Trial doc

Outsmarting is multi-faceted, and by definition is a complex entity. It is the outcome of interactions between agents embedded in a system. A character outsmarts another character when they successfully navigate constraints that stem from complex phenomena. Complex systems science studies the nature of complex phenomena in system
Complex phenomena are hidden through nonlinearity, randomness, collective dynamics, hierarchy, and emergence [(Santa Fe Institute, n.d., What is complex systems science?).](https://share.google/tHxGzKXSRnVxgO7mF)

By virtue of hierarchy, global systems comprise local subsystems and are typically more complex because of the collective dynamics, and nonlinearity and randomness grow as you scale up. There are also phenomena that do not even exist on the local level as they do on the global level. Macro-properties in the form of emergence cannot be reduced to any single local component.

“Criminals and corporations run this world”
Raymond reddington reddington is the most prolific criminal, a sphere of influence in every lawless activity. He himself partakes in all criminal occupations save for the inhuman like human trafficking. His criminal enterprise stretches globally. Maintaining and building a radical information network while navigating through the complexity of lawlessness and remaining as fbis most wanted while all criminal exploits remain simmering, with a furtive influence on the happenings of the world, this establishes himself well as a high tier scd capable of complex and multilayered scheming. Whilst maintaining his image as a criminal, he has to deliver them to the FBI and simultaneously throw all suspicion of his involvement in the case. There are a myriad of variables in the underworld for not even the letter of the law restraints them. To argue with his intellect is to argue with entrenched facts related to studies conducted by universities along with the implications of cognition. You cannot disparage his bandwidth without disparaging a heap of science and information carefully documented and objective.
This puts him well above the regulars like mentalist duo, prince bee duo, canon dn duo although arguments for him and lawliet can be made.
Thus his narratively implied capacity puts him way higher than mainstream Scd

Here the variables are through the roof as he has to face cabal and other government powerful organizations

This marks the beginning of a very comprehensive reddington doc enjoy

3.1

Narrative implications of evading a nationwide taking into account the fact that the blacksite that (an extremely intelligent operation) has satellite access and other government units and still manages to conceal himself is genuinely insane.

There are many powerful government people overseeing the search. They have a bloody chopper and the entire city is barricaded.

Manipulates the fact that they were observing the satellite feats and uses the truck to escape which he had previously kept ready then switched vehicles, causes a diversion and impersonates the cops. Made preparations in advance and had the foresight to recruit the troll farmer. Releases the contents of the fulcrum to sway the public opinion .
Lives simmering in an entire city of people searching for them. Prediction of the monotony returning in one two weeks. Trap evasion knows that the ruffle means that something has gone down and ascertains the fact that she called the police and leveraged her brother to get her to lie to the cops. Raymond had the troll farmer on retainer for three years. He goes his separate way with liz as he says that it will double the chance of them being able to clear their name revealing how logical he is
Offers blacklister as payment for his word. Ordains lizzy to hide herself leading to.her going to the Russian embassy

3.2

He doesn't stop working, he immediately finds a point of entry for a stream of information and gets to know the inner workings. He thus finds someone with dirt on their name threatens them and deduces that the people at the airport wil kill keen
Reddington is prepared
CAFE ESCAPE PLAN
He grabs the gun immediately when he is notified that police circle the estates. He therefore pita the entire restaurant under his domain, he knows that this is the only way to flee. He pressed the hostages against the window to validate his intentions. Foresight plus contingency feat Strongarms the FBI and it is then revealed that he called the entire thing on himself. Foresight deception manipulation scheme. An all encompassing strategy that facilitates the release of gerad gets good sandwiches. He also premtively called Becky (this is genuinely so insane 😭). And this is all just for marvic for whom he has more plans , multilayered as i said. Needed to account for fbis moves. He planned all this while he was evading cops and in constant worry for liz or wasn't worried idk u never know how he feels

3.3

Knows that by leaking the fulcrum the directors integrity would be questioned and knows that he can capitalize on that. He plans to obtain incriminating files in the variant which in turn will gain leverage over the cabal. Foresight.
Inductive reasoning - who else would be rare to find and deduces the fact that veridant hired him to attack their own facilities and their reasons and now plans to use ressler.

3.4

Dijin - infiltrates aram households just to get him to go to ressler and take up a case that will help him and keen. They knew that aram wouldn't call them also needed his skills. Immediately realizes that she is jin, manipulates her emotionally to extract information reads her perfectly
Strongarms the gin by preparing an escape and calling the FBI to their location thus making her feel trapped and having no choice but to conceed
Uses the chopper to deceive the cops and then throws the journal, allowing the FBI to trace the names thus attacking the cabal from a legal standpoint. The gay monologue was used as emotional manipulation btw to get her to ease up to him

3.6

Restaurant building plan, uses daughter to persuade the chief. Genuinely insane heist. Reddington need a cash reserve belonging to the director in order to strong arm him. Thus he sets into motion his plan of a heist..builds a restaurant bribes the inspector using his daughter. Gets the FBI on the case to get the thumbs, gets the thumbs and conducts the heist (foresight) to procure brief case
He is slowly pricking at the cabals director

3.7
Complexity phenomenon - catching someone who avoided government organizations like mossad FBI cbi for years not even a photo of him circulates. Hassan reasoning, not alot of feats this episode.
Gets Hassan to set meeting. Now

3.8

You like getting hurt eq
Cabin escape
Cabin manipulation

3.9
“Three hours to make one woman go away, we've made entire governments crumble in lesser times”

Gets the code Changed
preemptively insane contingency and foresight -
Sets meeting with foreign ministry of Venezuela, gets nawabi, start of his plan . Deception uIng nawabi as the photographer. Plans to steal from the FBI. Keeps storage locker in most states
Paint job gets fans fakes crime scene
Gets what he wanted holds the meeting and gives them the money printer

REDDINGTONS PLAN TO CLEAR KEENS NAME

Five weeks ago, I called the Metro PD to report a sighting of Raymond Reddington at the Del Rio Diner. I created a hostage crisis so you would be so kind as to release my attorney, Marvin Gerard, from prison. That day, Marvin and I conceived a plan to exonerate Elizabeth Keen, by targeting the cabal and in particular, the director. Since that day, everything we've done has been in service of that plan.
Plan. The Verdian case has resulted in catastrophic damage to the cabal's finances. The client list we took from the Gin gave us leverage with key players in the cabal to further isolate and weaken the director's influence. With Andras Halmi, or part of them, we cut a gaping hole in the director's golden parachute, leaving him nothing to run with and causing even further distrust and divisions within the cabal. But the Zavin Hassan case has opened a window of opportunity.
Window of opportunity. We must slip through with great haste to save Elizabeth. We must execute a specific attack, one so impactful, it will force the cabal to completely let go of the director

This is Raymond's explanation what proceeds had all been invisioned

Had been researching the director (foresight) plans to kidnap the director and is going to use insane deception like always to capture him

Uses his wife, deception to drug her and make her believe she's going into a panic attack, gets the director agitated and he reaches the elevator
Initiating of the plan it starts now, replaces the elevator floors , literally is changing the entire floor
He's been doing this for a while predicting this outcome, you cannot see by the fact that he is legit changing the entire floor. Gets aram to direct the lift to 8th floor and abducts
This is all for venzualen president, which is the product of the Hassan case which is just insane.
He's been planning this for a while, he knows that whatever damage he's been very subtly blowing has been for this case, this arrest will make it more rational for the cabal to simply detach the director from their organisation. All has been built for this moment . He is literally bringing a country down to their knees. It is then revealed that he does this entire thing to gain a position in that powerful organization
In conclusion this is a foresight amp
He knew five weeks in advance that the director was the soft spot they would need to push

Multilayered scheming
Ten episodes for one plan with microschemes

REDDINGTONS CONTINGENCY 3.11
Began with his clearing crew being shot and only me Kaplan left alive to send the msg to red that someone from that table knew

He then set his contingency in motion, this was a preset plan in the event that he is suspected of being in cahoots with the FBI, goes to show how he is prepared for most situations and how his contingencies are multilayered

Il briefly explain the entire episode so you have experience his deception first hand.
He hands liz the case wherein the 20 crime lords are meeting saying this is a once in a lifetime opportunity of catching an ocean of big fishes.
Presents it as some big fish has caught a meeting and tells her that someone he knows he's transporting him. This is him hanging his bait.
They find the big fish. It was Raymond reddington. But not our Raymond reddington some different guy. He claims that he is the real reddington and then goes on the prove it via information. Screw it. This man is a con artist sent by the real reddington, whatever deception the con artist employs is at Raymond's discretion. He drops in the information of the employer whose going to be taken, which is a feat for Raymond itself as this isn't the result of information rather reasoning. In this manner he gets the FBI to slightly doubt the real reddington(comes in handy) and sends them to protect the agent. He knew that they would fail and that this failure would put them on her lead, using this he knew that they would use the con artist (manipulation). Confrontation sows further doubt.
The map scene adds to the complexity,"you cut of one head of the hydra the other grow" suggesting that there are other opponents as large as the cabal and Raymond is up against that which is mental.
Raymond knew that they would take up on his offer
Raymond shows up to the meeting, and now the con artist is being sent to the meeting
He sows a seed "before this meeting is over i will prove that I am innocent"
He knew that they would get the informant to spill the truth. Produces reasons for everything he's done.
Gets the con artist to claim he's reddington on entrance and then the real Raymond presents the con artists as reddington, the reddington that has actually been serving the FBI. In this manner he expels all suspicion on his being and direct it towards the con artist. Then the exaggerated show down between the two to further decieve them.
Using aiding keen reasoning as a way to further entrench the fake Raymond's involvement.
Then frams marcus implicating himself as a victim then Raymond drops the address to get the FBI to rescue her. Knows that the cin artist is wired and uses that to incriminate marcus. He is eloquent.
He knew that the FBI would immediately breach as
Now here i present the most insane foresight feat
The helicopters just as the FBI breached. This means that reddington accurately predicted the timeline of events scaling from con entry, the whole pantomime followed by the discovery of the bug and preemptively got them to fly. And he doesn't even use the helicopters as his escape 😭😭😭 that was another deception used to lure the FBI to the roof and he took the service elevator downstairs. In this manner, he convinced the group, killer the person who uncovered his secret, deceived the FBI whose worked with him for so long and clears his name. 💀 And this was a plan the called "contingenies" and he has many such contingenies 💀.
3.12

Knew keen was pregnant from a myriad of factors (observation+ reasoning+ knowledge application)
After keens statement immediately ascertains the pattern and knows who he has to go to next
The singing part is just so sad 😭

He gives the case of the vehm so that he can hire him for a job, unbeknownst to him he manipulates the cardinal to manipulate the vehm into killing the cardinal himself so that he can eliminate competition so that he can raise funds for a war (foresight + premonition)

3.13
Josephine

3.14

Obtain file

3.15
Drexler

Deductive leading to the interviewer which leads up to drexler potentially, he follows his own line of inquiry for whatever reason
Accurately depicts the symbolism of the work.
He knows an enemy contacted him and needed to find it and thus sent the FBI against him

3.16

Looks at info and realises that the caretakers business's integrity. He was proven to be right is being questioned and schemes to prevent the fallout as a result. Logical persuasion to give up his data. (Observation) Notices the custom work, (inductive) realises that it's one of a guy he knows (influence) uses him to get location.
"Germans are tracking it but-" then a face and in two seconds Raymond accessed that, he has released the contract, and the Germans have stopped aiding in the terrorist tracking. He knew about the Germans, and their refusal post the release which is why he told them not to in the first place. This episode is a feat of threat evasion and assessment.
He does so to avoid his own secret from being exposed

3.17
Solomons, going after Elizabeth- saw through the deception, knew that she was planted as a diversion based on her not escaping and the car not starting. Knows his entire plan, amazing reasoning analysis and a lot of other cats
Ambulance deception

3.19
Observation of the place leading to abductive reasoning used to deceive the cop. He used the state of the house, shack, sentiments derived, and other factors as his basis of Reasoning. Reasoning was similar to bbc sherlocks.
The strategy involved to decimate an entire kgb unit. Starting from the outside to the inside, I mean its more like battle iq so I won't be mentioning it much but it involves deception-and-good strategy
. This includes immediately making signals between red and rastova, devise a plan to start from the outside, eliminating one operative to lure the rest whilst using their signal of flashlight. Water shock, fire of the door.

3.20.
All these years I anticipated every threat
Can play the piano has knowledge in music theory
Foresight - knew exactly which stairway the police would be taking them (reasoning looking at the schematics) used the guard to deceive the woman. Gets the woman on her side (another long term scheme start)

3.22
“I have virtually unlimited resources”
He gets her to free the hostages so the bureau could trust her. This is a good foresight feat and EQ feat as he knew that they wldnt and thus planned it like this
They are going to steal from the next president of the United States. Complexity.
Insane tom keen feet but who cares.
He gets Susan to steal the money so that he can strong arm the to be president of the states
Diaz eq- knew exactly what kind of lie diaz would be inclined to tel. He also falsely accused kirk to draw him out. Insane foresight
Oil foresight- two or three episodes back he hijacked oil that came from terrorists. There episodes later it's revealed that he did this so that he could get diaz to falsely accuse. This he had thought of getting susan on his side, the plan and the end result all a few episodes prior. He did this so that they wouldn't know that it isn't kirks and make its way into evidence. Now plants the evidence into kirks possession and gets the FBI to arrest the employees. He plans to intercept the truck and switch the oil. He also delays the driver.
Plants a fake truck to deceive the driver, gets the serial number exchanged makes the switch and succefully plants the oil. Hes so cool
Strong arms kirks into flying in. Persuades ressler
