L: Change The World

Made by: Tik-Tok: @kingdod69 Discord: Emperor Lelouch Instagram: go.diegoo.go27

(THIS WILL BE AFTER PAGE 38)

“The other was a pile of cell phones. Scrawled on the backs of each were the names of heads of state, directors of intelligence agencies, as well as the names of religious leaders, CEOs of global corpora-tions, and mob bosses, all of whom essentially had a hand in running the world. These phones were L's personal hotlines.”(Pg.38,17-2 Job) CTW L has world wide influence through the government, Company CEO’s, Religious leaders, and criminal organizations/mobs/gangs.

(World Wide Influence)

“As he picked up yet another new cell phone between his fingers, L spoke fluently in Italian, French, and English, working to resolve the unsolved cases compiled by Watari.”(Pg. 39, 17-2 Job) He is fluent in at minimum 4 languages as he also knows Japanese as shown in the Manga

(Verbal Comprehension Index<VCI>, language Proficiency)

“Every so often, L's hand reached instead for the sweets tower, and the smiling panda-shaped cookies made one final march before disappearing into L's mouth. With each case solved, L tossed the case file along with a cell phone in a trash bin marked DONE.”(Pg. 39, 17-2 Job) Solves multiple crime cases in one sitting, and these cases aren’t just some simple ones as he only solves cases that have 10 or more victims or have $1,000,000 or more at stake, and some of these are related to the President of the United States.

(Processing Speed Index<PSI> Cognitive Proficiency Index<CPI>, General Ability Index<GAI>, Detective Reasoning, Analysis, Complex Analysis, Analyzing Speed)

“Soon the piles of snacks and cell phones were gone. Only the cell phone marked "President of the United States" was spared the trash bin and stuffed in L's pocket.”(Pg. 39, 17-2 Job) He can call the President of the United States, who is the most powerful man in the world, at anytime and anywhere.

(Influence)

“Then he got to work accessing the internal networks of the world's intelligence agencies. Using multiple servers as springboards, he exploited a vulnerability to enter each system, used a dummy password, counteracted a hacker trap with a mirror trap, and masked the source while eliminating any trace of unauthorized activity.”(Pg. 40, 17-2 Job) He was hacking the servers of

some of the most powerful servers in the the world and he was doing it with multiple computers at the same time

(Perceptual Organization Index<POI>, Processing Speed Index<PSI>, Total Reading Index<TRI>, Multi Tasking, Attention Switching)

“and the likelihood that Nikaido was in trouble, and calculated the overall rate of danger. "Eighty-three percent probability…’"

He’s doing calculations

(Probability Reasoning)

“For a moment L observed Kujo looking troubled by the strict security, then turned on the microphone.” (???) He was observing Kujo and realized at first glance she was part of the terrorist organization and that she will betray them

(Observation Skills, Perception, Emotional Perception<EQP>, Cold Reading)

"Either using the virus is the goal, or they're thinking of selling it for a profit." He was able deduce that the Bio-Weapon was there goal, and use Induction to conclude that they needed it to sell it or actually use it

(Observation, Deductive Reasoning, Inductive Reasoning)

"That's hardly necessary. You have no assurances that the data I gave you is real, and yet, you won't be able to analyze its authenticity right away. Even if it were real, I would never hand over the data without making a copy for myself, in which case..." He’s using Psychological warfare to make doubt in the minds of the terrorist and overall make them believe that they can’t trust the data with 100% certainty

(Psychological Warfare, Though Induction, Manipulation, Cold Reading)

“Just as L had known all along, the group was not composed of hardcore terrorists, as evidenced by their awkwardness with handling weapons. Their attention had been caught by the falling bomb, and every one of them was looking directly at it when it went off.

Armed as they were, they were unable to shoot for fear of shooting one of their own. L had known the best strategy against a group of armed amateurs was to confuse them”(Page 73) He was able to observe that they were inexperienced, when it came to firearms and quickly made a strategy to combat that

(Processing Speed Index<PSI>, Working Memory Index<WMI>, Cognitive Proficiency Index<CPI>, Defensive Strategy)

“Maki bit her lip and stared at the mark on her arm. And L stared at her as if reading her emotional barometer…You don't know how it feels to lose your mother and father and be all alone."

"Yes, I do." He took out a picture of Watari he'd carried with him since his mentor's death.”I'm an orphan too.”(Page 75) He was able to perceive and understand her emotional as well has himself

(Emotional Perception, Emotional Understanding)

“any hidden programs, but there's one program blocking access to the data that's posing a problem."

"Meaning what?"

It's asking for a password, but if you type in the wrong one, all the data gets deleted.” (Page 79) He had a contingency Plan in case they did get the data, he also memorized the data before hand and hand a second chip

(Contingency Planning)

“In fact, none of the Blue Ship, including Kujo, noticed the listening device stuck to the window.” (Page 79)He was able to put a tracker on them without anyone noticing he did

(Deception, Concealment)

เ

กระ

"That transmitter was a dummy. The real one is in there." L pointed to Suruga's stomach.

"Huh? My stomach?! Hey, you didn't..."

Before they had gone to Yellow Box warehouse, Suruga had complained of stomach pains from drinking too much of the sweet coffee, for which L had given him a pill.

"I put a transmitter in a non-dissolving capsule. You should probably do something to expel it later."

So making me drink that coffee was all part of the plan, Suruga thought, rubbing his stomach.” (Page 85) He saw right through her and made another contingency plan when she did betray him

(Seeing Through People, Contingency Planning, Observation, Cold Reading)

He had

For a minute, L stared down at his broken watch. His usual expressionless face gave way to a sad smile.

"My only friend once told me... that I knew nothing of the real world, having locked myself inside a room. Which is precisely why I'd like to complete this mission without depending on any of the organized agencies. But this is just my selfish desire. If you wish to leave, Mr. Suruga, now is your chance."(Page 89) He understands why someone wouldn’t want to risk there lives for something like this, also he’s doing thistle without any influence or anything supporting him

(Intrapersonal: Emotional Understanding)

“battle with Kira." said in his usual monotone. " have eleven more days to live. It's the very same length of time you have:

Maki's eyes widened. "Aren't you afraid to die? I am. I'm terrified." Maki shook her head as if to shake off the fear. "Why are you rying to save me and the world when you only have days to live

yourself?"

I will continue to do what I must until the very last moment.That's all."(Page 93) He understands himself and what he needs to do not just for himself but for others

(Interpersonal: Emotional Understanding<EQU>, Self Awareness)

"Those are the same words..." Maki thought she saw her father in L's profile. "It's what my father used to say all the time. He used to say never to lose sight of what you have to do, no matter what troubles come your way. He used to worry if what he was doing was really helping people. But as long as there were people suffering and dying, he told me that somebody had to do the job."

"He sounds like an extraordinary man."

Maki nodded shyly.”(Page 93) He knows what to say in this situation

(Social Intuition, Social Interaction, Sociability)

“The Metropolitan Police Department, Ministry of Health, Labour, and Welfare, each of the regional police departments. All of the information being accessed was from internal confidential files closed to the general public. One after the next, the man typed away on each of the screens.”(Page 100) L is memorizing all of the information from all of these organizations and typing it down and with a cup of very sugary coffee and mid way through he does it with one hand

(Processing Speed Index<PSI>, Working Memory Index<WMI>, Cognitive Proficiency<CPI>, Total Reading Index<TRI>)

“When L and Maki burst through the door, they were quickly intercepted by the other police officer waiting outside. L caught his leg on the chain roping off the parking lot and fell. As he started to get up, he kicked up his legs and hit the policeman squarely in the jaw, sending him head over heels on the ground with a wild capoeira move.”(Page 102) He was able to think quickly in a stressful situation, also he’s insanely strong

(Quick Thinking, Stress Tolerance)

“L paid no mind as he picked out an electrically assisted bicycle, undid the combination lock without any problem”(Page 102) A standard Bicycle Lock has 4 numbers which is 10,000 different combinations and he was able to solve it quickly
(Analyzing Speed, Processing Speed Index<PSI>, Probability Thinking)

"I've completed the modifications. Hop on back." The bicycle slid forward carrying the two of them and quickly picked up speed.
"What did you do to modify.. w-whoa! No bicycle should be this fast!" Maki held on to L's waist and gasped for air.
"I made a modification to the motor control board by adjusting torque so that the bicycle thinks it's continually going uphill. Now I don't even have to pedal."(Page 103) He was able to modify a electric bike
(Mechanical Engineering, Mechanical Intelligence, Digital Intelligence)

“While Blue Ship might have been regarded as a terrorist group, its members were nothing more than amateurs. With the sudden darkness and emergency alarm, they froze in panic. And because most of the members had cleared out thanks to L's plan, there was no one to give orders.”(Page 107) Part of his plan was to separate the leaders from the followers to isolate and insight fear and confusion in them as they have no one to give them orders
(Short-Term Planning, Seeing Through People, Cold Reading)

“passenger seat, L began to type away on the laptop and hacked into the FBI system.”(Page 116) He hacked into the FBI’s system, and since the FBI has to change there system to make it harder to hack in the future, he was able to adapt to the new system, he’s also doing this while getting shot at.
(Digital Intelligence, Processing Speed Index<PSI>, Cognitive Proficiency Index<CPI>, Analyzing Speed, Fluid Reasoning Index<FRI>, adaptability, Composer, Mental Fortitude, Stress Tolerance, Persistence)

"Yes, I have a plan. Until then, keep going, honey," L said sug-gestively. He reapplied some lipstick and winked at Suruga again.”(Page 123) He was able to come up with a plan on the spot and his disguises are so good that even up close they fooled the police
(Plan formulating speed, Disguise Mastery)

"Mr. President? This is L," he said casually, as though talking to a friend. Then L declared, "You don't seem to be taking my threat seriously. Ten minutes from now, I will commit a murder using the Death Note. The victim will be the mob boss Rod Ross, currently incarcerated in Arizona State Penitentiary."
Lended the call and opened the Death Note. Holding the pencil precariously by the end, L wrote down the name:
—Rod Ross
will die of a heart attack July 23, 22:30.” (Page 125) The Blue Ship terrorist organization sent a threat to the president of the U.S and made the FBI involved, so in other to get them off there black he says he will kill a random prisoner, which does happen and reveals that he has the death note and can make the condition of the presidents death is that he orders nukes to other countries and causes WW3 “The President of the United States, David Hope, will die after launching nuclear missiles at London, Moscow, and Beijing, If I am attacked in any way I will assume that you gave the order and write your name in the Death.
Note."
(Short Term Planning, Adaptability, Creative Thinking, Cleverness, Planning, Threating Skills)

"Mr. President, this is a different L from the L who has been threatening you."
"A different L.... What do you mean?" The president looked to the others for an answer. The cabinet members assembled could only shake their heads and listen in on the conversation.

"Mr. President, you must be aware that L is not a single person,but an investigative group composed of multiple Ls.*
"Y-yes.
The amorphous Detective L. The rumors, speculation, and hypotheses about L's identity were endless." (Page 126-127) He makes up a lie that not only there's Multiple L's and one become evil and made the situation were it went from the FBI chasing L to the FBI protecting L
(Adaptability, Bluffing, Fabrication, Verbal Deception, Strategic Deception, Mass Deception)

"The president picked up the phone and was patched through to the director of the FBI. "Inform your agents on the L case that there has been a change in plans. Suspend the operation to eliminate L but continue to monitor his activities covertly. And eliminate anyone who tries to harm him."(Page 128) L was able to successfully come up with a strategy to not only stop being chased by the FBI, but for the FBI will defend them from the Blue Ship and The Japanese Government
(Quick Thinking, Short-Term Strategy, Planning Intricacies, Foresight)

"Now onto the next phase of our plan." L brought up meteorological data on the laptop and fumbled around in the truck for a long tarp. "It's my hot air balloon," he explained in the most bare-bones way.
So this was all a part of his plan too...Suruga watched L quickly put together a burner and assemble a black plastic gondola. The balloon had been delivered to Suruga while he was having the truck modified, and he had simply loaded the cargo into the truck without noting its sender or contents.
"The wind will shift west around midnight. We'll fly as close to Osaka as we can.
"I see; we'll be virtually undetectable flying in the dark. And by air, there won't be any fallen trees to worry about."
Suruga started to climb into the gondola when L stopped him.
"Mr. Suruga, this balloon is for two."
"You want me to stay behind?"
"Yes, we'll need the truck once we arrive in Osaka."(Page 128) Every little detail of this is all part of L's plan so he was able foresee that he will need a hot air balloon and prepared it beforehand so they can move around the city undetectable
(Planning Intricacies, Foresight, Cleverness)

"Maki's face was ashen when she returned from showering
"What's wrong, Maki?" L noticed the change almost immediately"(Page 131) L was able to notice Maki's change in emotions immediately
(Emotional Perception<EQP>, Observation)

“Gathering himself, L asked, "Professor Takahashi, I'm afraid I only have a layman's knowledge of immunology. Will you explain it to me?"(Page 132) In The beginning L had a below average knowledge in immunology(the study of the immune system) but within that same day, as he had to assist him, he went from being below average in immunology Knowledge(and Virologist as he has to make a cure to the virus not just study the immune system) to being at(best interpretation best in the entire world and worst interpretation best in Japan) immunologist and Virologist level, which takes around 40 years(using Guidio Kroemer as a fair reference, it took him 38 years from graduating and getting his MD in 1985 to being recognized as the best scientist in 2023)
(Fluid Reasoning Index<FRI>, Novel Complex Problem Solving<NCPS>)

"Are you telling me I not only need to synthesize the antidote myself, but that I have to put all our lives in jeopardy to do it?"(Page 135) They did indeed synthesize the antidote without proper equipment and in a unsafe environment
(Resourcefulness, Adaptability)

"Can't you find them yet?" Matoba snapped. Two days had passed since the information on the girl stopped coming in,”(Page 135) even though they had the exact location where they were and going, they still couldn’t find him for 2 days
(Misdirection, Concealment, Information Control)

"Unlike the warehouse, there's nowhere to escape this time."
A third ship altered course, churning up a huge wake as it cut across the sea lanes and blocked the Blue Ship vessels' course toward the cruiser. Before anyone could understand what was happening, the interceptor flooded the decks of the ships with blinding white light.
The interceptor's crew wore no military uniforms, but rather sunglasses and gauze masks. With a minimum of movement, the boat had succeeded in containing the two Blue Ship vessels and prevented them from getting any closer to the cruiser.
"These bastards are pros. Dammit! We can't get any closer!"
Yoshizawa said over the radio.
Kujo threw an arm over her eyes and squinted carefully. "Sunglasses and masks...to guard against the Death Note. The FBI is protecting L," Kujo said, astonished.
"What's happening, Kujo? I thought you manipulated the FBI into killing L."(Page 139-140) L was able to foresee that the synthesization would need to take place on water and that the blue ship terrorist organization would find them, and manipulated and deceived the FBI to defend them.
(Foresight, Predictions, Anticipation, Setting Traps, Trap Evasion)

"This player's batting average is .251, so the odds of his hitting a homerun every at-bat is about once every five thousand games.”(Page 140) He was able to calculate the batting average of a player and the odds of him getting a home run.

(Probability Reasoning, Analysis)

"Nothing." Despite having only two days left to live, L lifted his glass. "Professor Takahashi, let us make a toast."
"Right. To the completion of the antidote and to Maki's happiness."(Page 146) L was able to synthesize an antidote to a new virus with terrible equipment and laboratory, within 3 days
(Fluid Reasoning Index<FRI>, Adaptability, Novel Complex Problem Solving<NCPS>)

“But no one could truly understand L. How L did not and could not forget the faces of thousands of victims. Who could comprehend the man who had lived his life, and had to live confronting all of the lives ended prematurely, the tears of the grief-stricken survivors, the devaluing of life as a daily reality. How was it possible to measure the pain of such a man?”
(Page 151) No could understand him, and since he an extremely popular dude, that probably includes professional psychologist, L is able to remember all the thousands of faces of the victims cases he solved, and understands emotions so well he is able to perfectly understand psychopaths and sociopaths, and able to accurately scale how much emotional damage they have done to the victims.
(Emotional Understanding<EQU>, Psychological Complexity, Working Memory Index<WMI>)

"So let's have the Death Note. If you hesitate here, I'll have the girl killed," Yoshizawa said.
"I understand. I'll give you the notebook." L obediently held out a bag of potato chips. Suruga rolled his eyes over L's unconventional storage methods, and apparently Yoshizawa felt similarly as he took the bag suspiciously and pulled out the notebook.
"Now Detective, there are supposed to be two Death Notes according to you. Where is the other one?"
"That was a bluff. I burned the other Death Note."(Page 156) He Bluffed about the 2nd death note and is using acting skills as deception
(Bluffing, Acting Skills))
