L has the ability to manipulate the entire world police force with his influence, "the best detective". I could nominate FBI agents or the whole world of special forces to help, the special world here is Wendy and Albert. He also asked an entire country to use the notebook to test the 13-day law.

In Death Note's reading, Wendy has an amazingly good ability to bypass high-tech security systems and some of them are > L (i.e. L also has the ability to break in).

L is capable of robbery and pickpocketing quite well, he took Misa's phone without Raito and the others noticing, thereby breaking Raito's plan to use Misa's Shinigami eye to kill L, capture Misa because of the suspicion of being the second Kira, causing Raito to almost fall into a dead end.

At the age of 8, L was a bunch of young people who took any damage, also at the age of 8, L solved the crazy Wincheter bombing that happened, Preventing World War 3, around in During that time, L was able to increase Watari's stock by 20,000 times in just 2 years, as well as solve the murder case with no clues:

Operating the helicopter is only intuitive, not trained.

By the time L confronted Beyond Birthday, he was in a position of intelligence equivalent to five local conventional investigations and seven news agencies. Identify the killer behind the entire Los Angeles serial murder case as BB.

(L. Lawliet)

*ability to zone kira

-As soon as consecutive heart attacks occurred, L appeared in front of the police through a computer and offered to broadcast a news bulletin to him in some of the areas he requested. Specific plans include:

+ after analyzing and examining the criminals that Kira killed, he noticed that there is a man who has the same way of dying. The news about this marriage is only broadcast in Japan => L locates Kira in Japan

+ Where is the question now? L at this time asked the police to broadcast a separate video of a person posing as L provoking Kira in each area of Japan. If Kira killed someone, => Kira is there. Not only that, L can also Find out how Kira commits crimes through this test

+ What kind of person should be chosen by L? L chose a death row inmate to pretend to be himself and have a name with many L's to make sure no one suspects that this name L is fake, and conceal this information in front of the media to avoid losing information. that this guy is fake

+but if kira doesn't kill, why not share 50/50? L now has an intuitive guess on how to kill Kira that he even kills the death row inmates even though they have been sentenced to death +

the fact that this fake L hand is tested is a death row inmate in a similar case to Kira's killing This is very likely (otherwise L could have asked someone to sacrifice for this, not necessarily a death row inmate, because they are anonymous but not criminals if Kira knows someone. If it's a crime without communication, this plan can fail.)

+ after fully set up, L chose the most crowded place, kanto, and luck for L kira to be far away from the net this time
=> L knows the ability to kill people and at the same time locates the victim. After that, L explained and attacked Kira to kill him with the purpose:

-prove that kira can kill someone who reveals their face or identity in the media
After seeing that I was not killed, I was able to find the following information:

-kira is in Japan

-He kills people without any difficult means or has to get close to the victim

-kira can't kill people that the media doesn't cover

-kira has the ability that he can kill people when he knows the victim's face
Wisdom feat (planning-deduction-strategy-prediction-psychological prediction)

*L's ability to reason and improvise after this challenge

-After knowing that Kira was in Japan, L based on the time of the crime and determined that Kira was a student at the same time, he asked the Japanese government to investigate how to publish news about crimes in Japan.

-after being poked by kira that killing time can be changed L deduced that there are 2 possibilities

1:kira is pretending to be a student and fooling

2: He can control the time of death because after the student's information is revealed and has not been published in any media, the criminal dies continuously 1 hour at a time, the time is very specific and not false=>may be relatives of investigators in the investigation team to arrest Kira. So L asked Watari to send a message to the US FBI and send someone to investigate individuals and families participating in the investigation. investigation of the kira . case
After that, a series of cs employees sent by L about how the broadcaster quit their jobs because they learned that the victims died from exposing their faces in the media => L came to the new conclusion that Kira could murder through the identity of the victim (actually in some other versions, L recognizes it through the name)

After that, a series of strange deaths
appeared with the name of Kira engraved on the wall with strange inscriptions. At this point, L had a speculation that maybe Kira was experimenting with crime to get something,

because in the end they all died of a heart attack => there is no need to let the victim die in such a strange way unless Kira is giving a message or an experiment.

So L makes a decision. decided to only announce the news that the victims died of a heart attack and no further announcement. The victim then continued to die and left behind strange messages that when put together it became a sentence saying 'you do you know the god of death'….L speculated that this might not just send a message, but kira might want to do a more specific test.

After the fbi died and the last message sent was 'L' do you know that the god of death eats me'=>kira throws a mist to let himself focus on the annoying information and ignores other actions of kira and at the same time learns that kira can actually control her behavior death of mask n times (score is even tie L locked kira h was locked by kira)

At this time, L knows that the other fbi died because he received the file of each other's face and background => not only the face but the name can also be something for Kira to kill the victim

At the same time, L began to question who was the first recipient, speculating as fbi raye who is the investigator who has the highest probability of being kira (1 person is the son of a deputy police officer and 1 is the son of the investigation team captain).) and all of a sudden it got loose, at the same time 12 fbi was leaked and died without his name
expressed wisdom (deduction, prediction)

*create a new team
But at this moment, L is not really in a hurry, he knows that the FBI is scared and runs away, so he can only rely on the Japanese police.

At this time, I have come up with a plan to draw the remaining members to my side, specifically the following steps:

+ L observed the situation and judged that most of the police here did not trust him because he did not know his identity and suspected he was Kira => he needed to reveal his identity to the wrong people. check left in this room

+ method: he waits when the cs team is tired of human resources when the other members have withdrawn almost only a few individuals, then L gives a message with the suggestion that he trusts them from the beginning so think about it meeting you and creating a special group to catch kira believe L and right at the text of the message L mentions the pair 'I trust everyone' as a link for the other people to think about the idea of creating a hidden group and have trust from each other => they may wonder if people who don't follow but also have followers because this is like a compromise L accepts to reveal their identities and the other policemen are vague and can be traps, but both have trust and information about each other

+ Then, when people agreed, he revealed that the hotel he was staying at was in the hotels that the Japanese government controlled => creating confidence for the others about creating this hidden team.
Expressive intelligence (strategy,eq ,psychological prediction)

*L's direction to catch kira

After having the investigation team L told them about the methods of murder and gave them fake names including himself to keep the group safe, L then deduced and reasoned about what happened. occur and localize:

+ imagine yourself Kira, through killing people immediately after the challenge to remove the criterion of killing only criminals worthy of death not only after hypothesized that kira in the murder kanto is only episode In the middle of the day, at the same time when fbi was murdered, the same thing happened, but Kira is not afraid to try to track him down, but Kira also responds to everything => Kira can be a quick, smart, loving person. selfish, always defending his ideals or what he does (note this generalization)
At the same time, he devised a strategy to spread the fire, and 1500 more agents around the world will come to help him catch Kira, with the aim of putting pressure on Kira that he doesn't really disturb the internals and has a lot of eyes and ears to share. come and catch him

+then L begins to make the first inferences after 12 fbi dies:

- on December 14, 12 fbi employees arrived on December 19, Kira started using his ability to test the ability to manipulate victims on prisoners => Kira noticed the presence of fbi employees in about 5 days, in order to kill people that Kira doesn't know the identity of, Kira has to test how much his ability to manipulate victims

- until 12/27 with the results of the Kira test being successful and having enough names and faces of these officers, then he sent the file to all of them before killing because Kira didn't want them to know From which employee did he get the information => Kira was in contact with at least 1 investigator

-from the 19th to the 27th, there were 23 different murders happening, most of the victims were only suspects and had a clear criminal record different from the usual victims of kira=>kira killed people to eliminate relationships The threat from fbi and killing 23 people to cover up a small number of victims is for obvious purposes not only from the tests until fbi broke from December 19 to 27 kira waited 8 days to let them have time to investigate more suspects, avoid exposing yourself
All of the above => Kira is highly likely to be among the individuals investigated by fbi between December 12 and 19.

-following that base the first person to receive the file was penber and his father told him about his death through the camera and L realized that he was being manipulated by Kira so he acted weirder than the other 12 people. L discovered small details like how he got on the 3.13 pm train with an envelope but then when he got out of the station he didn't hold it + and when he died he tried to look up at the train as if he wanted to look up at someone or something the camera can't capture=>there's a chance that envelope was a tool for kira to kill 12 agents and someone who could be kira was able to get it and stay on top that train
Following that, L received more news that penber's fiancée had disappeared strangely and was once a fbi working with L.

Right now, L has a big clue and a guess:

+ the penber couple stayed together at a hotel after penber died, Naomi also died but Naomi is a good spy she has the ability to track down Kira instead of killing herself and she is with the penber and knows Some things that kira doesn't know => there is a high chance that kira killed her to cover up the clues and those clues could be related to the penber or the penbers investigated =.>kira could be one of the suspects crimes that penber investigates That led L to decide to put hidden cameras all over the houses of the suspects to keep an eye on them

Wisdom is expressed (deduction ,logical reasoning, prediction,strategy)
*after the hidden camera plan failed, L created a new plan

After followed and didn't get much from the houses, L came up with a new idea through observation and noticed that a suspect as smart and as sharp as me is light yagami.

Step 1: L pretends to be a student with a bad name with a famous singer who is close to light during the opening ceremony and reveals himself to be L and invites light to join the investigation team. This attack has high damage. how come light aka kira.

-if kira thinks lawliet is really L, then kira can't kill because if so, light yagami will become the number 1 suspect more than half of L is using a singer's fake name if he writes that name, kira will unconsciously remember the mold that singer's face and accidentally killed it => light yagami will still become the number 1 suspect
-secondly, Kira will fall into a state that the person just introduced is the real L or not, creating a terrible pressure inside the person who is really Kira

=> 1 perfect manual move makes Kira confused and have to admire L's way and accept to play the game of real friends and fake friends with L

Step 2: L challenged Kira to play racquet and revealed himself to him, after light asked, L replied "don't worry, this information is useless about identity" which confirms that this game is not just a knife. It's true, but it's also just for verification. Because the identity of Kira L comes back as someone who doesn't accept defeat and will use all his strength to beat me, this leads to the person who fights with L if it's the real kira, he will have to gradually lose himself. should he lose or should he try to win because everything leads to doubt, not only that, if L's opponent is Kira, then after the game he can be on the lookout for L to take another step into making light leak information. but only Kira knows with his identity and invitation to join the investigation team, there's no reason why Kira can't take advantage of that against L => if Yagami Light accepts to join the investigation team, if he is the real Kira, it will be fine. giving kira a great advantage to fight L and at the same time knowing L's identity through a certain intermediary. The special thing is that both of them think like that and understand each other's thoughts, but both came to a different conclusion. Light decided to be the one to ask for the upper hand and L to be the one to pull light to ask to join the investigation team. But L was quicker to take the initiative to become the person. was asked before light by saying that he doubted light was kira

Step 3: L throws out the photo and the document is 4 traps

Trap 1: is a document to see if Kira has lost his temper and reveals an opening saying what those people get. Here, Kira has completely overcome this game and said that he doesn't know what to receive.

Trap 2: L gave 4 photos and numbered the bottom if light didn't recognize it and said it out loud, it could be revealed immediately. But light noticed the numbers and pretended the boss was wrong, right after that he I said based on the number and put it right and reread the answer L intentionally boss

Trap 3: is the main trap that L trap light: he gave 3 pictures and let the light arrange (and L's correct answer was wrong) L added a fake photo and asked for 4 pictures if Kira saw it If he changed his mind like crazy, he would reveal, Kira realized this and went along and said if there are only 3 then he is right while playing the role of the interrogator it is difficult for him to claim there are only 3 pictures. Believe me, what the innocent interrogator should usually say should be "so you're missing me?" or "what's the point in the picture then?" Over here, Light got confused and told himself that what L did was pointless and defended his point. even if you look at the number on the back of the paper, it's not in any order. ie maybe there is still leftovers, not just 3 pictures, L reminded light well about focusing too much on 3 main photos, light discovered that L traps himself through the saying "you focus too much on 3 pictures" and had to try to follow along and say that I see 3 so I'll treat it like 3 pictures. Trap 4 kicks for trap 3: L asked light if it was L what would you do to force the suspect light said "I'll ask him something that only Kira knows"

So let's go back to trap 3 L gives 4-card information (ie L gives information that kira only has 4 correct pictures) light says he will do the same as L but he will struggle if only 3 images deduce he is correct, While the truth is, only the questioner knows if it's right or wrong => accidentally light made himself somewhat like Kira but L assumes a person who always defends his ideal point of view and will do everything to prove it. proving himself right, and at the same time, light's intellect is as smart and sharp as Kira, he answers everything quickly and accurately as if knowing a culprit who knows the direction of investigation

=>L increase % light is kira up 3%

After that, L continued to say that he is not L, but only impersonated to find someone to investigate this, which affects a part of light's psychology when if it's not really L, how does this investigation help? and light cleverly and fiercely refused this, which made L more suspicious of light and day 1 matched the kira that L envisioned, which raised L's suspicions by 7%.

After that, L regretted that he would bring Light to meet his father to give him confidence about the investigation, light was surprised, but everything was cut off by a phone call telling his yagami father to be hospitalized for all the next plans L stopped but after talking in the hospital, light joined the team

=> both sides got what they needed

The wisdom of this feat (plan,strategy,eq,prediction,creativity,mind reader)
