Best Feats

Episode 1

While as a child, **Shawn was able to memorise even the most minor things and visualise them in his head, such as: the letter out of the exit sign, the colour of the vinyl of the seats, the manager's name tag which he only saw as he came in as well as how many hats were in the establishment and their description, and all in just seconds**.
PSI, WMI, VSI, Observation, Visual Spatial Intelligence,

While on the way to doing the dirty with a girl, **Shawn was able to abduct the stereo robber of a case- which was the store manager, in just mere seconds by watching the nervous fidgeting and not looking at the reporter in the eyes of one of the people there and is able to make out his location** (which was on Channel 8 News) **out of some blurry pixels several feet away and also that the tags on the news van expired**.
PSI, WMI, FRI, EU, EP, Observation, Perception, Intrapersonal Intelligence, Non-Linear Thinking, Analytical Thinking, Convergent Thinking, Abductive Reasoning, Logical Reasoning, Intuition,

While sitting on the bench, **he was able to observe small bits of shattered tail light on his shirt and intuit that he broke into someone's car**. He tells him to wipe it off his sleeve where they fall into his boot. **Later, he uses this by telling the officers to shake him down and was able to pretend that he was being possessed or something, and that all the evidence in his left shoe**.
PSI, WMI, Observation, Intuition, Direct Manipulation, Acting Skills, Tactics,

While in the interrogation room, he noticed Lassiter playing with Lucinda's hair in the mirror for a slight bit before he moved away, where he deduced them to be in a relationship and then intuit that they're getting married. He also noticed one of the officers who were supposed to be detaining him and abduct that he's getting dance lessons due to hand gestures and the "one, two, three" thing he said previously. Lassiter also states that he can "read guilt" off of TV interviews.
WMI, EU, EP, Observation, Inductive Reasoning, Abductive Reasoning, Logical Reasoning, Intuition, Acting Skills, Cold Reading,

Previously, before being led to the interrogation room, **Shawn was able to observe several items on the desk officer's desk which included several spiritual things and that she believed in spirits and something about her grandma dying. Later, while he was being cuffed by her, he noticed it was the same person and played into being a psychic and was able to use his acting skills to stop her from arresting him at the moment. Later, while at the front desk, he was able to**

use her grandma's dog's name (Lulu) and was able to easily gain connections with her.
WMI, EM, EU, Social Skills, Social Awareness, Observation, Perception, Deductive Reasoning, Acting Skills, Bluffing, Emotional Manipulation, Guilt Tripping, Cold Reading, Tactics,

Was able to deduce that Gus was playing video games in just seconds of coming into the room just based on his hand placement on the spacebar and arrow keys. While talking with Gus, he was able to convince him into coming with him after he said that "he won't do anything blindly with him again."
PSI, Social Skills, Faster Thinking, Associative Thinking, Abductive Reasoning, Logical Reasoning, Cold Reading,

Case Outline

It starts as a kidnapping case, where he was hired to find Camden McCallum Jr., the son of Camden McCallum Jr. After some digging, Shawn was able to find that he was a party boy, and after 18 months, he was gone. Shawn concludes that he "kidnapped himself", since exactly 18 months ago, Camden Jr. threatened to cut him off unless he stopped, coincidentally around the exact time he stopped hanging out with Malcolm Orso. And after some more reasoning, he was able to conclude that the killer was Camden McCallum Sr.

While looking at several pictures of Katarina and was able to figure out several details about her life: She was lonely early in life and grew up into a beautiful woman, reads Vonnegut, is an aviatrix and kayaks. And while describing the kidnapper for the case for a police sketch, **he unknowingly used a picture in the background as a basis for it and is able to describe the man in the photo easily**.
VCI, Observation, Perception, Cold Reading, Intuition,

After sneaking into Gus's home and confronting him, **Shawn tells him that he's dying to know who the kidnapper is even after saying that he left the case.** He was correct in this assumption and Gus came back. **Shawn was able to come to the conclusion that he left on his own accord and wasn't kidnapped. He came to this by using photos found in Katarina's room and finding out that Malcolm hasn't been seen with him for a while and THEN that he's been planning the thing for almost a year.**
EU, Social Awareness, Associative Thinking, Linear Thinking, Analytical Thinking, Inductive Reasoning, Abductive Reasoning, Deductive Reasoning, Logical Reasoning, Cold Reading, Info Gathering,

After being pulled over by a cop, he passes him his dad's old police business card and says that he comes from a family of cops. **After being caught in a lie, he was able to successfully convince the cop that he appeared in town a few days ago and grabbed some supplies and was let go.**
Social Awareness, Bluffing, Acting Skills, Misdirection,

Was able to find out that young Malcolm and young Camden spend their summer days in the Orso family cabin and since Malcolm is so far out of Camden's range, the police wouldn't suspect him. Then, he forms a strategy that involves having a "premonition" at the police headquarters and to have a lot of witnesses for it to gain more fame and after being ignored by the detectives, he starts having another "vision" and says to them to not eat the chicken. This is because he knows Billy Camp, the chef, has bad hay fever and since it's windy, it seems as if he's getting allergic reactions from the food, which causes the detectives to give them a second chance. He leads them to the cabin.
WMI, EM, Intrapersonal Intelligence, Cold Reading, Hot Reading, Info Gathering, Strategy Building, Strategy Execution, Strategy Efficiency, Observation,

While focused, Shawn was able to observe minor things such as the coffee cup fallen on the ground, the coffee pot still there and a small, bloodied dent in the table, and was able to gain favour with the police department. **He is also able to deduce that it isn't a murder suicide since there was no reason for them to fall-out before they got the ransom money. While exiting the station, he is able to notice something about Camden Sr.'s sleeve while he was shaking Lassiter's hand** and **was able to convince Lucinda to give him more information,** which she reveals that he tried to kill himself, which he considers strange considering he was a war hero who had seen everything.
EU, Social Skills, Observation, Perception, Inductive Reasoning, Divergent Thinking, Influence Building,

It's also been stated that he's had numerous jobs- around 50 or so, so he should have at least a bit of experience in a lot of things.
Crystallized Intelligence, Knowledge,

Even without being prepared, Shawn was easily able to pass his father's test of how many hats were in the room, how they look and was able to memorise that his father had a hat in his pocket. He was even able to notice slight things like a wedding ring on someone's hand and the text on each one's hats. He was even able to notice that the person wearing the cowboy hat walked out during him ridiculing their hats by the sound of her boots.
VSI, PSI, WMI, Observation, Perception, Visual Spatial Intelligence, Adaptability, Trap Evasion,

He is also able to read "nervousness" from Katarina's positioning of her body. And after being embarrassed that what she was carrying were clothes, **he formulated a tactic to get the bag.** This tactic involved:
Using the thrift store worker's kindness to NOT get kicked out after doing that and have Gus attempt to buy the bag while Shawn sneaks into the back. Shawn DID get the bag, but it also failed at the same time because he used Gus as a decoy while he didn't know, which allowed Gus to rat him out.
EP, EU, Psychological Insight, Tactics,

Using a few dollars as a basis for the bag, he was able to visualise the amount of money that the bag could contain in a few seconds and also based on the wear and indentation of the bag and a groove on the side. And from that, he was able to deduce that someone at the house paid the ransom.
PSI, WMI, FRI, VSI, Logical Mathematical Intelligence, Visual Spatial Intelligence, Convergent Thinking, Connective Thinking, Deductive Reasoning, Logical Reasoning,

From several feet away, he was able to shoot a perfect match that matched Lucinda's, someone who should be trained with gun-handling.
VSI, Visual Spatial Intelligence,

Shawn was able to reason that Camden Sr. was the "killer" of Camden and Malcolm in the cabin. He did this by:
-Premise 1: The ransom drop DID happen
-Premise 2: He did everything they asked of him
-Premise 3: While driving back, he recognized Malcolm's car
-Premise 4: This would confirm Camden's suspicions on Malcolm doing it and gives him a hunch on where they are, the cabin since it's a very good place to hide in
-Premise 5: Camden Jr. was making coffee when he arrived at the cabin
-Premise 6: The coffee and its cup was spilled in the living room of the cabin
-Premise 7: The edge of the table was damaged and bloodied
-Premise 8: Malcolm was shot in the chest and killed, and the dog saw everything
-Premise 9: Camden Sr. made it look like a murder-suicide
-Premise 10: The ransom call never came
-Premise 11: Camden Sr. attempted to take his own life
-Conclusion: **Camden Sr. didn't mean to kill him, just to teach him a lesson or else why would the coffee cup be on the floor of the living room? It couldn't have been knocked down, since it's not shattered and it wasn't flung that far away. After getting a bit too rough with him, he slammed his head on the table, killing him. After Malcolm walked in, Camden Sr. led him to the chair and shot him in the chest. It couldn't have been a suicide, or else bleeding out from a shot in the stomach wouldn't have been ideal. Shawn could deduce that he went home, called the police and bided his time. Since killing his own son and**

best friend, he must've been shaken up so badly that he tried attempting suicide.
Shawn could visualise all of these sets of events in real time, which he did in, at most, seconds. Then, he could empathise with him with his own feelings of his father and could get where he's coming from.
PSI, WMI, VSI, EU, EP, Empathy, Psychological Insight, Cold Reading, Linear Thinking, Convergent Thinking, Deductive Reasoning, Inductive Reasoning, Abductive Reasoning, Logical Reasoning,

Shawn was able to have Camden Sr. arrested with a strategy, that followed something like this:
-Gus realised Consumine, something that was used to prescribe dog bites, was in his medicine cabinet, which he later tells Shawn in the car. Shawn then realises that the dog DID have blood on its teeth and not sausages.
-**Shawn starts thinking of several strategies to do have him arrested, where he finally thinks of one**
-**Shawn calls the cops on him, and was able to mimic Camden Sr.'s voice and attitude accurately enough to trick the police responder**
-**He also had enough foresight to predict that Camden Sr. would come outside and have them in cuffs, and when he gets to the car, he starts to have a "vision."**
-**He acts like a dog's biting him and tells them of the dog biting an intruder, and that the dog knows him, and then he starts saying there's blood**
-**Since he KNOWS that Camden Sr. was injured by the dog and since he knows that he was injured in the arm due to the bandage, he starts telling them that it was Camden Sr., and that if they check his arm, the teeth marks would all line up**.
-**After Camden Sr. was confronted by Karen, where he's slowly gaining her on his side**, he yells out that he's had another vision of Dr. Mandali and the word Consumine, a medicine for dog bites, and also that the wound is fresh.
-Camden Sr. breaks down and reveals that it was him
PSI, WMI, FRI, EU, EM, Social Awareness, Indirect Manipulation, Logical Manipulation, Fabrication, Acting Skills, Bluffing, Information Control, Fluid Intelligence, Interpersonal Intelligence, Strategy Efficiency, Strategy Effectiveness, Strategy Formulation Speed, Strategy Shielding, Short Term Strategy, Strategy Foresight, Associative Thinking, Non Linear Thinking, Divergent Thinking, Convergent Thinking, Prediction, Anticipation, Setting Traps, Adaptability,

After the main crime is concluded with, it's revealed that he's been considered for being added into Karen's speed dial, and also that he's got another case.
Influence Building,

Episode 2

After the woman who took his seat started grabbing her purse's handle, **he was able to notice several minor details including: something in her purse, cat hair stuck on her shoe and jacket and a photo of her parents inside of the purse. This allowed him to deduce that she has two cats at home, one grey and one white, and also that she should have a close relation to her family considering she has a photo of them. He was also able to guess her parents were together for around 30 years. After the dude walked in, he was also able to deduce that she was a cop based on the paper she's reading, her vantage point and the layout and also that she got defensive when the person walked in. He also deduced that it was the first time pulling out her gun, due to how shaky her stance was.**
PSI, WMI, VSI, EU, EP, Social Skills, Psychological Analysis, Interpersonal Intelligence, Linear Thinking, Analytical Thinking, Deductive Reasoning, Abductive Reasoning, Logical Reasoning, Perception, Observation, Seeing Through People, Intuition, Pattern Recognition, Cold Reading,

After rewinding the TV, **he was able to notice that something was wrong with Brendon's inhaler, due to his shaky hand movements. Then, Shawn could come to the conclusion that he was sabotaged due to several premises.**
-Premise 1: Brendon said his inhaler felt funny, because his hand stung when he used it
-Premise 2: The inhaler disappeared after the paramedics arrive on the scene
Conclusion: **Logically, this should mean that his inhaler was sabotaged in some way, or else why would he use a broken inhaler that he brought in there?**
PSI, EP, Linear Thinking, Observation, Abductive Reasoning, Logical Reasoning,

Case Outline

Shawn (and Gus) were hired to investigate a sabotage for the Regional Spelling Bee of Brendon Vu, the runner-up of last year's Regional Spelling Bee. There are 43 remaining contestants presumably with a motive, and Karen wants him to "read guilt" by talking to them, and their parents by 5 because the event is ending in two days. He has five minutes to interview each contestant. After they finished interviewing them, Elvin Cavanaugh, the Spellmaster and former champion, falls off the railing of the Spell Master's box and dies.

After he finds out the officer has an aunt who can see spooky things or so and that he doesn't doubt his psychic abilities, **he is able to manipulate the officer by**

telling him that Elvin's spirit is still there and very, very angry, he then pretends that his spirit is trying to kill him which spooks the officer enough to leave.
Direct Manipulation, Individual Manipulation, Acting Skills, Bluffing, Fear Inducement, Persuasion, Tactics,

While searching through the Spell Master's room, **he was able to read a slightly faded "1953" from Elvin's notebook. Then, he starts observing closer, which he finds the potted plant, chair and pencils knocked over. Shawn concludes that it was something similar but not an altercation because he was up here by himself.**
Observation, Abductive Reasoning, Logical Reasoning, Concrete Thinking,

While the officers are planning to stop the investigation, **Shawn starts thinking of something to stop it, which involves yelling random gibberish pretending it was yet another "psychic vision"** and telling them to check the food and that it was a murder.
Acting Skills, Tactics

For an attempt to get a lab, Shawn sets out to find his father and **asks about Jim Syklan, a friend of his who works at the regional crime lab.** Shawn assumes that the food has poison in it, so Shawn was able to get Henry to disclose the location for a favour, where Henry requests him to finish the dog house from eighth grade. Then, **Shawn is able to remember and visualise his conversation with his father from eighth grade about this topic.** After some further conversing, **he was able to remember the guidelines Henry gave him for it in 1989.**
WMI, Social Skills, Memory, Influence,

After an attempt to run him over and being upset, **Shawn compares him to those spelling bee obsessed parents since he "only cares about the results." Shawn was able to come to the conclusion that whoever tried running him over wanted him dead or wanted to send a message.**
EP, Associative Thinking, Intuition,

While visiting Brendon Vu, **he was able to quickly notice that his inhaler is nearly identical to Jiri Prochazka**, another contestant, and with Gus's knowledge, **is able to come to the conclusion that it is fake.**
PSI, Abductive Reasoning, Logical Reasoning, Observation,

Later, after getting the results on the food, he goes to the police station and **pretends to have yet another psychic vision. This time, he tells them that he feels that the food's been poisoned, alongside some other hints like a styrofoam container and a fortune cookie. He also tells them that it's gone out of control and that the perpetrator is willing to cover it up.**
WMI, Acting Skills,

While trying to get back into the Spell Master's room, he was able to observe who the new Spell Master is based on the card on his coat and **that the person outside was the Spell Master since he was standing close to it.** So, **he grabs the coat and locks him outside, and impersonates him to get into the room.**
PSI, Intuition, Acting Skills, Tactics,

After getting back into the Spell Master's room, **he was able to find circular indentations on the carpet** and after he found a tripod in the closet with a camera attached, **he linked the indentations to it and was able to set the tripod exactly how it was when the murder happened on the first try,** which pointed to Miklos, Jiri's father.
PSI, VSI, Linear Thinking, Deductive Reasoning, Logical Reasoning,

After they were found out, **he was able to quickly deceive them into thinking he was the Spell Master** until the actual Spell Master came in. During this, **he was able to come up with a rhyme involving banana**.
VCI, PSI, Concealment,

Once they snuck out and snuck back into the Spelling Bee, Gus deduced that Cavanaugh was going to disqualify Miklos and Jiri in his announcement. While looking closer at Miklos, **Shawn was able to observe that he was tapping something on his jacket and also that Jiri was holding tightly onto his inhaler. That is how he was able to deduce they were cheating. He goes on stage and does his usual psychic bit and starts vibrating and then reveals that they were cheating.** Although, **not without telling him to spell "soubrette" which confirms that he can't without help from his father.**
-Premise 1: Brendan Vu's inhaler was not working, and he has nearly the same exact inhaler as Jiri
-Premise 2: The camera was pointed exactly at Miklos
-Premise 3: Elvin Cavanaugh was a stickler for cheating and his so-called "obsession"
-Premise 4: Jiri was holding onto his inhaler tightly and Miklos was tapping on his jacket
-Premise 5: Since Shawn was the one who alerted the police that this was a murder case, a van tried running him over.
Conclusion: **Jiri and Miklos were cheating via Miklos' method of tapping into his jacket and sending electronic signals into Jiri's inhaler from the transmitter. That's also how he figured out how he died and why he never stopped the Spelling Bee and also who the one in the van was.**
EU, Interpersonal Intelligence, Linear Thinking, Analytical Thinking, Holistic Thinking, Deductive Reasoning, Inductive Reasoning, Abductive Reasoning, Logical Reasoning, Acting Skills, Observation, Intuition,

After the main case is concluded, it's revealed that **he intentionally deceived Gus who had studied for three months**, **which should garner him more VCI than him as he was the one telling him the answers.** He states that it was for the best, as he would've been ridiculed as a nerd if he won it since high school kids are REALLY mean.
VCI, EU, Bluffing, Acting Skills, Direct Manipulation,

Episode 3

As a child, **he was able to learn how to sneak around via walking around on the balls of his feet and with deliberate steps from his dad. He also learnt to peek around a corner staying down low cause people are expecting you to be up at eye level and also when walking down a hall, to check the grains of the carpet. He utilised this knowledge later to sneak around the police station to tail cops around for information to get them onto a case with a stolen ring.**
FRI, EU, Crystallized Intelligence, Learning Ability, Knowledge,

While a cop was pulling around a bulletin board of information for it, **he was quickly able to process numerous pictures on it** and **reason that it's an heirloom worth 5 million dollars lifted from the hotel where they're having the wedding on Saturday and there's also an open bar. He is able to remember and detail all of the things about the diamond that he saw too.**
PSI, WMI, VCI, Observation, Connecting the Dots, Linear Thinking, Analytical Thinking, Faster Thinking, Connective Thinking, Deductive Reasoning, Logical Reasoning,

In just a few seconds of being given the case files, he could deduce that the secretary was the one who did it just by looking at the signatures in her handwriting, where she was the one faking her signature.
PSI, Inductive Reasoning, Abductive Reasoning, Logical Reasoning,

Shawn was able to intuition that one of the people there was the sister of the groom just by the paper in her hands, and during her hand shake with her, was able to tell that she was the maid of honour and wedding planner from the photos and documents in quick succession. Then, he was able to get them to invite him to the wedding.
PSI, Social Skills, Social Awareness, Abductive Reasoning, Logical Reasoning, Intuition, Observation,

Case Outline

The son of the Attorney General, Dylan is getting married to his fiance. The problem is that the ring, which has been in the family for over 200 years and is worth over 5 million dollars, has been stolen. Shawn gained an invitation for the wedding after sneaking into the interview room.

After a cop snuck up on him while he was listening into the Chiefs and Lassiter's conversation with the Attorney General, **he was able to observe several things on him such as the mask and gloves on him, where he comes up with a strategy which involves using his germaphobia which involved:**
-Telling him that he's listening for **numerous diseases such as Lyme's disease, rickets, avitaminosis, Legionnaires, bubonics, etc.**
-He deceives him into thinking that there are spores in the wall, the planter and everywhere in the hotel.
-He also acts that Mike, someone probably important to the guard, was unimportant to him and that he was called in by the Chief Inspector.
-He proceeds to manipulate the guard into giving him access into the entire place by inducing fear into him via telling him that the safe room will be a triage unit if he doesn't get in there, even after the guard tells him that it's a crime scene.
PSI, WMI, EU, EF, Social Awareness, Observation, Knowledge, Direct Manipulation, Emotional Manipulation, Acting Skills, Bluffing, Fear Inducement, Persuasion, Sophistry, Psychological Insight, Psychological Analysis, Cold Reading, Interpersonal Intelligence, Strategy Effectiveness, Strategy Efficiency, Short Term Strategy, Connective Thinking, Deductive Reasoning, Abductive Reasoning, Inductive Reasoning, Logical Reasoning,

While doing a fake palm reading on Julie, **he was able to understand her emotions well enough during Lassiter's briefing on the case and utilised it to gain a connection with her to help eachother out on the case.**
EP, EU, Social Skills, Social Awareness,

He was able to bluff to Gus's coworkers that he had a female, orange tabby cat that he got last Christmas that he made a Santa hat so that he could get him out of work. **He also knew made Pickles a female so that it allowed him to make his coworkers get on his ass even more for him if he didn't leave.**
EU, Fabrication, Bluffing, Tactics,

He was also able to lie well enough to get Bobby to believe that he was the Chief Inspector, since him being a "psychic" didn't convince him enough and **even came up with an elaborate backstory and started with a British accent and slipped into an American one halfway through. He was also able to create a**

suspect list out of all the people at the rehearsal dinner since the only people who knew about the ring being in the safe were at it.
PSI, Linguistic Intelligence, Direct Manipulation, Bluffing, Acting Skills, Fabrication, Deductive Reasoning, Logical Reasoning, Tactics,

In just one entire second of stepping into a room of one of the suspects, was able to clear them out of being the suspect. This is because: **Uncle Leo left his wallet out on the table out in the open and since he knew criminals are sneaky, jaded and defensive people, and yet this person had a reason to be trusting.**
PSI, WMI, CPI, EP, EU, Abductive Reasoning, Logical Reasoning, Intuition, Observation,

After just coming across a dead body in the dumbwaiter, he was able to observe several minor details, such as a mark on his shoe as well as marks left on the table. As soon as he saw the nameplate, he remembered that it was Lassiter's suspect. As soon as he comes across Lassiter and Karen, **he does his pretending business and leads them to the body.**
WMI, Acting Skills, Observation,

On Shawn's first watch of the tape, **he was able to observe that the best man was wasted based on his movements.** Sometime before that, **he hosted the bachelor party to get them drunk enough to dig information out of them, which only got him a bit of information before he passed out.** Later, **he was able to seduce Lacey and attempted to get information out of her, but she was distracted after encountering her bouquet locked up.**
EP, Social Skills, Seduction, Tactics,

Sometime before being at the wedding, **he had already deduced who he thought it was and he stated that it's somewhere around the high 60 percentages that he's correct.** While in the wedding, **Shawn does one of his usual psychic act and exposes the oldest sister as the culprit for stealing the ring,** he reveals her motive started when the father revealed the ring to the bride before the wedding, which the oldest sister was jealous of because she thought she was supposed to get the ring. Instead, **because of the fact she was always her grandmother's favourite, this fact being intuited by Shawn,** and the older sister was counting on the ring to go to her which didn't.
EU, EP, Interpersonal Intelligence, Psychological Insight, Acting Skills, Non-Linear Thinking, Divergent Thinking, Holistic Thinking, Probabilistic Reasoning, Abductive Reasoning, Inductive Reasoning, Logical Reasoning, Intuition,

Shawn also mentions that she had a small window/chance to get the ring, which was when the ring was being put back in the safe so she insisted it be used during the rehearsal wedding and she pretended to adjust the ring and put it back, this fooled

everyone except Dietrich Mannheim (the dead body Shawn found earlier in the kitchen) who wanted a cut from the ring and threatened to go to the police. Using this, **Shawn knew it was her who killed him, Later Shawn reveals that the florist bailed on her which meant bouquets would have to be crafted by hand urgently, so she had to work with others to craft them, which gave the oldest sister no way out to hide the ring she stole, so she the only place she held it in was inside of the flower bouquet. Shawn knows that she hid it there because:**
-Premise 1: She freaked out when one of the workers was handling the bouquets, and was frantic and specified that it needed to be the right one.
-Premise 2: When he seduced Lacey, she slipped the information that she knew the bouquets were locked up for some reason, so she must have tried to open it previously.
Conclusion: **The best conclusion to come to, was that she was the one who must've stolen the ring. Plus, Shawn knew that she grew up hearing crime scene details so she must've thrown the police off by planting all the needed evidence elsewhere.**
EU, Interpersonal Intelligence, Associative Thinking, Linear Thinking, Convergent Thinking, Holistic Thinking, Deductive Reasoning, Abductive Reasoning, Inductive Reasoning, Logical Reasoning, Intuition, Trap Evasion,

Episode 4

At the start of the episode, **Shawn was able to reason that Gus had stomach issues just by the fact that there were vents in the bathroom and air fresheners all over the place- well, alongside his nose. He's also shown knowing several organs of the human body for some reason,**
Divergent Thinking, Deductive Reasoning, Logical Reasoning, Observation, Knowledge,

Case Outline

A group of robbers have been released and are looking for a female whose husband had been part of a robbery and is in potential danger as the robbers think she has something to do with a large amount of money. However, it's revealed that her husband is actually dead, and she wants them to contact his spirit.

After reading her name on the paper, Shawn **calls her name in a way a friend would address her and then heads out to leave. He is stopped by Raylene and was able to convince her that he was a psychic, and get connections to her, which then makes him connected to the case.**
PSI, EF, Direct Manipulation, Acting Skills, Tactics,

Had been able to sneakily pull out information about Raylene's dead husband and when **he did his psychic business, he told her that he saw rain and a fiery crash,** which got her believing him even more.
EF, Direct Manipulation, Acting Skills, Misdirection, Tactics,

Later in the day, **he was able to gather Maylene, David's sister and some of her friends to join him on a seance to summon the spirit of her husband. This allowed him to get in contact with everyone in that room and get information from them since they're witnesses and piece it together from the information they tell him.** Just from this, he was able to gain information such as: The dead guy was on the lam for three days with the cash and had help. During the seance, **he was able to easily piece together information by intuition** and **by piggybacking from other's answers** and **visualise their location as they go on.**
VSI, FRI, Social Awareness, Logical Manipulation, Psychological Manipulation, Misdirection, Fabrication, Acting Skills, Short Term Strategy, Strategy Effectiveness, Divergent Thinking, Intuition, Adaptability,

As he encounters the lady officer from the first episode, he coughs in front of her while walking by to get her attention. Then, **he gets into a conversation with her about him speaking to her grandma again where he says that she's in the records room, so she gives him the keys for it. He leads them over to the Ws and has her close her eyes while he gets the information. He also intuitions that Walter was her ex, judging by her tone while saying his name.**
PSI, WMI, EE, EF, Social Awareness, Interpersonal Intelligence, Acting Skills, Misdirection, Bluffing, Hot Reading, Intuition, Strategy Efficiency,

While on the car ride with Gus, **he was able to remember several details about their shared past.**
Memory,

When Gus and Shawn find David Wilcroft, who was supposed to be dead, **Shawn is able to tell David had lost the money and was trying to find it by digging somewhere around his location.**
-Premise 1: There are several dirt stains on his pants.
-Premise 2: There was a really hard rainstorm for two days straight, the worst in 30 years.
-Premise 3: The rainstorm knocked a road out, which was where David supposedly died.
-Premise 4: He never went back to Raylene even after this event.
Conclusion: **The most convincing conclusion to come to, was that David lost the money and forgot about it somewhere while driving away and has been attempting to dig to find it. This was proven right by David shortly after.**

PSI, WMI, Linear Thinking, Analytical Thinking, Holistic Thinking, Connective Thinking, Inductive Reasoning, Abductive Reasoning, Logical Reasoning, Observation,

After coming back from David's home for the time being, **he promised to Raylene that he has a plan to put the robbers back in jail to protect her.** This goes something like:
-**Sneak into Lassiter and Juliet's car while they're on stakeout to distract them.** He also tells them that they don't know where the money is. **He also predicted their reaction that they didn't want their help.**
-**He had Gus somewhere nearby their location so he could take notice of where they left after he distracted them both.**
-Get a key to sneak into their house, so they can find evidence to convict them, but they were caught in the process.
-**Shawn also demonstrates enough control over his emotions to keep his calm with a gun pointed at his face and even make jokes.**
-Using his "psychic powers," he tells them that he has a message from David Wilcroft that he lost the money and is concerned that they're going to harm Raylene.
-After being asked to demonstrate his psychic powers, **Shawn observes several stains on one of their pants** and **determines that he's wearing the same pants that he was released in and packed on a few pounds.** By using his skill in observation, **is able to get on the good side of the dude holding them at gunpoint via looking at how many fingers he's holding up in several reflections. He did this by moving a bit and pouring some tea, which had the dude move around and allowed him to view the reflections.**
-**He also concluded that Raylene was evil because David was a wheel man but missed a turn on a mountain road because he was trying to get away from his wife to fake his own death.**
-After going to the mausoleum, they find themselves at gunpoint alongside David by Raylene. **Shawn tells Raylene that David doesn't have the money, and he's the only one who knows where it is,** and **bluffs her to the crypt since Roger runs the place, so it should be the perfect hiding spot and they can get in and out whenever they want. His bluffing could even fool Gus, who had known him since he was a child. It's revealed that he planned the dudes and the cops coming in and likely planned to stall long enough for Lassiter and Juliet to come in.**
-Raylene has her gun taken away by Lassiter and Juliet and is arrested.
WMI, FRI, EE, EU, EP, EM, EF, Social Skills, Social Awareness, Fluid Intelligence, Observation, Connecting the Dots, Adaptability, Direct Manipulation, Logical Manipulation, Misdirection, Fabrication, Bluffing, Concealment, Short Term Strategy, Strategy Efficiency, Strategy Effectiveness, Strategy Shielding, Short Term Planning, Planning Intricacies, Planning Coverage, Planning Versatility, Planning Contingencies, Associative Thinking,

Linear Thinking, Divergent Thinking, Lateral Thinking, Abductive Reasoning, Inductive Reasoning, Logical Reasoning, Prediction, Setting Traps,

Shawn also deduced where the money was located just by a few, simple premises and an assumption, such as:
-Premise 1: David Wilcroft practically dug all around the Kalish Loop since he's been digging for four years.
-Premise 2: It was dark and rained heavily when David hid the money, and David said he THOUGHT it was off the path so there's a chance he may have gotten lost.
-Premise 3: There are 2 different Kalish trails, the J. Kalish trail and the L. Kalish trail.
-Premise 4: The L. Kalish trail is defunct and the J. Kalish trail is where David was digging. The L. Kalish trail is only used by rangers for backfires, medical access, mudslide emergency routes and for instance, a torrential rainstorm. Otherwise, it's gated and looks completely abandoned.
Conclusion: **Albeit it's shown off screen, these premises allow for the off chance that David accidentally went to the L. Kalish trail during the rainstorm and forgot where it was but knew it was one of the two. He wrongly assumed it was the J. Kalish trail.**
Non-Linear Thinking, Divergent Thinking, Holistic Thinking, Inductive Reasoning, Abductive Reasoning, Logical Reasoning, Guesswork, Intuition,

Episode 5

It's revealed that **both Shawn and Gus have been working on cases nonstop for a month, where some must have been tiring considering they were on them, which means that the police were unable to complete it.**
EE,

He also seemingly is friends with several of the officers working on the case. **After observing McNab, he was able to reason that he gained wedding weight off of just five pounds gained. He was also able to bluff to him that he brought Lassiter coffee to calm him down by taking Gus's coffee.**
Bluffing, Memory, Observation, Influence,

Case Outline

A case where multiple people who had depression or stress in common have committed suicide after calling the same help line. Shawn finds the first body while walking on the sidewalk with Gus, the second inside of a car.

While at a crime scene that was listed as a suicide, one of the Forensics team opens the fridge, in which **Shawn finds a marinating steak inside of it. From this, Shawn is able to immediately conclude that this was a murder and not a suicide due to the fact the steak was being marinated for a future meal. Shawn was able to recall information from a bit ago while distracted.**
WMI, Focused Thinking, Deductive Reasoning, Logical Reasoning, Observation,

Was able to notice that the door latch was still intact from several metres away, which wouldn't make sense if you're going to kill yourself, so this helps prove his theory. After observing greased footprints left on the ground, **he immediately does his usual psychic stuff, allowing him to tell them all the information he knows.** While being escorted out, he was immediately able to think of getting information out of the cat which gives them an in on the case.
PSI, Acting Skills, Linear Thinking, Holistic Thinking, Divergent Thinking, Observation, Abductive Reasoning

For some reason, **he knows that statistically, people are far less likely to kill themselves in a warmer climate unless they were in Vladivostok. He uses this to prove a point to Gus.**
Knowledge,

Using the knowledge given to him by McNab, he was able to use the cat and tell Lassiter that taking three creams and four sugars is dangerous, which is a heart attack waiting to happen, **which impresses Detective O'Hara. He was also able to observe words on the windscreen and make it out immediately, where he immediately lets the cat into the car to distract them.**
PSI, VSI, EF, Sophistry, Tactics,

He was also able to abduct that he would've swung by the dry cleaners and grabbed the pantsuit first before killing himself is kinda weird, and uses the cat to tell him it and was able to cold read that **she doesn't look like the type to listen to heavy metal with her floral pattern clothing. He also seemingly has enough influence on both Lassiter and O'Hara that Lassiter whispers to her to check out the dry cleaning.**
Social Skills, Psychological Insight, Cold Reading, Linear Thinking, Abductive Reasoning, Logical Reasoning, Influence,

While driving the car, **Shawn grabbed the newspaper Gus handed to him, read the newspaper in seconds and then fling it back to him. He memorised her face and read that she made a big break in Santa Barbara, which is really odd to kill herself after that.**
PSI, VCI, WMI, EU, Holistic Thinking, Multi Tasking

While talking to Julia, he was able to "channel" the cat who's channelling Gloria Starks, where after he gets both Lassiter and Julia in the room, he shows them the newspaper of Gloria.
VCI, Direct Manipulation, Acting Skills, Tactics, Adaptability,

Shawn was able to design an entire evidence board with a pen and mirror of the full case of everything he knows of thus far. Using the knowledge his dad gave him while he was still a kid, he uses it to find a clue in one of the first dead person's places and talk to his brother, who was roommates with him and is getting rid of the apartment.
VSI, WMI, Crystallized Intelligence, Non-Linear Thinking, Holistic Thinking, Knowledge,

Shawn's strategy to talk to the first dead person's brother was to rent the house that he was getting rid of. He did this in order to not get him on guard and if he knows they're investigating, he'll clam up, as well as to get more information out of him. He was also able to immediately recognize the letter of a phone bill, where he steals it and finds a stress line. He tells Julia via his psychic powers to run the victim's phone records.
VSI, EU, Acting Skills, Short Term Strategy, Strategy Effectiveness, Strategy Efficiency, Tactics,

He also reasoned that everyone who called the help line committed suicide. He was able to reason that Gloria only called it since she was stressed about an audition, and later, is found dead, which is very unhelpful. He intuits that the killer is the one killing them and making it look like suicide.
Deductive Reasoning, Logical Reasoning, Intuition,

In just a few seconds, Shawn was able to tell a guy was a poet by glancing at a book he was reading and his eye bags.
PSI, Cold Reading,

Shawn's overall strategy and plan to find the stress hotline killer goes something along the lines of:
-Shawn's first strategy to talk to the first dead person's brother was to rent the house that he was getting rid of. He called him previously before going over to the house. He did this in order to not get him on guard and if he knows they're investigating, he'll clam up, as well as to get more information out of him.
-Later, Shawn rents a sign in the office of the stress line to gather information. Shawn has Gus call the stress line and pretend to be depressed while he goes down the hall to see who is the one answering the call. He finds Rory being the one who put suicidal thoughts into their head.
-After getting the Hiltonbock's receiver where he finds McNab as the next victim, he calls the chief and informs them.

Short Term Strategy, Strategy Efficiency, Strategy Effectiveness, Strategy Resilience, Planning Intricacies, Planning Aim, Planning Versatility,

Shawn was able to calm Gus down from being angry that he couldn't call the police to have Rory arrested.
EF,

Later, Shawn is suspicious of Hiltonbock, the guy who's been fixing the phone lines outside. His reason is:
Premise 1: **Because the deaths coincide with the day as the days Hiltonbock had been servicing.**
Premise 2: **He remembers that a guy from the phone company found one of the bodies, and he confirms it when he goes outside with Gus to check the power pole outside.**
Premise 3: When Gus steps on one of the power pole's spikes, **he observes that his shoe is greasy. He also remembers that the first shoe print found in the first victim's house was greasy, and immediately he makes the connection.**
Conclusion: **Hiltonbock is the most likely person to be the killer, as everything coincides with Hiltonbock being at the epicentre of it.**
They find a receiver which Hilton had been using to listen to suicide hotlines. Shawn is able to check the last number on the receiver to find his next victim and its McNab.
PSI, WMI, Associative Thinking, Convergent Thinking, Critical Thinking, Analogical Reasoning, Inductive Reasoning, Abductive Reasoning, Logical Reasoning,

Shawn was able to psychoanalyse Hiltonbock and make him even more stressed after visualising all of the events that have occurred thus far. He was able to intuit that Hiltonbock killed everyone because his brother was weak, and he wanted to track them all down and kill them. To catch Hiltonbock, **he forced all his attention on Lassiter by praising him** and later, had the cat attack him from behind.
VSI, WMI, VCI, EF, EM, Direct Manipulation, Bluffing, Acting Skills, Psychological Analysis, Cold Reading, Tactics,

Episode 6

Knows Newton's Third Law as a kid.
Knowledge,

Also still a kid, **Shawn was able to deduce that his dad took a shortcut to find a rocket based on the amount of dirt on his trousers that he observed after he looked around and found a road nearby.**

Deductive Reasoning, Logical Reasoning, Observation, Hot Reading,

Case Outline

While Shawn and Gus were watching the rehearsal reenactment of the Civil War from afar with some snacks, the actor of Captain Quantrill was tragically shot from behind with dozens of people at the scene.

After someone opened the door to leave the Evidence Room, **Shawn was quickly able to observe the bullet hole where the person was shot at, both front and back. Shawn then uses this information to do his psychic act acting as if he was shot exactly through his heart and intuits that it wasn't an accident.**
PSI, WMI, VSI, Acting Skills, Linear Thinking, Tactics, Intuition,

Later in a meeting, Shawn is able to get involved with the case by doing one of his psychic acts and knows that the victim died by a gunshot wound to his heart after taking a quick glance at his uniform.
EF, Hot Reading, Tactics, Acting Skills

Shawn is able to visualise the Battlefield board at the meeting and recreates it for his purpose, [comparison between
The two] and earlier he's able to recall a name from Lasstiers board of suspects despite only glancing at It For a few seconds.
VSI, WMI, Short Term Memory

Episode 7

Psych's Guide to Crime Fighting for the Totally Unqualified

Obviously, since Shawn is the one writing the book. I'm not gonna be adding any VCI/Linguistic Intel below, since this covers them all.
VCI, Linguistic Intelligence, Creativity,

It's described that being a psychic detective is like being Morrissey, people love you and look to you for guidance and solutions, hanging on your every word and "admiring your twee English manner."
Charisma, Social Skills, Aura,

Was able to think of calling yourself a detective isn't enough—you need essential tools: an office, a sign, and more. But even with those, solving a case takes you to the next level and compares it to being like a shoe salesman- even with no sales is still a shoe salesman, a detective becomes more legitimate after solving cases.
Associative Thinking, Divergent Thinking, Analogical Thinking, Decompositional Thinking, Analogical Reasoning,

Has enough influence that his word was able to get printed and sold by the newspaper for immediate release. His influence is later described to allow them to never market themselves.
Influence,

Was able to decompose the types of successful detective personalities into six specific types from studies into neurological processes, each one having their own attitude and methodology. These being: The Hangdog, the Old Guy, the Other Dude, the Hack, Liam Neeson and the Pinkerton.
EU, Psychological Insight, Psychological Analysis, Psychological Profiling, Interpersonal Intelligence, Divergent Thinking,

Is able to calculate the neighbourhood's criminal activity rate and knows of several ways of doing so, but in this book, he gives us the ones that official law enforcement agencies use the most. **One of the things there is a mustache factor. He is also able to understand the average criminal's line of thinking and predict what they're going to steal.**
EU, Crystallized Intelligence, Logical-Mathematical Intelligence, Intuition, Knowledge, Prediction,

Is able to visualise and tell what an office needs in order to make it look "bitchin'", such as: a secret compartment under the floorboards, a cryogenically frozen head, a live zebonkey or grolar bear as a mascot, a helicopter pad and several more things.

VSI, Naturalistic Intelligence, Knowledge,

Is able to differentiate between guaranteed and nonguaranteed incomes and is easily able to explain them and even make a chart on it. This also extended to tax deductible and non-tax deductible expenses and dependants and charitable donations, where he was able to connect it to like taking your girlfriend out to dinner for tax deductible and a Christmas present for non-tax deductible and ALSO make a chart on that.
Logical-Mathematical Intelligence, Associative Thinking, Divergent Thinking, Analogical Thinking, Analogical Reasoning, Knowledge,

Is able to frame the sidekick's role to be… well, at your side and breaks down the qualities and uses of a sidekick, comparing them to several tools and animals. He also deconstructs and attributes the skills of them. He is also able to build a Venn diagram that presents several amazing sidekicks of the greatest detectives, and frames Gus as the best out of all of them.
VSI, Conceptual Thinking, Analytical Thinking, Decompositional Thinking, Holistic Thinking, Analogical Reasoning, Abstract Reasoning,

The first 48 seconds of entering a crime scene makes it or breaks it if the case goes to you or someone else. **This means that Shawn does this, quite literally, every single time as he creatively describes everything about it so this should give him some decent people skills.**
Social Skills, Social Awareness,

Shawn encourages using a dishevelled look to lower expectations on you and draws comparisons between looking shabby and achieving credibility in detective work. He also reflects on the social impact of appearances, like how smoking enhances perception and makes a chart on what and what not to wear to go to a crime scene.
VSI, EU, EF, Analogical Thinking, Creative Thinking, Reflective Thinking, Analogical Reasoning, Abstract Reasoning, Logical Reasoning,

Understands that you can tell a lot about someone by the way they walk, so he encourages them to lead with your chest, have a pelvis-led walk, be ready to be approached and have a set of clearly ambiguous responses- so basically, have confidence and be mysterious and get close to the body before anyone figures out you're talking nonsense and by proving you're the smartest in the room, you're basically indispensable. **Shawn does this through his psychic visions and stuff.** By waiting a few minutes and police making observations, he usually says something **that demonstrates his power of observation and out-of-the-box thinking, leaving him room to conduct more observations.** He's also a Batman fan so that garners him a few points I think.
EU, EM, EP, EE, EF, Misdirection, Sophistry, Acting Skills,

Shawn is able to take a glance at a neighbourhood and instantly spot the truth underlying it. He is also able to observe people's footprints and determine what the person was doing by the details in them.
PSI, EP, Seeing through People, Intuition, Observation,

Is able to bring snacks and drinks into crime scenes by disguising them, and subtly suggest it to them, such as: by carrying around a beaker of hot chip dip (which coincidentally looks like ground up stomach lining), ask an officer to run a DNA test on them before stopping them, dip a chip in it and eat it before describing the victim and walking away. **He has eaten entire lunches this way and also made an entire chart of foods that look like several parts of the body. He must have done this several times so that he's able to confidently do this and write about it.**
Creative Thinking, Analogical Thinking, Decompositional Thinking, Analogical Reasoning, Abstract Reasoning, Inductive Reasoning, Logical Reasoning, Logical Manipulation, Fabrication, Concealment, Tactics,

He describes that a professional detective has many tools in his arsenal, such as: going undercover, **analysing shoe clues, creating disguises** etc. He should be able to do all of these things.
Misdirection, Acting Skills, Disguises, Observation, Knowledge,

Suggests the importance of having a car, due to its many uses to a detective and that no one would take a car-less detective seriously and **is able to make a graph of cars vs crime rates and is knowledgeable on several cars and their uses to sleuths.**
VSI, EU, Crystallized Intelligence, Psychological Insight, Planning Intricacies, Knowledge,

(im not continuing this specific part this is pissing me off, just dm me on discord (maskoftheruler) and ill send u an epub of this book (or any other psych book))

A Mind is a Terrible Thing to Read

Henry describes Shawn's intelligence that it'd be easy for him to skate through his adolescence without ever accomplishing anything.
Statements,

Was able to avoid painting and cleaning the garage by having Gus do so while Shawn bikes to see the great white shark caught in Santa Barbara. He also tricked Henry into believing Gus was Shawn, however, Shawn was caught coming back so it failed. To do this, **Shawn manipulated Gus by telling him that if**

he went, he could describe the shark to him in such detail it would be like he saw it himself, but if Gus went, all he could say was that it was white and great.
EF, Direct Manipulation, Indirect Manipulation, Misdirection, Persuasion, Strategy Effectiveness,

Him and Gus are able to go undercover as plumbers, pizza drivers and piano tuners to question other suspects.
Acting Skills,

When the woman came into Psych, **Shawn psychically pretends that there was a murder** and after a bit, **was able to understand her emotions and engage with them that it was someone who she loved deeply taken away from her and she was blamed for it. This is impressive, given that it's stated that it's been years since anyone understood her. Then, he does his psychic act and gets a wedding with a man much, much older than her and that his name was Oliver and she was Veronica and then overviews the entire story. He did this after quickly skimming through the entire story in a sexy magazine and using that.**
PSI, WMI, EU, EP, EF, Social Awareness, Direct Manipulation, Acting Skills, Holistic Thinking, Non-Linear Thinking, Deductive Reasoning, Logical Reasoning, Intuition,

Shawn deduces that she was unlikely to be the killer given that she could've easily waited for him to pass from old age, given that he was several decades older than her and makes the most sense. Later, it's shown that he was right.
Psychological Insight, Critical Thinking, Deductive Reasoning, Abductive Reasoning, Logical Reasoning, Intuition,
