KAITO CORBEAU PLAN ANALYSIS.

Made by : Nox

Source : Magic Kaito 1412 episode 23 and 24.

Introduction.

So the reason for making this analysis was because when I was scaling Kaito for my Kaito DOC I saw that the plan of Corbeaus was good and when he explained Corbeau's plan I thought it was a good planning feat and had a lot of potential for Corbeau as an SCD character and the plan was even better than some of Kaito's plan too. I didn't take scans for most of corbeaus's plan as I did not intend to make an analysis so I have only Kaito's scans of him explaining the plan and some information when I watched the episode. Also since the lack of evidence on this topic I will not be taking Kaito Corbeau as Touichi Kuroba, if I had taken him as Touichi then he'll have some great feats.

So The Plan is divided into two episodes episode 23 and 24 , 24 is where we get the explanation, 23 is when we are shown the plan , So I'll divide them into Part 1: The Midnight Black Crow and Part 2: The Clash Of The Century.

Part 1: The Midnight Black Crow

So basically Kaitou Corbeau said that he could steal the jewel without even touching it. (It was part of the bet and etc).

Heist :

Security :
1.It was very cold inside the room , so that they could paralyse Corbeau.

2. There were many officers in that room.

3. There was Harry Nezumu too.

4.Nakamori was sitting on the case where the jewel was secured.

Stealing :

• After the time on notice , feathers were coming through the vents , which was the signature of Corbeau

• After the ending of the feathers , we see that the diamond is stolen out of the case with Corbeau's coin.

• No one entered the room no one went close to the case.

• Corbeau said in the back of the coin that he'll be back for the real one , as Harry Nezumu replaced the real with the fake one.

Why this feat stands out.

1.Used feathers to misdirect everyone's attention.

2.All this was done in the duration when the feathers were released.

3.Planned all the security (Harry Nezumu was Corbeau).

(The reason for not including the other things is because Harry Nezumu is actually the disguised Corbeau)

Part 2: The Clash Of The Century

Here we get the explanation of the plan , so basically he did the same thing as yesterday but in here some things were different.

1.So firstly Corbeau misdirected everyone's attention by firstly using feathers , then he coloured the real diamond by using a black marker to block out the shine of the diamond so that people will think it's fake.

2. He took the real diamond out of the case and replaced it with simple ice , dyed with blank ink and carved into the shape of the diamond. Then he planted a gold coin inside the Ice, so when the ih heater inside the petal would melt the ice in an instant.

3.There was a Black cloth in the case so no one would notice the melted black liquid stain , and Corbeau wore black gloves so no one would see the ink on his fingers from touching the black ice.

4.The floor was kept at -10 degrees so the Balck ice he bought would retain the shape.

5.Harry Nezumu (disguised Corbeau) was actually a magician. And exposed Magician's Tricks and all and helped in assisting this security plan and to stop Corbeau and Kaito Kid, But in actuality Harry Nezumu was a disguised Corbeau , which would mean that , everything he did until now was for this heist only.

6. Then when the black organisation (?) or the magic Kaito organisation, started to attack them , the cooling system was already on , which means that Corbeau anticipated that they will come to steal the jewel.

(Anticipation, EE , Motivation, Misdirection, Disguise Mastery, See through people , Strategy Complexity, Strategy length, Knowledge , VCI (Corbeau did most of his heists in Las Vegas) ,

Scans
