Scene Set: Murphy Lawden being performed by Murphy Lawden aka scp 3143 is called in for an investigation on scp 3043. Murphy has to neutralize this scoundrel of an scp while keeping the narrative intact, but enough with the petaphysics meandering, I'm not a pencil pusher, let's start the show. (This play is directed and written by Murphy himself, that handsome devil)

Fade In:
"A bent cigarette rests between his lips, his name is Murphy Lawsen and he is ready to give anyone a bit of the business" (Experience, Tenacity, BIQ)

Murphy is immediately described as charming and experienced: "He's hard handsome with the sort of face you could use to smash up concrete then dust off and still take home to show your Ma" (Charisma)

Murphy is our narrator, thus the whole thing is written by him, presumably in real time. (PSI, Fast thinking, Linguistic intelligence, Fluid Intelligence, Crystalized intelligence, VCI)

He delves into more of his background:"you see a lot of ugly in this line of work, good people with bellies full of lead enough to bleed out in rain, soaked alleyways, love ruined, turned inside out until it just becomes an angry festering sore" (Experience, EE,Calmness,Mental Fortitude, Perseverance)

This part is especially enticing:"Statues that will kill you as fast as you blink." Humans blink in 1/10th of a second or 100 milliseconds; Murphy here is talking about his own experiences, thus he must experience this on the daily, meaning

his reaction time must be faster than 1/10th of a second, much faster in fact. The average reaction time is 250 milliseconds, the average in healthy teens/adults is 180-200 milliseconds, and possibly 160 milliseconds for healthy male teens (light stimuli). Anything below 100 milliseconds is presumably super human reaction time, something not possible by a human, so Murphy has super human reaction time and decision making.
(PSI, Faster thinking, decision making)
(Studies on it:https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4456887/, https://www.sciencedirect.com/topics/nursing-and-health-professions/simple-reaction-time#:~:text=The%20fastest%20(simple)%20reaction%20time,in%20which%20human%20beings%20evolved.)

Murphy then gets a visit from an scp sight researcher. Murphy instantly observes that she's in her 40's.
(Observation)

The doctor then questions why she's in Murphy's office, Murphy stating that she wasn't the first women to say those lines to him.
(Charisma, Seduction)

Murphy calls her "tutz", she is displeased with such a name and points it out, the kind Murphy obviously complying with her demands of not calling her that.
(Social awareness, Empathy)

Murphy quickly notices her name badge.
(Observation, Perception)

Murphy says he'll take the case despite how dangerous it is and how much he hates the foundation. He also has an icy stare that could kill anyone.
(Aura, Tenacity, Empathy)

Murphy doesn't wear a seatbelt while driving
(Tenacity, experience)

Murphy expresses that the doctor is smart, too smart, based off pure cold reading.
(Cold reading)

The doctor says how she lost her memories at the foundation and remembers blacking out, Murphy makes the deduction that the doctor stumbled on something she wasn't supposed to.
(Deduction, deductive reasoning)

“If site 95 sas the rotting corpse, site direct August was the worms wriggling inside of it’s corrupted core”
(VCI)

Murphy expresses Augusts influence over the facility
(Info Gathering)

The doctor tells Murphy that the anomaly he!s facing

Murphy notices that 3 of the 4 windows are are framed glass windows (August's office).
(Observation)

Murphy tells us that August has a heart of steel and that he’d a brilliant man
(Hkt Reading, Profiling)

“When dealing with site director August you didn’t try to bluff”
(Profiling, Hot Reading)

Murphy still tries bluffing to August. Saying something along the lines of “when does the foundation carr about classifying safe anomalies”, the bluff didn’t work however.
(Bluffing, deception)

Murphy notices August smiling and immediately gets a bad feeling about it, saying that a man like August probably only does this when he has already won.
(Hot Reading, Intuition)

Murphy quickly dispatches the two guardsmen next to August as they had tried to attack him. Murphy stays calm and cool the whole time.
(Faster Thinking, BIQ, EM)

Murphy soon realizes that something isn’t right (after noticing that August was threatened by him and yet the situation felt at ease). He quickly deduces that sco 3043 was making Murphy take the blame for threatening the professor.
(Deduction)

Murphy mentions how he “has nothing to lose”
(EE, ER)

Murphy deduces that the typewriter is SCP 3043 due to the doctor mentioning that the last thing she remembered hearing was a typing noise. Then he deduces that he made both the doctor and professor act the way they did. He also deduces that the typewriter was trying to conceal itself as safe when it actually wasn’t.
(Deduction)

SCP 3043 tried manipulating Murphy by using his hero complex to convince Murphy to not kill it, Murphy denies being a hero and simply says “I’m no hero I’m Murphy Lawden” (rough paraphrase).
(Manipulation resistance, ER, Self Awareness)

Fade Out: Murphy’s best categories are his experience, EQ, and deduction/reasoning. Overall this article is semi-useful in determining Murphy’s full outsmarting capabilities.
