Field skills countering

CHP 1: OLD TESTAMENT BOOKS

In the first chronological order of the series we know that Gabriel got exiled from heaven due to tricking Adam and eve unfortunately this feat isn't that special as they most likely had the same knowledge as humans
(Bluffing,lying,logical manipulation)

Next timeline wise we have a large skip to the time of Noah where we see Gabriel saying to Noah “Noah, You have disobeyed my orders you will be punished”
And then it's revealed that an alternate was on the boat
(Emotional manipulation)

NEW TESTAMENT BOOKS

Next we have another time skip to the time of Jesus Christ (lol)
And we cut to him telling Mary that he is an angel of the lord and
He has come to help to help her and that she would give birth to the son of god
Remember he has to perfectly conceal his emotions because he is still scared of judgement (EF,EE,EM) (Perhaps abductive reasoning but “I know what you dread”statement is very speculative)

Just in case his statement of “I know what you love I know what you dread” gives him high abductive reasoning as he had to reason thousands of peoples fears and him saying “I have fooled them should indicate him misdirecting them or lying to them about that he was an angel

(Lying,misdirection,acting skills,abductive reasoning, inductive reasoning?, abstract reasoning)

In-depth analysis of this feat

Gabriel had to perfectly imitate an angel without god finding out that he was doing all of this majorly boosting his adversity feats and EM as he's pulling this off absolutely perfectly without any error

(Composure,cognitive discipline,stress management)

Next feat point is that his misdirection must be insane to do this now there are no certain population estimates for biblical Nazareth but if we assume it was even a thousand people which is quite low considering a decent amount of people lived there Gabriel had not only abduced their worst fears in a short span of time and misdirect them from god too in the span of 33 years this can also apply to his planning due to him mapping out thousands of ways and methods to achieve these vastly improving his FSIQ and planning with this feat

Another small point my stupid ass forgot to elaborate on is his feat of trapping Jesus in the tomb but then again I'll get to that during the speculative/non canon feats part as there is no definitive proof about this feat from any deleted statements or online content of MC

CHP 3: AWAKENING

Gabriel wakes up as a tulpa in Mandela mostly likely feining for em kids (lol)
Now we know that canonically his first victim is Mark now we flash to a time skip which reports over 2k kids have been kidnapped from their home
Now for you to understand how good of an EU+EP feat this is I want you to imagine that someone's personality is like a unique fingerprint and let's be honest we all know little cousin Timmy cry's at getting his iPad taken away now Gabriel nearly perfectly presented himself as the best interpretation according to their personality without one child making so much as a reaction other than one this level of EP is insane literally appeasing to 2000 kids in the timespan of 3 weeks or less is insanity only Mark knew about the existence of Gabriel and that's what alerted the MCPD in the first place if mark hadn't drew “the man in the wall Gabe wouldve never been detected
(EU,EP,Trap evasion)

Now real quick quiz my children what is Gabriel powered on

A) Fear
B) Fear
C) Fear
D) Fear

if you choose either you're correct Gabriel is powered on fear now you may be wondering what this has to do with the doc
Perfect Gabriel during the child assessment test arc voluntarily decides to scare both the parents as the next part of the plan
What is this plan?

His plan was to first take away most of the children to cause maximum amount of despair within the community as to inflict maximum fear when he eventually decides to start the alternate killing spree this way all emergency services would be overloaded due to people already commiting suicide this way he could prevent any heroic wannabe cops (subtle foreshadowing) from stopping him in anyway
Because he knew that human nature is to protect themselves and again he was right about it the department refused to help anyone with an alternate encounter which solidifies his feats in this
(random interruption that video scared my sociopathic tendencies having ass so hard :sob:)
(EF,EU, deductive reasoning, abductive reasoning,mass manipulation,bluffing,Planning coverage, planning intricacies, planning contingencies)

In-depth analysis of this feat

First of all the amount of EU+EP as i've said would've been insane to begin with but it's amplified after you realize it was 3000 kids not 2000 and the fact he did this after waking up from his slumber in ancient Rome helps it even more

Next the second part is hopefully self explanatory and set in stone so it shouldn't need any elaboration

CHP 4: OH NO MARK!

Now the first part is heavily debated that if this alternate was Gabriel himself or a separate entity in the first place but since it's mostly considered separately we'll say it's an independent alternate not Gabe himself

Gabriel now sent this alternate to psychologically break Mark heathcliff he knew that as soon as “ceaser” called Mark to check his security cameras and turn them on Gabriel predicted that Mark would do this without hesitation because he's already dealt with tulpa Gabriel so he wouldn't want his friend going through it either he knew that the alternate would then follow Mark home leaving him stuck inside now there were three outcomes after this
1 Mark commits suicide
2 He goes mad with fear
3 He prays and makes Gabriel stronger

Low and behold Gabriel predicted all three would happen. There are three major points here one he knew Mark's trauma would lead him to help second he knew his religious beliefs would allow easier access points third he was Gabriel's first victim hence making him a high priority target this way Gabe was actively destroying his only weak link and providing himself the best access points so when Mark was at his weakest revealing by praying Mark was actively powering him which he knew would make him even weaker at the same time he ordered the alternate to break in making sure there was no chance of escape anymore

(Planning intricacies,planning coverage, planning aim,planning contingencies, emotional manipulation, indirect manipulation, logical manipulation, deduction reasoning, inductive

reasoning,cold reading,psychoanalysis,psychological warfare,Anticipation,prediction,EU,EP,EF)

After this monster of a feat by Gabriel we can finally tone it down a bit in volume 2
Not really but you get it

We see Adam Murray and Jonah Marshall venture into a house-sitting gag which was called in by a woman who had been convinced that her cat's spirit was still alive freaking out Jonah but Adam easily brushed it off as a hoax or delusion but then we see the brilliancy in Gabriel's involvement here he knew that due to Adam's cocky nature despite his partner's desperate requests he would decide to stay in the home and go down to the basement which is why she was told to hire these two Gabriel knew because of their histories it'd lead them into this specific job his plan was after hearing all the freaky stuff in the house Jonah a superstitious person would instantly try to run without Adam which Gabriel took advantage of and had the alternate crash the car and while that happened he knew that despite his message writing "NOTHING IS WORTH THE RISK" this would play into Adam's ego even more leading him to go downstairs and let's just say that didn't go very well on his part and no witnesses would be left

(Fabrication,concealment,logical manipulation, indirect manipulation, emotional manipulation, inductive reasoning, deductive reasoning, abstract reasoning?,EE,EU,EP,Anticipation, psychoanalysis, psychological warfare,cold reading,planning forecasting, planning coverage, planning intricacies)

IN-DEPTH ANALYSIS

From now the analysis will be coloured to avoid confusion in this piece
The most impressive thing about this is how rapid Gabe's learning was here despite not having any technological contact ever he managed to easily pick up in-depth knowledge of frequencies gadgets and their different uses not to mention he has most of the county visualized in his brain at any moment hence how he guides the alternates into perfect positioning without even being their and also knows in-depth stuff about the infrastructure of the entire county
(VSI,WMI,PSI,crystilized,LA,GK)

Also quick intermission the Adam Murray thing actually happens ages later as I'll explain in the next part

CHP 5: FOLLOW YOUR RULES LIEUTENANT

In volume 333/3 we see the starting conversation between Jude and Lynn Murray who are confirmed to be Adam's parents as shown in the letter in volume 4
Here we see an absolutely brutal EE and EF feat
After learning about the fact that Jude was going to be visiting the house Gabe sends and alternate to said house during said time
You may be wondering northy how the fuck are you sure this was planned?

Simple there is no reason for an alternate to show up at such a random time hell alternates are more shown to attack people by themselves not groups solidifying my statement
This way Gabe knows that Jude's call would reach Thatcher someone who's not scared of breaking the announcements rules for others safety hence him and Ruth going to the Murray residence he knew that despite Thatcher's best efforts the alternate would most likely kill Ruth first and he also knew/predicted? That Thatcher would be extremely guilty about this to the point of 2 years after the incident the timeline isn't very clear so this is subject to change later depending on interpretations but just know the low ball is 2 years the high ball is 17 years
Gabriel literally analyzed and facilitated nearly all of Thatcher's actions based on this to the point of that he also analyzed that when Dave would call him at his weakest just to break him even further all to finally get rid of him as Gabriel actually said himself “I'll go after your police friend next, He seems soo weak”
Speaking of Dave…

(EE,EF,emotional manipulation, logical manipulation, indirect manipulation,planning coverage, psychological warfare, psychoanalysis, psychological profiling,cold reading,Anticipation)

Next one the chopping block is our friendly tech friend Dave Lee
We see again why Gabe's top categories are EI, planning, deception and foresight
(Reasoning to but that's not included in this feat well technically everything Gabe did does require inductive and deductive reasoning)
Gabriel now hits another home run this time using inductive reasoning misdirection concealment foresight and a bunch of planning categories im not willing to list RN

After gaining knowledge of the fact that Dave is actively helping thatcher Gabe thought the best course of action would be to eliminate Dave now it's common knowledge that due to the lack of citizens in Mandela his shop would go out of business now it's time to show why I haven't mentioned that many manipulation feats yet he starts targeting this via acting as his friend O'Brien calling him about an offer about going to the church which he knew that eventually Dave would have to comply with due to the business going bankrupt hence setting it up perfectly to get rid of Thatcher's only Intel source effectively double checking two problems off the list and when Dave arrives let's say his brain wasn't in a good condition…

(Emotional manipulation,indirect manipulation,direct manipulation,acting skills,perception,observation, psychological profiling,cold reading,EM,EU,EF)

After this we have the Jude Murray attack but just know it's not anything special
Yes im rushing because I want to get to a specific thing but in short he breaks Jude over his guilt of Adam supposed death
(Not colouring this part idc)

(Emotional manipulation,indirect manipulation,direct manipulation,bluffing, abductive reasoning)

After this we see the fact that Adam tried to commit suicide now as we see the intruder/Gabriel plays the same frequency used for both Lynn's and Jude's screams same thing in vol 2 to use Adam as a mindless puppet subservient to listen to whatever Gabriel orders him to do as we see in vol 2 4 and 5

This is also the same volume where we see the clearer image of thatchers own PTSD as we can see that he clearly has developed PTSD as he portrays symptoms verified from many sources

Ladies and gentlemen I present to you one of the greatest plans in the history of scd I present to you

THE FALL OF HEAVEN (TFOH)

THIS PLAN INCLUDES EVERYTHING YOU'VE READ TILL NOW PLUS MORE LET'S START EXPLAINING IT

the first chronological order of the series we know that Gabriel got exiled from heaven due to tricking Adam and eve unfortunately this feat isn't that special as they most likely had the same knowledge as humans
Next timeline wise we have a large skip to the time of Noah where we see Gabriel saying to Noah "Noah, You have disobeyed my orders you will be punished"
And then it's revealed that an alternate was on the boat Next we have another time skip to the time of Jesus Christ (lol)
And we cut to him telling Mary that he is an angel of the lord and
He has come to help to help her and that she would give birth to the son of god
Remember he has to perfectly conceal his emotions because he is still scared of judgement
Just in case his statement of "I know what you love I know what you dread" gives him high abductive reasoning as he had to reason thousands of peoples fears and him saying "I have fooled them should indicate him misdirecting them or lying to them about that he was an angel Gabriel had to perfectly imitate an angel without god finding out that he was doing all of this majorly boosting his adversity feats and EM as he's pulling this off absolutely perfectly without any error his misdirection must be insane to do this now there are no certain population estimates for biblical Nazareth but if we assume it was even a thousand people which is quite low considering a decent amount of people lived there Gabriel had not only abduced their worst fears in a short span of time and misdirect them from god too in the span of 33 years this can also apply to his planning due to him mapping out thousands of ways and methods to achieve these vastly improving his FSIQ and planning with this feat
2000 years later Gabriel wakes up as a tulpa in Mandela mostly likely feining for em kids (lol)
Now we know that canonically his first victim is Mark now we flash to a time skip which reports over 2k kids have been kidnapped from their home Now for you to understand how good of an EU+EP feat this is I want you to imagine that someone's personality is like a unique fingerprint and let's be honest we all know little cousin Timmy cry's at getting his iPad taken away now Gabriel nearly perfectly presented himself as the best interpretation according to their personality without one child making so much as a reaction other than one this level of EP is insane literally appeasing to 2000 kids in the timespan of 3 weeks or less is insanity only Mark knew about the existence of Gabriel and that's what alerted the MCPD in the first place if mark hadn't drew "the man in the wall Gabe wouldve never been detected

Gabriel now sent an alternate to psychologically break Mark heathcliff he knew that as soon as “ceaser” called Mark to check his security cameras and turn them on Gabriel predicted that Mark would do this without hesitation because he's already dealt with tulpa Gabriel so he wouldn't want his friend going through it either he knew that the alternate would then follow Mark home leaving him stuck inside now there were three outcomes after this
1 Mark commits suicide
2 He goes mad with fear
3 He prays and makes Gabriel stronger

Low and behold Gabriel predicted all three would happen. There are three major points here one he knew Mark's trauma would lead him to help second he knew his religious beliefs would allow easier access points third he was Gabriel's first victim hence making him a high priority target this way Gabe was actively destroying his only weak link and providing himself the best access points so when Mark was at his weakest revealing by praying Mark was actively powering him which he knew would make him even weaker at the same time he ordered the alternate to break in making sure there was no chance of escape anymore
Next in the plan he sends an alternate to the Murray residence to make sure that Lynn is dead and Jude runs away here in the video we see that Jude's only wish was for his son to be safe more on that later
Next he deceives both Thatcher and Ruth both shown to be smart by the way and using audio lures and clues to lure them to a specific place to kill Ruth to misdirect Thatcher after his alternate encounter
next we have a time skip for 17 years
Which even after Gabriel manipulation of Thatcher has worked he's still trying to follow Gabe's idea which he has implanted in Thatcher for revenge on the alternates as he knows that Thatcher is too weak to do so but he misdirected him into believing that this is possible using his own emotional judgement
it's kinda canonically clear that Mandela is just a giant trap which Thatcher thinks is still real meaning Gabriel is misdirecting nearly 2000 people into believing the same thing
After gaining knowledge of the fact that Dave is actively helping thatcher Gabe thought the best course of action would be to eliminate Dave now it's common knowledge that due to the lack of citizens in Mandela his shop would go out of business because of this Gabe starts targeting this via acting as his friend O'Brien calling him about an offer about going to the church which he knew that eventually Dave would have to comply with due to the business going bankrupt hence setting it up perfectly to get rid of Thatcher's only Intel source effectively double checking two problems off the list and when Dave arrives let's say his brain wasn't in a good condition… destroying any evidence which was left
back to Jude after his death is supposed to symbolize the shepherd he wished for his son to be safe in which Gabriel manipulates him promising him of this but it turns out Adam himself is an alternate deceiving everyone around Adams social circle this way Gabe can gather more Intel on the survivors to finally kill them it's been shown that Adam has been in close relation to his entire school this means Gabe was misdirecting again UpTo 200 people in the school and again using thatcher and Adam using Thatcher's own obsession to keep Adam alive as a tool for Gabriel to keep using all while keeping Thatcher in his own delusion
And that my friends is Gabe's entire plan remember he did the first part in a few weeks and the second part in a few days it's also a fact that Gabriel literally analyzed and facilitated all of Thatcher's actions to his interest

(PSI(overthrown feats),NCPS,LA,GK,EU,EP,EF,EE,EM, social skills,S.Integration,S.Cognition,social awareness,composure,cognitive discipline,adaptability,perception,emotional manipulation,indirect manipulation,direct manipulation,logical manipulation,mass manipulation,acting skills,bluffing,lying,fabrication,concealment, gaslighting,strategy vision,strategy forecasting,strategy shielding,strategy execution,planning coverage,planning intricacies,planning contingencies,planning aim,planning forecasting,deductive reasoning,inductive reasoning,abductive reasoning,associative thinking,lateral thinking,divergent thinking, metacognition, critical thinking,pattern recognition,connecting the dots,risk assessment,anticipation,prediction, psychological profiling, psychological warfare,psychoanalysis,cold reading,trap evasion,trap setting,info gathering,unpredictability,influence, resistances,willingness to act)

Let's clear up why some of these cats are here
Strategy cats: it's just been proven that Gabriel can execute protect and forecast his strategies multiple times such as the 17 years time skip and the kidnappings strat and even the police panic strat can be included.
Pattern recognition: it's been shown already that in the previous feats specifically the Thatcher and Adam meeting and the mark heathcliff attack that he's very effective at this specifically the former.
Risk assessment: actually very efficient at this being able to instantly recognize threats like Adam and Mark but also assessing clear points.
Unpredictability: his actions are the peak of unpredictability as his movements can't be tracked without tech and he constantly changes his plans to throw people off track
Influence: it's not that wild to assume that he has a wide range of influence on the county if not the state and this is growing exponentially so it can reach a very large magnitude.
Resistances: in any crossverse match up he's literally near impossible to counter as he's literally not able to be tracked and his influence grants him multiple layers of resistances to avoid any counters from high tiers like baku or RJ.
Willingness to act: he's shown to not be afraid to act Incase if he needs to to prioritize his own safety.
Psychology cats: it's very clear that Gabe has shown that he's very good at all psychology cats especially cold reading and psychological warfare his literal kill method is making people commit suicide so he's not exactly lack in this department

Let's start clearing up smaller stuff and some small feats

The Mandela prophet applying to Gabe is kind of an argument with a lot of holes it's actually more likely to be anyone else such as Thatcher,Adam or Dave

Small unknown feats:

In the game alternate watch he can switch extremely small details and even look at them from your perspective to ensure your loss this is shown and has scans all you need to do is just play the game I think it's on steam or something I don't really fucking remember (Observation,perception)

Due to being the biblical devil it's clear he knows the bible better than any theologian priest or other person and has way better comprehensive ability of it and can also speak every human language this is proven because when the angels talked to people in John and the disciples proved that it wasn't due to being drunk or any other factors these were angels
No I won't be debating anyone theologically on this because Mandela catalogue as a series is based off the bible so this can't be disproven
(VCI,WMI)

Managed to visualize every house he intruded to kidnap the child to avoid detection (this one is debunkable as it's scans were deleted) reminder that everything else does have scans only this argument is unscanned because kister deleted it due to certain allegations I don't want to get into
(VSI,PSI)

Is a very good leader and has great social intelligence as a whole in all interpretations such as when he arrives as the antichrist (already has) he will flawlessly be able to communicate with anyone and have amazing social skills
(SI)

Will deceive all of humanity during the end times this was already proven I. Revelation hence I don't really need to prove my sources for this one
(Acting skills, fabrication, concealment,lying)

Has insane psychological expertise and has shown to be more psychologically intelligent than many psychiatrists as they had to study to make a specific sound pattern just to craft a way to get children to react where as Gabriel utilized the same thing and created it on the fly this shows a much more effective psychological prowess than anything else that has been shown on screen also it's shown that alternates can't react to this test as we see in the report that Adam didn't react to it so we can assume that this only affects humans which boosts this even further
(Psychological profiling,psychoanalysis,psychological warfare,cold reading)

COGNITIVE BOOSTS: it was brought to my attention Gabriel lacks cognitive abilities hence why im writing this
VCI:
Knows complex verses to their core and exact emotional responses on where to use them as well as knowing every language on earth
VSI:
Knows the entire county of Mandelas infrastructure as we see him effortlessly able to control his alternates through the county
WMI:
Memorized all holy scriptures and other religious texts as well as he managed to preserve hundreds of memories of different eras as we see in the bible cartoon tapes
PSI:
Understood thousands of outcomes in a very short timespan during the uprising of Thatcher and the Jude attack as well as during the entrapment of Jesus

Cognition:
Despite having no real contact in 17 years with a human he managed to instantly understand how to trick Dave with specific dialogues
KA:
Has thousands of knowledge reserves and can near instantly use them to his advantage as we saw in both vol 1&4
GK:
Knows nearly all of human subjects such as history geography and other such subjects with ease
Fluid intelligence:
Managed to find hundreds of outcomes during the police uprising and found an exact way to neutralize the threats

And that my friends was the Gabriel doc short but very effective for his scaling
This can go into much more detail but that would be way to long for anyone to stay engaged if you have any questions feel free to ask in either have a nice day and if you have any contentions I can update the doc for your understanding but normally just ask on YT or disc because the people who review this and proofread it are humans too and also have better stuff to do then a read a scd doc for a demon angel.
