTANT SOLAR SYSTEM, WHERE...
MY SUPER-SNEEZE IS DESTROYING THIS SOLAR SYSTEM! SUSPECTING THIS MIGHT HAPPEN, I FLEW TO A LONG-DEAD UNIVERSE WHERE ALL LIFE VANISHED EONS AGO DUE TO A TERRIBLE SPACE-PLAGUE!
AAAA-AAAP-CHO-OOOO
2

Does this mean Batman is someone who can keep up with wonder women who is slightly on par with supergirl who is also on par with Superman can do this feat?
Now if Batman had shown consistent feats of keeping up with these power houses than yes he would be he has not
We need to go with what is most accurate and consistent
This is common sense guys
Now why do we specify we have to apply this rule to dc? Well let's take a look
Green lantern comic issues

MORE RESULTS

What is the numbering of the Wonder Woman comics?

It starred Wonder Woman and, from #271 to #321, had a back-up feature with the Huntress. In 2010, in celebration of the 600th issue, the legacy numbering was restored and the series lasted until The New 52 reboot in 2011. In 2020, the legacy numbering picked up again from **#750 lasting until #800 in 2023**.

People also ask
How many Batman issues are there in total?
As of this writing, there have been 1,028 issues of “Detective Comics” since his first appearance in 1939 and 885 issues of the eponymous “Batman” series that followed it in 1940. Many of these are collected and in-print but many are not.

Just by taking away 4 characters of the dc verse(keep in mind there are hundreds of dc characters)

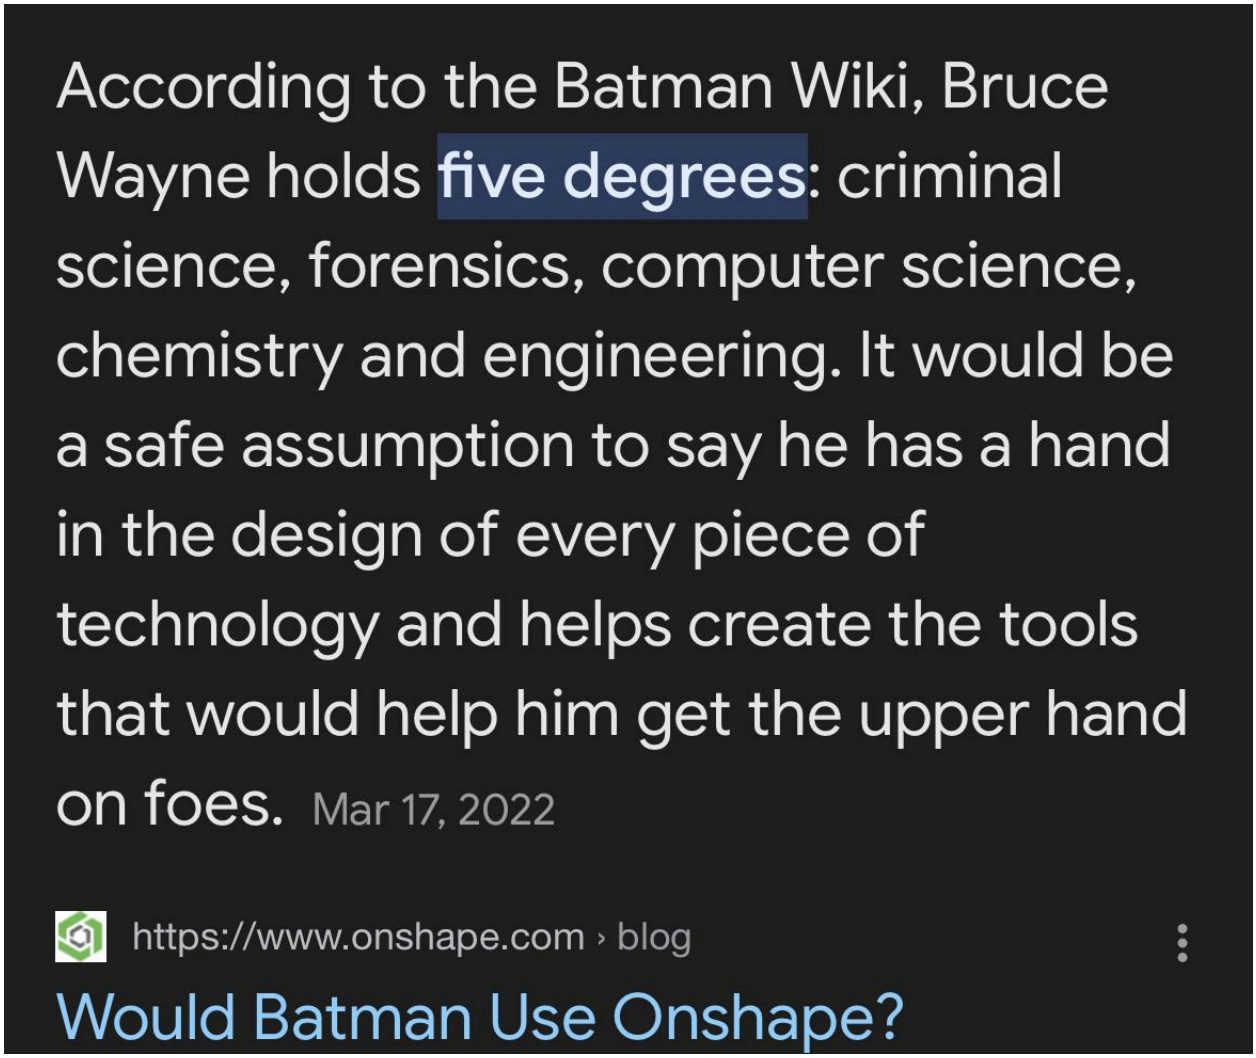

We already see how just 4 characters have over 2000+ comic issues so many things can happen in these comics so it's common sense we have to take what is constantly happening

Just one of these characters has more comics than an entire verse and just 4 combined have more than the entire RI verse. Do you see what I mean when this rule needs to be constant?
The reason why the constantly rule is never really used is because anime verses are not as big and giant as the dc verse is now of course this ruling should and is also implemented inside every other verse but it holds more weight in the dc verse due to the fact the dc verse is giant

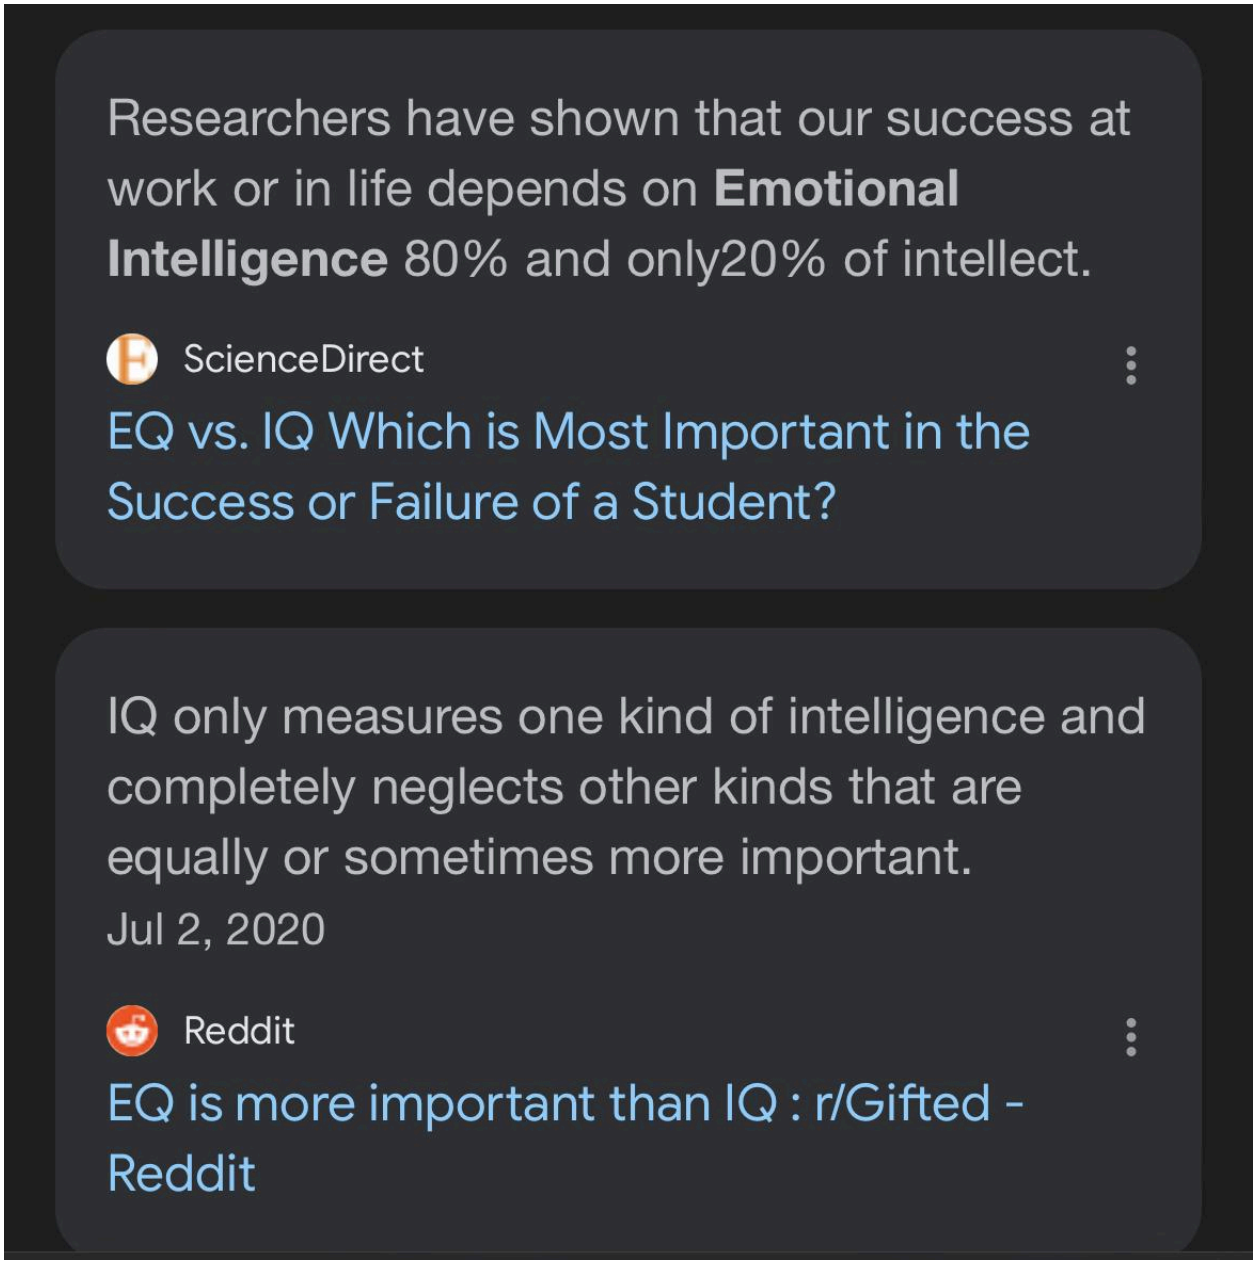

The next code of rule I will cover before debunking Batman is canon and non canon
Now when people list feats for Batman they forget the fact that they are sometimes naming non canon feats and hold no value
Why does canon matter? It matters because canon comics are offices comics made by and accepted by official authors a non canon comic is the equivalent of me taking a blank paper and Writing (Batman negs fiction) this would be considered non canon or for anime readers comp
Now how do we deduce what is and what is not canon? First off it's google a simple google search can tell you what is and what is non canon
Now there is something I wanna debunk about this topic and it's the topic about everything being canon basically there is this idea that due in to the DCAMU or the dc multiverse everything is canon but just takes place within a different multi/universe this is flawed and here is why
If every single comic/source of dc is automatically canon due to this logic can I go ahead and take a booklet and make a series of just Batman losing to Dazai and say there is a DC X BSD crossover? Can I go on and make a 1 page comic where I write in the fact Batman loses to a small ant and it will be canon? Using this logic I can and it will casually and ultimately just give a anti batman debater a easy win also if everything made automatic becomes canon it makes no sense due to the fact we ourselves have no say or work inside this field of area it's like me going to Elon musk and trying to change up how he runs his company it makes no sense
So in short no this type of thinking holds no value not every comic published is canon as it basically leads to an endless debate of basically anyone debating against Batman being able to say and make up a story of Batman losing to their character
To tell what is and what is not canon just use common sense and google it up it's not hard at all now I could be biased and use non canon anti feats but I'm not going to even though Batman has more anti feats in non canon verses than he does that up him I'm not going to go out my way to use them as I'm not biased and hypocritical
Now please remember this is not a full scale Batman scaling this is just me debunking most of his feats that people take out of context so this is not going to be as long as some people expect but just to remind you I'm not going to cover EVERY single

Batman feat only the feats that are heavily taken out of context and constantly used to say Batman beats fiction

The next set of rules we need to cover is Capeditz secret which is cosmology
Now if you're reading this it's probably for wis or who is smarter so for anyone who does not know
Cosmology is not used to determine the winner of wis now cosmology can be used to scale a character higher in their wis but it will not automatically grant them the instant neg diff
Let me give a example dn is a verse which has people live beyond death hence the shinigami who are basically immortal whilst cote has nothing of the sort does this mean Matsuda will be able to massacre the entire cote verse and blink them away even if the cote verse gets a 2x amp? Exactly this type of logic makes no sense I have no problems with cosmology debates in wis matter fact cosmology debates in wis is something I love to use but just do not be a weirdo like capeditz and go ok to say some bs like this person>other person neg diff also if someone is really willing to step so low to get a win in this way most high tier verses who I am defending already have boundless-extraversal cosmology which is on par with dc I am not going to cover that right now as I am not here to debate to much about cosmology I'm just here to debate on the lack of understanding on some Batman's feats
First Batman only has a total of 5 PHDS this is a impressive Iq feat

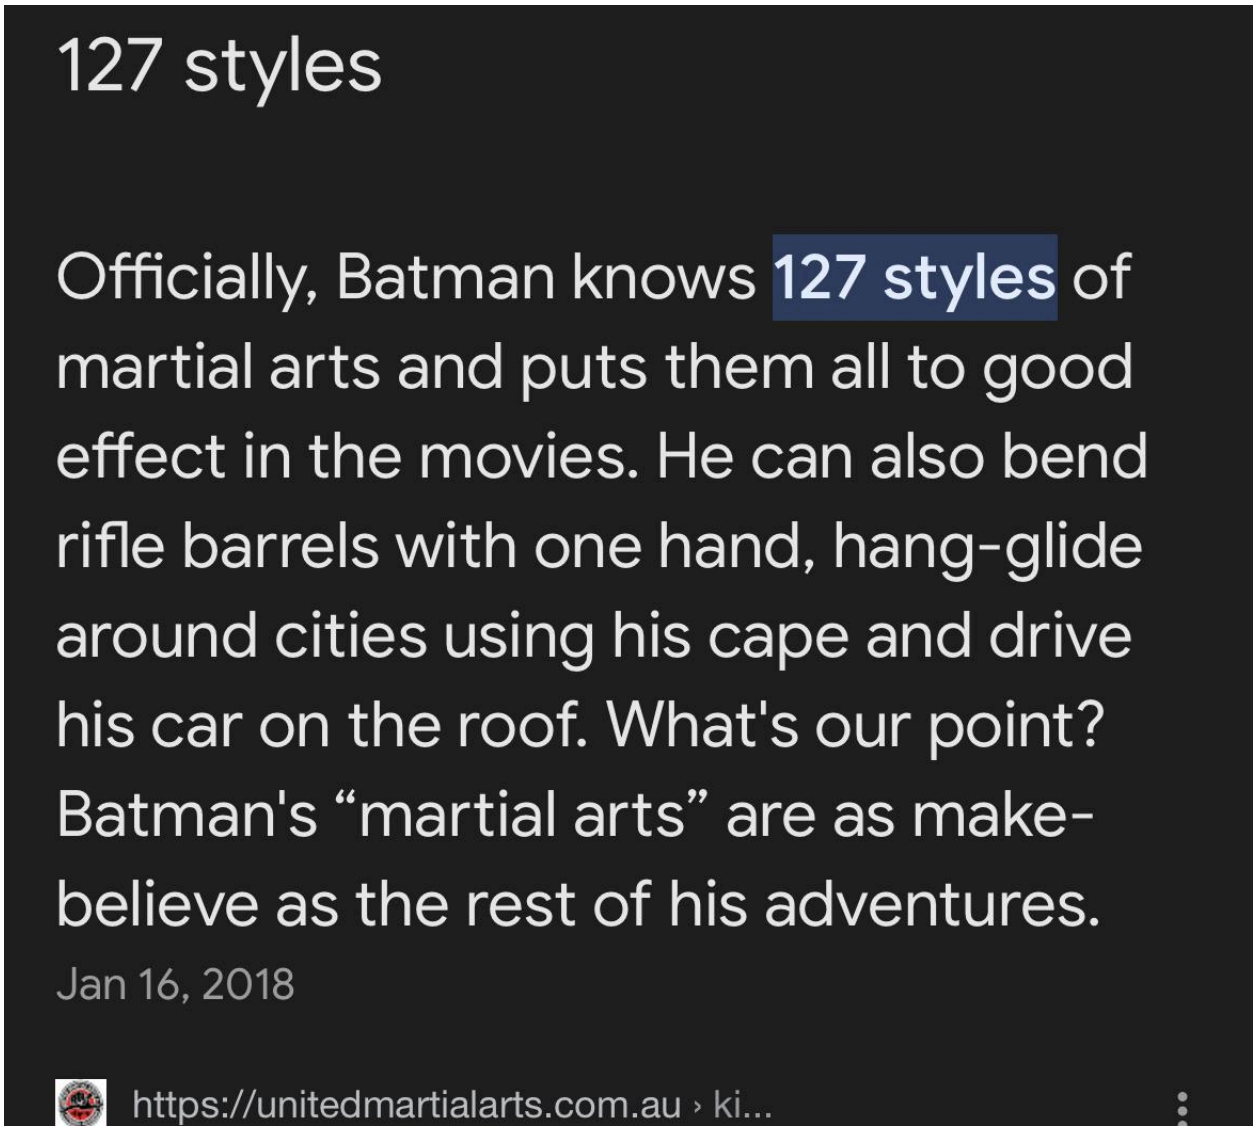

but what people do not realize is all of these PhDs are all invention feats criminal science, forensics, computer science, chemistry and engineering these 5 are all only Iq based so this would only had to Batman's FSIQ it will add nothing to his eq not only that but the degrees and PhDs bats have are all Iq and invention feats which rank very low he does not have any eq learning which in terms of smarts eq>iq thus his knowledge in iq is not going to be as impressive as the feats many other anime character does

here is proof eq is more important than Iq Batman has mastered 120+ MA which will only add to his battle iq in other words batman knows how to no diff people in a fight, him mastering that much martial arts also adds to his learning speed Iq but learning speed is mid tier in terms of a smartness debate I already explained how iq is not as good as people think, battle iq is a good tier but Batman's battle iQ only has him knowing how to no diff you h2h whilst other people with battle iq have it in a way where they can defeat you with Witt's which is way better and impressive learning speed is mid tier learning speed is how fast some one can learn something similar to adaption Batman has a very high learning speed because of this feat of his mastery of martial arts but learning speed is only mid tier it's not a high tier category in debates

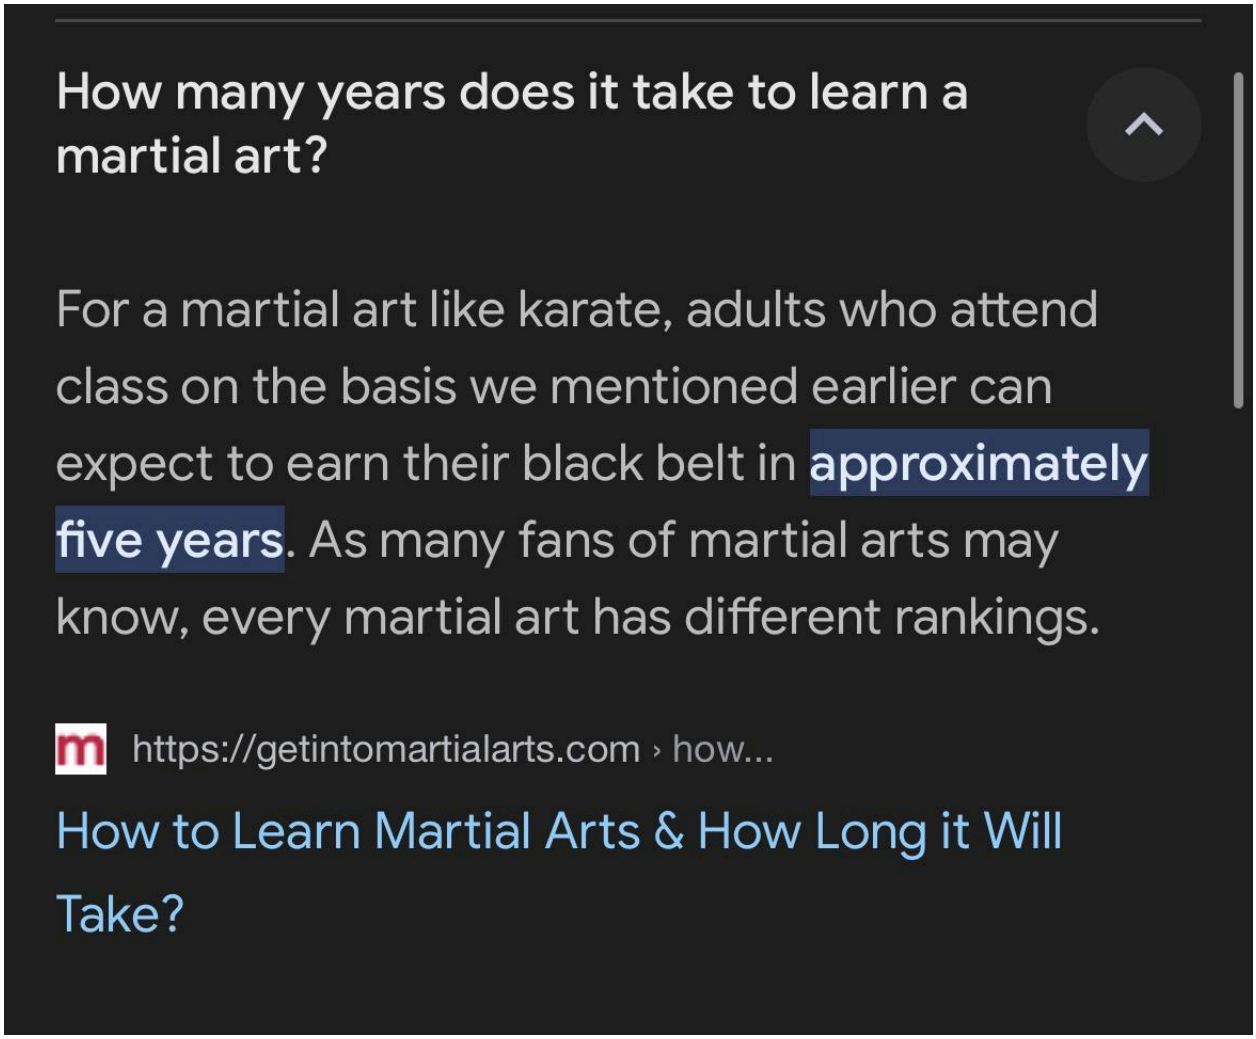

and just only having a good and very high learning speed will not mean and guarantee you will instantly win a debate against people eq>learning speed and having learning speed only with a few other cats does not automatically mean you will win the entire debate it gives Batman a big boost do not get me wrong but it's not going to guarantee a win especially since the fact that Batman has low eq feats in a debate having more eq cats>having learning speed cats eq>learning speed but that's not all

Now I have read comics and I can tell you Batman is without a doubt not limited to this amount of martial arts Batman should if and most likely has mastered all 170+ martial arts out there

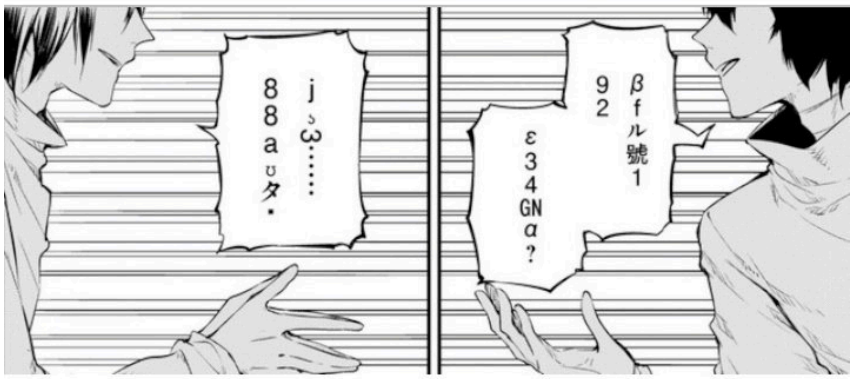

Now the reason I say this is for one scene in particular which I'm not going to cover at this moment but I'll cover it later and explain

Now this feat is highly impressive as according to google to master just 1 MA takes 5 years

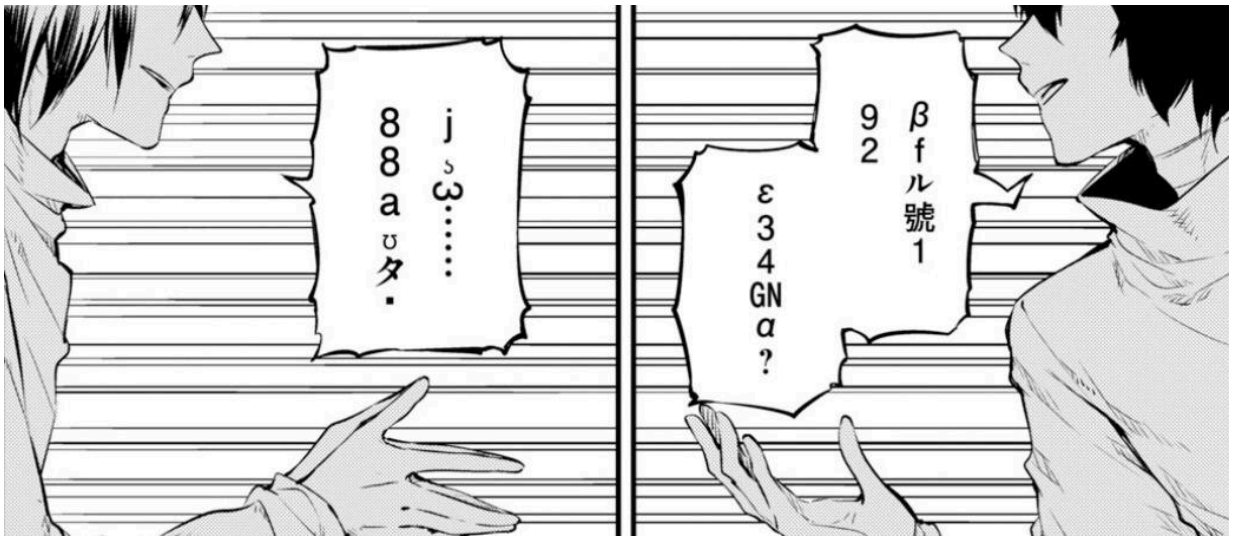

This means Batman by the age of 20s was already able to master all of these
This feat is impressive but outclassed by high tiers
However this Batman feat is matched if not completely outmatched Batman feats shiro can learn a foreign language in 30 min Fyodor and Dazai can make their own language and learn it within a span of just a few minutes this means Dazai knew and added a new sign to over 180-600k words Dazai made his own language and learned it in minutes so high tiers>Batman

popopretty

So Dazai and Fyodor memorized everything the other person has said, designated a number or character to each of it and created their own codes to communicate on the spot...

I am not even smart enough to make this up.

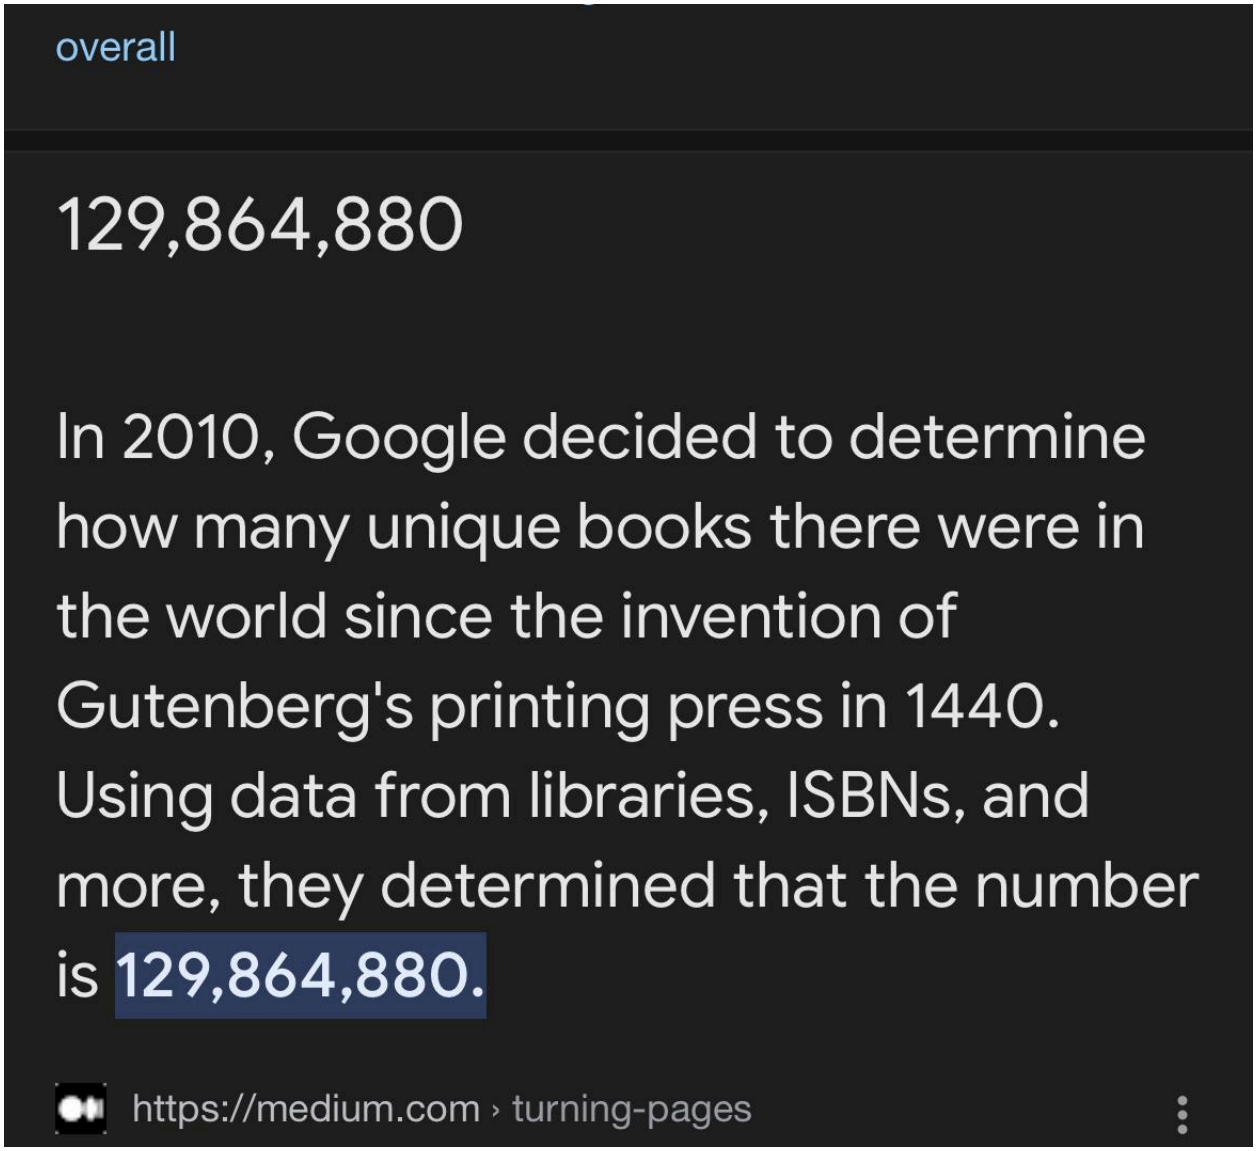

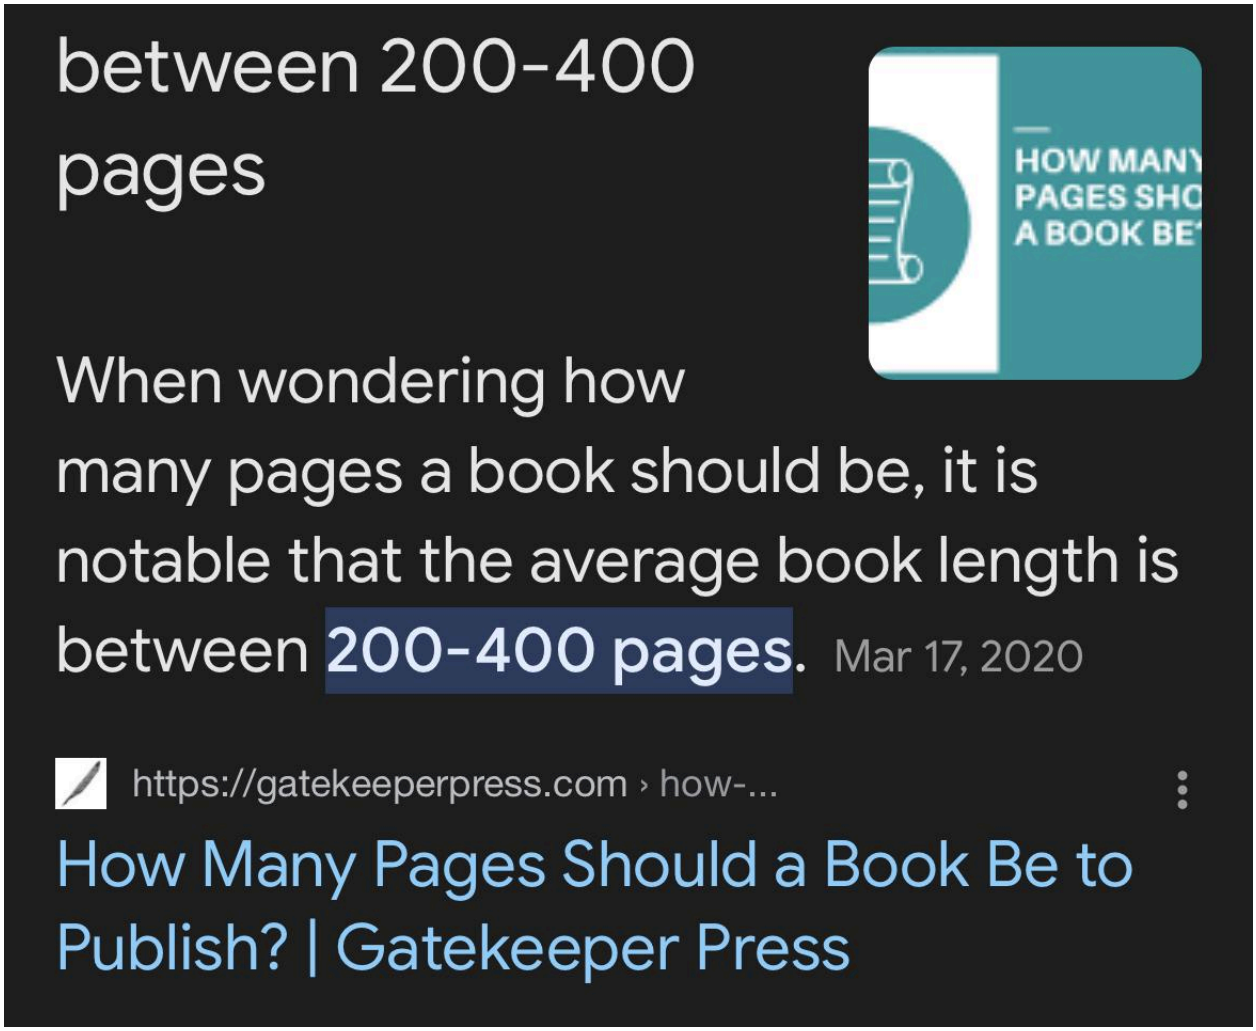

next up is the fact that Batman read every book in the whole entire world this feat even for a unrealistic verse is not possible at all let's do Simple's math there are 129

million books in the world

A book has between 200-400 pages

Let's lowball and say minimum 200 pages

If Batman can read a page in 1 second he can finish a book in 200 seconds or in other worlds 3 minutes to read just one book this would mean in just one hour Batman can read 20 books in just a hour

24 hours in a day

20x24=480 books a day

365 days in a year 480x365= 175,200

Batman reads 175,200 books in just 1 year

Average human lives up until 76

Green arrow lived up until his 80s

Let's assume Batman lives up to his 95s

Batman can read 175,200 a year

95=the number of years he lives up to

175,200x95= 16,644,000 books in 95 years

Now let's go a step further and double this number just in case people think my math is off

Which gives us 33,288,000

As you can see this feat highballed to the max is still not possible to do even if Batman can read a page in just a second

175,200=the amount of books he read in one year

480=the number of books he reads in a day

20=the amount of books he reads in just a hour

So if I use the lowest amount of pages in a book+use the most smaller amount of time batman can read a page barman still cannot even read every book nor come close to it even lowballing some stats such as the fact that there are 2 million new books published a year and the fact that it takes bats 200 seconds or 3m20s to read one book but I chose to lowball it to just 30 min Batman can read 480 books a day 365 days in a year meaning 480x365= 175,200175,200 is how much books he reads in a day and so fourth I'm also not taken into consideration batman probably made this claim when he is in his 30s do you get where I am going? Not only that but about 2 million books are made per year but I'm not done the max Batman can read in 95 years is 16,644,000 that's how much years Batman can read in 95 years now if we take that number and times it by 3 it would come up to 49,932,000 so even times the number of books batman reads in 95 years times 3 he still does not even come close to the 155 million books in the entire world but let's just say by some magic and plot Batman can read a entire book in the entire world Even if he could no matter how much I research I still cannot find the scan or panel or scene where Batman made this, this is never stated nor is it scene close to inferred no matter how much I research I cannot find the scan it's not even inferred that he can do it I been looking at it for literal hour and still cannot find the scan in Batman shaking he has read every book in the world nor was it inferred So this is a false lie I already shows proof on how even if a verse is unrealistic

even if I highball Batman's speed and lowball the number of pages and books and times the final number of Batman reading a book he still does not even come close to the number and to top it off I could not even find the feat on where it's said nor could I even find a scan of it being even close to inferred thus this entire claim is proven false now this feat would hold value if only there was a scan but there is literally no scan if Batman even doing such a feat

Next is Batman's Feat of him outsmarting darkseid and people like to use that to upscale batman first and foremost darkseid is not smart and he mainly relies on his power strength and army to win

proof darkseid relying on his army is here where instead of doing his own bidding he has his army attack a threat much bigger than him second darkseid has actually beat batman and outsmarted him in JLDAW where darkseid sees through the entire JL and legit no diffs them one by one so saying batman beat darkseid is not all now this feat happening is actually a non canon feat so take it with a grain of salt

here is the link to what happened and how bad darkseid has shown off his skills and power also to put more emphasis on this darkseid did not beat them but rather had his army and relied on them showing how much he relied on his army but once again please do not use this even though this shows how fodder Batman is it's not canon

The next time Batman beat darkseid is in another non canon scene but let's cover it right now

here is the time batman did outsmart darkseid however there are many flaws with this

Batman had help from cyborg and supergirl who are leagues smarter then Batman, second the way batman beat darkseid was hacking into his computer and making a bluff to make him give up as to can see batman won the battle by hacking into his computer this would classify as a Iq and invention feat but invention feats are not impressive as I said as for iq the Iq cat is a impressive category but it's not a one any eq cat for example eq cats such as eq, learning speed, emotional control are all just as good if not better than iq category eq>iq and emotional control=iq cold reading>iq by leagues so Batman doing this feat is not Impressive Batman hacking into darkseid a computer is not impressive drakan ehing is Batman hacking into a computer is just iq and invention iq is semi impressive but it is not as good as eq and many research has proven it not only thst but invention is not impressive but I'll get to that later when we cover it batman made a bluff to bear darkseid after he hacked his computer making bluffs is a eq feat however for one darkseid has no eq feats once you learn to seperate iq from eq it becomes more obvious darkseid has no eq feats thus emotionally manipulating him is not as impressive as you play it out to be you can be a genius but have no eq this gets you no diff by manipulation so Batman making a bluff and manipulating darkseid is not impressive because darkseid is 1)not even omniscient 2) he is not even have any eq feats the next time batman beat darkseid was in final crisis but this was not due to iq, in this comic Batman's did not beat darkseid by using Iq and Witt's rather batman used a bullet that would no diff him the bullet was not even made by Batman either Batman won by combat nothing more nothing less and combat is not the same as Iq or eq next time batman beats darkseid is on the brave and the bold Batman was able to manipulate darkseid to not use his powers however once again darkseid has little to no eq feats so once again it's still not impressive darkseid has no eq feats thus manipulating him is not hard to do oh and to add more to it this encounter happened after darkseid one shot the JL thus darkseid was cocky you could say Batman purposely hid and not fought darkseid and let darkseid one shot the JL before fighting him to make him cocky but then this would be a iq and eq only feat eq>iq so we can disregard that and second he uses his eq on dakeised who I said many times already to not be good in eq also it's not really possible for Batman to do this Batman values his team members Batman is not going to put the JL in great danger or heavily put them to death or possibly kill them to make this happen this is shown in another film where Batman lies to flash to keep him safe and this is slow shown in the Snyder verse where Batman would let himself get killed to let sups live so this happening is not likely as he does not have the will to do it to win but either way even if he beat outsmarted and manipulated darkseid darkseid is not smart eq wise and

darkseid has no eq feats as for Iq darkseid is smart but eq>iq all the times Batman has beat darkseid was when he either 1)has help from the JL 2) used combat(the bullet) 3) used his iq(eq>iq)The times Batman did use eq and manipulate darkseid is still not impressive because darkseid is not smart eq wise and he has no eq feats nor does he even have any eq statements thus manipulating and using eq on darkseid is not impressive Would also like to being up in the movie DOW Batman and the entire JL got no diff by darkseid not to mention true form darkseid was able to 0KO a group of gods who can mid diff TDK for people who don't know darkseid is where in his full form he is held back but when he does get into his full form he no diffs people who mid diff TDK

But anyways the time batman beat darkseid in BATB are not canon so it really does not matter either way

This feat is impressive but he only did it with help and prep from others there is absolutely nothing wrong with having help as a matter of a fact most manipulators use tools to help them get what they want but when Batman is having help from people who are just as smart if not way smarter than him such as cyborg lex supergirl and Superman and to add to that he is not even the mastermind behind it how are you going to upscale Batman? First and foremost Batman is having help from people who are just as smart if not matter than Batman and not only that he is not even the full mastermind of the plans either in other words you cannot say Batman outsmarts darkseid when he was one not the mastermind and 2 had help from people just as smart,but that's not all the feat that happened here is actually a non canon feat this entire movie is non canon so like I said it's the same thing as me going out and writing on a book of Batman losing to a ant n you can clearly see how supergirl was distracting darkseid which was not all apart of the Batman's plans

And it also does not help that darkseid himself only scales to super genius and is not nigh like some of the people high tiers have beat

The next time batman beat darkseid takes place within canon sources so this can be used if it was not so badly written

Now I'm not going to bore you with the entire backstory so I'll summary it

So basically Batman gets into beat with the league and it invoked d damian dying and his soul ending up in darkseid so now Batman has to beat darkseid to save damian Batman new he cannot beat darkseid and his parademons alone and since the it will not aid him he has to do it himself and get himself a suit now this suit is the very

known and popular hellbat suit a suit which is insanely deadly people like to say Batman made this suit and since he has this suit is heavy Amos his intelligence which would be true

If he actually made the suit

Contrary to popular belief Batman did not make this suit well he did but in a different way

Batman basically made the layout and design of how the suit looked in other words he does a feat which is already done by mankind

here is a irl human who made his replica iron man suit

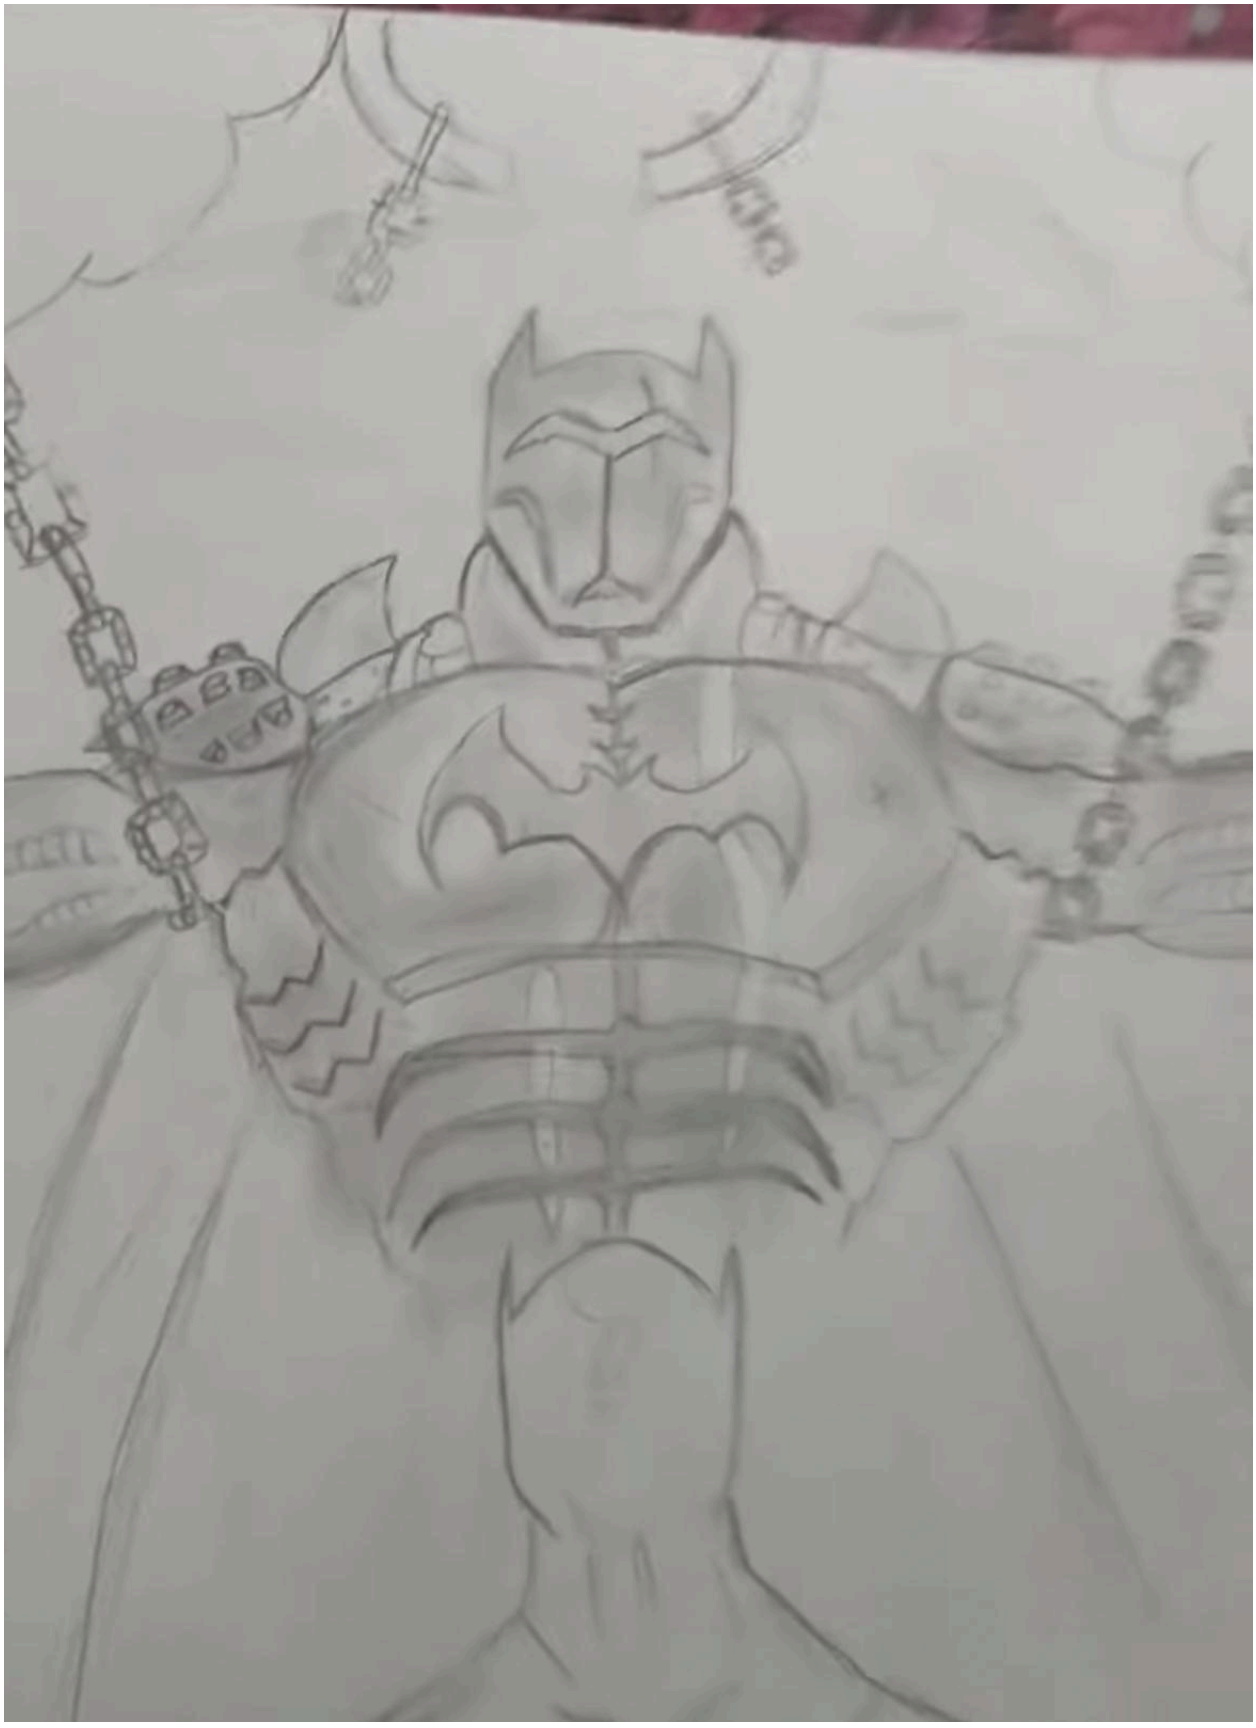

This is what basically what Batman did just looking different

However barman himself did not make and give the suit its super enhanced powers it was in fact the justice league

"...FORGED IN THE SUN BY SUPERMAN...
"...AND GREEN LANTERN...
"...FLASH...
"...CYBORG...
"...AQUAMAN...
"...ALL OF US CONTRIBUTING TO IT FOR A SINGULAR PURPOSE YOU KNOW ALL TOO WELL."

It was forged by Superman in the sun amped with will power by green lantern raced and amped by the speed force of flash has circuitry done by cyborg cooled in the lowest depth is seas by aqua man, casted by magic of both heaven and hell by wonder women and the final touches were done by the Greek god Hephaestus this suit was very highly amped by every member of the JL IT WAS not Batman who made this shot it was the JL who did most of the work and made the suit Batman did almost nothing to this suit the only thing Batman did was design the suit and it's looks which is no where near as impressive designing a suit is the equivalent to making blueprints or drawing a suit/picture on a piece of paper in other words barman only made how the suit looks and Batman only worked on the Aesthetic of the suit and how it looked which is basically the equivalent of making blueprints or drawing a image or picture or suit on a piece of paper basically anyone can do that anyone who knows basic drawing can do it and there are even tutorials of how to draw the hellbat suit on a piece of paper which is basically what Batman did in a nutshell so the hellbat was made by the JL and they did most of the forming and worn whilst Batman basically did nothing

do you see where I am going when I say Batman had help to win his battles?

this drawing is a representation of what Batman basically did when people say Batman was the one who made the suit but I'm not done Batman uses this suit to supposedly "beat" darkseid however anyone who has ACTUALLY READ the comic knows what happens

Hellbat fights darkseid and throws like 4 punches these punches are enough to hurt and sent darkseid back

--HAVEN'T BEEN LEFT TO MY IMAGINATION!
NNRGH
B'RRAKK
ARGHH
WHAMM

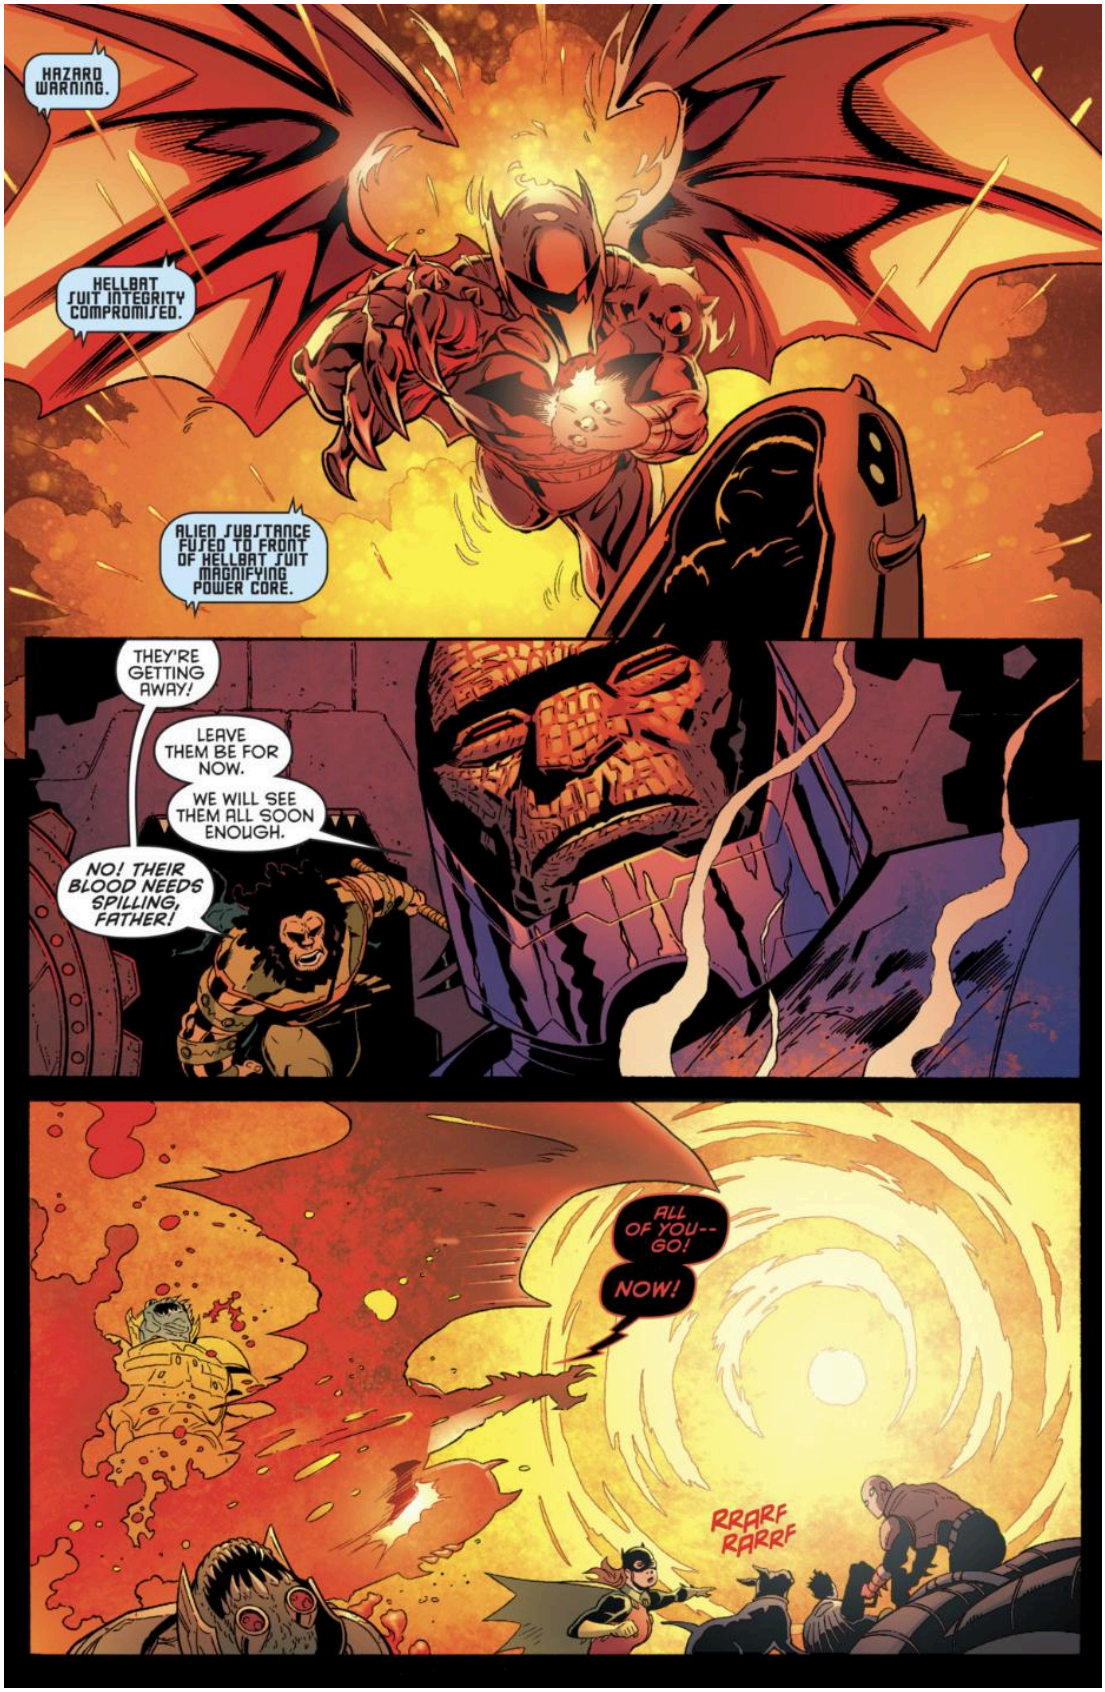

--HAVEN'T BEEN LEFT TO MY IMAGINATION!
NNRGH
BRRRAKK
ARGHH
WHAMM
SKRAKK

Here we can see Batman in his suit is able to hit darkseid and we can see how these punches are able to damage darkseid however they leave minimal to no marks on him

In the Exact same panel we see darkseid with a bear hug was already able to make Batman scream in pain

But this is not all darkseid fired omega beams Hellbat uses the Chaos Shard to attract the Omega Beams like a magnet. He used the power to charge his suit up to 100% so Batman as amped as he already is gets a extra giant amp and lands a forever hit on darkseid

BRAKA
KOOOOM
RRNN

HAZARD WARNING.
HELLBAT SUIT INTEGRITY COMPROMISED.
ALIEN SUBSTANCE FUSED TO FRONT OF HELLBAT SUIT MAGNIFYING POWER CORE.
THEY'RE GETTING AWAY!
LEAVE THEM BE FOR NOW.
WE WILL SEE THEM ALL SOON ENOUGH.
NO! THEIR BLOOD NEEDS SPILLING, FATHER!
ALL OF YOU-- GO!
NOW!
RRARF RARRF

there is

the scan of a already amped Batman getting even more amped

But yk what's funny? Darkseid after getting hit by this just gets up and walks it off like it's nothing and just before this darkseid was able to tear a small section of the suit with complete ease

Batman never used the hellbat to beat darkseid at most he was able to noticeably damage him but not the point he wa finna die

But this is not all Batman pusses out and make a run for it as the hellbat relies on energy and the longer Batman was in the fight he would of died not via darkseid but his energy

So no matter the situation he loses so to all the Batman syndrome Stan's who wanna use this feat just keep this mind

Blud never made the suit and he never used it to beat darkseid keep this in mind next time you talk after this is posted ion wanna hear anything else ab all this hellbat feat because it's not even as good as y'all scale it to that's not all even with the hellbat suit Batman was going to lose it took the help of not only the JL who I already explained are smarter than Batman but even the ex robins who 2-4 are smarter than him

Now there are 2 other times Batman beat darkseid however these events take place in non canon scenes Batman brave and the bold is not a canon source so this holds little to no value whatsoever they would hold some value if they were canon but they are not I already covered the BATB fights is non canon and does not matter much

Now according to the vs battle wiki

Intelligence: Gifted. Has ruled over Apokolips for thousands of years, leading his armies to invade thousands of worlds successfully, and is a master combattant who has fought in countless battles and was able to easily defeat a Green Lantern

Intelligence: Supergenius (Has countless years of experience in strategy, military tactics, governing, and scientific pursuit. He regularly draws chess matches against Eclipso, a cosmic entity and former embodiment of God's Wrath, and built a spaceship larger than the state of New York. Darkseid is responsible for some of the most advanced scientific breakthroughs in the DCU, creating technology capable of penetrating the Source, accessing the realm of Anti-Life, stealing part of the Anti-Life Entity's power, combining and manipulating fragments of the Anti-Life Equation

darkseid is scaled to genius-super depending on the version this means Batman's feats are only at the level of super genius intellect whilst NGNL and bad deal with Nigh omniscient

That's it and only if he has actually even beat darkseid which I covered he has not and the times he did was confirmed to be already non canon

After writing all of this I can officially say Batman V darkseid ant any iq fear regarding that is officially DEBUNKED

Next up is a double debunk for the joker and Batman and it involves the infamous Mxy feat

For context joker was able to "manipulate" Mxy into getting all of his power

And Batman was able to defeat the joker even when the joker had this power and was beating Batman and many bat syndrome fans try and use this to upscale the 2 of these people

Well I hate to break it to you but this feat is and has already been debunked

Let's take a look at the exact panel joker manipulation in Mxy and let's see what Mxy has to say. What if I told you that there is context that disproves this entire joker feat?

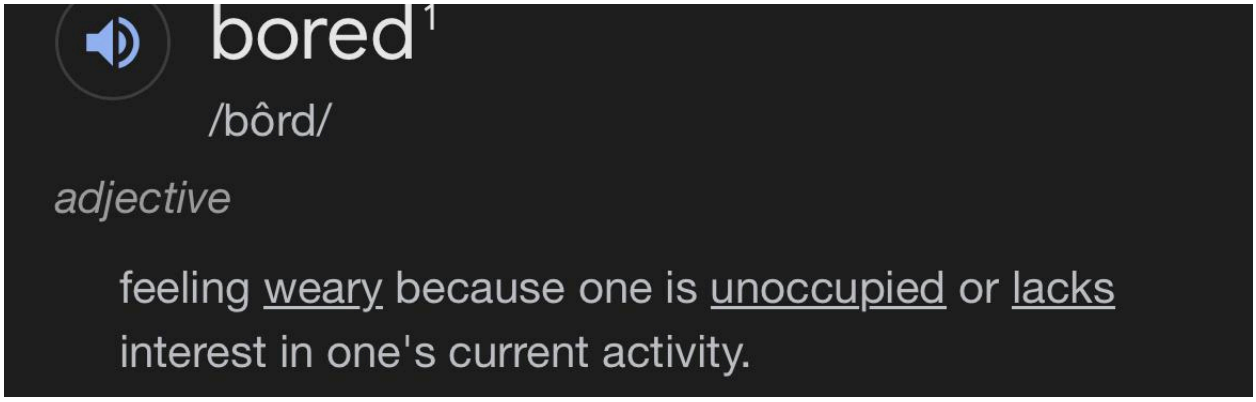

Let me show you again if you guys did not see it fully

THERE ARE JUST SO MANY TIMES YOU CAN LEAD A HORSE TO WATER --
AND
CH AN
OG NEW
CKS.
IN OTHER WORDS, I GOT BORED.
SUDDENLY, I HAD THIS BRILLIANT IDEA.
375

Mxy-“In other words I got bored” now why does this matter

It matters because if this

Bored meaning “lacks interest” this means when Mxy was pulling his little stunt off he did it when he did not care and was not showing interest and was not paying attention so joker was able to trick a non caring and non interested Mxy it’s the equivalent to me beating Ayanokoji in a math test if Ayanokoji is not trying

Does that sound impressive to you? But this is not all

Here is a another scan that should lower this feat Mxy himself says that he is a idiot

there is the scan of Mxy himself calling himself an idiot now now how well does this statement hold? Well it's pretty obvious Mxy Is not a idiot after all bro is above space and time itself and he has reality warping

Reality warping is a power that also includes nigh omniscience

So just by having reality warping alone Mxy is nigh omniscience so it's quite obvious this claim does not hold much

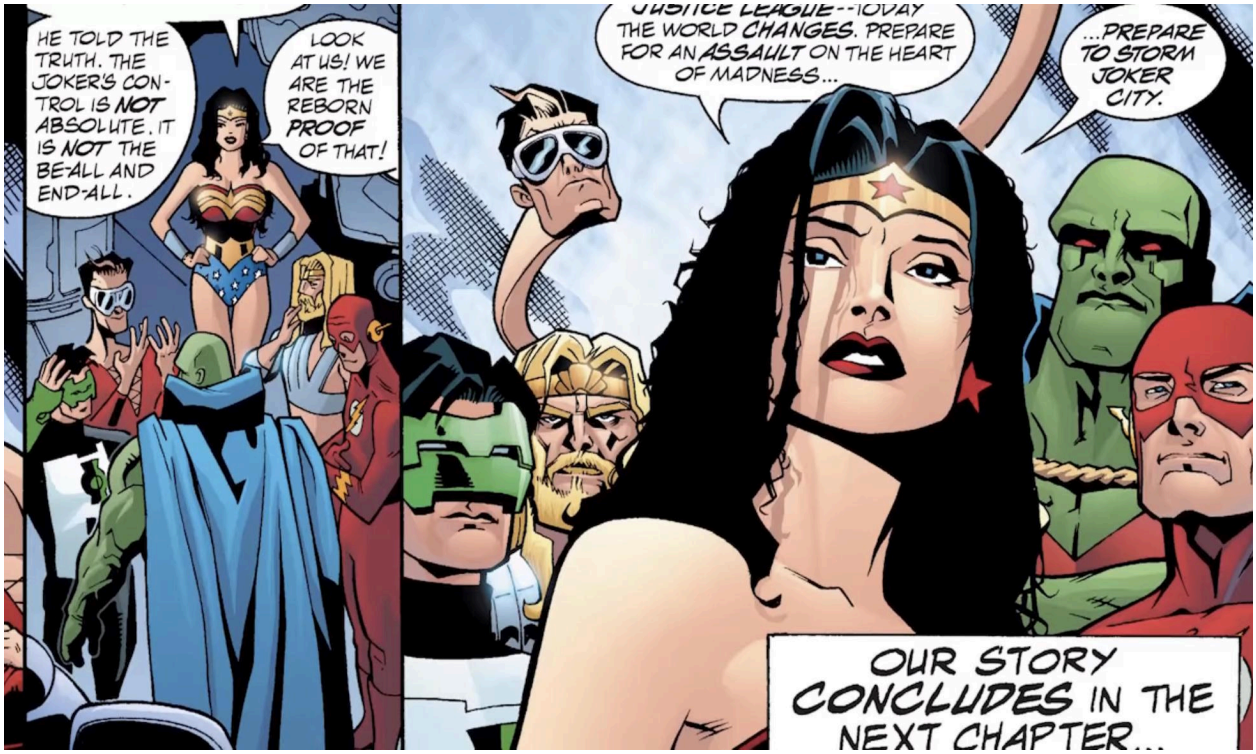

But it does hold slight value for those who don't know everytime Mxy goes from the 5th to 3rd dimension he becomes less intelligent and more goofy so in other words Mxy is not at his peak intelligence when we see him this adds extra value and proof Mxy feat joker did is not as impressive as people are making it sound like alright now that I proved joker vs Mxy is a out of contest and misunderstood feat it's time to cover Batman outsmarting emperor joker

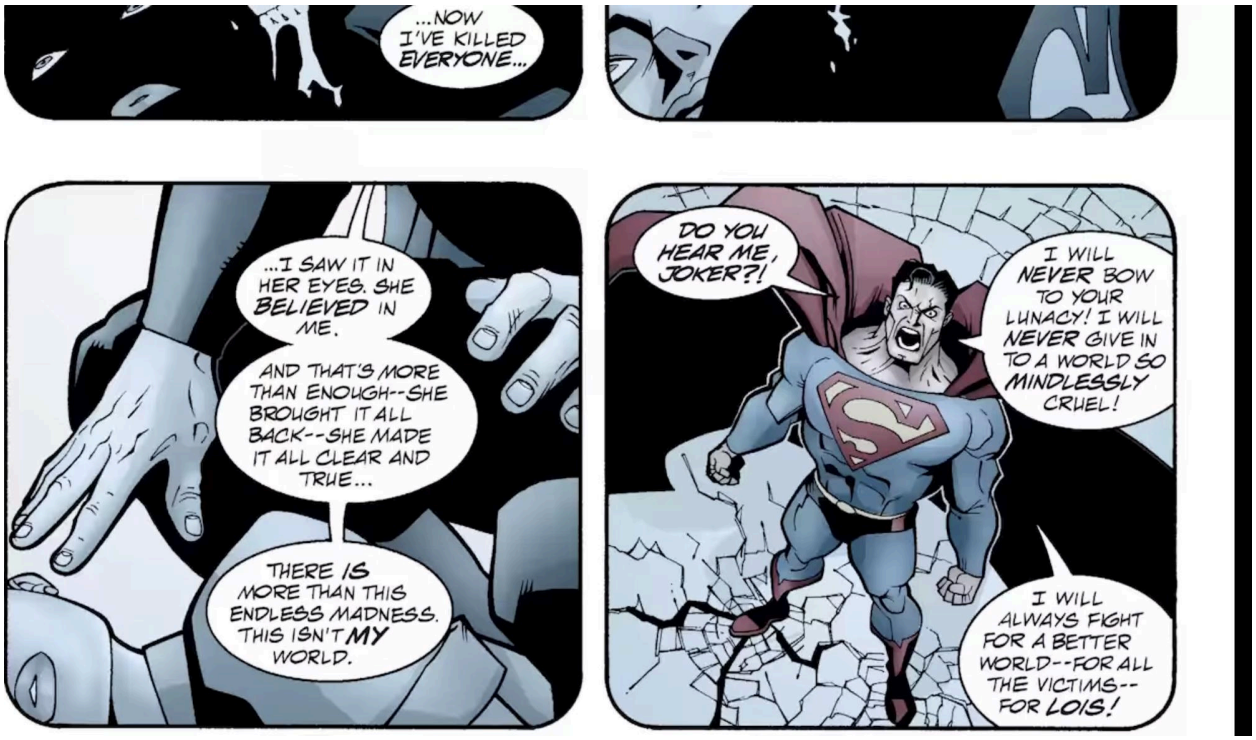

So how did Batman outsmart this all mightily and powerful joker? Well let's see we'll um uhhh WELL FIRST off ummm uhhh HE DID THIS WHICH LEAD TO THAT AND uhhh Ummmm

Alright im sorry but i'm going to be honest

Batman never outsmarted this version of joker at all, yes you heard me right the most famous infamous feat that is used to scale Batman…. Never happened

What happened in this comic is Superman showed how brave he is and broke the effects of reality warping that joker put on

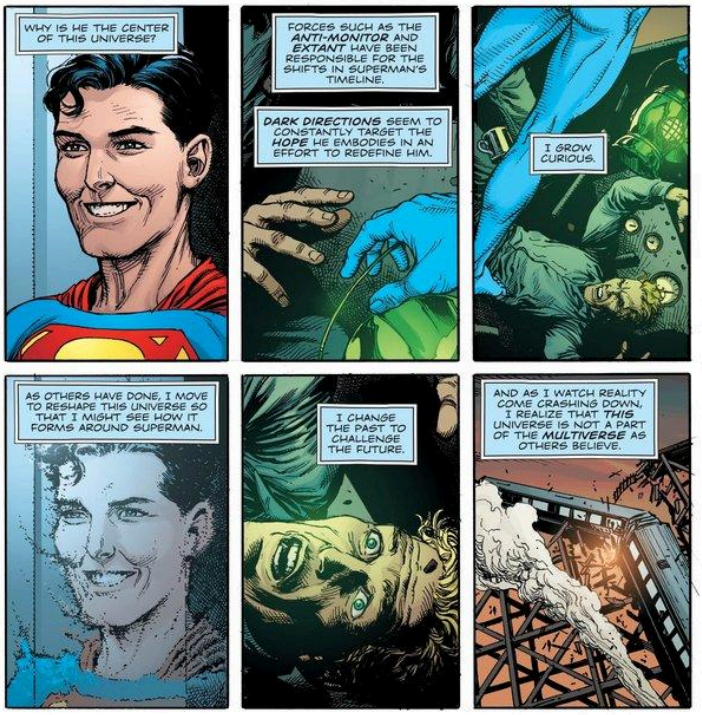

here are the scans of that being true as you can see Superman shows how brave he is and it breaks the effects of reality warping Now Superman actually gets a buff here it turns out Superman was able to deduce the joker made a fake world and the world he made is fake so this means emperor joker used reality warping to make a fake world

instead of actually going through with it this means this causes everyone else to find out this realization and see through it

Now this is off topic but I have to bring this up as I know bat syndrome fans will try n use this feat so I'll cover it now

The JLA did not see through reality warping that scaled above them

Superman seeing through the powers of mxy/joker is because Superman is on par with manhattan we see that Manhattan cannot do shi to Superman when he used reality warping

here is Superman being immune to manhattan which means Superman is on par with manhattan

Manhattan is a mf who can keep up with Perpetua

and Perpetua is 6D compared to the 5d Mxy is so sups is actually above Mxy and is non dazed by his power

As for the rest of the JLA who saw through "reality warping"

They did not

It took a speech from Superman(who like I said scales heavily above Mxy) for them to break out the reason why the entirely of the JLA was able to see through and break the effects of reality warping is because of the fact Superman gave a speech and Superman is above the powers of mxy/emperor joker and his reality warping

So now that i covered that let's move back to this feat Batman has never outwitted emperor joker

As a matter of a fact do y'all wanna see what was going on

after Superman beats emperor joker fixed the world carried his entire team Saved Bruce and then deduce what the laws and rules joker had

Batman was sitting there traumatized and crying

Why? Bcuz joker killed him and revived him so many times it mentally broke Batman there you can see how terrified Batman is so before y'all go on and say Batman outsmarts emperor joker no he did not as a matter fact bro died dozens of times and was left traumatized at the end of the day it was joker who got the last laugh and even though blud got Lz from Superman he ultimately won as all he cares ab his Batman and he left Batman broken

Now there is another adaptation of this feat that happens in Batman brave and the bold but like I said earlier that is a non canon story run so it holds little to no value whatsoever

Next up is Batman outsmarting brainiac and solving something brainiac could not first and foremost I can recall 2 times off the top of my head where brainiac SLAMMED Batman first was injustice 2 and second was LB2 both times Batman got outwit and needed saving now like I said earlier take this with a grain is salt as these 2 verses are not canon at all so I would not use this if ur Trying to scale

second people like to claim that brainiac has a 12 level intellect and he gains intelligence of the entire world that he destroys and captures which is true however there is a loophole to this a "12 level intellect" according the wiki only means "a term

that was used to describe some of the smartest people in the universe" in other words 12 level iq=smartest without being omniscient or in other words some of the smartest people/creature alive in the universe now let's search up the definition of "smart"

"having or showing a quick-witted intelligence"

AKA having a high intelligence

Intelligence=iq

Iq=INTELLIGENCE quotient

Do you see the loophole?

Having only a 12 level intellect only means your smart IQ WISE

In other words 12 level intelligence only means you're smart when it's Iq based so cats such as fsiq-planning-strategy-memory and basically any and every other type of iq cat falls under 12 level intellect. Do you see the loophole?

For the people who did not 12 level iq only means your smart iq wise but it never specified nor said you are smart EQ wise

In other words brainiac can make a complex plan on how to graduate a top college become the richest man in the world

But he would not be able to understand emotions philosophy and or prevent himself from being MANIPULATED as I said eq>iq low diff

Here is a article according to LinkedIn

"EQ has a greater impact on success than other factors."

According to campsbesvile

"Emotional Intelligence (EQ) Emotional intelligence is distinct from IQ. "Your EQ is the level of your ability to understand other people, what motivates them and how to work cooperatively with them," Harvard education professor Howard Gardner explains. In some ways, EQ is far more important and valuable than IQ"

According to diffen"EQ is a better indicator of success in the workplace and is used to identify leaders, good team players, and people who best work by themselves"

As you can see all of these sites are saying eq is better and way more beneficial than is this proving eq>iq without a doubt however you do not have tk take my word for it let's use some real life examples

Albert Einstein is a prodigy genius with a way above average iq Combine inflation he will be worth of a net worth of 634k

Not Albert does not have the highest Iq so in turn I will be using someone who is popular but not the talk of the town fake Teeqo is a fake member he was never in the spotlight he is not the most viewed or subbed faze member he is popular but not tk the point where everything and everyone knew him

Fake Teeqo is not smarter than Einstein not even close but he is very entertaining to a small audience

His net worth is 1 million

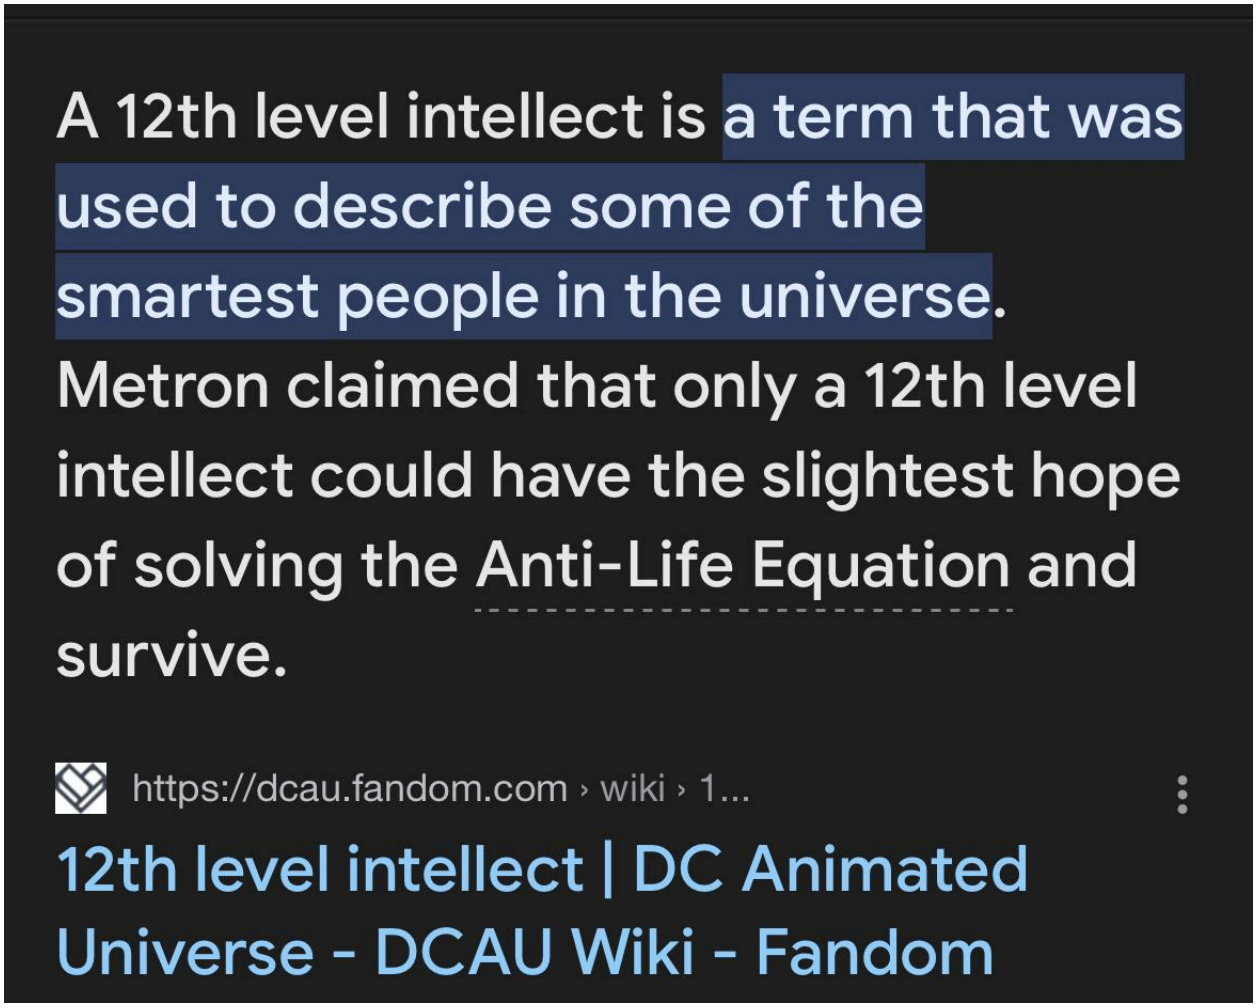

Furthermore proving how eq>Iq

Not only is eq more important and more better than iq and stronger but it's also harder to gain

Iq is usually gained through places such as universities and schools where you learn things that are already KNOWN AND STUDIED sometimes iq is gained by doing your own things and learning something completely new but most times 50-60 percent of the time iq is gained by learning things that are already known and sometimes it's gained by doing your own research and learning on something that is not known and completely new on the other hand if yoj want to learn and have a high eq you need to study and interact with human emotions humans are smart and complex creatures every single human is different in their own way and they are all unique you will never find 2 of the same exact humans they will all be different thus when your trying to gain eq and learn about humans it's ALWAYS going to be new different info that you have to figure out and deduce all by yourself compare that to Iq where most times your learning about things that are already known and taught but eq ur learning something completely new that is not known the world yoi also have to deal with and see through things such as lies and deception and many many more so with all of this eq and gaining it>iq I have already provided scans of eq>Iq so there is no need for that n ni need for me to give it out again

12 level intellect as I said is self explanatory it basically means you have one of the highest iq in the universe and in all of existence and in existence it never once

specifically said to even inferred anything about eq in other words 12 level intellect only means you have a high iq not eq

Next up is the feat in death metal Batman was able to make his one new fighting style/martial art within minutes

This feat is impressive and not at the same time

The reason why it's impressive is because well the man legit made his one fighting style and martial art within minutes to fight BWL

This would be a BIQ feat as anything involving using your intelligence to win fights and battles especially with hr hands and fists with no doubt it can be BIQ and learning speed as he did it in such short time however here is the thing

Low tiers such as Ryuen have also done this feat Ryuen is a low tier yet even he over the span of his life was able to create his own martial art and fighting style

Ryuen should be compare to Arisu

Arisu should be lower with Yagami

Yagami should get mid diff by kiyo Ayanokoji has said Yagami is only about 40 percent of his skills Ryuen and Arisu are basically equal

And Yagami should be about the 2 of them If we assume Ryuen made his martial art before ANHS he would of made it when he was about 14 this would mean Yagami who should be higher than Ryuen by quite a bit he able to do this feat in about 10 years Since Ayanokoji only sees Yagami as only 49 person of his skill this would mean Ayanokoji can achieve this in 4-5 years

Next up are actual Batman feats that are impressive these feats are feats that should actually be used when scaling Batman as they show off his intelligence

The first feat is the fact that in death metal Batman was able to make a series 2 version of last laugh which is a backup protocol that will cure and save all the Gotham inhabitants if a Chemical outbreak occurs

The next feat is on the lesser impressive but so caught my eye it's the fact that Batman was able to make a drug to almost Tuen James GORDEN pure

If you don't know who James GORDEN is he is dc's biggest psycho even worse than people like the pig

When it comes to invention/on screen invention feats Batman is easily top 3 in his verse only being behind obvious high tiers like Dazai who has op narrative and NGNL

Off screen BWL captured Jim than narrowly let him escape as he planned and predicted that Jim would go out of his way to team up with Batman their team up would lead to them achieving last last the BWL plans and predicts all this happening hence he lets jim go and the reason why BWL wants it to happen is because he knew last laugh was not meant to save lives but to destroy it and to put this in perspective not even a amped Bruce Wayne with a visor that improves his vision saw this coming until the very last minute

Through will alike he held off the amped effects of becoming a second BWL

A slightly corrupt Batman was able to make a replica visor that involves filtering out dark metals if dark energy which allows him to see what he needs and wants

This is still not comparable to what batman did but in the anime verse Ryuen is not close to being high tier he imo is even below low tier yet he still made his own martial art

But that's not why this feat it not impressive

Batman was able to make 1 martial art in minutes

But the thing is Batman knows 180+ martial arts and even knows some secret martial arts only a select handful know

Now why is this relevant

Bill gates has over 113 billion dollars

On a show bill once received 20k check for himself

20k dollars compared to bill gates is only worth about 70 cents to him if we look at how much money that man has made

In other words batman only making 1 martial art is not as impressive as he knows 180+ martial arts in other words he should of been able to make a feel more

It's also the fact that Bruce knows 180 martial arts so making a fighting style/martial art is going to be way easier for him as he already has knowledge on 180 of them

It's like saying a advanced calculus teacher saying the first 50 numbers of po is impressive like the man is legit a advanced calculus teacher he can and should be able to do much more than just that

Feat is still valid and impressive just not to a degree people think this as it's been done by low tiers who are weak asf

This is a actual valid feat

HA! THE BATMAN WHO TALKS IS MORE LIKE IT.
STILL, I DO LIKE THIS CAVE BETTER...HEEE.
WELL, WELL. I WONDERED IF YOU'D SHOW UP.
WAS IT THE DRAGONS? SOME SECRET SIGNAL?
OR WAS KILLING TWO BATMEN TOO MUCH TO RESIST?
A GOOD OLD-FASHIONED THREE-WAY FIGHT.
HEH. NOT EXACTLY.
SO, PARTNERS, BATSSSS?
I'M GOING FOR THE LEG.
I CALL HIS FACE.

batman using a made up martial up on the spot to keep up with BWL

Remember when I said even though it's only stated Bats new 127 martial arts but I believe he should know way more? This is the reason the fact he was able to make a combat martial art style not even BWL who is split counterpart and knows everything about him can deduce shows he most def knows more styles of combat

This is by far the most overused and most loved feat by every Batman fan so let's cover it

First, what is and who is metron? Metron is the greatest mind of New Genesis, a New God explorer who seeks scientific knowledge in the further corners of existence with the aid of the universal-traveling vehicle the Mobius ChairStill not recognized? Well let me word it to where a Batman fan would say "Batman outsmarted omniscient"

first and foremost high tiers like Dazai Sora Siesta have Nigh outsmarted omniscient users as well when they were trying to win vs them

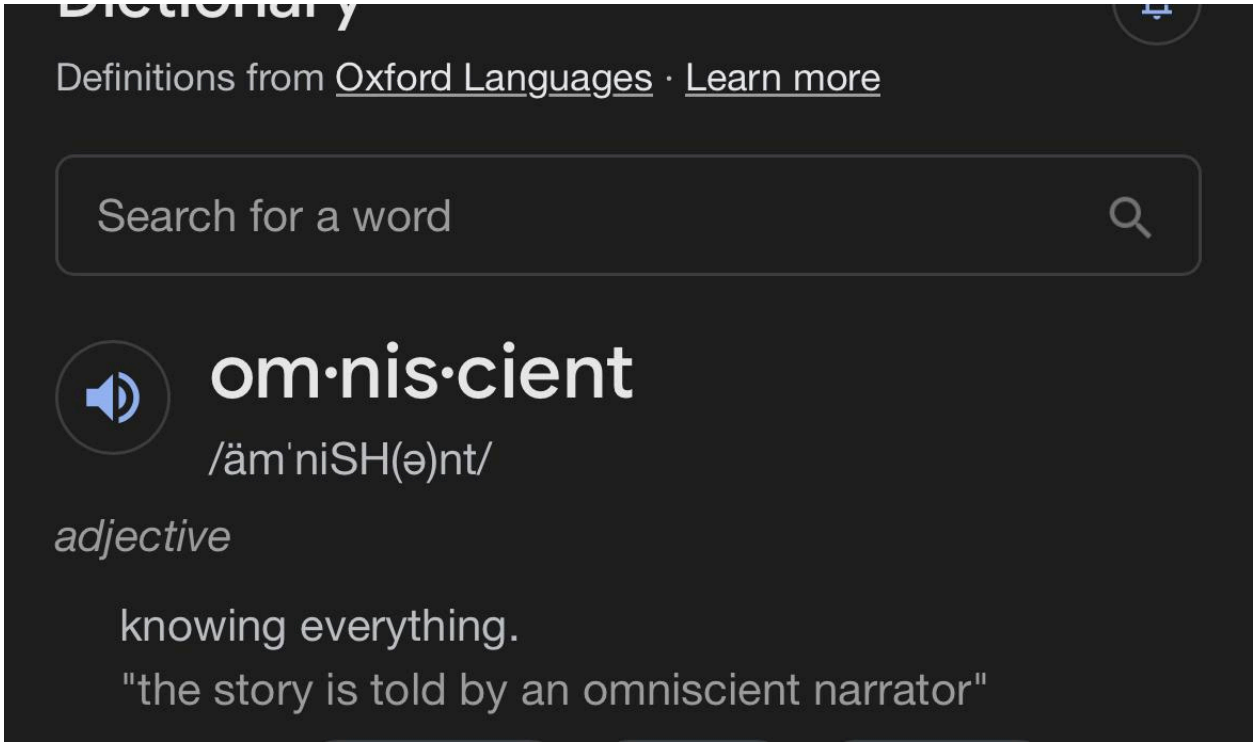

Intelligence: Nigh-Omniscient (Old Deus almost knew everything. Holou possesses an ability similar to clairvoyance but it's became still far from omniscience since such a thing violates the rules and thus the Ten Covenants are limiting her power) | Nigh-Omniscient

Main article: Design Ability

This unnamed ability allows Dr. Wollstonecraft to design anything she wants. She accounts most of her scientific achievements to this ability.

Here is proof Wollstonecraft and Holou are nigh

Next up is the meaning of omniscient there are 2 meanings of omniscient and it depends on how you use it The first and most used meaning is that omniscient means to simply know everything no

US /ɑːm'nɪʃ.ᵊnt/ UK /ɒm'nɪs.i.ənt/

Add to word list

having or seeming to have unlimited knowledge:

exceptions or limits The second meaning of this word is to have all knowledge which implies only having infinite iq now when scaling the first term of this word is usually used so why would I bring up the second term? I'll cover that now according to the Cambridge dictionary omniscient meaning "having or seeming to have unlimited knowledge " do you see the loophole? Omniscient only means you have infinite knowledge AKA IQ but it never specified having infinite eq in other words anyone who still sits on this chair will still have their own eq so that is that

Second it's obvious y'all have no idea about what or how the Mobius chair works

First of all the mobious chair does not give full omnicient it gives only nigh omnicient second the mobious chair does not give the user omnicient powers rather it allowed

the sitter to use its omnicient capabilities that may sound hard to understand so let me explain it more harder when you sit in the mobious chair you do not INSTANTLY get omnicient capabilities but rather you get to use The powers of omniscient of the chair so in other words for the omniscient powers to work and to use the mobious chair you need to ask it a question mobious chair only works when you use ask it a question so let's just say I sit down on said chair when I sit down I am not granted nor do I gain any type of omnipotiant power at all rather o get to use the chair which itself has the power so let's just say I sit in the chair for it to "work" I need to give it a order /question for example let's just say I wanted to solve world hunger if I'm sitting in the mobious chair and o want to solve world hunger I do not instantly know how to solve it rather I need to ask the chair something such as "how do I solve world hunger" so I'm a nutshell for the mobious chair to work you need to ask it a question and the mobious chair is nigh omnicient not the user sitting on it the user does not get omnicjsnt rather the person sitting on it gets to use omniscient capably only if that person gives a question or demand In other words if I were to beat a person with a Handgun but the handgun was never loaded with any bullets is that feat still impressive? If I were to beat a person who had a handgun and pulled the trigger but the gun was never loaded with any bullets thus no bullets came out am I still going at subsonic speed? If I were to beat Mike Tyson in a boxing match but the marches were when he was sleeping and he had both his arms and legs tied up, is it still impressive? If I were to beat a person with a gun aimed at me but that person had a gun that was not loaded is it still impressive?

Debunk time

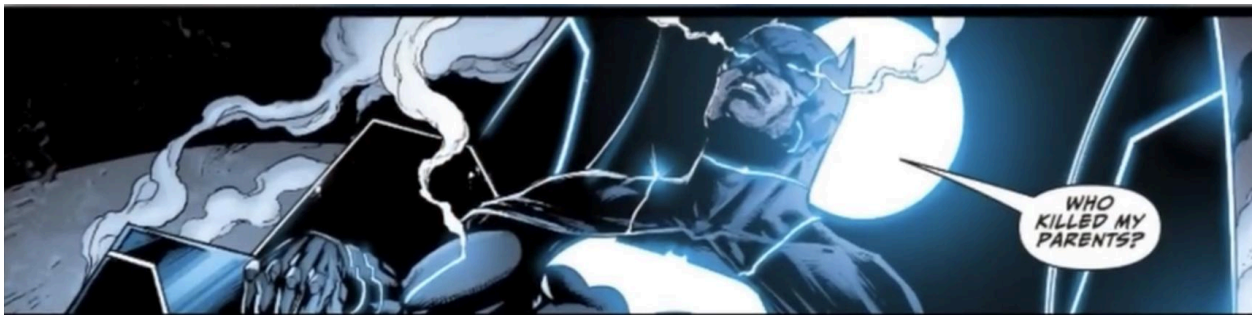

in this panel we see batman sit in the Mobius chair for the first time

Batman says-I can hear them the answers the answers to everything are they real is this real

People like to use this claim and say since Batman said this as soon as he sat on the Mobius chair this means when you sit on the Mobius chair you will automatically and at all times will be nigh omniscience and get answers as shown as "this panel" "proves" it

But that's just wrong. How do I know?

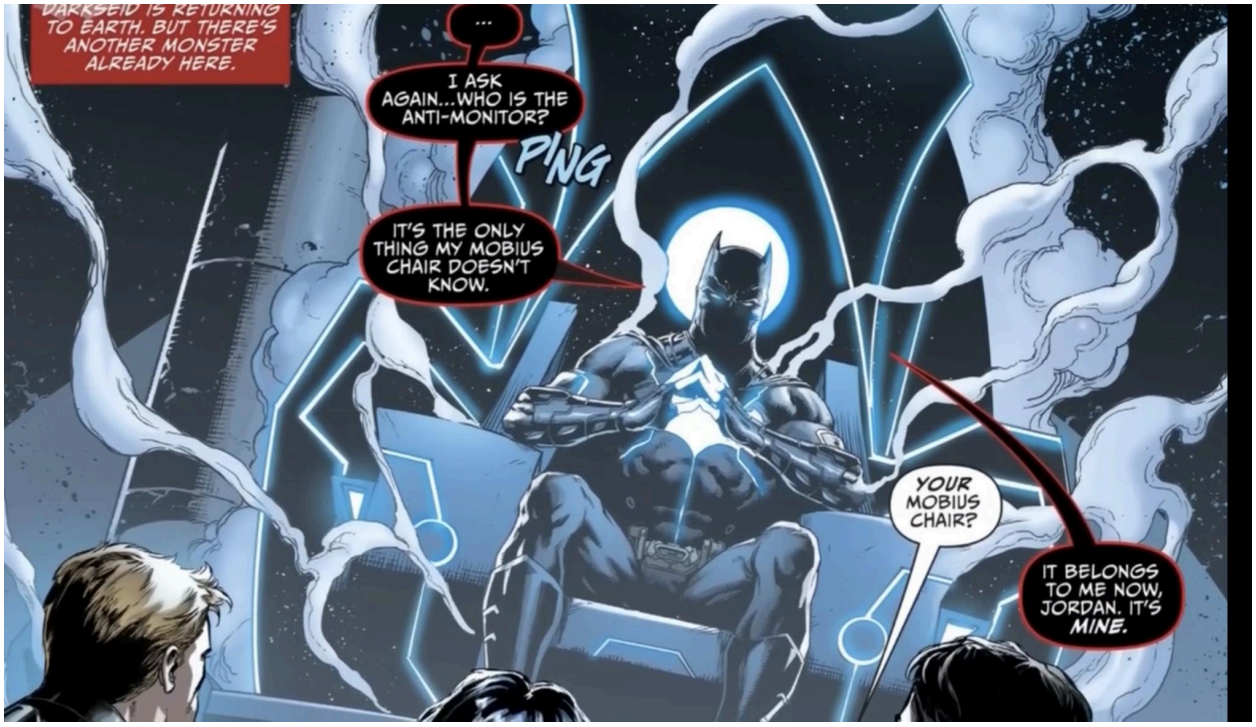

I know because in the exact next panel batman has to ask the chair a question to make sure it's legit and not fake

If Batman received the answers to everything or almost everything, why would he need to go on further and ask it a question to make sure? But that's not all

In the exact next panel Batman asks the chair a question again to make sure the chair is legit once again. If the chair is constantly giving and allowing the user to have nigh omniscient capabilities, why does Batman need to ask it another question?

If Batman got the answers to everything earlier this entire step would not be even necessary is this not enough proof?

Then why does Batman do it for a third time? He does this 3 times already now later into the comic we see Batman make wis/smart moves and feats without asking the chair a wrist ok or speaking however what is to say he never thought about it? What I mean by that is thinking of something is the exact same thing as saying it out loud just because Batman did not say it out loud out of his mouth does not mean he did not think it and judging via the fact the first pages we see Batman enter the chair he firstly had to ask it a question before he would get a answer it's safe to say the chair does not grant Batman nigh capabilities but rather he has to ask it a question and the times where Batman got info and knowledge when he did not speak up or talk where the times where he thought of it in his head this is shown via proof and the fact that when Batman first steps into the chair he has to ask the chair 3 times 3 questions for him to get a response now it's time for a second debunk of the Mobius chair and that is

The Mobius chair grants nigh omniscience in the form of unlimited knowledge not all knowing Proof?

The times Batman used the chair was all in situations that involve cats involving FSIQ

For example Mobius chair Batman has done feats of stopping a robbery via car escape stopping a man from hurting his wife and prediction attacks from the anti monitor

All of these involve Fsiq not eq when Batman supposedly outsmarted omniscient METRON AKA the person sitting in the Mobius chair metron never asked the chair a question nor did he give it a demand nor did metron try and question Batman's plan or

motive once again for the Mobius chair does not give the user omniscient it allows them to use the chairs omniscient capables but you need to ask it a question or give it orders Metron never asked the chair a question nor did he give it a order nor did he question or understand Batman's methods Metron never onced asked the chair a question nor did he give it a order nor did he use the Mobius chair to question or understand Batman's methods In other words no form of omniscient was involved people would just believe what they hear over Reddit and replies and just go with it

But this is not all people like to upscale and uplay how good the Mobius chair is but they go to ignore the weakness it gives for people who do not know

Sitting on the Mobius chair as soon as you sit in it you gain

-a thirst for more knowledge

-overconfidence

Batman also took advantage of these 2 things to outsmart Meteon and these 2 things are the weakness of what the chair gives him so come ikr that with the fact Meteon did not ask the chair if Batman was planning something and the fact the chair only shows fears is having unlimited iq and not eq it's official this feat is a goner

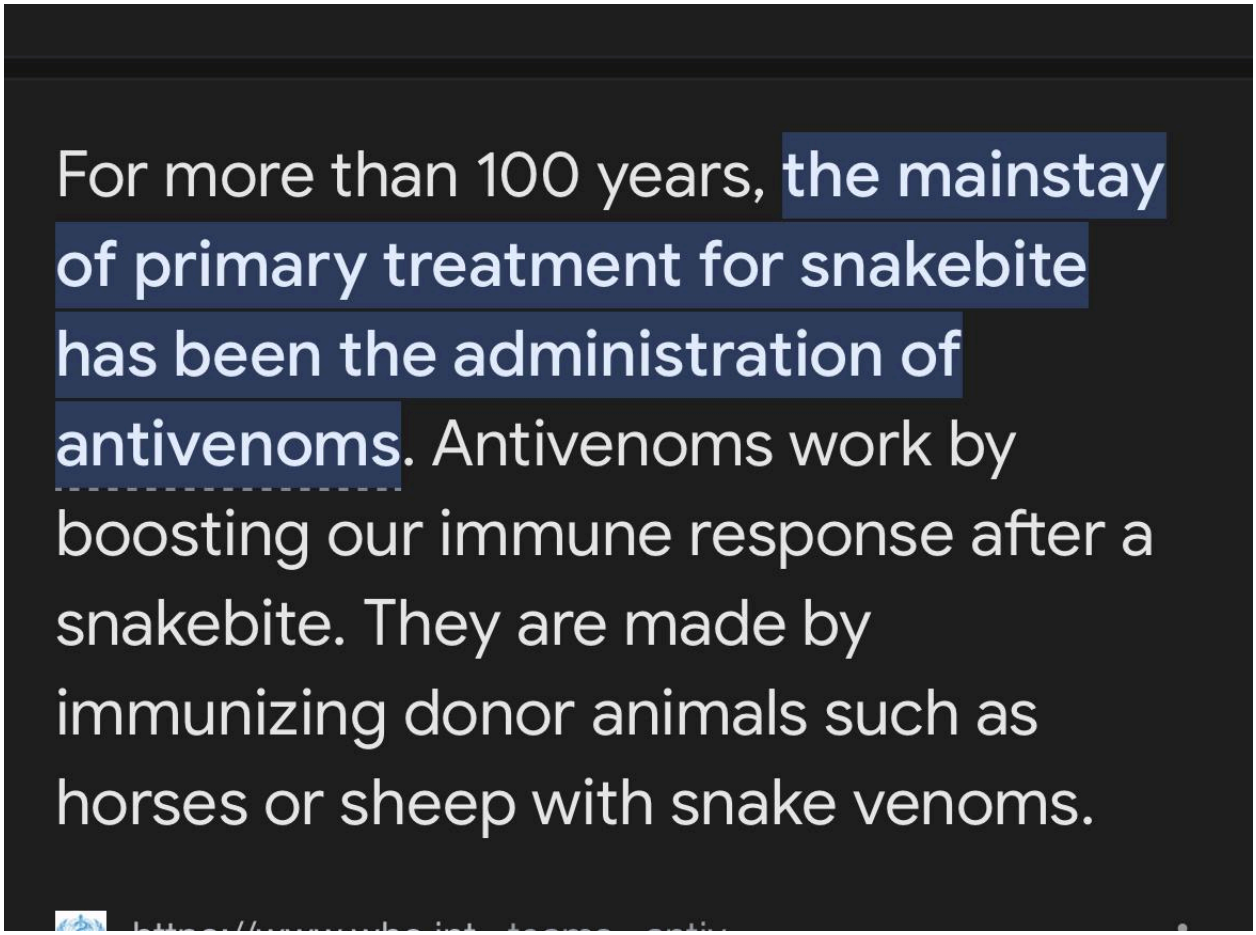

Next up is one of Batman's more lesser used but still uses feats which is his alien cure feat a alien disease and making a antidote to it this feat invoked the fandom not knowing how a antidote is made at all

For those who do not know a antidote is made by using the same type of thing that hurt you for example the way a venom snake antidote is made is by

-taking the same snake venom that but said person

And putting it into said person Now that is fine but people still have no idea about the alien disease feat

For those who do now know this feat happened when brainiac attacks and tried to use a disease to kill everyone Batman stops him by making a antidote However when Batman "stopped" him he was on brainiac's ship and to put that in perspective the disease brainiac made was made on his ship do you see where I'm going with this? This feat Batman did is when Batman already had access to the disease thus making a antidote is no different than making a normal venom snake antidote in other words a scientist can pull this feat off this feat is absolute garbage this feat will only be valid if Batman makes a antidote without the use of already having the disease but he needed the disease and virus to make one that is enough to debunk this feat and this feat is not impressive at all

To make a cure the original source is needed the rest becomes easy when the source of it is found here is scans of it

Now it's time for the full debunk on BWL/TDK by far these characters are some of the most over wanked in terms of how smart they are and even power wise there are they main source of why the Batman image is so ruined now let's debunk then

First and foremost Batman and the BWL are not the same person so trying to use and say BWL feats=Batman feats if not correct as Batman is not the same as BWL The Batman Who Laughs is a version of Batman that killed his universe's version of Joker. Doing so exposed him to a toxin that was inside Joker's body. Over time, the toxin corrupted this Batman turning him into The Batman Who Laughs. He is not Joker in Batman's body Batman and Joker's bodies were not fused together to create him. Both BWL and the normal Batman have stated that this shows how Batman is amped for people who don't know the toxin in Joker's body makes them evil And turn them into Joker but that's not all this toxin also amps their intelligence so what did we take from this?

-Batman is not BWL nor is he a combination of Batman X joker nor did they get fished together

-Batman got hit with toxin making him turn evil and becoming a joker/corrupted version of Batman

The joker toxin heavily amps a person intellect shown many times already

Next up of the intelligence of the BWL/TDK people make it seem like these 2 are like a heavily amped version of Batman and are Batman but basically entire leagues smarter however this is heavily false Do not get me wrong BWL is very smart and is basically a amped Batman but the way people are portrayed him is that he can low diff Batman base which is by far the truth of the matter but this is not true at all BWL is indeed above Batman but not to the point where BWL is always ahead their intelligence gap is about the same if not similar to Ayanokoji vs light Yagami where one of them is a clear winner bud the other will still give the other a very hard challenge to the point they will be at their limit what scans prove this?

these 2 scans I'll explain the BWL gets what he wants and has his plans happen as he infects Batman his goal is to make a second BWL which he is about to

successfully get however due to the high will of Batman he resists it long enough to reverse engineer the security torrents at Wayne company to attack the evil Batman and these torrents are no joke they are meant to take down tanks and have electric currents we on them

This goes to show the will of Batman and remember what I said earlier?

Batman vs BWL is a fight where both opponents would be matched and at their limits?

as you can see ya man BWL is chained and tied up like he is in a adult film this is after Bruce beats him at his game the win from Bruce was a extreme diff and Batman needed a amp of joker toxin and a op visor but if BWL is portrayed as being so much smarter than base bat to the point where it is low diffed than at the end of the day BWL should of still won

The Batman was not even fully joker gassed as a matter of a fact many of the joker toxin he used to why his amp he was suppressing via antidote so he was not fully like the BWL

Batman did have a amp via a op visor BWL also used but even with it the BWL had much better help and influence and even if Bruce had a visor he would of win due to the fact that he was fully corrupted unlike

Batman was who half corrupted

In the fight in Wayne manor Bruce made a very new martial art to beat BWL in combat showing you how Batman can still outsmart BWL at occasions

So this proves that the entire argument about BWL>Batman no diff is false it also proves BWL is not in some entire different league BWL is surely smarter than Batman no doubt but he is far from being out of the league of base Batman

But this is not all

this is a scan of the joker after Batman beats the BWL

It turns out the joker planned and predicted all of this was going to happen the joker KNEW Batman needed a push to beat BWL so he infected Batman with the

toxin inside him which was the main source that turned earth 22 Bruce into the Batman who laughs this toxin was a decent factor throughout the entire battle between those 2 not only that it was the greatest factor in Bruce beating tf out of the Batman who laughs

Joker knew this so he shot himself to have the toxin get exposed which infected Batman as he predicted at the very end it would be a favor in helping bruce defeat the BWL which he was right as in this last panel it's a panel where joker says "your welcome" to bats after the batman who laughs lost

Next debunk for the BWL is what if I told you there is an anti fest out there that is so bad it can bring down BWL to lelouch level?

I'll cover it right now first and foremost when people think of who is the smartest Batman they typically think of the BWL/TDK/GOK Batman these 3 Batman are without a doubt very smart however those Batman are all outclassed by 1 Batman that Batman goes by "the grim knight" now who is the grim knight? Well the grim knight is basically a darker version of owl man who uses guns

Now why does the grim knight have anything to do with anything and why is he one of the smartest versions of Batman? as you can see on the comic cover this version of Batman is already stated to be the most dangerous dark knight of them

all but that's not all 

This is also a scan of him being stated to be one of the smartest Batman and there is even a scan where he off screen and admits to outsmarting the Batman who laughs so these 3 feats show at the very least he is slightly smarter than the BWL

why does this matter? It matters because jim gordon was able to mid diff the grim knight now to be fair Jim did dedicate his life to finding and tracking him down not only that but Jim is someone you should not brush off either he is smart in his

own way but based off feats Jim should be on the same level of Kisaki from Tokyo revengers jim did get a buff so I say he is smarter than Ayanokoji as we later see him again beat the grim knight along with his son(does this with prep he never made)

Now when it comes to anti feats they are subjected and depend on the character how do anti feats work?

Rules of anti feats

-what is the context?

-how did it happen?

-how constantly does it happen

-what are both parties feats

What is context-context matters for example even though Jim outwitts GOK Batman keep in mind he dedicated his entire life to do so

How did it happen-this matters because we need to understand context furthermore for example trying to use a anti feat like this say person A goes vs person B person A trains martial arts person B trains Im books smart person A beats person B in a fight and outsmarted him in the fight this matters because the way it happened was out of person Bs knowledge zone

How constantly does it happen-constantly matters a lot. For example in Tokyo Revenge we see Draken in one occurrence hit a table out in a rage but the tiny small table does not break. Does this mean Draken is below the street? No it does not reason is due to the fact this only happens once and we see time and time again Draken beige wall level too small building

What are both parties feats-this matters due to the fact that anti feats cannot be used to debunk someone if the person already had good feats

If I say Matsuda>cote verse due to the fact Ayanokoji got outwitted by kushida that makes no sense because both those 2 parties have feats that can scale them higher

As a general anti feats are typically ignored in debates due to this reason

So how well does this tbh feat hold up?

Well the feat has context with Jim putting in his all and his whole life to capture Batman

The way it happened was via the fbi surrounding Batman

It happens twice we see him with prep extreme diff him along with his son

Jim has feats that can put him higher than Kisaki

This anti feat is mixed I won't be using this anti feat to scale him but I will say this still shows how a version of Batman who is >= with TDK is still able to lose to normal humans and can still lost and be outsmarted and outmatched on occasion

But even the GOK has limits and if we were to include robins dressing up as Batman he is far from being too 3

Future Tim drake Batman battle for the cowl Batman grim knight Batman beyond Damian just to name a few all these versions of batman or robin dressed up as the bat are people who are smarter or at the very least in par with GOK

Now to more debunk the TDK and BWL we have to take into consideration the fact that TDK lost to wonder women

Now before y'all say there was context you are right there is context wonder women had her powers amped and had her lasso dipped in ant crisis energy

now this amp of wonder women was so good it gave ww powers on par with TDK and he even admits this much to her face but here is the problem

Wonder women did not beat TDK via her powers as it's been stated these 2 are equals so neither of them would gain the upper hand which leads to the only way of winning was to outsmart one another which we see wonder women do as instead of trying to use her powers hax and AP to beat TDK she resorts to paying him into the death sun instead using your surrounding to win a battle is classified as battle iq also for the people who are going to say it NO anti crisis energy does not amp a person's intelligence it only Amps their powers and hax not once does it specifically say it amps a person's intelligence

It also does not help the TDK that even though it was stated that TDK and ww were equal(stated by TDK) TDK does have slightly better hax as he can make

and create worlds whilst we at hood state cannot but dispite thst factor they are jus ab equal with TDK havign slightly better creation and hax but this just add to the anti feat as TDK lost via battle iq and the fact he has stronger hax anti feats just in general anti feats do not hold much value at all the only times anti feats hold value is when a anti feat HEAVILY weakens the character and or the anti feat happens constantly and or the anti feat has to make sense but the problem is that the grim knight is stated to be the smartest version of Batman and has feats that upscale him to above BWL but loses to a basic police officer without a doubt thst anti feat HEAVILY weakens him as just the thougn of it sounds like Batman is just a normal human in iq and thinking now in terms of this happening Jim has outsmarted Batman from time to time but more or less Batman is ahead but then agaian these 2 have always been on the same side most times and as for it making sense the anti feat does make logical sense as Batman is only human align with the fact jim has feats that scale him near kisaki and the fact he has been working on the case his entire life So overral this anti feat even though it does not hold much value it still goes to show how Batman is not as smart as people portray him as

But I'm not done people like to overrate the fact the BWL destroyed and took over the entire world which is a impressive feat but this feat is done by Light Yagami all by himself the batman who laughs needed a army to do his feat Light Yagami did it with a small group of people even Kisaki does a half asked Version of this feat

depending on where you scale Yagami he will always be near Ayanokoji and Ayanokoji is a low tier who gets ultra negged by even siesta or shiro so this feat is done by characters who scale to low tier oh and keep in mind light Yagami does his feat with a low diff so it really does not matter if Ayanokoji is lower then Yagami as

Yagami does this feat with a low diff so even if Yagami is slightly above kiyo that would only mean Ayanokoji would be able to do such a feat with a mid-high diff even Kisaki who gets negged by light and even low tiers like kiyo have pulled off such a feat it doesn't even matter if light>=koji high extreme

High diff refers to the person winning clearly but needed to go all out to do so and has noticeable casualties whilst extreme diff refers to the battle begin at a 52/48 situation and it really does not matter who is better as the fact that light and Ayanokoji are close to equal but light does his world takeover with a low diff at max

Next up is the feat on which the BWL was able to neg many universes this feat is impressive..... for a power scaling perspective Batman who laughs has beat out the entire universe and many or her universes but the problem is this does not amp his intelligence but rather his powers

If we were talking power scaling this feat would be impressive and would make BWL already wipe out most of anime but we are not power scaling

But that's not all this feat once again since this feat is a power scaling feat(as BWL destroying many universes is done via his powers not a smart iq debate feat) then I will use a feat of power scaling for Dazai

In BEAST Dazai is immune to the effects of the book which means he scales above the book and the book is a ability that can make many universes

For people who don't know how to power scale making a universe>destroying and taking over one

What makes this feat even better is the fact Dazai does it without doing anything on the other hand TDK even after getting a giant buff still needed a army

And making a universe>making worlds and destroying a universe

(a world is smaller than a universe)

(It takes more energy to make something such as a universe than to destroy it).

So the book>TDK

TDK is not capable of making universes this is proven via the fact he needs to find the source of the place that made the universe/multiverse

reason why TDK is trying to kill her is to destroy all the universes which proves TDK making worlds=planets and what not

He cannot make universes as he is trough to kill the creator of the multiverse/universe which proves he is not even someone who is able to make them so this debunks TDK being able to make universes

So just by this alone Dazai>TDK no diff

Should I go on?

smartest beings in the universe such as Superman joker etc have got outsmarted and lost to people with no feats to back up their iq

Here is a non canon comic issue where Jason Todd(before he had any training and was still homeless and did not meet Batman) able to outsmart joker keeping in mind at this point Jason only had 1 feat making him hood which is more or less a speed feat

Lois lane was able to outsmart Superman and Lois lane herself has little to no feats even thought she was under influence of the joker

here is the scan

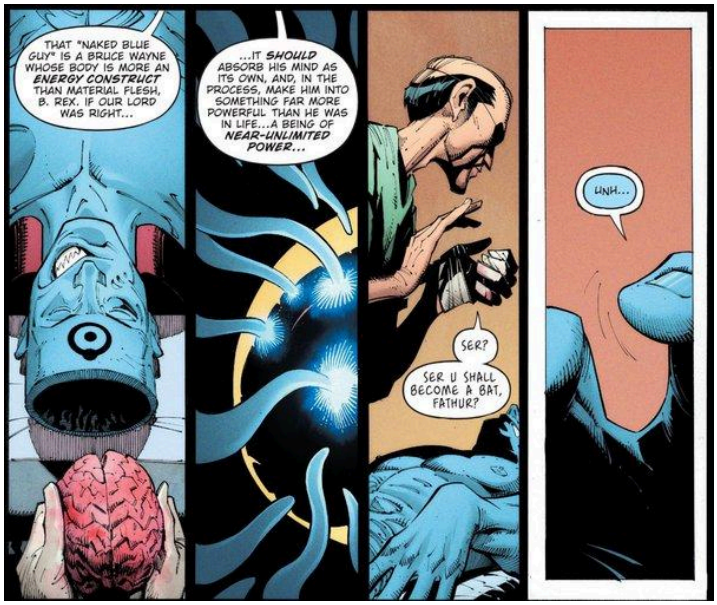

As I said tdk/BWL are not as smarter thanBatman as people like to portray him as now when it comes to the meaning of omniscient it's highly controversial according to some dictionary's the meaning of omniscient is having all or unlimited iQ whilst some other sources say it means to know everything and be

aware of everything It really does not matter which one is as Batman has never defeated nigh omniscient and the times he did was with context added this second meaning should be applied to the Mobius chair as the fact the Mobius chair shows no eq feats and Batman only says it gave him powers to be the god of knowledge

Next up is Batman vs dr manhattan people say Batman beat dr manhattan when it actually never happened this feat is such a joke and so funny that it reminds me of the days when people thought Ayanokoji was stated to he the perfect human/knows all martial arts not once did bats beat dr manhattan people like to lie and say Batman beat him when he did not beat him ONCE

All Batman did was he found a Bruce Wayne who made a machine that made dr manhattan get his powers BWL went to this Bruce Wayne and cut out his brain and combined it in his and got his power

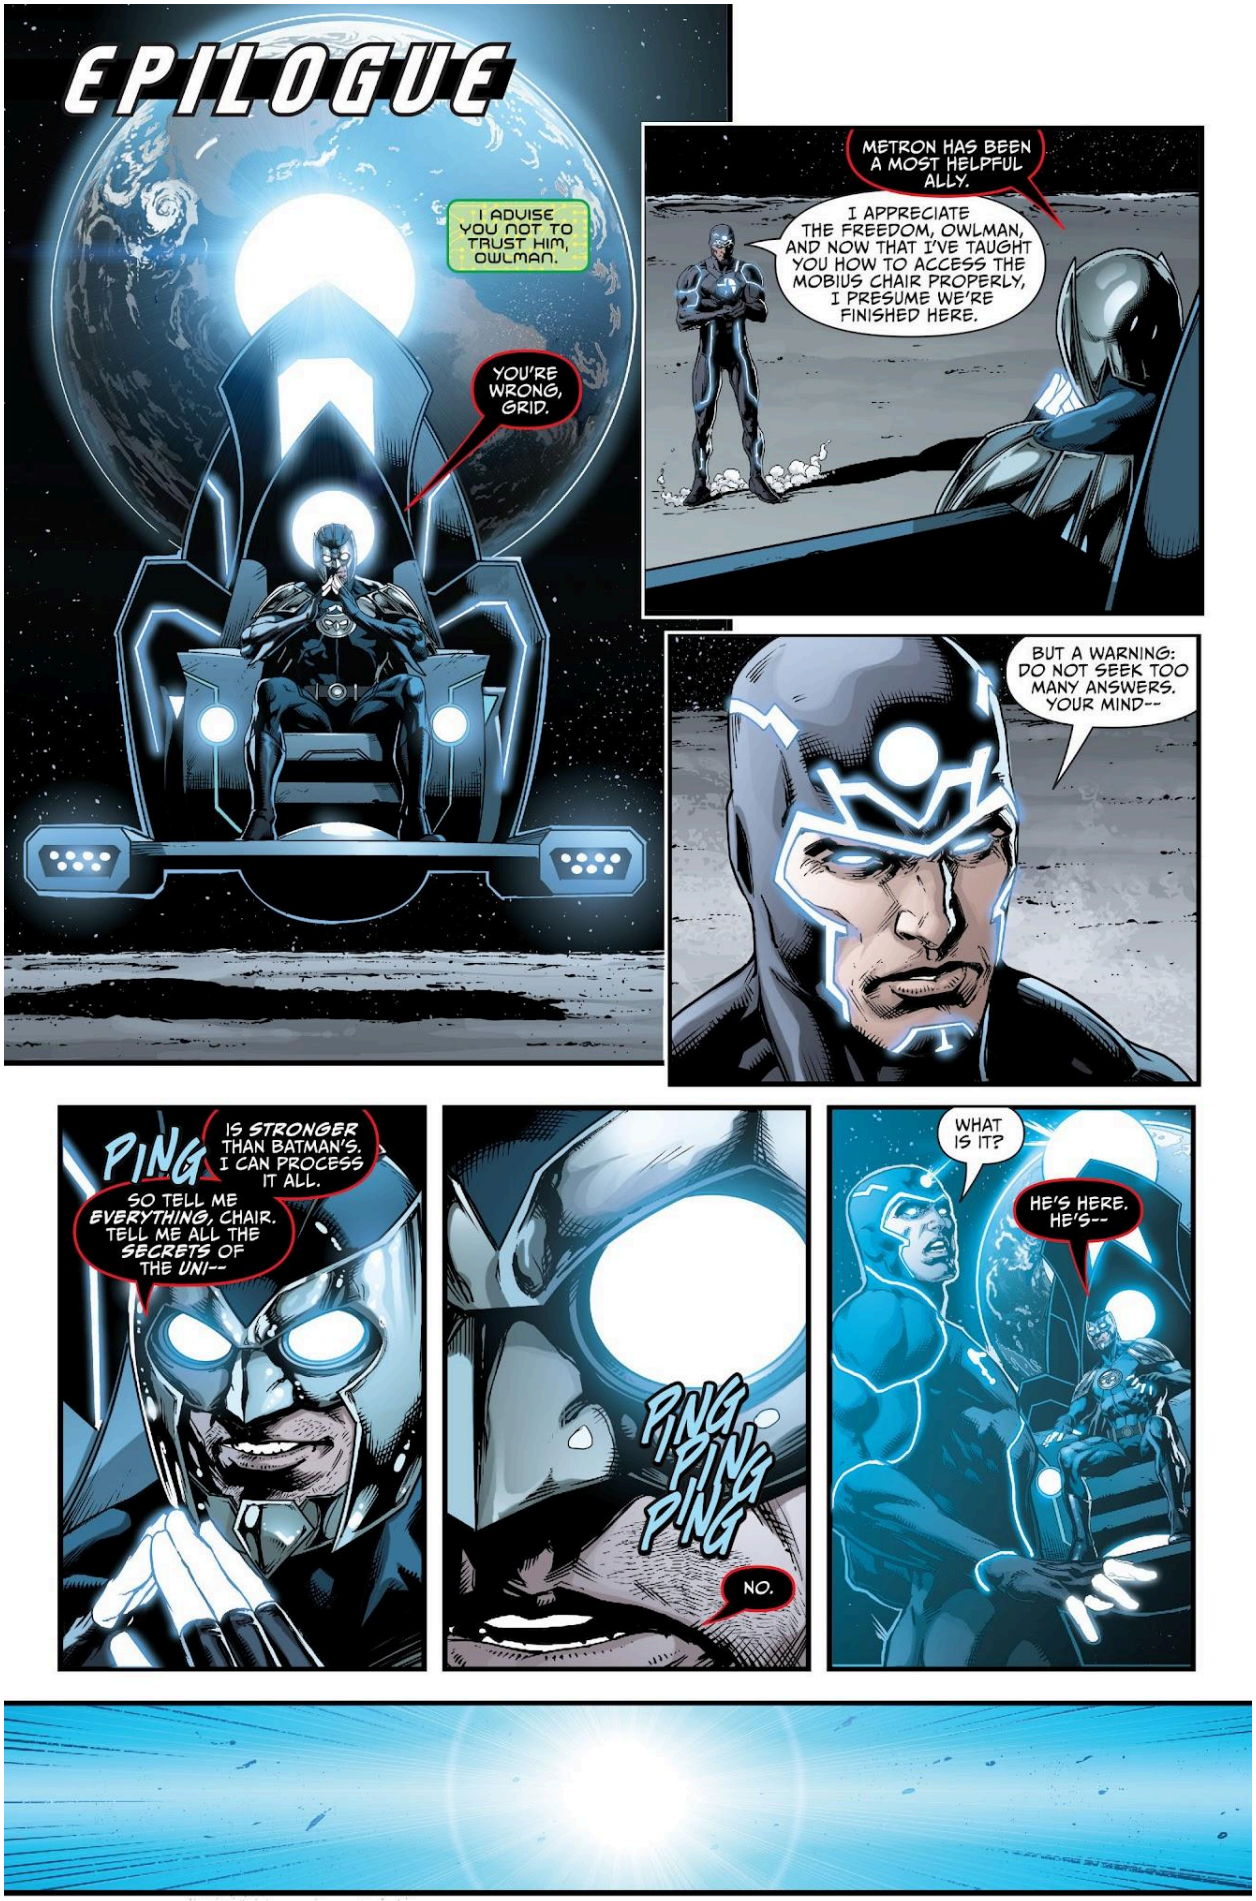

I AM SOMETHING ELSE. SOMETHING MADE FROM THE ONE DARK BATMAN HE TOLD NO ONE ABOUT.
SEE, WHILE I WAS STILL HIM, TRAVELING THE DARK MULTIVERSE IN SEARCH OF KNIGHTS, I SAW ONE ECHO OF BATMAN I HID FROM EVERYONE.
A BRUCE WAYNE WHO, AFTER ENCOUNTERING AN INCREDIBLE ENERGY TIED TO A BUTTON FROM ANOTHER UNIVERSE, DECIDED TO REPLICATE THAT POWER.
I WATCHED HIM BUILD THE INTRINSIC FIELD GENERATOR, UNAWARE OF ITS TRUE POWER OR WHAT IT MIGHT LEAD TO.
I WATCHED AS THE EXPERIMENT BEGAN TO GO AWRY...
...AND AS HE WENT TO SET IT RIGHT.
I ACTIVATED THE MACHINE.
IT TOOK MONTHS FOR THAT BATMAN TO PULL HIS BODY BACK TOGETHER, MOLECULE BY MOLECULE.
A POWER STRONG ENOUGH TO CREATE AND DESTROY WORLDS. A BATMANHATTAN.
IT TOOK SECONDS FOR MY ENERGY KNIFE TO LOBOTOMIZE HIM, BEFORE HE GREW POWERFUL ENOUGH TO SEE ME COMING.
AND SO, I HAD MY PATH TO ASCENSION.

THAT "NAKED BLUE GUY" IS A BRUCE WAYNE WHOSE BODY IS MORE AN ENERGY CONSTRUCT THAN MATERIAL FLESH, B. REX. IF OUR LORD WAS RIGHT...
...IT SHOULD ABSORB HIS MIND AS ITS OWN, AND, IN THE PROCESS, MAKE HIM INTO SOMETHING FAR MORE POWERFUL THAN HE WAS IN LIFE...A BEING OF NEAR-UNLIMITED POWER...
SER?
SER U SHALL BECOME A BAT, FATHUR?
UNH...

Now people like to use this and say “Batman made a machine that can and gave him powers of manhattan” however this is not true batman only got a small percentage of manhattan's power he did not get his FULL power he only got a small percentage of it his power of manhattan is not even enough to beat Perpetua also the manhattan BWL used was from the dark multiverse which is different from the normal manhattan

If this is not enough, remember what I said about the constant rule? How about I do you a solid and name just a few manhattan feats that he has done just to give you a example of how big the differences between manhattan and Batman is no between manhattan and even BWL/TDK is

Manhattan combined with the Mobius chair which was enough to repair all the damages to the verse left from BWl

EPILOGUE
I ADVISE YOU NOT TO TRUST HIM, OWLMAN.
YOU'RE WRONG, GRID.
METRON HAS BEEN A MOST HELPFUL ALLY.
I APPRECIATE THE FREEDOM, OWLMAN, AND NOW THAT I'VE TAUGHT YOU HOW TO ACCESS THE MOBIUS CHAIR PROPERLY, I PRESUME WE'RE FINISHED HERE.
BUT A WARNING: DO NOT SEEK TOO MANY ANSWERS. YOUR MIND--
PING
IS STRONGER THAN BATMAN'S, I CAN PROCESS IT ALL.
SO TELL ME EVERYTHING, CHAIR. TELL ME ALL THE SECRETS OF THE UNI--
PING PING PING
NO.
WHAT IS IT?
HE'S HERE. HE'S--

TO BE
CONTINUED IN
DC UNIVERSE
REBIRTH #1

Literally killed owl man who is slightly on par if not weaker than the BWL and he does this with no diff and he does it when blud sat in the Mobius chair

Killed reverse flash a being who is also slightly above BWL is not his equal

Manhattan was able to beat Perpetua with just a small amount of his power

Was able to neg half the jl with utter ease

Should I keep going? If anyone thinks Batman is going to beat a person who has put up feats like these then they obviously are out of their mind

Also a common misconception about BWL/TDK is the beef between them and cas so let me debunk this right now TDK is nowhere near the level of cas and let me go on to debunk it right now,

How many people like to think TDK is above cas due to this scan.

Where Perpetua gained all the powers of all these characters which included mandrak and mandrak went = with cas and along wit the fact she made mandrak

But remember what I said about the rule of constantly? The dc verse is vast and big, most of the wr verses like say cote do not have to follow such a rule as much to a extent

(The rule in cote does not hold as much value as it would say a big verse like dc as cote only has like 25Vols but it would still hold minor value as let's say I'm not going to have kei>horikita just because kei played a part in manipulating her)

But in dc where just 1 comic run for 1 character has over 8k+ comics which is like 4x the amount of a massive verse like ri so this time is needed

This feat is not constantly proven at all as in the same panel we see

Green lantern

this version of green lantern is someone who is capable of RESTARTING THE ENTIRE MULTIVERSE to put this in perspective TDK is not even able to take down the ENTIRE multiverse and the only way he can even hope to do it is go after Perpetua how is TDK(someone who can not destroy the entire multiverse) able to keep up with perpetua(supposed have powers of green lantern a mf who can casually just restart the multiverse) this claim has many loopholes and inconsistencies in it thus it is false to the max so this means mandrak is also not apart of this not yes cosmology speaking mandrak was made by Perpetua thus via common sense Perpetua is above him however

Superman was seen being immune to manhattan's powers and manhattan with a little of his power was able to >perpetua

This means cosmology Superman=manhattan and manhattan>perpetua

As for cas>Superman so if we take a look at cosmology superman Is still above Perpetua

This easily proves cas who is stronger than superman is above TDK so even using cosmology there are many inconsistencies within Perpetua and mandrak and as for cosmology superman is above manhattan who is above Perpetua

People also like to come out and say Perpetua was able to beat the entire JL(when each JL member had a small percentage of manhattan's power with each characters small percentage being equal to manhattans full powers)

But people like to take this way out of context

This does not scale Perpetua above manhattan for a simple reason

If I were to beat 100 babies with each baby having a small percentage of mike Tyson's power which is equal to his max power does this make me above mike Tyson and mean I can beat him 1v1? No it does not

Quality>quantity

Sure each jl member might of had a small percentage of manhattans power but this small percentage is not enough for each member to beat her the only logical way this would make sense is if at least half the jl members attacked her with their full power at once than that would in turn make sense but they never did even though manhattan held back this does not mean a small percentage of power which goes toward a character beats Perpetua as we do not know how held back manhattan was so this debunked TDK vs cas

So even if manhattan lost to Batman he has feats to show he is above Batman

What people usually think is if say person A beats person B or is stated to be better but person B has more and better feats than that would upscale person A and that means person A gets scaled higher and gets scaled higher than person B and can do feats that are either above person B or do and replicate feats person B does this is true to some extent but not always for this to be true person A needs to have statements or feats to prove his skill when it comes to Batman his top feats are nothing compared to manhattans feats not only that but if person B has showed or displayed feats that are either leagues better and or person B has feats that also involve beating person A than this type of logic becomes invalid for example person A can beat person B but if person B has also beat person

Next up is the feat with TDK vs Wally west

Basically TDK was able to keep up with every speedster which includes Wally but this is a speed feat nothing more or less it has no value in wis at all

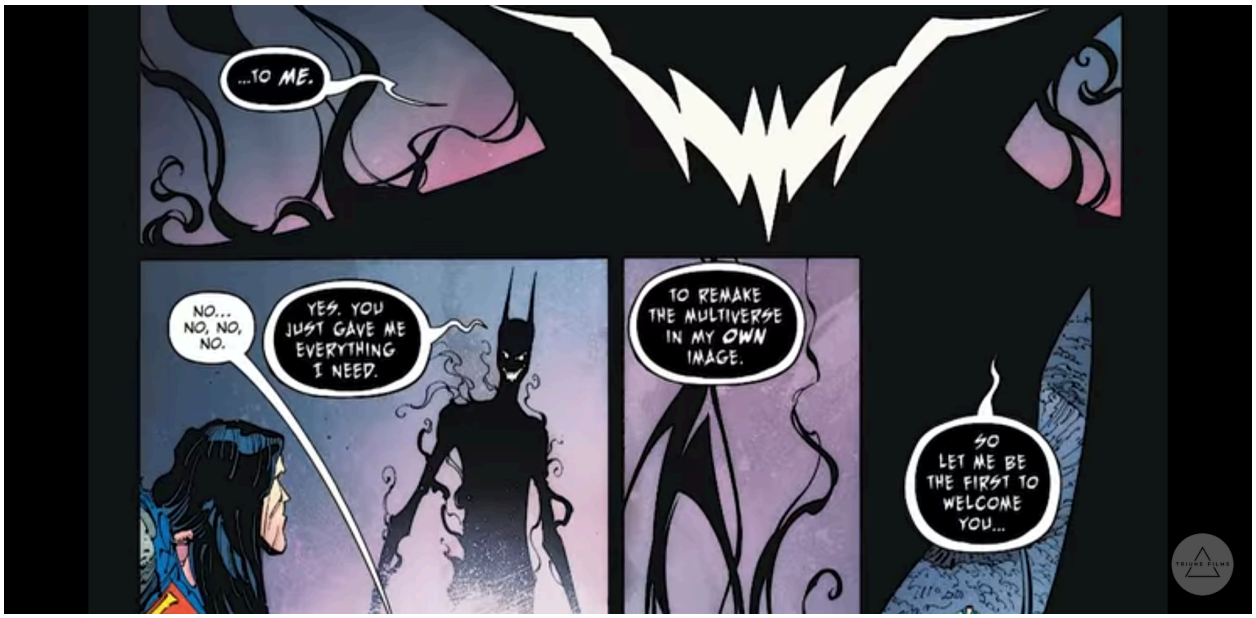

The next time we see TDK beat wally west was when TDK outsmarts him

In this scan we can see.

As you can see TDK took all of wally power TDK was able to outsmart Wally west when Wally west was on the Mobius chair basically what TDK did was wally west had a plan to redirect the Crisis Energy meant to power Perpetua to Wally West's Mobius Chair however TDK already saw this plan coming and he predicted this

So he planned ahead and rigged the Mobius chair to redirect the Crisis Energy to him instead of Wally West

This feat is impressive as TDK perfectly predicted the plans of Wally west and not just that he predicted ww Superman Batman and more however people use this to

scale TDK above the mobious chair however this does not, let me explain, the way the mobious chair works is when you sit on the mobious chair you need to ask a question or give it a command for example say I sit on the mobious chair and I have a Iq of 100 when I sit on the mobious chair ny is is not going to go higher and I am not going to get any smarter my is will still stay the same so for the nigh omniscient to work you need to ask it a question or give it a command when Batman and Wally made and came up this plan they did not ask the mobious chair if this plan would work and they did not ask the mobious chair if their plan would work or if TDK was planning something or predicted them so TDK only outsmarted base versions of each character to put that in perspective he outsmarted Wally west and Batman Batman is a character I'm currently debunking at of this paragraph

Wally west has been scaled to genius level intelligence which to put that in perspective is where Kisaki from Tokyo revengers scales to so TDK only outsmarted base intelligence firm wally west which is only at a scaling where low tier anime characters scale to such as Kisaki if Wally west used the Mobius chair to question his plan and to see if it would work out and if the TDK know about the plan and countered it then yea TDK would be scaled to nigh omniscience however wally west never used the Mobius chair to make a plan nor did he use the chair to question TDK or if his plan would go the way he wanted so that means this only scales to TDK being smarter than bade iq wally west which is in the same category as Kisaki from Tokyo revengers

After this TDK beats wally west and kills him when Wally west was sitting on the Mobius chair so TDK beat Wally west when he sat on the Mobius chair but this does not scales anywhere as 1)TDK used his ability's power and Hax to beat wally west 2)Wally never used the Mobius chair nor did he make plans or question the chair wally west never used the Mobius chair's nigh omniscient abilities to aid him in his fight vs TDK so this does not scale TDK above omniscient either as Wally west was not using the Mobius chair nigh omniscience intelligence to fight TDK like I said for the Mobius chair to work you need to ask it a question or give it a order or command when we see TDK right wally west and when we see TDK beat and kill wally west when Wally west was sitting on the chair we never once see wally west use the chair ask it a question or give it a order or command

As for him outsmarting Superman and wonder women it was not either of those 2 who made the plan if Superman and or wonder women helped and made the

planning than yes it would count but neither of those 2 made the plan they just followed along with it so this debunked the entire argument with TDK vs Wally

Before some of you people say I'm biased if I was biased I would use anti feats which is what the majority of you off brand anime debaters use also a small debunk I wanna do Right now

Batman is not smarter than superman and superman low diffs Batman if he goes all out Batman admits that if a

Superman were to go all out with 100 percent Batman would be dead already and would not stand a chance batman makes this comment as he holds kryptonite and just after Superman murked him so a holding back Superman low diffed a kryptonite holding Batman but that's not all

Batman vs Superman (Fight) | Batman: Hush

This video I will like to state is a adaption of the comics but the comic which has the exact same convo Bruce admits the same which is canon so it really does not matter

There is the scan if Batman with sups biggest weakness admits to the fact of sups went all out he would lost them after he says this he goes on to get slammed and almost killed

By sups

Debunking the fact that batman can beat sups but I'm not close to being done

Lex Luthor is a genius so smart in fact he is able to capture the BWL

Not only that lex was able to beat the entire crime syndicate a group which has all the evil counterparts of the jl which includes owl man

It's same to say lex has consistently proven and shown he is on par if not just slightly below the BWL and that's if i highball BWL

In other words their fight would be a either or and or with one of them winning only via a extreme diff

Why does this matter

Well In comics superman and flash raced raced around the worlds for charity the rule was who can run 10 laps around the world the fastest

At the start of the race the flash starts out with a lead

lex sees this and with the results so far he makes calculations and deduced no

matter the situation Superman will lose he then makes a vet saying he will donate money to charity if sups win

Sups with super hearing hears this and goes on to push himself and die to this with supermans will it allowed him to barley catch the dub from flash

Now why does this matter? It matters because lex who o just proves has skills on par with BWL makes calculations and was so confident about it just to have sups outsmart him and see through his calculations proving Superman is on par if not on a higher level then Superman putting him also on equal terms with BWL

A lot of people tried to debunk this via saying flash said it was for charity however this is proven false as that claim was made on a different verse which is not canon as injustice verse is no where near canon at all

Next up is covering failsafe

For people who do not know failsafe is a robot made by Batman designed to kill him if Batman were to ever kill

Batman was framed for the murder of penguin which caused failsafe to activate and go after Batman

And when we see this robot it literally beats the brains out of Batman in every way possible

Want an example?

BRAK
POK
Hn! Fast--
too f--
KRAKOOM

Here are 3 scans of this robot casually predicting all of the Batman's moves with literal ease he casually outpaced and predicts Batman's attacks and is so fast and predicts Batman's moves when he tried to use a grappler

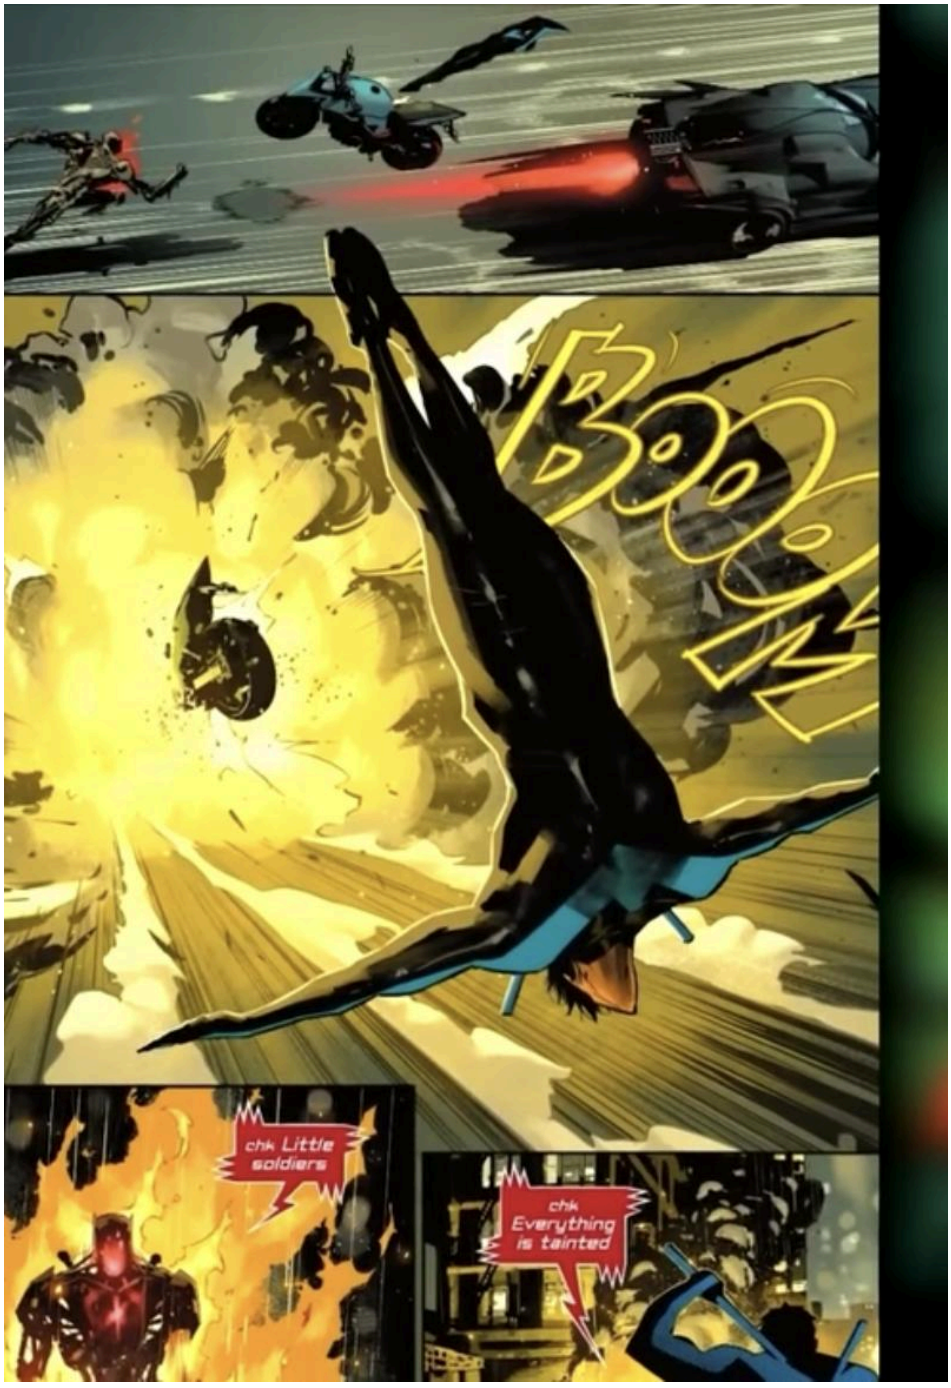

Saying the failsafe is a very amped version of Batman is a huge lowball and understatement this robot should be above every single Batman as it was literally

made to be the exact counter of Batman this includes the grim knight and the grim knight alone is arguably in the top 3 smartest Batman's

failsafe is not batman but it ultimately beat Batman in a battle both h2h combat and intelligence and it was made to counter and beat the ever loving life out of Bruce it was basically the backup plan if Bruce were to ever kill so it's dura is insane taking on multiple missiles ranging from 3-6 and being able to causally read movements as the scans up there show

This alone should show this robot is above Batmans level are around but I'm not done

TSK
SMACK!!

Here are 2 scans of this robot taking on and going = with fucking Cassandra Cain and steph

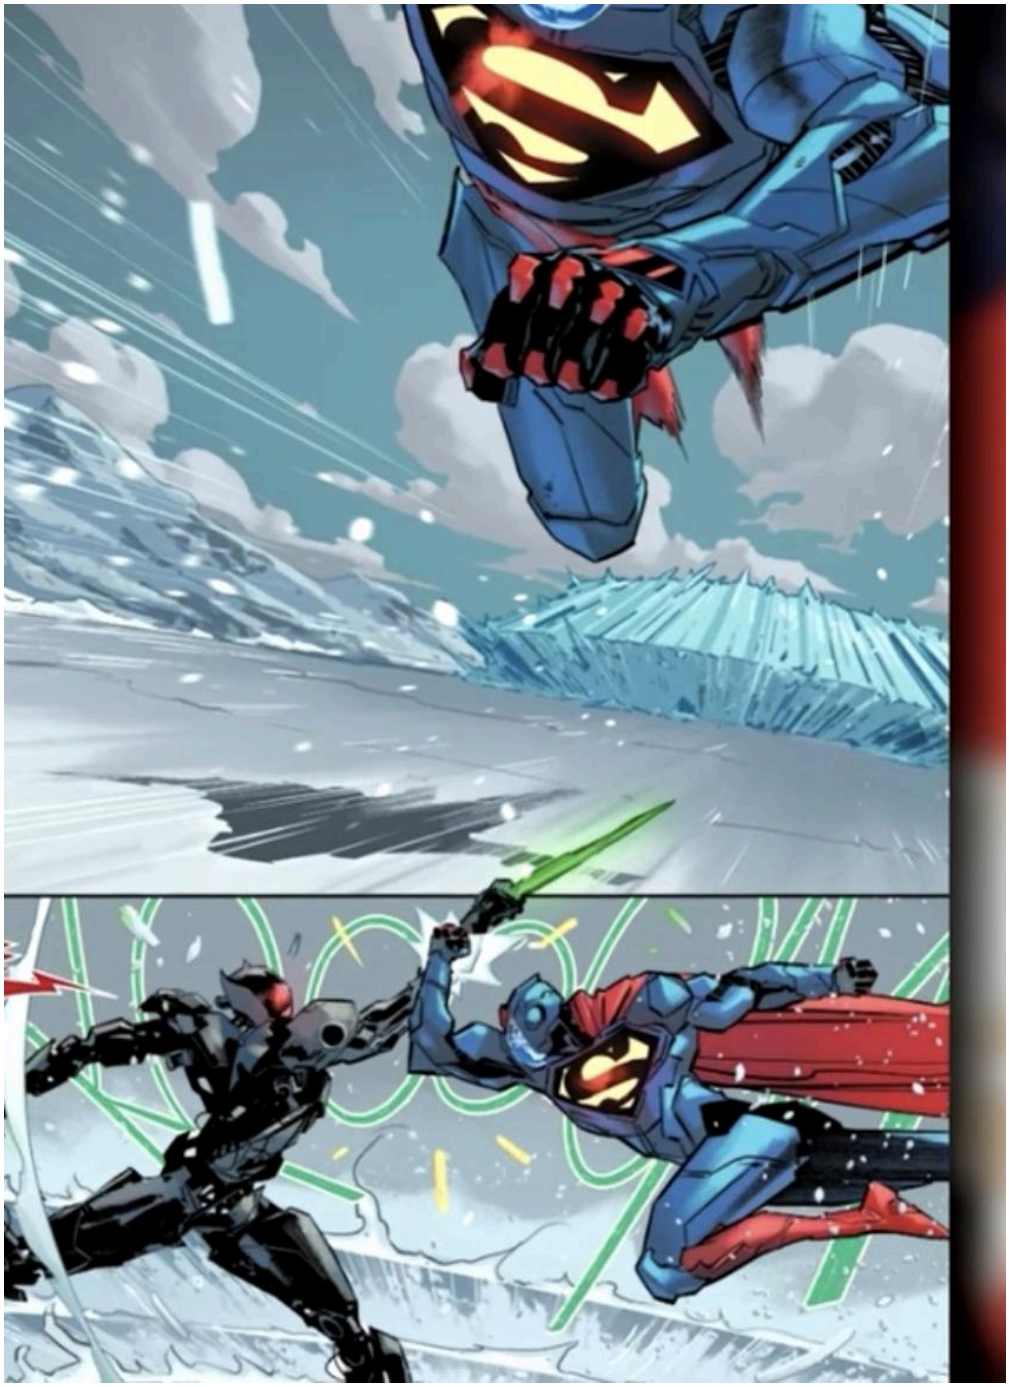

Most anime people will simply brush this off and be like it's not impressive as they are sidekicks/robins

People like these whenever I see a comment like this I always laugh to myself as they think Batman>robin no diff which means they have not even touched a single comic issue I will cover robin later as the robin and BWL/TDK misconceptions are the most taken out of context things ever

Keep in mind I am choosing to lowball failsafe but even a lowball failsafe is still above Batman

Now why does this matter?

Because failsafe(who is above Batman and the entire robin league by league) and (with prep) (and with kryptonite) went vs a weak Superman and was at a stalemate

Now later after this failsafe does get the upper hand and outsmart Superman

However the fact Superman at a very weak state was able to go = with failsafe when it was prepped up and armed with green kryptonite and yet failsafe barely managed to win and was not even able to kill Superman even if Superman was only at a = with him for a brief moment shows not only how op Superman is but also shows how smart

But if this is still not enough proof Superman was literally holding back in the fight before Superman went to fight failsafe him and Batman had made a deal superman was only going to distract failsafe and not go all out which means Superman was weak and was holding back vs a robot that is miles ahead of Bruce Wayne

Failsafe was prep up and had kryptonite and is already proved to be above Batman still could not fully kill a weak Superman and was even at a = with him

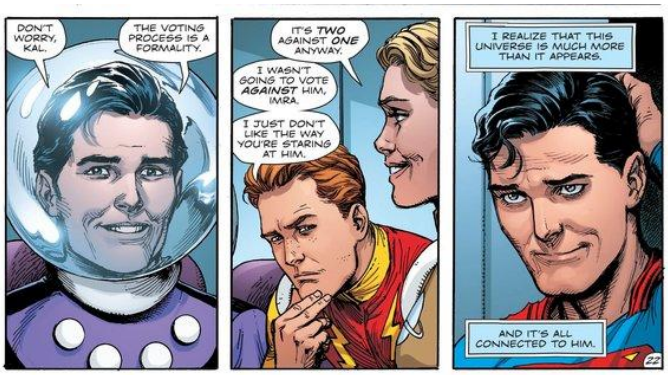

Should I go on? This alone proves Batman is not above superman which not only he admits but with this and many other Superman feats proves it but I'm not done how about we dive into just a bit of Superman's feats to show that even if you try and debunk this it's still not possible

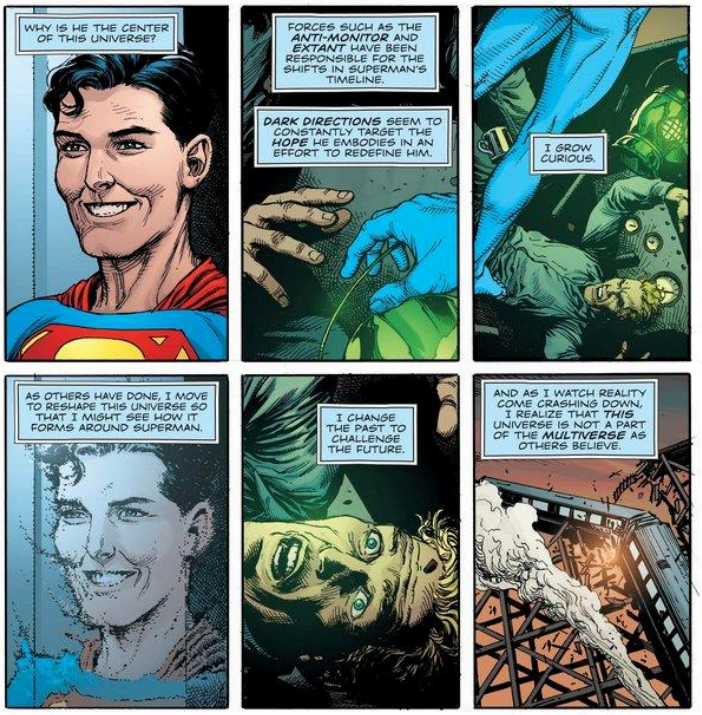

First off superman was literally able to deduce the batman identity within a few seconds of meeting batman

In the superman adventures comic run Superman was able to low diff the joker in iQ and even made a deduction about the entire encounter on how the Batman set it all up

Superman was able to be immune to the powers of dr manhattan who I also covered

He was able to be immune to the powers of Mxy

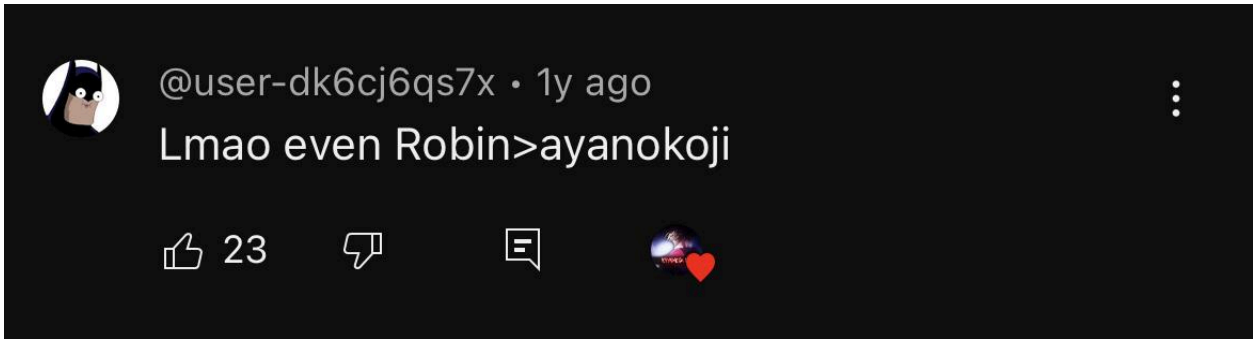

Lifted the heavens should I go on? I have no clue why tf Superman is compared to Batman just because Batman wins on a couple occasions does not mean he is constantly better than Superman this should debunk the entire Batman>superman topic the only way you can argue Batman is above is if we use TDK but TDK only gives Superman a hard time due to the powers the TDK has not the actual smarts of his mind oh and keep in mind I am using just base version of Superman I am not using cas or sbp which if I did would be a massacre even if we use the TDK

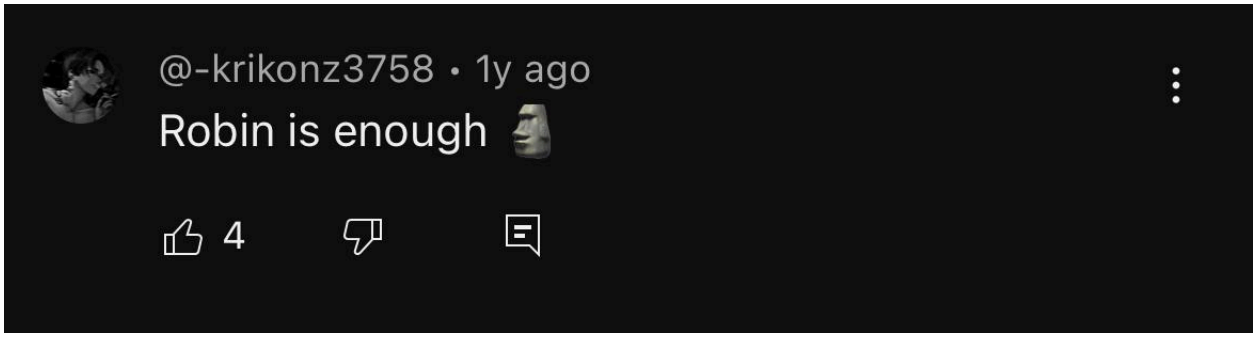

This should be enough proof that superman low diffs the bat all in all Batman himself admits he loses to all out sups Superman has more impressive wins under his belt and he has better feats

All the fights Batman won and has vs Superman were when Superman were holding back excluding the IJV so in short overall Superman low diffs I really do not understand why people like to compare such a garbage character trying to scam Batman as smart when in reality they shouldn't be trying to scale him higher in his own verse

Batman slams anime? No he does not as a matter fact batman is not even top 10 in his verse in intelligence and in combat yes I said it Bruce Wayne is nowhere near the smartest in his verse at all

Now for all my anime Batman fans(the people who say Batman beats anime without knowing the verse) y'all are about to me soooooo mad right now ar what I'm about to do

people like these are the people who like to downplay Robin

And to all my robin Stan's it's time I shine some real light on the goats of dc and the real people who should be used rather than fodder Batman so let's start and cover people who can casually beat the whole out of batman and this includes all of his forms and yes I mean every form of Batman from BWL to The Darkest Knight to GK

Now let's start with

Grayson/nightwing

Grayson before even having proper training was able to beat 2-4 criminals by himself

Next up is Grayson when he was just brought back alive and rusty was able to high diff Bruce Wayne when they were both going all out keep in mind grayson was literally dead and came back to life meaning he was not at his max and did not fully recover yet he still was able to high diff Batman not only that but the fight was not just h2h but both were using their Witt's to try and get the upper hand proving this is a intellectual battle as well as h2h

IF THEY KNOW OUR SECRETS, WE WON'T BE ABLE TO *FIGHT.*
HOW CAN YOU ASK ME TO DO THIS, BRUCE?

Now it's time for the cherry on top a lot of people try and claim Batman holds back on Grayson

But here is the thing

Tom king who is the author for the issue of Grayson vs Batman admits himself BATMAN WENT ALL OUT https://youtu.be/REAzLpmS4h0?si=C79T0n1MfFAtKEjB

There is the podcast on which Tom king confirms Batman lost fair and square here if official words from the author himself on what he said

Words from author:T-to me the story was Batman and dick have a fight and dick wins I want it to be I love dick Graysoni think he can beat Batman in a fair fight but when I say fight I mean I mean a fight where Batman doesn't hold back because if it's just a fight where Batman holds back and dick wins then who cares

he doesn't have a victory so I wanted the fight to be Batman puts his all into it he hits dick with everything he got sand dick gets up and hits him back and so it got bloody and it got bad and Batman showing I think I know it's a little twisted but but to me that was Batman showing him look I respect you enough to fight you like this

This is offical words from the author himself who made this comic so it cannot be argued otherwise this I canon and Bruce was begging for Grayson to stop when Grayson got him in the floor this along with the authors word is already more than enough grayson Is above Batman nightwing is also able to make knockout gas able to knock out wonder women and hawkgirl which fits within his belt but that's not all Grayson whilst being heavily injured and was likely not even at 80 percent of his power was able to beat slade Wilson now a tiktok wr made a debunk for slade but he is incredibly biased and got debunked quite bad and a lot of people have a bad image of slade due to Arkham origins and knight which are not even canon versions and slade also has a bad rep because he lost to damian Wayne in a literal non canon movie and has pedo accusations this causes people to usually ignore slade I'll cover slade later as he is also someone who can dust Batman intellectually and physically so I don't need to explain right now and in a non canon comic Grayson was unmatched as he high diff the entire JL with his own prep and violated Batman with mid diff

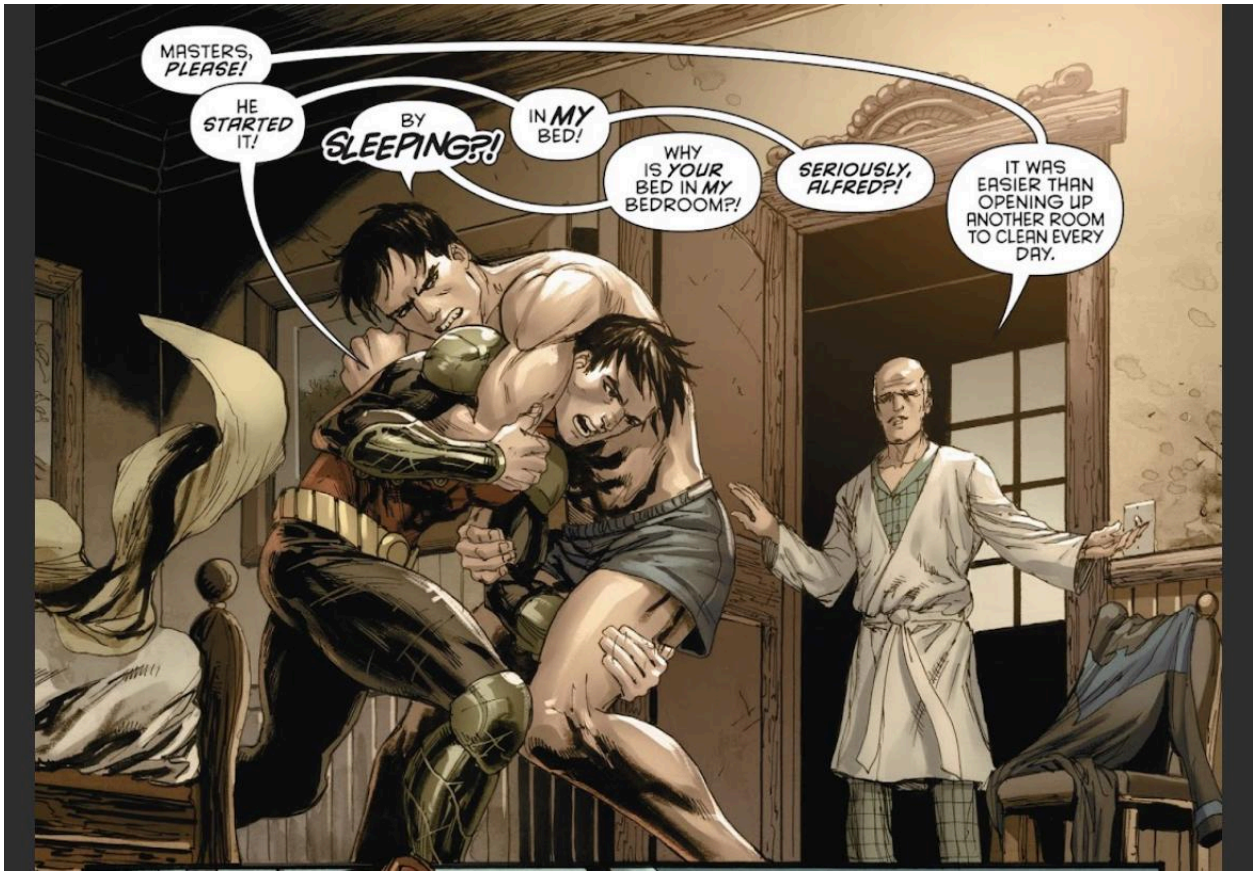

Nightwing can also make conclusions and deductions from the slightest and smallest of details such as the fact he can make co conclusions from slight

changes to eyebrows slight adjustments to eyes slight adjustments to lips and body movement and more

Jason Todd/red hood

The character who is the third best robin and the most underrated in terms of feats but in reality this man straight up low diffs Batman and that's me being very generous now before y'all bring up his loss to joker you have to keep in mind todd was literally still robin and joker later says how Todd did not release his all not only that but he was not thinking intelligently and was not all there he was very upset about what joker did to his mom and Barbra so he was not thinking clearly combine that with the fact Jason Todd improved massively when he became red hood means that joker beat and killed a version of Jason that was nowhere near his prime not only that but most of Jason's feat happens when he is the red hood

For starters a young Jason Todd still in training was seen going =<to Grayson when he was a full adult

Later in battle for the cowl where both Jason and Grayson Hold back they are seen close to equal with each other

Nothing Jason says can be taken for truth. He says Tim is dead. I'll need more proof than his word and an empty cowl.
Because right now, I need to keep that hope alive. If for nothing else, then to keep me from losing control...and I won't let that happer. Can't let that happen.
WHERE IS HE, JASON?
WOK
Can't.
GRK
GRK
GRK
DEPEND'S ON WHAT KIND OF LIFE HE LED.
There goes his nose. Control your anger.
SPLT
YOU'LL HAVE TO SHOW ME.
THUNK
YOU WANT TO SEE A ROTTING CORPSE?
YOU'RE A TERRIBLE LIAR, JASON.
SLAM
HIS PULSE DIDN'T LIE.
KRUNK
YOUR WORD MEANS ZERO.

IN YOUR DREAMS.
OH, REALLY? THIS COMING FROM THE SO-CALLED "SUPER-HERO" WHO LET ROBIN DIE AND COULDN'T PROTECT HIS BELOVED CITY FROM THE CATASTROPHE THAT BLACK MASK HAS SET UPON IT?
I MIGHT HAVE FAILED TONIGHT...BUT WHERE WERE YOU, DICK?
I'LL TELL YOU WHERE. HIDING BEHIND BRUCE'S SHADOW. PARALYZED BY THE FEAR OF FAILURE. BUT YOU ALREADY FAILED.
HOW DOES IT TASTE?
LIKE BLOOD.
BRING IT ON THEN! WE CAN FIGHT WHILE YOU CONTINUE TO LOSE GOTHAM!
The Black Mask. The first time his name resurfaced, it was from the paramilitary goons that shot down my glider. The same goons I couldn't question because Jason killed them.
But Black Mask is dead. Catwoman made sure of that. So if Black Mask is back, then who's behind the mask? And how could he have gone virtually unnoticed in Gotham while toppling Two-Face and the Penguin?

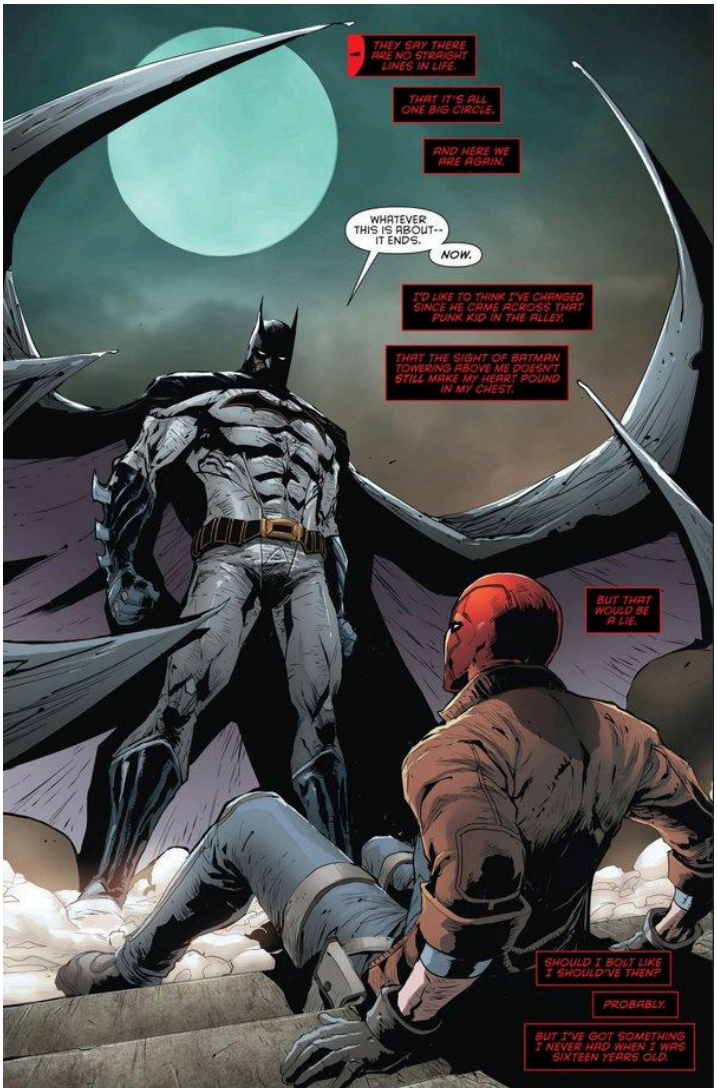

a lot of people like to say nightwing clears red hood while it is true nightwing is honestly or better than red hood in combat the diff is taken falsely most people think Grayson beats red hood mid diff in combat when in reality it's more of a high diff win for nightwing and if Grayson decides to play dirty and cheat then it's high-extreme also red hood is>=than nightwing when it comes to intelligence and intelligence wise Grayson was able to beat Batman even after he died and was rusty which means this can prove red hood>Batman but I'm not done yet It's confirmed by red hood he has always held back in all their fights

when he goes vs Batman

There is the scan which means all the fights Batman vs red hood red hood is casually holding back this is fur th ur emphasized by the fact Jason has a habit and soft spot for his family also holding back on Grayson tim and damian and now we got a inner monologue of him saying he held back on Batman and we also got

visual proof of him holding back this panel is red hood talking to batman and just before this when Batman throws a punch Jason admits and jokes that Batman is going all out not holding a single punch back not only that in the Under the red hood film which is a direct adaption from the canon comic Jason casually has his knife on Batman's throat but chose to lecture him and talk rather than kill it was also apart of his plan to let Batman beat him as he wanted to get into the same room joker was in I'd this is not enough proof Jason is better than Batman than how about this

a canon panel from the outlaw comic where Jason admits he can beat Batman cheating as he makes this comment he goes on to literally neg Batman and after this Batman was begging Jason to stop what he is doing

Cheating is a form of smart and intellectual thinking which proves he is smarter than Batman as well not only that but in a late Roanel Batman confirmed he had no idea about Jason's intentions and tho if not he was trying to kill the major meaning Batman did not hold back in this scenario

here we have yet another panel of red hood beating Batman it's not confirmed if Batman was holding back or not but after this panel grayson has to come and convince red hood not to kill him which means the situation would be tense this is still not enough evidence to prove Bruce went all out

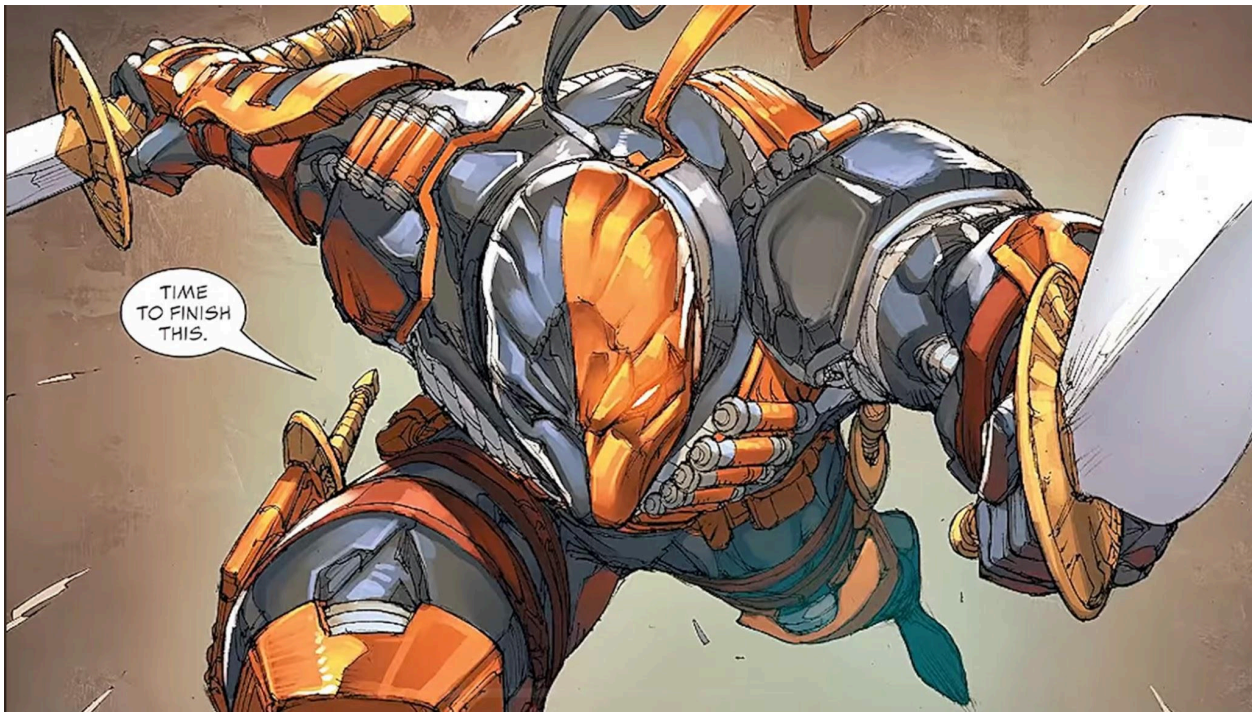

here is yet another panel proving Jason heavily holds back vs the cape as he can stab Batman's torso but chooses to go after his belt to keep the fight going that should proves he is leagues smarter than Batman he even made a bomb Batman was not able to defuse Jason should scale slightly lower than Grayson who puts Batman in a coma and plays mind games with him that alone shows Jason is above barman without a doubt same goes for Grayson

But if this is still not enough proof red hood has beat slade Wilson now a lot of people try and claim slade was not in his best shape but it's then revealed Jason was holding back and controlling the fight the entire fight Jason was just playing and toying with slade this is proven as when slade says "let's end this" red hood

says “whatever you say” as he lights slade up and he lays on the floor it’s later revealed red hood only aimed at certain areas of slades body as a means to have the wounds not be fatal and Jason goes on to boast saying he was never hear to kill him but rather just to hurt him which proves even though slade was not in full shape Jason himself was also heavily holding back on slade

BLAM
BLAAM
WHATEVER YOU SAY.
BLAM
STUPID.
THKSH
FKKSH
STUPID.
STUPID.

HAVE PASSED ON A JOB LIKE THIS. I'M REALLY NOT MUCH OF A SADIST.
BUT FROM EVERYTHING I'VE HEARD ABOUT YOU, SLADE...YOU'RE ONE BRUTAL SON OF A BITCH. AND THE CHANCE TO PUT A SMACKDOWN ON SOMEONE LIKE YOU...WELL, THAT WAS TOO TEMPTING TO PASS UP.
WHO HIRED YOU? TELL ME THAT, AT LEAST.
WHY SHOULD I?
BECAUSE IT'S PROBABLY THE PERSON WHO TOOK MY DAUGHTER.
YOUR DAUGHTER...?

There are the scans of Jason doing all of this now once again I will get to slade in a bit after I cover other characters

here are 2 scans of a comic where red hood and slade fight once again which red hood wins and was treating slade like a dog yanking him but slade was holding back in this fight but this still holds lots of value as I will later explain the powers of how good slade is even if he holds back/weaken which is the real debunk

With context Batman has only outsmarted Jason ONE TIME and without context he has beat/outsmarted Jason 4 TIMES

(Batman goes all out on Jason in outlaws where he shot penguin)

-red hood admits that he held back in the very same comic

(Batman beats him in a fist fight in under the red hood comic)

-was apart of Jason's plan so he can get into the exact same room with the joker to try and prove a point also he held back via the claim made by himself in outlaws and the fact he was visually holding back shown via the fact he was beating batman and trying to talk/prove a point in which batman later gets upper hand

(Batman beats Jason in death metal)

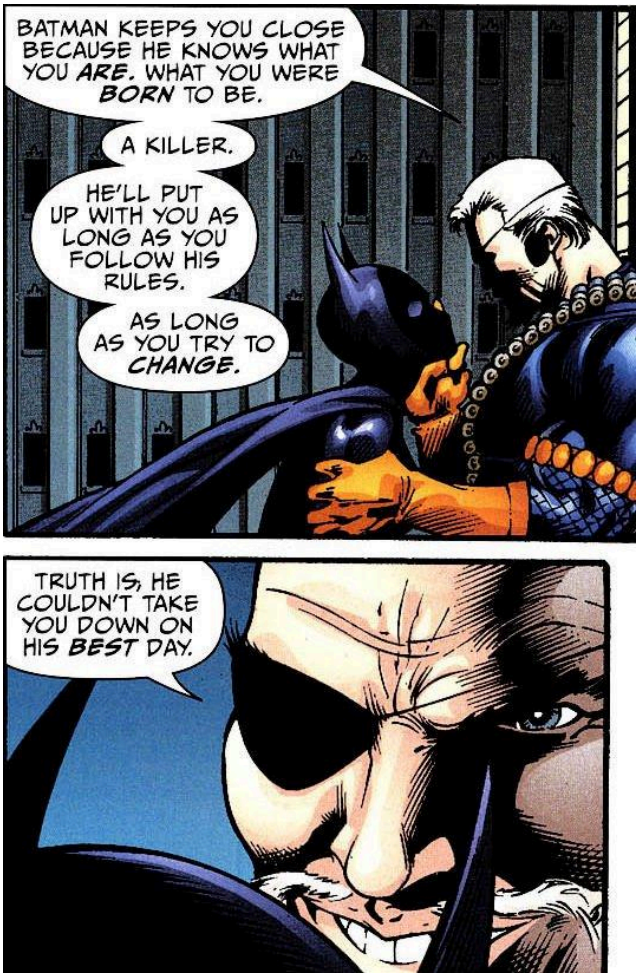

-he beat a alternate universe Jason which Is not the same as main Jason Todd there is a massive difference you will never see people trying to claim owl man and Batman are the same versions/people same with red hood and the alternate version

(Batman brainwashed Jason)

-this is the only win that batman has ever got on Jason without any form of context but it does not matter later in the comic Batman is seen getting the brains beat out of him by red hood which is an eye for a eye

Cassandra Cain

Cassandra Cain was trained by David Cain and lady shiva both of these 2 scale above if not higher then the Batman this alone should prove she is already close to

Batmans skill gap but I'm not done slade Wilson himself has said not even Batman on his best day can beat cass 

In a fight vs Grayson Cassandra Cain was able to go = with Grayson and I already proved Grayson is above and beyond Batman

HOW ARE YOU MOVING SO--
KRAK
FWUMP
THP
I CAN SEE IT IN YOUR FORM...
...THESE MOVES SHOULD BE LETHAL, BUT YOU'RE HOLDING BACK.
WHY?
MOTHER.

in a fight with lady shiva she was able to beat her mother wit ease

She has also gone = with red hood but is still inferior to him as red hood has also beat shiva same with Grayson as those 2 go = with her but Grayson was pre injured before Jus being on the same level if not slightly below red hood is enough for her to beat Batman

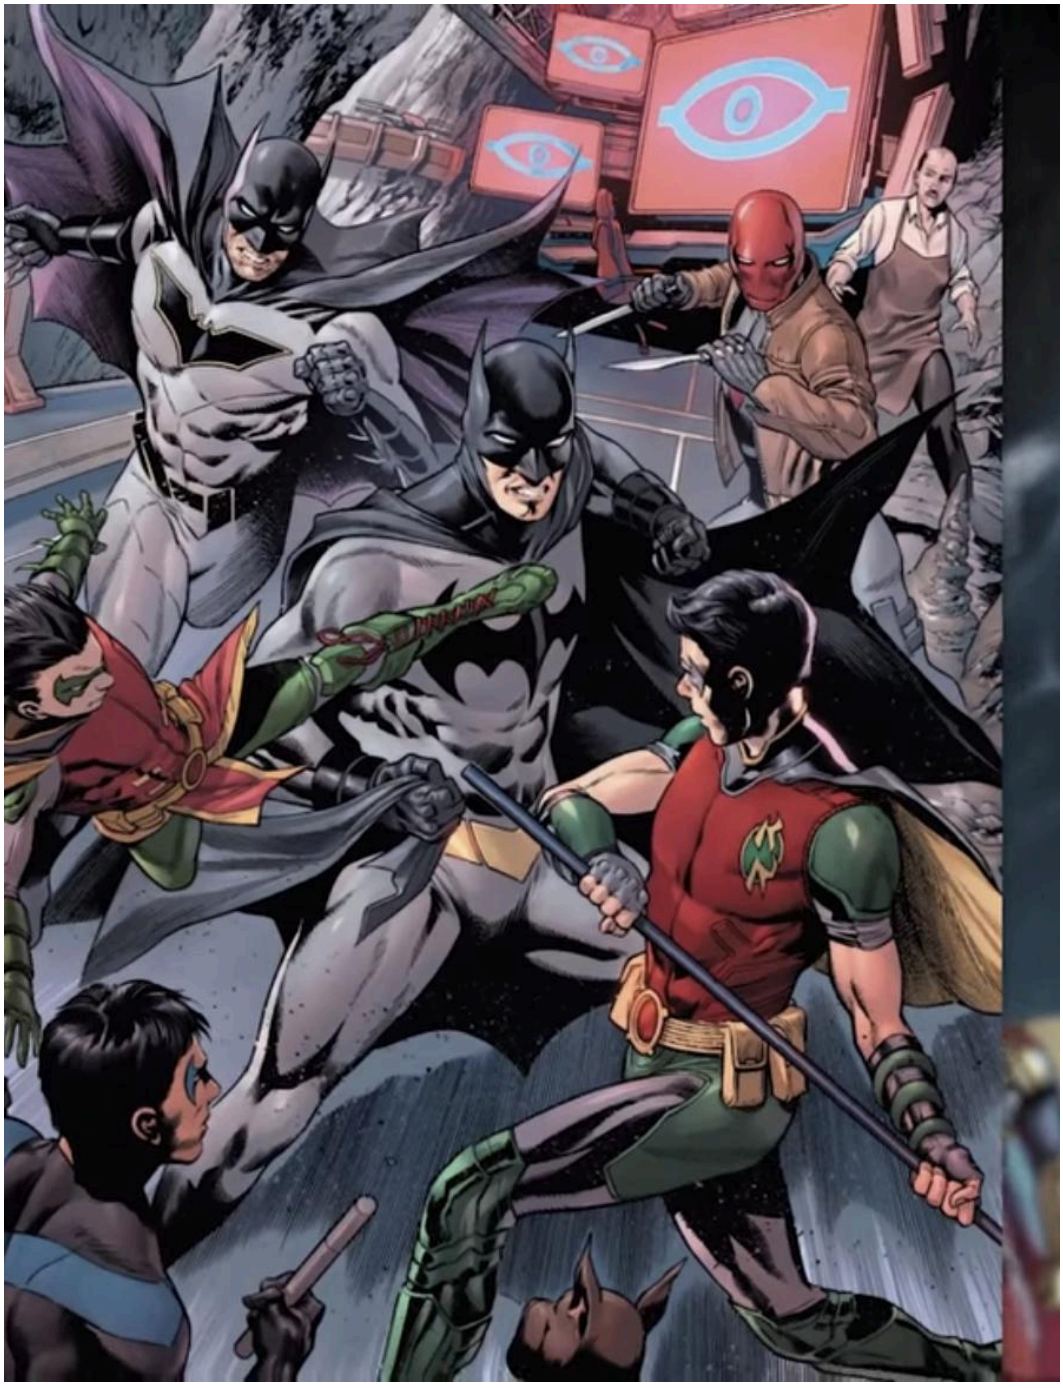

Batman has beat cass once but it's later revealed she was not at her prime as cass in fights uses her ability to read movements and in the fight with Batman she did not have it which means she was suppressed

not only that but cass whilst holding back fighting a mind controlled bloodlusted Batman was able to casually dodge and beat Batman with ease

In task force Z red hood admits cass was the biggest threat facing him as well all of this proves she is in the same tier as red hood is not slightly lower and red hood has beat bats holding back with low diff which means cass also has the skill bedded to pull off a high diff at the max if I lowball

Tim Drake

Tim drake is the smartest Robin being smarter than both Grayson and red hood which along proves he is better than Batman but this is not all tim drake at his prime and full potential is a monster

future-prime Tim drake got into a fight with

Batman

Nightwing

Damian

Tim

Red hood

He fought a 5v1 all by himself and all of them got DEMOLISHED with a low-mid diff at the MAX

red hood? Not a problem blud casually used his planning and prep to attack him in a dislocated bone

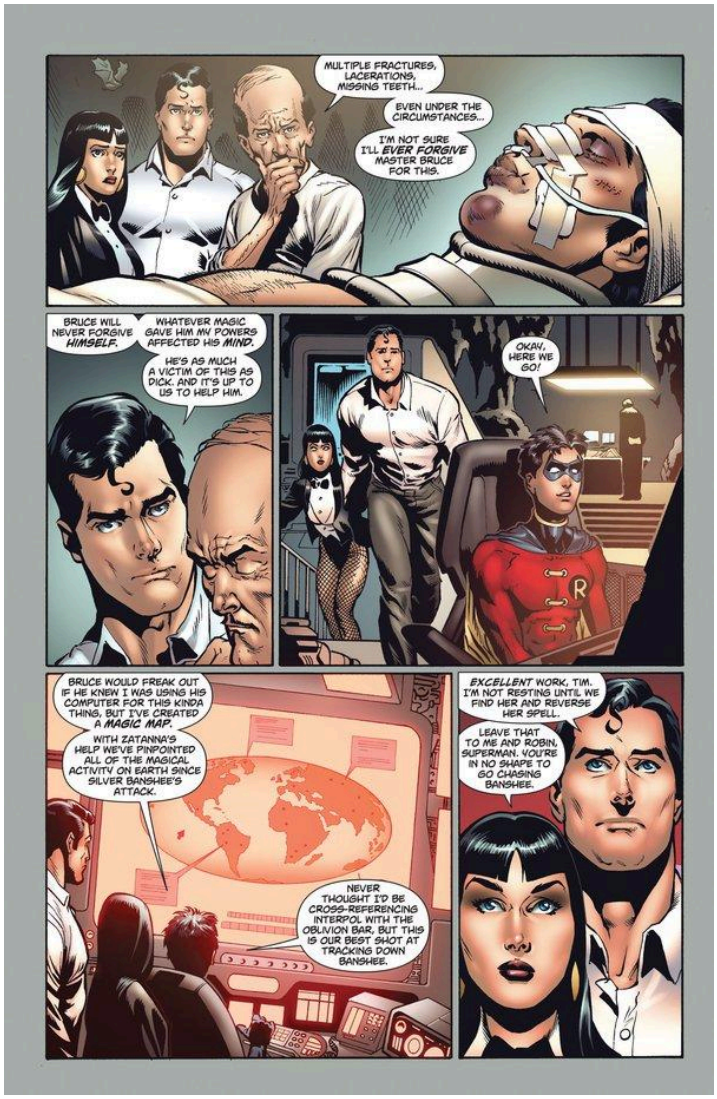

here is him casually hitting off Grayson

here is him beating batman with his Oreo and just before this he sent batman into a deep thinking as he manipulated him with the robins

Tim was also held back as the timeline was trying to stop him from altering the timeline which was causing him extreme pain

So prime tim was already able to low-mid diff the entire bat family all by himself

he also has many other feats like being the person who made a machine that knows all the current locations of every magic user and being able to poison lady shiva with chocolate when she is halfway around the world even Grayson admit he is nowhere near the intelligent of

Tim drake and Grayson is already proved to be above bats in intelligence

Batman himself has admit tim has more potential to be a better detective than he does and we find out he reaches that level in the futureTim drake has also outsmarted and beat a fairly mad Superman using more power than he would as his son was kidnapped

Failsafe

Failsafe is a robot made to counter Batman it was the backup plan to batman going rogue this robot was designed to stop batman no matter what and since this robot was made and designed to take down Batman if Batman goes rogue and betrays his friends and goes on a spree usually when a event like this would happen batman is going to use many weapons and explosions and use ways to take you down with prep so this robot was designed to counter not only Batman but his intelligence and his prep for example of Batman's where to go rogue and either get Superman in his side either by convincing him or using other means the robot is equipped with green kryptonite to counter them so it can. Be implied this robot is not only a walking Batman counter but a minor small walking JL counter

How powerful is failsafe? Well as I explained failsafe was able to go =with cass and I just proved cass is leagues above Batman which slade even admits

Not only that but failsafe was the one who killed batman and as I provided scans for earlier was able to predict and counter all of his moves by himself failsafe has also went= with Grayson who I also proved is above Batman it was even able to predict bats future moves and plans

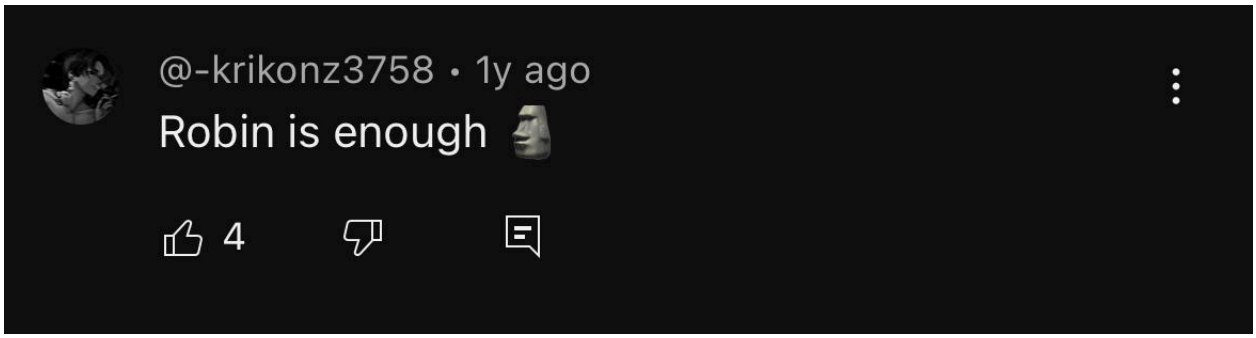

Lady shiva

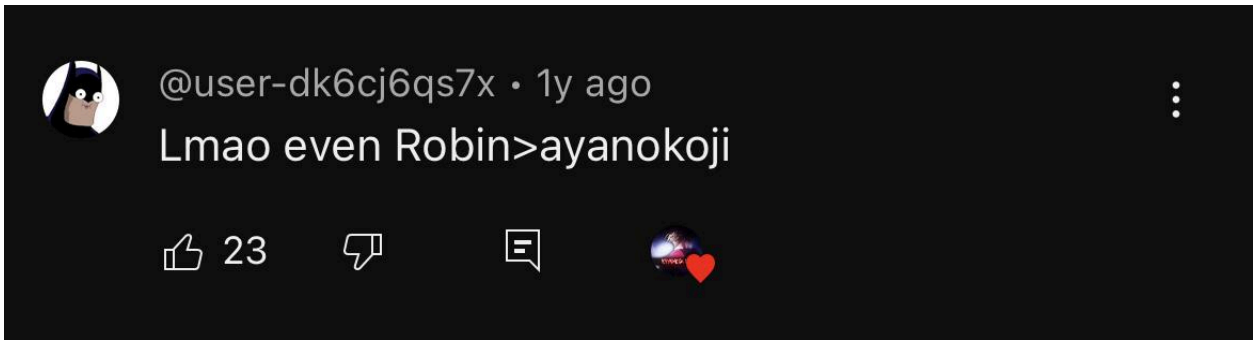

Lady shiva is a skilled assassin one of the best in the world a girl who trained both cass tim and in some verses Batman they fought many times and most times Batman has either tied or bats has won however in a new comic we see lady shiva fight batman once again and in this fight lady shiva admits every single time they fought lady shiva has always held back than after making that comment she bodies and destroyed Batman within seconds we do not know if lady shiva was holding back or not in this feat lady shiva infers she went all out but she never verbally admitted it but it does not matter this means lady shiva is better than Batman and every other time they fought and or every other time batman won vs her she was holding back and she makes this comment after beating the dog out of him

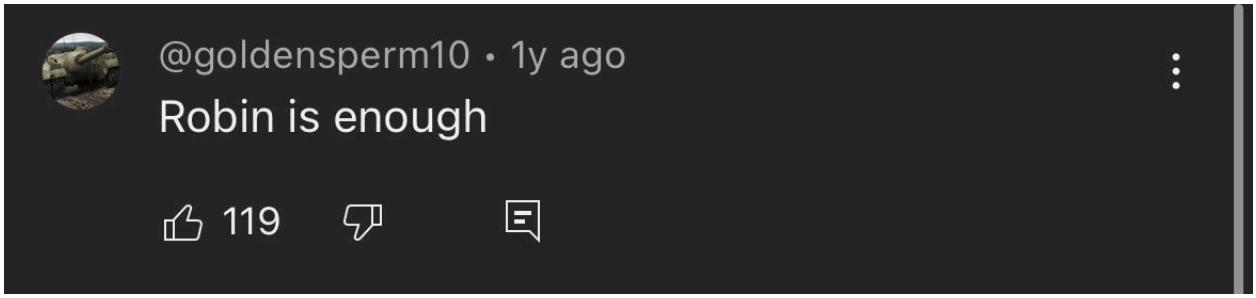

BATMAN.
I'VE FOUGHT YOU BEFORE, AND WON.
YOUR HUBRIS IS ADMIRABLE.
I'VE PLAYED THE PARTS I NEEDED TO PLAY. SOMETIMES THAT MEANT PLAYING THE LOSER.
BUT

To all the people who like to talk down and downplay Robin such as these clowns

just know red hood who is inferior than Grayson and Tim can still low diff Batman in FP

Now where do the robins scale in terms of intelligence? They actually scale really high

Tim drake is superior in making tools and inventions that batman is red hood is a better strategy and planning than Batman is and Damian Wayne even though he is nowhere near the level of Batman let alone the robins is a good manipulator

In terms of intelligence

Tim>red hood(tim with prep folded the entire bat family low diff max) (scan is shown already)red hood>=nightwing(Jason made a bomb the bat could not defuse and admits he can beat bats via prep he also hacks into Tim's base which is said to be the first to do so nightwing>Damian(should not have to go into any detail

damian is close to feat less in comics and got dropped by every bat family member

However robins do have limits

For example red hood despite being in top 2 smartest robins is very emotional red hood is similar to Ayanokoji both of these 2 people have trained and learned how to fight and survive in dangerous situations but when faced with minor situations/inconveniences they are fodders

Think of it like this red hood is the equivalent to being a kid in HS who is passing all his classes with a perfect score at the highest academic rate but this kid has no idea about any type of gang slang

Another example is wonder woman she is a goddess and has insane Big when everyday things such as foods that taste good she has no ideas about and thinks it's magic

Same for red hood he is able to do feats like the ones I just explained

But red hood has emotional issues as Damian Wayne was able to manipulate red hood by simply "hugging him" which causes red hood to be sent back

To be fair damian is not someone to brush off as bro casually pushed drake to his limits was able to do the same thing to red hood and even beat him by playing very

dirty and dug up footage of Tim almost killing someone and blackmailed him to Bruce(these feats are not fully consistent)

Now this feat does via Damian does not prove to be consistent as Damian Wayne lost to Jason before and every other Robin has humbled him but it does show the robins do have limits and these limits are things that can be exploited by regular normal human beings

Red hood also got manipulated by a literal little kid but this feat is also not consistent so it does not hold value

And keep in mind red hood is smarter than Batman and can be compared to the likes of tim drake but even he can get emotional and casually get manipulated this is not a good enough anti feat to even be able to put him below the Usogui verse as a matter fact this anti feat does not even do anything close to that but it does show these people from dc are within limitations so just because red hood has a anti feat does not necessarily automatically mean many anime characters get a open shot at him it does not even lower the diff for his wins but it shows how he is very vulnerable

Next up is Batman beating the JL people like to think Batman is able to beat anime due to the fact he beat the JL but in reality all these feats have so much context within them and I will cover it right now

First and foremost people like to say Batman>jl due to the fact in death metal Batman was able to kill all the jl in death metal

This feat is impressive but has 2 main pieces of context that downgrade it

First and foremost it was said that the BWL took down his universes JL by using weapons from past villains which means he did not even use his own prep he needed to use other prep from other villains

Second the JL from this verse is feat less I really cannot believe i really have to explain this but no character from any diff/alternate verse is going to be the same a perfect example is in the multiverse there is a Batman that went on a killing spree after the death of Jason Todd which is diff from the Batman we are used to hearing this means they are all different and they even have different levels of power for example superman and ultra man which proves my point we don't know how powerful this alternate universe JL is we do know at the very least they are

still very strong but without feats they cannot be compared to other main timeline characters with feats unless they have them

So just because a alternate Batman best alternate jl member does not automatically mean he is above them especially if we have constantly play into this factor

Anyways if Batman were to ever fight the JL even prepped up he 7/10 times would never win I will cover this right now

People like to say Batman is above certain Jl members because of the fact he has won a very small amount off times and people like to use this to say is is able to outsmart them and or at least be on the same level of intelligence or even power of them but this is just false due to constantly

Once again dc is not your traditional verse to scale Dc you need to use a different form of scaling more of them than other verses and this is constantly

Constantly matters in all verses but usually a feat/verse is not big enough for it to hold value

But for dc which is a verse that has a character having easily 30+ full novels and 1k+ comics JUST FOR ONE CHARACTER means this rule applies heavily to dc verse

Let me give a example of constantly

In the Cote verse kei was able to manipulate Horikita ONE TIME

Are we going to go out and say Kei is officially smarter than Horikita? Sure kei doing this feat would upscale her and hold value but let's not sit around and drink tea trying to say kei is smarter than freaking Horikita

Another example of constantly takes place in better call Saul

In better call Saul 1 of the twins was able to hit hector and leave a mark on him

Now at this time the twin was only like 10 years old MAX

Are we going to sit down and act like 10 YO twins are able to harm hector?

Another example of constantly in the nfl 2022 the rams were able to defeat and win the nfl this includes beating Tom Brady

Are we going to go out and say the Rams quarterback(Matthew standford) is better than Tom Brady just for this 1 win?

Exactly

So let me debunk Batman vs all the JL members

Batman vs si
