Hello ^_^!!!!! My name is chilpalendo. I will be creating a document on proving how Goku is Outerversal. Now, this is one of the shortest and easiest scale to understand so yeah. Let's start!

Goku Scale:

(I): All contradictions are false in all possible worlds.

(II): Anything that's conceivable, imaginable, and non-contradictory is logically possible.

(III): Classical logic is defined as a set of principles and methods of inference or valid reasoning.

(IV): Principle of Sufficient Reasoning (PSR) is tautological and is true in all interpretations.

C1: Given the prior data, all of this infers Classical Logic being true.

(V): Any abstraction that's aspatial and atemporal and beyond dimensions would have qualitative Outerversal existence level.

(VI): Every configuration of spatiotemporality would have to always compose space and time and there is no instance where one can exist without the other that as they are a duality.

(VII): If it is the case that there is no concept of time within the Otherworld then no concept of space must also follow to not exist within the Otherworld.

(VIII): If the Otherworld transcends dimensions then it can't be 0D, and must be beyond dimensionality as its abstract edifice.

(IX): Anything that has Outerversal existence would have qualitatively superior to all dimensionality lacking the concept of space and time and anything that's has Outerversal Attack Potency can affect all dimensionality significantly.

(X): It is the case that the Otherworld is abstract and transcends dimensions without contradictions and it's consistent in the narrative given the data.

C2: The Otherworld has Outerversal existence.

(XI): Goku's clash with Beerus was able to shake the entirety of the Universe 7 Macrocosm which would include the Otherworld.

(XII): If the collision of two punches has been able to affect Universal quantification of everything in the timeline then one of the punches would be equivalent to the timeline.

(XIII): Since one of the punches is going to be equivalent to the universe then the Attack Potency must be affective to the timeline.

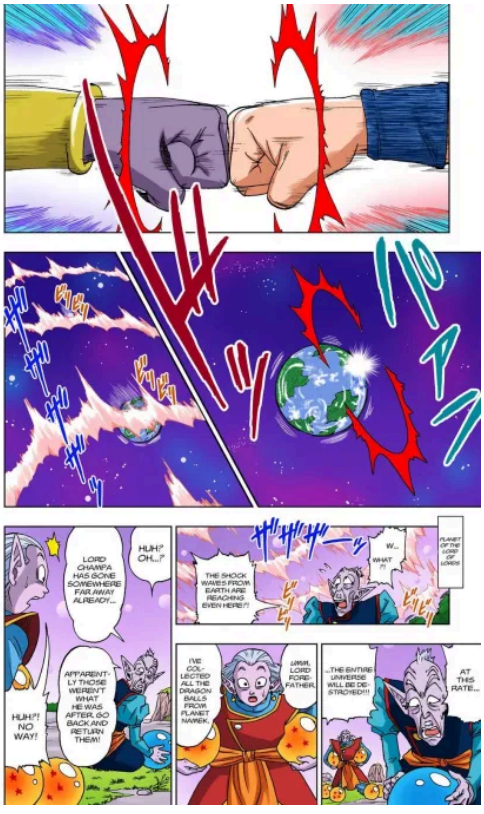

C3: Goku is Outerversal.
