PT-BR version

Description:

A young girl of average height with not very long blond hair and blue eyes, she almost always appears to show exaggerated emotions and has a charismatic and friendly personality. She wears simple clothes indoors but usually wears luxurious clothes when she goes to a special event.

IMPORTANT THINGS ABOUT THE STORY

Red9: terrorist organization led by Amelia Elliot Wilson and her 2 vice leaders that has control over more than 5,000 terrorist gangs around the world (Amelia does not lead this terrorist organization because she wants to, but because she has no choice, she needed to play the game of the goddess of death, there were several other avatars of the goddess like her and several others that were discarded because they lost the game, in the first moments of her life Amelia understood that she was nothing more than a mere cog that made the goddess game work normally, her emotions did not matter and the way she felt about all that did not matter, these were the main things that came to Amelia's mind when she remembered her current situation, Amelia never wanted to kill people, she does not care about humans, she does not hate them or love them, however thanks to the goddess game, she has to kill them) that have the ideology of killing all the "sinners" to achieve divine salvation, after confirmation coming from Index that the creator would destroy the universe (which is a lie, but there was no way for them to know that) several religions around the world collapsed, the god they admired and worshiped would in the future exterminate them, Red9 decided to sacrifice the sinners so that their lives would be spared.

Sinners: Billionaires, corrupt politicians or non-corrupt politicians (just the fact that they are politicians makes them sinners in Red9's view), international celebrities and criminals who no matter how minor their crimes were, will end up dead at the hands of Red9.

The Goddess Game: The goddess of death created both Emma and Amelia with the purpose of starting a game to entertain herself, since birth Amelia was granted knowledge about the goddess game, Index and her role in the game, she is the game's killer, also known as the mouse, while her sister, Emma, would have the role of detective, or the cat, unlike Amelia she will have no knowledge whatsoever about the goddess of death, about Index, about her role in the game of cat and mouse or even about the existence of this game. This game is very simple, the mouse, Amelia, will cause as much chaos as possible and establish herself as an important figure in the world of politics at the level of the president of a nation without her identity being discovered by the detective, while Emma has the role of discovering Amelia's identity as the

avatar of the goddess and causing her arrest through any creative means she deems appropriate, the game ends when Emma captures and uncovers the identity of the killer, or when Amelia achieves such a level of influence in both the political and social world that not even national law can reach her, thus making it impossible for Emma to win the game by arresting Amelia, the killer cannot kill the detective, if this rule is broken the game will restart from the beginning using manipulation of time and the whole process will occur again from the beginning, both the detective and the killer do not know each other's identity.

Index: robotic entity that has a shape similar to a hexagon with a screen in the center, its size is similar to that of a modern computer, the entity has a life of its own and was created by Elizabeth Watson Aurora, Index claims to be "omniscient", which is somewhat true, he receives his knowledge from the Aurora network and shares the knowledge stored in it with the police and the American government in search of discovering Doomsday's identity.

Aurora Network: is an existential plane that exists independently of time and space, it is a plane of existence completely inaccessible to any existing being, the reason for this is because the Aurora Network exists within the minds of the members of the Aurora family, as long as they believe in the existence of the Aurora Network it will continue to exist, even if its conceptualization is eradicated, the Aurora Network is a place full of infinite large bubbles the size of an adult man and within these bubbles, there is knowledge of the past, present, future and all things that exist, the Aurora Network also has a hierarchy system that decides the users of high priority and those that are less significant, orders coming from a user of higher priority than another user will be seen as priority, users of lower priority cannot withdraw or prohibit orders or commands made by those of higher priority, the Aurora Network has millions of functions such as organizing knowledge, create objects, living beings or food and erase any kind of limitations from it's user like hungry, negative emotions, emotional trauma and physical pain.

Ban system: in order to prevent her daughter's location from being discovered, which would put her at high risk, Elizabeth decided to create the ban system. Users at the top of the Aurora network hierarchy can ban access or ban Index from answering other people's questions or giving information specified by people at the top of the hierarchy, one of these people being Amelia Watson Aurora, who abused this system to commit her crimes and use Index to manipulate people and the American government.

FEATS AND STATEMENTS

(In chronological order)

(Narrative): if this sign is above one of the events mentioned in one of the 2 parts of the document by Amelia Elliot Wilson, this means that the events mentioned below this sign are not Amelia's feats at all, that is, they are used only to tell a bit of the story and to make statements without a process or logical evidence. Amelia's feats will not be buffed when the (Narrative) sign is above an event. Events with this sign are not advised to be ignored for the sake of a better

understanding of the story (unless you are only reading this document for the feats, if that is your case then you can ignore the parts with Narrative).

Documents used:
SCD categories 1
SCD categories 2

In the second document, categories such as: Cognition, Tactics, methods, adaptability, behavioral, judgment, resistant, psychological warfare and analysis will be completely ignored or won't be fully covered in this document

P.S: Most of the categories in this document are from the SCD categories 1 document, so it is recommended that the second document be used for most of the reading for a better understanding. For strategy and planning, the first document was used, so when reading a character's strategy, the second document should be used to follow along.

My interpretation of what is strategy:
A plan composed of Multiple tactics that can be both Long term or short term and has the sole purpose of achieving success or an advantage to the one who made the strategy.

My interpretation of what is planning:
A plan composed of Multiple strategies set at different moments to achieve a specific outcome or a plan made by indirect means without the direct intervention of the planner The Death note memory loss plan is a good example of this as Light just prepares everything for his planning and doesn't interfere directly in it after the start of the plan.

Amélia understood that her emotions didn't mattered to the goddess of death, she was merely a cog made to entertain her, if she died, the goddess would make another Amélia to entertain herself, if she win the game, the goddess will restart everything and make another game to continue entertaining herself, in the end, Amélia's existence was completely meaningless, she easily noticed this during her first day of birth.

(Existential intelligence, conceptual thinking, reflective thinking, abstract thinking, intrapersonal intelligence, self-awareness, Holistic thinking, abstract reasoning)

Amelia has 21 different musical instruments in her father Henry Elliott Wilson's mansion and Emma stated that Amelia learned to play all of them like a great professional in a single day.

(Musical intelligence, Learning ability)

—----------

When her parents were killed in front of her she showed no emotion, unlike her sister who developed a trauma and remembers what happened to her parents whenever she sees blood.

(Composure, emotional management, emotional self-regulation)

—----------

At age 11, Amelia learned to speak and write fluently in Russian, German, Turkish, French, Japanese, Chinese, Korean, Hebrew, Polish, Ukrainian, Italian, Spanish, Arabic, Dutch, Hindi and Latin in three days and she also knows how to use the slang of each one of these languages correctly, how did she do it you ask? Basically abusing the Aurora network as usual, she created a super dictionary containing all the words, slang and meanings of all the languages listed above and memorized them by looking at it once (She also knows how to speak Brazilian Portuguese because she was born there and 5 other languages, but since she already knew Portuguese and these other languages before deciding to learn to speak the languages mentioned above I didn't include them here and she also knew basic English), P.S: this is an achievement of the pre-accident Amélia, the current Amélia that we will follow in this doc is no longer capable of doing something like this in such a short time, for the current Amélia it would take two weeks to learn all these languages.

(Learning ability, PSI, WMI, CPI, VCI, Linguistic intelligence, knowledge)

—----------

Home invasion strategy:

Amélia had a friend named Charlie. Everyday she would leave the house without her father knowing and go play with her friend. One day she went to sleep at Charlie's house, but in the middle of the night she heard a noise coming from downstairs. She subtly opens the door to the room where she was and goes towards the stairs. At the end of the stairs she finds Charlie and her sister dead. Amelia saw an opportunity and told her that she would end up being arrested for having murdered her sister (which is not true, after all, she was just a child and didn't do it on purpose). The girl was very scared but was comforted by Amelia, who said she would help her. Emma held the body away from the house and now begins her strategy. Knowing the location of each camera in the place, she was able to avoid them all and simulated in her mind the movement of the 73 cameras that could see her for 30 minutes, in addition to their blind spot while she was carrying the corpse of a 17-year-old teenager 4 houses away from the place

where the crime occurred, being only 13 years old. Amelia instructed Charlie to set off some fireworks stolen from the neighbors to draw the attention of the locals away from the crime scene and prevent them from hearing the sound of the rock breaking the glass so she could enter the house. Upon entering the victim's boyfriend's house, she placed the corpse on the bed and killed the owner of the invaded house with a hammer, ensuring that his death would be instantaneous. Using the information given to her by the teenager Heather, that he didn't leave the house much unless it was very important and that even though she was his girlfriend he rarely answered her calls, she deduced that he was a lazy and sleepy person. So she predicted that he would be sleeping when Amelia broke into his house even with the noise of the fireworks. After killing him, she took him to the bed next to Heather's corpse and used a match and some gasoline that she collected from Harry's car (the owner) to burn the entire house along with the bodies, thus destroying every piece of evidence. 5 years after these events and the only clues the police had was a piece of glass with a little of blood from the victim Heather (which Amelia did on purpose to show the police that Heather was dead) and the fact that a rock was used to enter the place, there were fingerprints on the rock, however, when they were taken to be analyzed, the owner of the fingerprints was not found, so there were 2 alternatives to explain this.

1st- The killer was a child or someone who does not have an official identity recognized by the state.

2nd- The killer used some method such as gloves in which the parts of the finger where the fingerprints are were touched by a child or a person with an identity not recognized by the government and used these gloves to deceive the police and make them think that a child or person without an official identity was the killer.

And the police would have a high probability of believing that the second alternative was the correct one because it is unlikely that a child would be able to think of such a well thought out plan considering that the oldest child who lived nearby where the crime occurred was 14 years old and did not have very high grades in school which further reinforced this thinking of the police and also the fact that all the people nearby excluding some children or babies had an official identity recognized by the government and so the police decided that the 2nd alternative was the true one thus being completely deceived by Amelia exactly as she planned, in fact the fingerprints in question that were found on the stone were from a child who had died several days ago and not Amelia, it was a random stone that the child had used to create a tower made of stones, 3 days before the incident occurred, because the child was dead, the police never found out who those fingerprints belonged to after all the child had died before having an identity officially recognized by the state and because she had died she would never have the chance to have an official identity, this strategy was thought up in a hurry by Amelia, she did not even have 10 minutes to prepare, she made improvised fireworks and the rest she would have to do on her own without the help of anyone other than Charlie who was just a 12 year old child.

(Logical manipulation, mass manipulation, direct manipulation, indirect manipulation, emotional manipulation, strategy efficiency, strategy effectiveness, strategy harder to counter, strategy

alignment, strategy complexity, Misdirection, improvisation, abductive reasoning, Logical reasoning, Hot reading, Fabrication, Creative intelligence, Convergent Thinking, Critical thinking, Creative thinking, Lateral thinking, Trap setting, VSI, WMI)

—----------

On Amelia and Emma's 15th birthday, humanity found inside a meteor a strange mechanical being called Index who apparently knows all the secrets of the universe (Index is an "omniscient" robot created by the supreme servant of the creator and the goddess of death mother, Alice Watson Aurora), in an attempt to discover Index's location and as a bonus discover some things that could be useful to her in her future schemes, Amelia used a special crystal to be able to observe 16 years of Milin's memories her daughter who was created through her own blood and who was a Miku (extradimensional beings that have a childlike form and have the same appearance as Amelia when she was 6 years old). Through the memories, Amelia learned how to speak the Miku language (which has more than 750 thousand words in its vocabulary), learned to create magic circles she did not have Magistus (the energy that granted all beings the use of magic) which made it impossible for her to use magic in her human form and therefore she had to depend of magic circles that worked regardless of the person who made the magic circle or if this person has Magistus, she discovered the location of Index, all the secret government bases and several secret government files, she also discovered multiple secrets unknown to humanity about the universe as a whole, about the energy that composes it, and she also learned how to make a time machine and a machine that creates portals between dimensions, but due to lack of resources, she was never able to make these machines, and one detail: she processed and visualized all 16 years of Milin's life from her birth to her current moment when she was found by Amelia in 0,7 seconds, even if half of the memories Amelia saw were just Milin sleeping and she completely ignored those parts of her memory, it is still a considerably good feat, this is possible because Amelia is not fully human, after all, she is the avatar of the goddess of death, in addition, she organized Milin's memories inside her mind and categorized them as "useful memories" and "useless memories", if we make the calculations she processed something close to 360.947.142 seconds of pure information in 0,7 seconds

(VCI, PSI, WMI, PRI, CPI, Knowledge)

—----------

School kidnapping strategy:

When Amelia entered Starlight Pride High School, she decided that the first thing she would do at that school would be to get information about the teachers and, if possible, about the school principal, so she could blackmail them and use them in the future. To do so, she decided to talk to Elizabeth Riverdale, the daughter of the school principal, who had an entire 30-meter room

just for her, given to her by her father, where she drank tea and talked to some students she found interesting. Amelia was one of the people Elizabeth found interesting because she seemed to hide her true emotions and use a facade to hide who she really is, in addition to always getting top marks on her exams. This was all part of Amelia's plan to attract Elizabeth's attention and make her interested in her. When she received an invitation to go to her class, Amelia went straight there and focused on trying to build a relationship of trust with her, agreeing with most of the things she said, giving her opinion on certain subjects, complimenting the subjects discussed by the two with extra information she hadn't mentioned, and showing interest in the subject so that Elizabeth realized that she was paying attention to what she was saying and was not ignoring her and just agreeing with whatever she said besides being very polite and acting in a charming and charismatic way they talked a lot and a bond of friendship was quickly created between them at least that's what Elizabeth believed, but in truth she was nothing more than a puppet that Amelia would use to achieve her goals when the bond of friendship was completely formed Elizabeth opened up to Amelia and vented about some trivial matters of her life and Amelia did the same and said how she doesn't care about what she has to do or sacrifice to achieve her goals to test this Elizabeth wanted to propose a challenge to Amelia, at Starlight School there was a girl named Emily who Elizabeth completely hated because of her good-natured and well-intentioned personality so she proposed the following challenge to Amelia that she would make Emily suffer a lot and that she would make her life a hell to the point where she would never recover and if Amelia could fulfill the challenge and exceed Elizabeth's expectations she could ask her for anything she could do and Amélia accepted the challenge since if she completed the challenge she could ask for information about the teachers and the principal. On the same day, Amelia sought as much information as possible about Emily and discovered that she has a habit of staying in a park near the school to listen to the sound of birds and relax a little. Knowing this, Amelia hired a group of Gangsters to kidnap Emily. Amelia disguised herself to the point where she was completely unrecognizable with her disguise. She looked like a tall adult man with little money and was aggressive, practically everything that Amelia was not (Amelia was 1.62 m tall, had an appearance considered typical of rich people, was just a 15-year-old teenager and was extremely calm). Thus, preventing the police from believing that she was the culprit, with a cloth full of sleeping pills, Amelia captured Emily unaware and quickly took her to the appointed place where she would meet with the Gangsters she hired. It was a place with few cameras that were deactivated thanks to a blackout that Elizabeth caused to contribute to Amelia's plan. Amelia finally met with the Gangsters, got into their van and quickly fled to a place far away. on the border of Los Angeles almost desert where there were no people around and much less cameras then they settled in an abandoned house that was almost falling apart, there she gave permission to the Gangsters to do whatever they wanted with the girl while Amelia recorded everything for Elizabeth, Emily was tortured, had her back broken and her eyes blinded by liquid soap, the real Amelia would feel disgusted by what she was seeing but the human Amelia was almost emotionless and didn't give a damn, when it was all over Amelia killed the Gangsters with her bare hands even though they were armed with knives and baseball bats, Amelia killed them easily and gave Emily food and water since if she died Amelia would lose the challenge proposed by Elizabeth and wouldn't be able to get the information she wanted in addition to having injected specific drugs into her to lessen the pain she felt so that Emily would remain

conscious until the police arrived Amelia took Emily's cell phone, called the police and brought it to her ear so she could hear the police officer who answered the call and naturally asked for help after Amelia heard that the police officer had sent patrol cars to the place Amelia broke Emily's cell phone and fled the place using a nearby train station to go back home, she also used the fact that her adoptive father who was a billionaire had taken a trip to one of the states bordering Los Angeles for business which as Amelia had planned was the place where she was to make the situation more convincing since the people at the place would think that Amelia had come with her father or that she had come to visit him and was already going back home, the next day the principal of Starlight gave the news to the students about what happened to Emily, Amelia then pretended to be sorry and disconcerted about what Emily had suffered and went straight to Elizabeth's room, there she gave her the full video about everything she did to Emily and as promised Elizabeth asked what Amelia wanted, she said she just wanted information about the school staff and so it was done, Amelia received the next day a pendrive with a file full of information about bad things, secrets and criminal histories committed against the teachers and the principal, This was a plan that Amélia considered to be fail-proof.

—----------

The Death of Elizabeth Riverdale:

Amelia knew that Elizabeth was not trustworthy and that she could be a problem in the future, so she decided that Elizabeth should die. On the same day that Amelia received Elizabeth's flash drive when she was leaving school, she spoke to Mia and May, two sisters who acted as Elizabeth's bodyguards and agents and were always present during Amelia's conversations with her. She said that if they cooperated with her plan to kill Elizabeth, she would give them 15 million dollars each and they quickly agreed without thinking twice. The next day Amelia once again visited Elizabeth's classroom, but this time with three wigs in her backpack and makeup products. During the conversation between the two, only Mia was present and out of nowhere she used a plastic bag to suffocate Elizabeth to death. After that, Mia and Amelia took off Elizabeth's clothes and put them on Mia so that if anyone was around and saw them, the students would think that Elizabeth was still alive when in fact she had died. In addition, Amelia pretended to be Mia and to This used makeup products and put on a wig just like Mia did to make her disguise convincing and both of them used chemicals to dissolve Elizabeth's body until no one could recognize whose corpse it was and hid it in the closet and would use a remote control toy to burn the entire room during the night where there would be no one in the school, after that they left the room together being seen by some students and May who was believed not to have gone to school that day, was actually hiding in the closet of Elizabeth's room, she went there during the night and stayed there for several hours until she heard Amelia

and Mia's signal, May pretended to be Amelia and went to the meeting point marked by the real Amelia which was located in a blind spot of the cameras in the place, there they were paid by her and both Mia and May went to a bus station that they always go to because they find the seats there cozy, but when they least expected it they were killed by a bomb planted by Amelia, the next day the principal's daughter was reported missing in addition May and Mia were not seen after that day, The school was full of detectives and police officers trying to find out what had happened in that place. The investigation lasted 2 weeks, but in the end the police found nothing. So Amelia got rid of not 1 but 3 people who knew what her real personality was like and avoided the possibility of them revealing information about her, no matter how small the chance of that happening was. In addition, the school cameras were hacked and had their files deleted by Amelia, thus making the chance of being discovered as small as possible. The fire caused by Amelia in Elizabeth's personal room was only put out 2 hours after it started due to the fact that the school was located far from the base where the firefighters were. Elizabeth's body was completely covered in gasoline and was completely charred. Her bones were burned to dust. In addition, Amelia's plan to kidnap Emily and her strategy to kill Elizabeth are part of a big plan that she had already planned before even entering Starlight Pride School.

(improvisation, emotional Facilitation, acting skills, persuasion, direct manipulation, disguise, concealment, convergent thinking, horizontal thinking, conventional thinking)

—----------

During an interview in which Index was participating, Amelia, who was watching everything on TV, put her plan into practice and manipulated Index's answers since she had higher authority in the Aurora network hierarchy and forced him to lie to people. Index said that the creator would destroy the entire world in 20 years (which is a lie, as has been clarified before). Because people were already very dependent on Index and because with his help, humanity's technology had evolved to astronomical levels, people ended up believing this lie without much resistance. Thanks to this, several religions around the world collapsed and planet Earth, along with human society, succumbed to total chaos. Civil wars, mass suicide, a massive increase in robberies, murders occurring in every corner of the world, and several other things occurred. Amelia took advantage of the situation and created Red9 and with her special powers granted by her creator, she easily convinced people to join her. Amelia revealed this to everyone. who was the goddess of death and said she could save them from imminent death if they helped her kill the sinners of the world, because people were completely desperate and hopeless, they joined her without much resistance, obviously there were people who refused to join her and who continued to believe in their gods, only 150 people joined Amelia in her goal of forming Red9 (including the servant and the apostle), however that didn't matter after all the amount of people she had under control was already enough to complete her plan, besides one of the members of Red9 was Charlie, the girl that Amelia saved in the house invasion strategy, because of that the girl became completely loyal to Amelia and as a reward she (Amelia) gave special attention to the girl, thus giving the idea that among all the members of Red9 she was the favorite, Amelia gave her gifts and gave her authority at the level of a vice leader, thus Amelia further

strengthened the loyalty and admiration that Charlie had for her and also began to The idea that Charlie was something like “the chosen one of the goddess” was given to the other members of Red9, and they began to see her as the apostle of the goddess of death and her supreme representative. In addition, Amelia would always buy her several gifts, touch her lips and bring her face close to hers, completely seducing her, not only this but she also made a accurate observation of the personalities of all the 150 members of Red9 in one single day, by doing this she made a list of the members with higher probability of betraying the Red9, she then gave attention to them, giving some gifts and making their deepest dreams come true…using a room full of gas(that she made by herself) that causes severe hallucinations capable of damaging a person's brain completely if not managed safely, nothing of these things were real, she played with their minds making a perfect Utopia for them, a perfect paradise, she did with the purpose of strengthen their faith in Amélia, this way strengthening their faith on the goddess(or in other words, Amélia) and making them completely loyal to the point that they would give away their lives if needed for the “goddess” to achieve her goal and this method of her to strengthen their faith and loyalty in fact worked exactly as she planned.

(Mass manipulation, Brainwashing, Logical manipulation, direct manipulation, emotional Facilitation, indirect manipulation, Knowledge, crystallized intelligence, fear inducement, Love bombing, seduction, emotional influence, interpersonal intelligence, emotional understanding, emotional manipulation, verbal deception)

—----------

Amelia remembered the exact position where the student's family members/friends would be and at which tables they would sit to watch the student dance. Not only that, but she also remembered the turns of all 240 students, who would perform first and who would perform last. There were more than 3.179 people on the day of the dance, counting only the students' parents and friends, and Amelia perfectly memorized which seats each of them would sit in. She also memorized which students would perform first and the turns of the presentations. She did this by reading the list given to her by the school principal. She read this list in 3 seconds and processed all the information in the blink of an eye. The list contained the names of the family members, their faces, and the tables at which they would sit, as well as the turns of the students' presentations, their faces, and names.

(PSI, WMI, CPI, TRI, VSI)

—----------

Amélia always completed the tests and exams in record time without any difficulties. During the math teacher's class, Amélia got so bored because she already knew everything that was discussed that she told the teacher that she bet she was better than him at math. The teacher, irritated by the provocation, decided to test Amélia in a special, exclusive exam. In this exam,

she and her teacher would have to do multiple mathematical calculations of any type, 1+1, 32x9 or any other calculation. To complete the exam, a machine connected to a huge television would be used, which would make anything the person using the machine imagined appear on the television screen (after humans found Index, they used it to improve their technology and avoid several wars. Thanks to Index, humanity prospered and today's technology compared to that of 5 years ago seemed futuristic). Basically, in this challenge, Amélia and the teacher would use this machine to think of the most complex mathematical calculations. who were able to solve it and then they would be compared in 15 seconds, after explaining the rules, the test began and the two started using the machine, 15 seconds later, the test was over and Amelia was announced as the winner, the teacher was incredulous and looked at Amelia's monitor and saw, an insane amount of mathematical calculations of the most complex and long types ever imagined by human beings things like: Fermat's theorem, Pythagoras' theorem, Diophantine equation and Riemann's hypothesis, all these calculations and many others could be found on Amelia's monitor, only there was not just 1 calculation of each of these but rather 753 calculations of each of these equations and calculations and it is even more impressive when it is made clear that Amelia thought and solved all these calculations and equations in 15 seconds which again demonstrates her inhumane PSI.

(PSI, QRI, Logical mathematical intelligence, academics)

Amélia was capable of learning more than 7 martial arts in half a day effortlessly, she did this by watching some online videos on YouTube and watching Martial arts tournaments, she also has knowledge of 25 martial arts.

(Learning ability, observation, bodily kinesthetic intelligence)

A few months after Elizabeth's disappearance, a tall, strange man approached Amelia and acted as if he already knew her. She, on the other hand, had no idea who he was but acted as if she knew him. Amelia looked curiously at the man's gloves and asked to look at them. The man took them off in front of her and handed the gloves to her. Amelia, just by briefly looking at the gloves, realized that they were Hilbert Grillmer gloves, created by the German company Skyerflitz in 1915. A company that made gloves, shoes and clothes that went bankrupt after the First World War on October 12, 1927. She knew this because she had read all 479 books that her adoptive father had in the library of the mansion where she lived. Thanks to these books, she became a professional in 27 different martial arts and was an expert in several areas of knowledge of Humanity, such as such as: Writing, History, Astrology, Astronomy, Cartography, Biology, Science, Geometry, Biogenetics, Biography, Toxicology, sociology, criminology, Mathematics, Politics, Economics, Law, Arts, Technology, Etiology, Mechanics, Literature,

Physiology, Philosophy, Chemistry, Medicine and much more, With this information she guessed that the man in front of her was German or that he had a friend or family member who was German and had received the gloves as a gift. However, she also deduced that he had a lot of money because at the time when that glove was brought to the market it cost at least 17 million American dollars and only rich and luxurious men had the privileges to have a glove like that. In addition, the glove was quite dusty and in poor condition. In the state in which they were, those gloves are worth almost nothing and for that man to still be using those gloves means that they had some kind of sentimental value. The gloves are most likely family items that are passed down from generation to generation or a gift from a friend/lover/family member. However, when the man called Amelia by her real name (name before being adopted), Amelia remembered that when she was 11 years old her adoptive father had mentioned having a German friend who was a little strange at first glance but that he was a good person. Amelia realized that only family members or people very close to her father would wear those gloves. She would know her real name, she finally discovered the identity of that man and why he knew her real name before she was adopted along with her twin sister by Henry Elliot Wilson, that person was Edgar Shneyder, a German friend her father spoke of, she then gave him the glove back and he asked if she was sure about it and said that she only looked at the glove for 5 seconds and said that she didn't need to hold back to appear polite, Amélia discovered this without having any prior information about who he was.

(VCI, linguistic intelligence, Cold reading, observation, abductive reasoning, observation, perception, Fast thinking, Bodily kinesthetic intelligence, Crystallized intelligence, knowledge)

—----------

The Assassin and the Mysterious Mastermind Plan:

Before summarizing what happened, considering that this is probably the longest plan made by Amelia (if it isn't this, it's the battle between her and Ryan), it is first important that certain things are clarified for a better understanding of Amelia's planning.

1st-There are 2 Amelias, one is the one we have followed so far, which is the human Amelia without powers and who is merely a common member of Red9, while the other Amelia is the clone, a fraction of the real Amelia, unlike the human Amelia she has powers and is the true leader and founder of Red9. The only difference in appearance between the two is that the human Amelia's eyes are blue while the clone Amelia's are red and her pupil has the shape of a triquetra, she is the main piece for the real Amelia's plan to kill the goddess of death but we will only talk about this later. Human Amelia and the clone are the two halves of the real Amelia and when they come together again the real Amelia will return (Human Amelia always wears gloves according to her father Henry since he adopted her and her sister Emma Elliot Wilson, he has never seen Amelia's right hand without gloves when they try to forcefully take the glove off her right arm she acts rudely and always avoids talking about why she wears gloves so often and the reason for this is because the mark of the goddess of death is located on her right hand this

mark is a sign that she is the property of the goddess and to prevent anyone from finding out about it she disfigured and burned her own hand in the fire to the point that it was impossible to see the mark and showed no reaction when doing so)

2nd-Matt Wanderley is the president of the student council of Starlight School while Amelia is the Vice President this occurs 1 year after Elizabeth's “disappearance” and Amelia here is 16 years old and will only turn 17 on her birthday November 16th, she is in the 2nd year of Starlight Pride High School and is only a few days away from going to the 3rd year, Amelia (Human) and the clone Amelia cannot contact each other, the Clone Amelia unlike the human Amelia knows about the plan to kill the goddess of death and the reason why the human Amelia does not know about the plan is the fact that The goddess of death reads your mind 24 hours a day to make sure everything goes well and prevent your avatar from trying to betray you. However, she does not read the clone's mind because she considers her irrelevant. Human Amelia and clone Amelia know about each other's existence.

3rd - The clone met Matt for the first time when he tried to commit suicide due to the abuse he suffers from his family. He was prevented from killing himself by the clone, who favored him on several occasions, to the point that Matt faithfully believed that the clone Amelia would never lie to him. The clone is a fair person who hates killing and has the same personality that the real Amelia had before being reborn as a human, so that the game of the goddess of death can begin. Human Amelia only inherited the bad, selfish and evil emotions of the real Amelia to make the idea that Amelia was still loyal to the Goddess as realistic as possible and prevent the goddess from realizing her real intentions.

Ok, let's get started.

One day, Matt received a warning from the clone saying that Amelia Elliot Wilson was to blame for Elizabeth's disappearance and said that she was a threat to the school and everyone who studied there. In addition, she said that Amelia would be unconscious in the principal's office the next day at 1:30 am because she was very tired. On that day, a special party would take place at the school to celebrate the 50th anniversary since the day that Starlight Pride High School was founded. The clone also told him that on that specific day she would black out all the cameras in the city of Los Angeles where Starlight Pride High School is located, which was actually true. This fact helped not only Matt but Amelia as well. But nothing that Amelia couldn't handle on her own. She could simply hack the cameras again and black out them or abuse the Aurora network once again, as always. Thanks to the long history of times the clone helped and saved Matt, he blindly believed her statements without thinking twice and quickly thought of a plan. In this plan, he He had help from his 2 best friends Michael and Jonathan Henderson (Jonathan is a Red9 spy that Amelia uses to keep an eye on Matt and make sure he doesn't do anything against her). Jonathan refused to be part of the plan because he thought it was too risky, but he gave Matt some materials that could be useful for him to succeed in his mission to kill Amelia. On the day of the murder, Michael would pretend to be Matt and attract the attention of everyone who was in the main hall where the party was taking place. The fact that Matt, who is actually Michael in disguise, was in the main hall in front of several people would make it

impossible for Matt to be suspected of being the killer because he couldn't be in 2 places at the same time. Matt, disguised as Michael, took off his disguise in a quiet area away from the main hall where the party was taking place. He stayed there for 2 hours until all the students left the school. At 1:30, he finally went directly to the principal's office and used the Lock pick trick to open the lock and enter the place. On his first attempt, he was successful and entered the principal's room. Director there he saw Amelia sleeping at the table, Matt gently removed the pinch used to open the door to prevent it from breaking and walked towards Amelia, when he got close enough he grabbed her hair and cut her neck with a knife. However, shortly after that, something happened that Matt would never expect after having his neck cut. Amelia opened her eyes and Matt noticed that her eyes were black instead of blue, realizing this he got scared and hit his head on a bookshelf that was behind him, knocking something over. Matt thinking the worst, he looked closely at Amelia's hair and realized that it was actually a wig. When he took it off, what Matt feared most proved to be real, Amelia deceived him and the person he killed was not her but Matt's sister. After that he was very confused and called the clone to question her about it, but she didn't show up. He quickly realized that he was caught in a trap and fled the crime scene. The next day Amelia was alive as if nothing had happened.

Now let's see how Amelia dealt with this situation.

30 minutes before the party started, Amelia was warned by her spy, Jonathan Henderson, that Matt would try to kill her. After hearing this, she spent 15 minutes trying to guess what methods Matt would use to kill her. She also thought of a plan to counter all the methods and strategies he could use. In 15 minutes, she had already thought of a plan to deal with him and made all the preparations so that her plan would work. Elize Wanderley, Matt's sister, was a kind and honest person, making her easily manipulated. Amelia used this to lure her to the principal's office. Basically, Amelia sent a message to Elize saying that she had something important to do and that she wouldn't be able to finish in time to be able to enjoy the party. She said that she hoped she would enjoy the party to the fullest. However, seeing that Amelia needed help, Elize said that she would help her with what she was doing. Amelia had already predicted this response from her, but decided to play dumb and say that it wasn't necessary and that she didn't want to bother her with it. That's it, but due to Elize's insistence, Amelia said that she was in the principal's office waiting for her and Elize quickly went there. Amelia had already predicted that no one would notice that the girl had left the main hall thanks to Michael's speech disguised as Matt and even if they knew there was nothing they could do since they wouldn't care where she was going or what she was going to do, interfering in whatever she was going to do would be an illogical and senseless action. When she arrived at the principal's office the door was open she entered enthusiastically and took 2 steps forward, but she couldn't see Amelia anywhere that was when someone caught her off guard and used a sleeping pill to make her sleep, after that she quickly took wigs and makeup from her backpack to make Elize look as much like her as possible to fool Matt. She carried her to the principal's desk and placed her there so that Matt would think she really was Amelia. She closed the door to prevent outside actions from ruining her plan. After preparing Elize and making her look like her, Amelia entered the office. The cabinet in the principal's office was arranged in front of the bookshelf so that they would block the view of anything that was in the back of the cabinet and block the view of anyone who

looked there. The reason for this was so that Amelia could not know if Matt would suspect something and look in the cabinet. That is why she placed the books that way so that when Matt opened the cabinet the only thing he would see were some books, without thinking that Amelia was inside the cabinet behind the wall of books. She also made some holes in the cabinet to prevent her from running out of air. Finally, after some time of waiting, Matt appeared and killed the person he believed to be Amelia after making sure that he had left the place. She pushed the books forward with force to open the cabinet, which caused them to be scattered on the floor. She placed several objects at the crime scene that could be used as evidence to discover the identity of the killer, his actions and what he did. Of these, only 1 piece of evidence is falsified and all the others are true. The evidence in question was:

A bag of a wig, a broken vase on the floor, a paper with a seemingly incomprehensible code, a syringe with some sleeping pill, a bottle of sleeping pill hidden inside the victim, half a pinch stuck in the door (this is the false clue) and a piece of paper in the closet written “someone was here”, referring to Amelia, after placing all the evidence, she used a chemical acid to make the principal think that the door was stuck and try to break it down which would cause the door to break and also to create the famous locked room case, using a twig and a remote control mechanism she was able to lock the window when she was already outside and quickly fled the scene, the next day Starlight Pride School was closed to prevent possible clues from being tampered with, soon the police began to suspect a group of teenagers who had left the main hall and said that they went to the kitchen to steal some of the food, however there is a lack of evidence to prove this and for this reason they were recognized as the main suspects, that day, Matt was to the police at the scene and warned them that Amelia was to blame for the crime and they went to try to confirm this however, to Matt's surprise, Amelia had an alibi, remember the beginning of this document in the house invasion strategy, Amelia did that to prevent her 13-year-old friend Charlie from being arrested after all she was the real killer of Heather the only thing Amelia did was to prevent her from taking the blame, she (Amelia) knew that Charlie was a person who didn't leave the house much and didn't know very well how the laws of society worked, besides that she used the fact that she was Charlie's friend to deceive her and make her think that she would be arrested when in fact she wouldn't because she was just a child and for having killed her sister Heather by accident by pushing her down the stairs, after being "saved" by Amelia she swore complete loyalty to her and joined Red9 when she found out that Amelia was the leader of the organization (she didn't know about the existence of the clone so she thought the clone was the human Amelia that she knew) and joined the same school as her, the Starlight Pride, now that I've explained that let's continue the explanation, basically Charlie and Amelia entered the party on the day of the murder, however only Amelia was seen leaving the place because in fact Charlie was disguised and pretending to be Amelia to create a false alibi, with an imitation that could be considered perfect she fooled everyone into thinking that Amelia had left the place when in fact she was still there, she was aware that after this the police would look for her because she was obviously a suspect in the crime, but Amelia assured her that she would be fine, that Red9 would not allow her to be captured by the police and brought to trial which motivated her to do this even though it was so risky, after leaving school she called Amelia's father and said that she would stay at a nearby hotel and that the next day she would go straight home and so she did, she went to the nearest hotel where she was seen

by the cameras, further reinforcing Amelia's alibi and slept there for a day, the next day she left the place and went to a cabin in a nearby park away from cameras, there she met Amelia who had spent the whole night at the place, she told Amelia who had done everything as she asked and after that without thinking twice she (Amelia) suffocated her to death, Amelia never cared about Charlie, in the end she was just another one of the many tools she could use as she saw fit, she then buried her body in the floor of the cabin and covered Charlie's body with the wood from the floor of the cabin after that she left the place and went straight home and thus she had completed her false alibi, this plan of Amelia's was completely foolproof, even with the risk of everything going wrong being high, she decided to bet heavily on luck and see how everything would turn out, and in the end everything went as she planned.

—----------

Part 2 of the assassin and the mysterious mastermind plan:

A police officer went to Amelia to find out where she was at the time of the crime and Amelia said she was in a hotel, which matches her alibi. After that, the officer and Amelia went to the hotel where Amelia was to confirm her alibi. There, they watched the security cameras. The officer then admitted that it was impossible for Amelia to be the killer behind the case and that the culprit was probably Charlie, who had disappeared after the day of the crime. One more thing I must make clear here: Amelia has 3 goals that she plans to achieve with this plan.

1st - Test the police's deductive and investigative capabilities to get an idea of how dangerous they would be to her plans.

2nd - Get Matt arrested to get rid of him, since he is a possible threat to her plans.

3°-Announce to the world the existence of Red9, because until now Red9 was a secret organization of 150 members that acted in the shadows (controlling gangs and terrorist groups around the world) of which no one knew existed (yet).

After that, the police officer took Amelia back to her home and went to Charlie's family's house to ask if the parents knew about the girl's whereabouts, to which they said no. The trial of the teenagers who stole food would be in 3 days, to give enough time for the investigation to be carried out. Within a day, the police had already collected all the evidence provided by the mastermind of the crime, this being Amelia, and began to focus on deciphering them, analyzing

them and finding out how they proved something, since the clues seemed to be just a bad joke by the killer. However, due to the scarcity of clues and these being the only clues that might reveal the identity of the criminal, even though they were probably false, the police decided to trust and analyze those clues. However, they were having great difficulty solving the puzzle of some of the clues and understanding how they connected to the case, especially one in particular... the paper with an incomprehensible code. They even posted a photo of the paper on the internet, hoping that someone would know how to solve it, but not even the people on the internet knew how. were able to decipher the code, Amelia was disappointed with the police's performance and thought to herself that she had gone too easy on these puzzles, she had overestimated the police's capabilities and so to prevent her plan from going wrong she decided to help the police in the case indirectly, Amelia went hidden to the school and she took advantage of a moment where they wouldn't be looking and took a photo of all the evidence she had planted and decided to do an independent investigation, Unlike the police, she knew who the killer was and also knew that while Matt was in the principal's room he was also seen in the main hall. However, Amelia knew that it was impossible for Matt to be in two places at the same time, so she decided to talk to the students who were present in the main hall and asked them if they had noticed any strange behavior or any difference in Matt during the speech in the main hall. She questioned several students and the 5th student she questioned said that Matt's voice was a little deeper than normal to the level that only someone who saw him every day would notice. She also said that it was strange that she hadn't seen Michael at the party even though he had entered through the front door and was at school to attend the party according to the security guards at the location. But even so, he wasn't seen anywhere. After hearing this, Amelia quickly went to Michael's house and said that she knew he was dressed up as Matt, pretending to be him to give him an alibi and avoid suspicion. Michael confessed effortlessly and gave her a summary of the plan. Amelia had noticed that Michael had not realized the real intentions of Matt's plan and that by disguising himself as him, Michael would have no alibi and would inevitably be suspected of the murder. Matt would silence Michael by killing him the next day, but thanks to the police interrogation he did not have time to complete his plan and kill Michael. Amelia told Michael this fact and said that he was merely a tool for Matt and that he would soon be discarded. After finally realizing this, he decided to help her reveal Matt's guilt in the case. Amelia and Michael went to Matt's house near the place. She told Michael to enter the house with the excuse of having forgotten some material for a project there. He should take Matt's uniform and throw it out the window so they could analyze it. After the whole process, they analyzed Matt's uniform and found a pinch in his uniform pocket. Amelia quickly broke the pinch in half to give the impression that it was the other half of the pinch that had been found by the police on the door of the principal's office. After that, she thought of a plan to present her findings to the police in a way that would not seem too convenient and suspicious. For this, she had the help of Indirect from Otto Lionheart, the prosecutor who was going to charge the suspects in the case that would be the group of teenagers. First, Amelia went directly to talk to the prosecutor and said that she had discovered some things that could be useful in the case. Otto didn't find this strange because the police had not only sent the proof of the incomprehensible code, but also all the evidence they had in their possession on the internet to gain public support in the case. Otto then asked what these discoveries that Amelia made were and she said some things that the police were already aware of. However, she purposely let slip

the information that Matt had a strangely deeper voice during his speech and that Michael was not seen at the party by anyone even though he had entered the place according to the security guards. After hearing this, Otto began to investigate Matt and discover his involvement in the case. Amelia then manipulated her discoveries a little and made him come to the same conclusion as her, that Michael was pretending to be Matt and that Matt was most likely the culprit. Thanks to Amelia, he found Matt's uniform and half of a pinch that Amelia had He put it there, he informed the police that Matt was a suspect and now the police had 3 suspects of being the killers in this case: one of the young men from the group of teenagers, Charlie and Matt, so finally the day of the teenagers' trial arrived and Matt was also called to the trial, but Charlie obviously had not yet been found by the police.

—----------

The Trial (or in other words the final part of the assassin and the mysterious mastermind plan):

On the day of the trial, Amelia used a strange crystal given to her by Index, this crystal would erase her memories of what happened that day, she would still know that she was the one who manipulated Matt to kill her sister but she would forget how she did it, why did she do it?, it's because Amelia is a sadistic person, besides that she has a high confidence in her intelligence and knew that even without her memories she would be able to solve the case. In the courtroom, Otto began the accusation against Matt, but because most of his accusations had no evidence, he didn't know what happened that day and how the evidence connected to the case, he was at a disadvantage. His accusation was quickly denied and attention returned to the group of teenagers who were at the scene stealing food from the kitchen. Witnessing the situation, Amelia decided to intervene and sent a message to Otto's cell phone number, which she obtained by asking one of the detectives on the case and said that he should present half of the pinch to the court. Otto ignored what she said because Amelia didn't put more context in the message because she wanted to test Otto's trust in her, which clearly wasn't much. So, in order to gain Otto's trust, Amelia said that she already knew who was guilty of the crime, which took him by surprise. The judge was bothered by the fact that Otto was picking up his cell phone a lot in the middle of the trial and questioned him about it. Otto looked at Amelia, she winked at him and then Otto said that he wanted to ask Amelia to be his assistant. In this case, however, Amelia was a minor and therefore it would not be common to leave such an important case in the hands of a teenager. However, Otto bet on Amelia and stated that the truth can only be reached if all available resources are used. After thinking a lot about the matter, the judge accepted Otto's proposal and Amelia was allowed to argue in the case. There, Amelia made a summary of what she "believed" to be what really happened on the day of the murder and used the evidence to prove her point, thus avoiding too much suspicion. After all, it was pure logic

and a theory of Amelia's that could be true or false but that had a high chance of being true. One of these points, for example, was...

P1: On the day of the murder, the voice of Matt who was in the main hall was different from the voice of the original Matt.

P2: Furthermore, when leaving the place, Matt's friend Jonathan was not seen anywhere in the school by the guards.

C1: The Matt who was in the main hall was actually Jonathan, no matter how hard he tried Jonathan couldn't imitate Matt's voice perfectly.

P3: There was a syringe with sleeping pills at the crime scene, in addition the contents of the injection were half full and there were some traces of liquid on the tip of the syringe indicating that it had been used.

P4: In addition to the syringe, there was also a bottle of sleeping pills found inside the victim's stomach. The bottle was in perfect condition, even with the gastric juices in it, and it was completely empty.

C2: This syringe was used to knock the victim unconscious and make it impossible for her to warn Matt about her real identity or escape. The small hole made by the syringe in the victim's neck and the bottle of sleeping pills further strengthens this idea.

P5: There was a broken vase at the crime scene. According to the school principal, it was on a wall.

C3: Considering that the vase was intact until the morning of the murder, it is safe to assume that the vase broke at the time of the murder. Since Elize was incapacitated due to the sleeping pills, only the killer could have hit the wall.

C4: The killer in this case proved to be quite competent considering his methods. So why would he create such evidence? Maybe he didn't do it on purpose. The killer was startled by something and accidentally hit the wall.

P6: There was a small white piece of paper on the bookshelf in the classroom and the following sentence was written on it: “Someone was here.” There were also several books thrown on the floor in front of the closet.

C5: If the mastermind is really playing fair with us and is not using false clues to deceive us, this means that at the time of the murder, she was hiding in the bookshelf.

C6: Furthermore, the fact that the books were thrown on the floor, in addition to the fact that they were in front of the bookshelf and the possibility that the mastermind had hidden inside

means that she used the books to hide the killer's view just in case he investigated the bookshelf.

P7: The piece of a pincushion that was broken was found inside the door in the school principal's office.

C7: The killer used the Lockpick trick to open the door to the principal's office and when he saw the person he thought was the mastermind sitting in the chair without moving, he was overcome by rage and advanced on her without removing the pincushion from the door properly, thus breaking it in two.

C8: A piece of pinch was found in Matt's uniform pocket, which makes him even more suspicious of being the killer in this case.

P8: There was a message from an anonymous channel on the victim's cell phone asking for help with something and telling the victim to go to the principal's office.

C9: This was probably the trick used by the mastermind to lure the victim to the place where the crime took place to start his plan.

These were all the conclusions that Amelia made in relation to the case, in addition she solved the strange code of the paper that was nothing more nothing less than just some sentences from different languages that were merged at different angles and created a totally new language, the languages in question were Chinese, Arabic and Japanese, however the sentences were carefully chosen so that all the sentences on the paper had the same meaning in the 3 chosen languages and when the sentences had different meanings in the 3 languages, the letters that were similar in the sentences would be the real translation for example:

Japanese: Sayonara

Chinese: chion mejin

Arabic: Ahmur aqionbal

All the sentences have the letters "ON" and so this will be the sentence used for translation (this is just an example and was not actually on the paper) and after translating all the sentences of the code the true text was revealed "Elize was not the target but someone else" to prevent anyone from suspecting her, Amelia said that she could speak fluent Japanese and Chinese, while reading the code she noticed that a Japanese kanji was in the text and after researching a lot she finally understood the puzzle and in a few hours she was able to translate it, she avoided every suspicion and continued on the case, Amelia always made it clear to everyone about Matt's guilt in this case and insisted on blaming him for everything making him remember his past, his parents were always abusive to him and always blamed him for everything, Amelia knew this and insisted on emphasizing Matt's guilt in this case to weaken him mentally, and

prevent him from being able to counter the deductions made by her, she explained her “theory” about what happened that day in a way that gave the impression that she didn't know what really happened that day and that everything she said was merely a hypothesis, she also brought up an important detail.

The Mastermind had the key to the principal's office, after all, he was able to lock the door even though he was inside the principal's office and this was obvious if you think logically, after all, if the Mastermind had used the Lock pick trick like the killer, the mastermind would be able to open the door but not close it and the fact that the killer used the Lockpick trick to open the door reinforces this idea even more, after all, if the Mastermind had used the Lock pick trick, the door would be open, that is, there would be no need for the killer to use the Lockpick trick to open the door, this raises two hypotheses:

1st-The mastermind knew the principal and had a key given to them personally by him.

2nd-The mastermind made a copy of the principal's office key and used it to enter the place (this is the true alternative, Amélia made a copy of the principal's key because she had already predicted that something like this would happen).

So the police decided that the director should go to court, however when the police went to the director's house he was found stabbed to death, a forced smile was made on his face with the use of nails and his blood was used to write the phrase "Red9" on the wall, the director was killed by a member of Red9 more specifically "The Fool", the first vice leader of Red9, now that the director was dead, it would be impossible to discover the identity of the mastermind and so only the killer, Matt, would end up being arrested and Amelia had already predicted this, think logically, since the police have more clues pointing to the killer's identity they would obviously focus on finding out who he is and leave the mastermind in the background, Matt desperately used the ability granted by the clone to create knives and threw the knife at Amelia trying to kill her who to avoid being killed used her right hand to block the attack, after having her hand pierced by the knife she pretended to be in great pain, after witnessing this Matt was arrested, after he was taken to prison, the clone manipulated Index and made him tell everyone present in that place that the goddess of death was an enemy of humanity, revealed that Red9 was a terrorist organization that had control over a huge amount of terrorist gangs around the world and stated that there would be many more deaths, that humanity would learn to fear her and thus Amelia fulfilled all her objectives at the beginning of this plan, tested the police and the investigation team, got rid of Matt and revealed the existence of Red9 to the world and so once again Amelia got away with one of her many crimes, it is important to note that Amelia had predicted all these events excluding the sudden appearance of Index and the police's mediocre investigative capacity, all this a few minutes after hearing from her Spy that Matt planned to kill her, however the spy never said how he would do it and as mentioned before she not only thought of this plan, but also predicted and anticipated multiple other plans that Matt would use (excluding the part of discarding Michael) in less than 15 minutes, so she easily managed to get rid of him, in addition during the trial, everyone present at the scene stopped talking in order to listen to her and even if she spoke about the most boring and complex subjects imaginable,

everyone would stop talking and yelling at each other just to listen to her because of her great charisma, in addition to all this, there was the fact that Charlie was the only one who was not seen leaving the place by the guards, thanks to this, the police would mistakenly think she was the mastermind and would try to find her in vain since she had already been killed by Amelia a long time ago in the first part of her plan, this plan of Amelia's had a risk chance of almost 0%.

During a trip with her sister, Amelia came across a large map of the city they were going to, which was 47 km² in size. She looked at the map for 1 second and memorized it in her mind. Not only that, she also created two markers that showed their exact location. During the entire trip, Amelia knew exactly where she had been and where she was going because she had memorized her entire route on the mental map she made.

New experiences:

Because the principal of the previous school had died, Amelia had no choice but to study at another school, but specifically the same school as her sister, the school in question was Bright Future High School, on her first day there she noticed that Emma her sister was acting strange only because she had changed her facial expression minimally during About 0.1 seconds later, she also noticed that she was avoiding looking at table 37 where students who were quarrelsome and bullies sat. There were rumors that that group of students had committed several atrocities such as rape, robbery and attempted murder, but because they were never proven, they were never punished. The fact that their leader was the son of the school principal also contributed to this. All the students at the school avoided looking at them directly and were shaking with fear. Amelia, analyzing these facts, noticed a red mark on Emma's face and noticed that she had been beaten by the boys. After that, she got up from her table and approached the boys' table. She started provoking them into a fight and easily knocked them all out. Two students had a fractured spine, one student had a fractured skull, another student had several of his bones cracked and the rest only had some medium injuries. The principal's son had several bruises and Amelia was treated like a heroine at school for having saved the students from the terror that the group of troublemakers had caused. represented, she quickly

became a person of great influence, but Amelia did not beat the students just because they had hurt her sister, after all she was the type who would get rid of them through the shadows and indirectly, she knew how much the students feared them and that is why she beat them in front of everyone, so that she would be seen as a type of Jesus Christ, a savior for the students of that school, besides Emma would think that Amelia did all that especially for her, which would make her trust and dependence on her sister increase significantly, using the information she received from Emma, Amelia blackmailed the principal of the Bright Future school who, fearing being sent to prison, covered up the incident.

Unexpected betrayal (Narrative):

Amélia had missed a class to relax a little and went to school the next day. There she learned that there was an elite student who had not come to school for a week and that he had quickly become a very influential person. After walking a little, Amelia came face to face with the elite student and recognized him almost immediately. That was Ryan Heinrich, also known as the Apostle, the second vice leader of Red9. Amelia was surprised. Why was he there? She had not been notified of his arrival, even though she was not the leader (Clone Amelia is the leader of Red9 and only the vice leaders know about the existence of the 2 Amelias, something that not even the human Amelia knows. She has no idea that there is a clone of her out there). She should have been informed about this and acted as if that was the first time she had seen him. While talking to him, Amelia thought in her mind why he was in that place. After much thought, she came to the conclusion that he wanted to confront her. The reason for this was because The fact that they had known each other since childhood, Ryan was a narcissistic person and loved to be the center of attention, but he almost never had the opportunity to feel special because Amelia always stole the attention for her, and only when she went to another school did he become the center of attention again, but that wasn't enough for him. He realized that the students were only paying so much attention to him because Amelia had left, which created an inferiority complex in him, and in fact she was right. So at that moment a long confrontation between the two would begin. I'll probably have to take back what I said about the Assassin's plan and mastermind, this will probably be the longest chapter.

(Narrative)

Ryan Heinrich, 2nd vice leader of Red9, copied files from the principal of his school and there were several documents about the students and teachers with information such as their hobbies, weight, things they like, height, talents, things they hate, favorite food, face, name, address of their homes, schools where they studied in the past, if they had a criminal record, what their jobs were before entering school, personality and also had information about the family members and friends of those students and also the same information about the students had about the family members and friends of those students too so in the documents there was also information about hobbies, weight, height, talents, things they hate, favorite food, things they like, face, name, address of their homes, criminal history, schools where they studied in the past, personality, etc. and Ryan had to read, process and store inside his mind 1,971,216 characters of all the documents during the school break and still had 10 minutes left for him to do whatever he wanted, in this school the break It lasts 40 minutes, so he read and processed all the information contained in the documents in 30 minutes, which if we do the math, means that he read and processed in his mind 1095 letters per second, and he did it without having to look twice. He also stated that Amelia would also be able to do something like that, and he also said that there was a possibility that she could do something even more surprising considering how superior she is compared to him.

(Narrative)

A few days before her 13th birthday, Amelia suffered a car accident that greatly limited her mental and psychological capabilities, according to The Fool, the first vice leader of Red9 (a criminal organization founded by Amelia to exterminate as many people as possible and cause chaos in the world, not because Amelia likes to see people suffer more because she has no choice but to carry out her plan to cause the death of the goddess of death at the hands of the Creator, the first being and the supreme lord of the gods above even Queen Alice. The goddess of death was her creator who always created new avatars like Amelia and forced them to entertain her by killing people, raping them and causing national or cosmic disasters. Amelia on her first day of life understood that she was merely a cog so that the goddess of death's game would work smoothly and that when she got bored, Amelia would be discarded) He said it was funny to think of Amelia as a child is more intelligent than his adult version and also said that even if all three (adult Amelia, The Fool 1st vice leader of Red9 and the Apostle 2nd vice leader of Red9) joined forces they would not even come close to being a threat to Amelia before the accident, that is, when she was still in her prime.

Final part

Amélia PT-BR version final part
