

Akagi:The Genius Who Descended Into Darkness.

Akagi Shigeru is the main protagonist of the Akagi series, and a main character in Ten. He is a genius who specializes in gambling,master in psychological warfare and manipulating opponents.Ruling the Japanese underworld for around three years, he is well known as a mahjong legend.
This doc will cover his feat vs aliens (Akagi Defender of the planet Earth) a chapter from different manga: Akagi Zawa… Zawa… Anthology.

So Let's Start..

The year is 1965,Aliens from other space attack earth suddenly.Due to the difference in Technology,earth defense force is completely defeated.All of humanity had no choice but to submit to the aliens.except for just akagi.(Emotional Management,Composure,Mental Fortitude).

The aliens are Robo Alien,Silver Alien and Octo-Alien.They want to decide how much of earth their races should take,So they will decide with a game called "Space Mahjong". The problem is that they don't have enough players.Having an overwhelming superiority over them,they decided to choose one of the earthlings. In the end,the united nations decided to rely on akagi.Now he will risk his life to save the planet(Influence, Emotional Management)

The Aliens attack: Octo discards (Bof,bof!) and silver wins Immediately with fmaap anti matter palpolepen youshi musou baibaioh paipapallin! Lmao.

Ougi stated that Akagi was given a very basic exposition about the rules,However he has to figure out the most of it by himself.Akagi is in a huge handicap.for whatever ground he loses he has to pay with his life force.But given the fact that akagi is the only available player,and how much of earth anyone of them would take is determined by points we can deduce that they wouldn't kill akagi so quickly.Thanks to this fact,Akagi is surviving but he just playing ordinary,merely draw and deal tiles.Ougi and the cop begging him to go for all-or-nothing gamble before it's too late.Akagi suggested that there is no need to do it against opponents with this level.Anyway,Robo nuppah! and someone calls with pekkhyan!.Akagi splakk and wins with paiotz 3-D(notice the fact that akagi learned their language so fast).Akagi demonstrated that he won with this cheap hand,and it made them grimbace a bit. He stated that he figured out the rules of the game,and he knew early the important parts but wasn't sure about certain things so he just observed.Akagi clarifies that he was making a test starting from the foundation not just hoping it woud work ,he simplified it with 2 exemples (Climber who had to find a foothold, and a vintage glider).
(Observation,Deductive Reasoning, Inductive Reasoning, Analogical Reasoning,Linear Thinking,VCI,PSI,FRI,CRI,Crystallized Intelligence,Methods,Risk Management,Emotional Management,Emotional Engagement,Short-term Planning)

Akagi attacks several times, his territory is expanding and the aliens are confused.they insult him with expressions like you still have hair in your body,you don't have an antenna on your head.akagi's brain dominated the technology of the aliens.
it's shown that akagi can comprehend thing like coincidences as if they were forces of nature by the "Flow" idea
(Cognitive Discipline,Methods,Lateral thinking)

Akagi hits with the final blow anitmatter plasma galaxy! Big bang expansion! double stonweil!
His hand emits a strong light,Silver says that akagi manipulated the laws of the universe to win this match.(Strategy Complexity, Versatility,Resilience)

Anyways akagi won 100% of the earth and he saved the planet.The aliens admit their lose and threaten that in the future they will comeback,Akagi interrupted him and said our match is still far from over,they will continue.Ougi and the cop object because the earth is saved after all.Akagi demonstrates that if they go to andromeda galaxy they will find their plant,and he already has the earth to wager against it so he decided to take all-or-nothing.(Emotional Engagement,Determination)
