OZYMANDIAS
DOC

Series: DC comics

Created by: Banesmanifold

Editor: VanDaGoat

(***Intelligence terms from here.)***

Red: FSIQ & FSEQ

Cornflower Blue: Strategy + Planning

Green: Reasoning + Thinking

Purple: Deception + Manipulation

White: The Story

Light Green: FSSQ + Psychology

Orange: Foresight (Prediction and/or Anticipation)

Pink: Crystallized/Fluid/ = General Intelligence + Academic Intelligence, Knowledge, and Multi-Tasking

Gray: Elaboration

Dark Blue: Info-Gathering/Control, Perception, Seeing Through People, Trap Evasion, Setting Traps, Decision-Making, Influence, Intuition, Problem-Solving, Creativity, Observation, Cold Reading, Hot Reading, and Connecting the dots.

BEFORE WATCHMEN: OZYMANDIAS

Before I start with this I want to clarify, like the bane doc, Ozymandias also has Eidetic Memory. However unlike bane, Ozymandias takes it to the extreme, so extreme to the point where I'm gonna dedicate everything to his knowledge and his plan in Watchmen(just a warning, this will likely be one of the only feats mentioned in watchmen, since he doesn't have much)

Ozymandias never forgets.

Sometimes confused with Genius Level Intellect and known as "photographic memory", Eidetic Memory is a term used to describe the ability of some characters to mentally recall anything and everything a character has ever been allowed to remember over the course of their entire lives. This can extend further and beyond the scopes of reality's memory as a character like Brainiac, or those like the Gods of Rome, may transcend their memory. For human characters like Batman or Oracle, they can simply remember everything they ever learned.

After Ozymandias quickly intimidates a thug so that he can gain information on an underground drug facility, he quickly heads to a ball where he knows the people will be. He doesn't want himself to be tracked in this room however, so to make sure he doesn't, he makes it so his eyes seem perfectly still, when in reality he's scanning the entire room to check even the slightest detail as to where the boss is, as he knows a thug will be given a letter. He knew how they were gonna act, trying to be as unseen as possible, which is why Ozymndias does this in the first place. After he sees the letter and sees the man leave, Ozymandias circled the place 3 times and went after the thug. He didn't want to be seen so he stayed exactly 55 feet away from the thug. After locating where the base is he suits up and gets ready to take them down.

Abductive Reasoning, Social Skills Observation Non-Verbal Deception, Camouflage, Convergent Thinking, Divergent Thinking)

Ozymandias makes a very quick and short plan when he infiltrates the place. In fact we know he does it exactly when he gets in as right then and there he observes EVERY possibility that could happen in this instance. Quickly making a plan that is full proof and removes every single possibility that could lead to even having a chance of lowering his chances of winning. So he takes the full proof route that will lead to his success 100%. This plan consists of him mostly blitzing everyone to the point where they fire where he isn't, but we do get an interesting part at the end. After throwing his headband with pinpoint accuracy, he makes sure to perfectly throw people into where it would benefit him. One person he throws causes cocaine to drop on the ground, which Ozymandias knows would create a gas that would not only cause people to go blind, however would also cause people to struggle breathing. Making them susceptible and completely unaware of anything that could happen. It's revealed here that he has actually trained to a point where he doesn't need to breathe to keep his body functioning. He uses this exact skill to get the hand over everyone in the facility. He gets a gun pointed at him by the boss, who he directly insults and makes fun of for not shooting the bullet. Just to further push his ego, which leads to a Klieg Light to slam into the back of the bosses head, which he perfectly planned by throwing his headband earlier. The cops come and Ozymandias quickly leaves, knowing this will surely impact everyone and will want them to have more of him.

Ozymandias Confronts Comedian. The Comedian tries to off guard Ozy by shooting him, he however hears the machine gun go off before the bullets are fired which he instinctively jumps out of the way and throws a Trash Can top at the machine gun. Keep in mind, he never knew exactly where he was. So he uses the machine guns sounds as a way to perfectly figure out where he is. We see them have a head on confrontation, where it's revealed Ozymandias actually caught a bullet. He caught it specifically for this moment so that he could reverse the bullet and make it Break the Comedians gun. He does this by looking at his pointer finger and having instinct carry him all the way through. At this moment he knows that The Comedian will be blinded, he sprints into action and puts all of his body weight into his one attack so he can get a grip on The Comedian. Ozymandias demonstrates his perfect memory and knowledge of the human body, and he can put pressure on an exact body part if he wants to, not needing to apply it everywhere. He quickly adapts to being slammed to the ground by taking a bite out of the Comedians Cigar and spitting it into the Comedians Face. After this they have a 1v1 fight where they are evenly matched, but Ozymandias decides to lose. But why? Because he used this fight as a way to get an analysis on The Comedian. As a way to understand how he fights, acts and behaves.

Going through the book, we understand that Ozymandias is the only person in the world to truly understand Rorschach's and Dr Manhattan to the fullest extent. Which is impressive considering that even by master psychologists he's described as "unpredictable" and "unreadable." Dr Manhattan also blatantly admits that Ozymandias is the only person in the entire world that can understand Dr Manhattan perfectly. He also understands everyone else's thought process, everyone else who was on the team of course. It's been proven in before watchmen as well that he's been driving them all to psychological insanity. (EQU Psychological Insight Psychological Manipulation)

Hey guys, quick note and thanks for anyone who has read this far. This doc will not be going over his feats in doomsday clock. Yes they are extremely impressive, however not

only right now do I not feel like analyzing them, I do not usually add every feat of a character in my docs, as I want you guys to also study them yourself instead of just getting all the information from me. This doc along with other ones after this will mainly be about hyping up the character rather then fully scaling them. Of course if you want me to do that, just ask me in DMs. However I rambled on for long enough. While I only mentioned 4 feats prior, this feat will truly blow most of your minds. Get ready for Ozymandias's official plan and what has led up to it.

WATCHMEN(along with before watchmen ozymandias and before watchmen Dr Manhattan)

This plan is extraordinarily comprehensive, extending over several months. Ozymandias crafted it with meticulous precision, drawing on concepts from a wide array of science fiction media he has encountered, as well as his ability to foresee future events. He has meticulously analyzed and eliminated every potential scenario that could lead to failure, distilling his strategy into a single, foolproof plan guaranteed to succeed.

Ozymandias's Manipulation on Dr Manhattan:

Before Watchmen: Dr Manhattan we get to know this. As a god and as a man with such complex emotions he can't really express them to anyone because they wouldn't understand it. Which is why he went to Ozymandias, who perfectly understands Dr Manhattans thought process and moral dilemma. As he continues on with the story, Ozymandias gets a feel of how to use Dr Manhattan as a helper. Dr Manhattan knows this, and asks for his help. While Ozymandias agrees and explains how he is gonna help him, he doesn't need nukes, only Dr Manhattan. With Ozymandias inducing his view and his ideas on Dr Manhattan and how nice Ozy has been, Dr Manhattan agrees with everything. Always following Ozymandias, even if Ozymandias is the weaker human being. Hell, he manipulates him so much to the point where if he wanted to, he could just manipulate his ability to see into the future.

Ozymandias's Manipulation on Rorschach:

This is the section where I get to go over the people who believe Rorschach is somehow equal to Rorschach, no he is not. We see his first manipulation tactic when Rorschach goes to see Ozymandias. Rorschach trusts Ozymandias and believes he is the smartest. So because of this trust, Ozymandias is able to misdirect Rorschach, he starts by having the idea that The Comedian was killed by a Soviet due to him being a nazi. Which Rorschach intently doesn't believe due to The Comedians dedication to his country. After this fails he resorts using the fact that he is retired to make Rorschach leave. When truly, Ozymandias was the one who killed The Comedian all along. To where Rorschach humbly leaves. The 2nd time this happens is when Rorschach goes to see Edgar, Ozymandias is aware of Rorschach visiting Edgar for information on The comedian, so Ozymandias shoots Edgar in the head. When Rorschach comes back, he sees this bullet hole and the police outside. While Rorschach is strong, he's not able to overcome the police. Which allows him to be arrested and for Ozymandias to gain more time.

Overall Plan

This might get a bit confusing, so I'll start with the overall goal and then explain further.

What is Ozymandias trying to achieve? Simple: World peace. To do this, he needs to end the global pandemic and stop constant wars, so you might be wondering about his solution? He blows up most of New York which forces himself to endure the pain and suffering of the millions who die in the incident.

How does he do this? With the help of Dr. Manhattan, whose immense power is well-known; he's essentially the "Superman" of the Watchmen universe. Ozymandias uses Dr. Manhattan's power to carry out his plan but ensures that Dr. Manhattan isn't blamed. Instead, he convinces the world that aliens were responsible for the attack.

Here's the shocking part: Remember how I said he eliminated every possible way his plan could fail? That was when he was still a hero. He retired as a hero in 1975, according to the DC Wiki, and Watchmen takes place in 1985. This means Ozymandias spent 10 years—an entire decade—planning and predicting every move, manipulating everyone's actions to make his plan work. And he did all this inspired by science fiction media.

To convince Rorschach and Owl that his ideology was the right way to go, he made it possible, but not too easy, for them to find his hideout. This way, he could confront them and explain his plan. He always knew Rorschach wouldn't agree and would rather die, while he expected the others to go along with it. In the end, Dr. Manhattan leaves, and everyone else lives a happier life.

So, that's Ozymandias' full plan, explained to a point where its understandable, but not fully explained but a bit, as we'll have doc solely on Otz plan, but It's still pretty insane when you think about it.

(ALL FSIQ Indexes EVERY EQ category, Social Awareness, Self Regulation, Charisma, Relationship Management, Conflict Resolution, all Reasoning categories, all thinking categories, all planning categories except versatility, all strategy categories, all manipulation categories, all deception categories, all foresight, all psychology categories, decision making)

For now this will be the end of the doc, please contact bane on discord for more info on otz. We will make another doc focused only on Ozy Plan. Future edits will be made on this doc if necessary. Thank you for reading 🙏.
