Two Bodies (두 개의 몸 ***Du Gae-ui Mom)*** is the condition of a single consciousness possessing an additional, second body, entirely different in appearance and build from the original, with the consciousness being shared between the two. It effects Crystal Choi (Elite's daughter) and most notably,Daniel Park.

As observed (by Daniel),it is bound by certain principles :

1. **Falling asleep switches him from one body to the other.**
2. **The sleeping body cannot wake itself.**
3. **Forcing the sleeping body awake forces the waking body to sleep**
4. **The sleeping body remains alive, and feels hunger and performs other bodily functions**
5. **His consciousness is awake for a full 24 hours. Memory and experience carry across, and no mental strain results, because whichever brain he is not using has rested. Moreover, Daniel is embodied by/in both bodies,meaning he perceives both to be his own body,without any sense of disembodiment or dysmorphia. Additionally,there is no development of schizophrenic tendencies due to any disassociation of the body with self**
6. **The second body's build does not change whether he starves it or overfeeds it. Yes,it grows stronger but that is due to cognitive development in Daniel's consciousness.**
   Moreover,Jinyoung (medical genius) can't affect it whatsoever (except with opioids which affect consciousness).

7. **If one body is in no condition to regain consciousness, no exchange happens. It resumes once that body has recovered enough to wake.**
8. **If one body cannot wake at all, the other becomes able to sleep and dream.**

Additionally,some more principles can be observed

1. **The transfer between the two bodies is instantaneous ,irrespective of physical distance. With seemingly no energy being needed to perform this function**
2. **If a body is the state of UI then it appears that Daniel's consciousness can't possess it**
3. **If neither bodies are in a state in which they can be possessed (say one is knocked out while the other is in UI),then Daniel enters a dream-like place in which he encounters a figure who looks like the Second Body and has knowledge of the future. This is theorised to be the future self of Daniel.**

Scans [Properties] :

FIRST THING!

SECOND THING!

THIRD THING!

THE SLEEPING BODY FEELS HUNGER AND NEEDS TO GO TO BATHROOM TOO SINCE IT'S AN ALIVE BODY!

CHARLES CHOI IS FIRST.
...MY OTHER BODY?

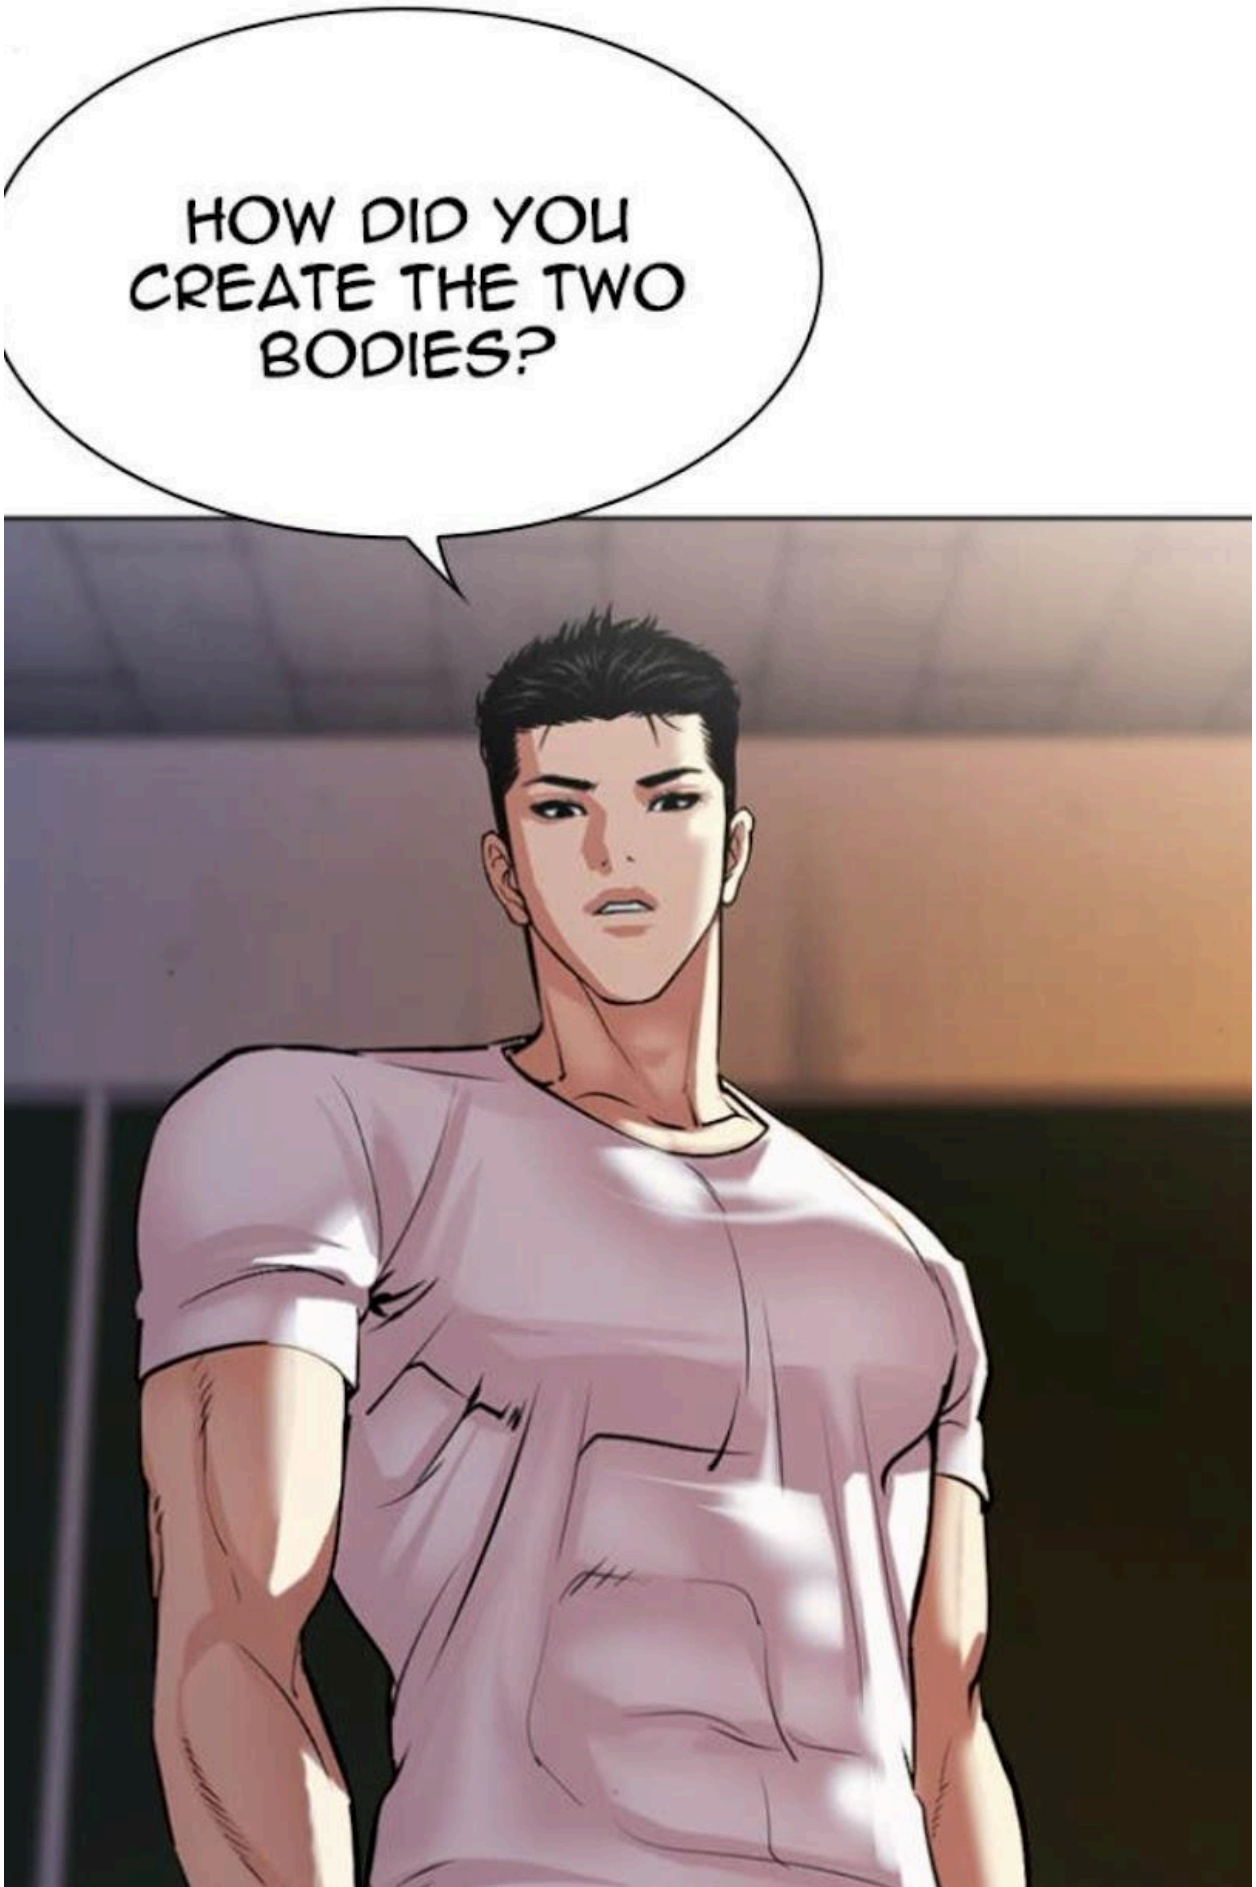

THAT PERSON IS COMING.
THE PERSON YOU MUST ALL WORK TOGETHER TO DEFEAT.

WHAT?
NOT THE WORKERS.
THIS MAN IS...

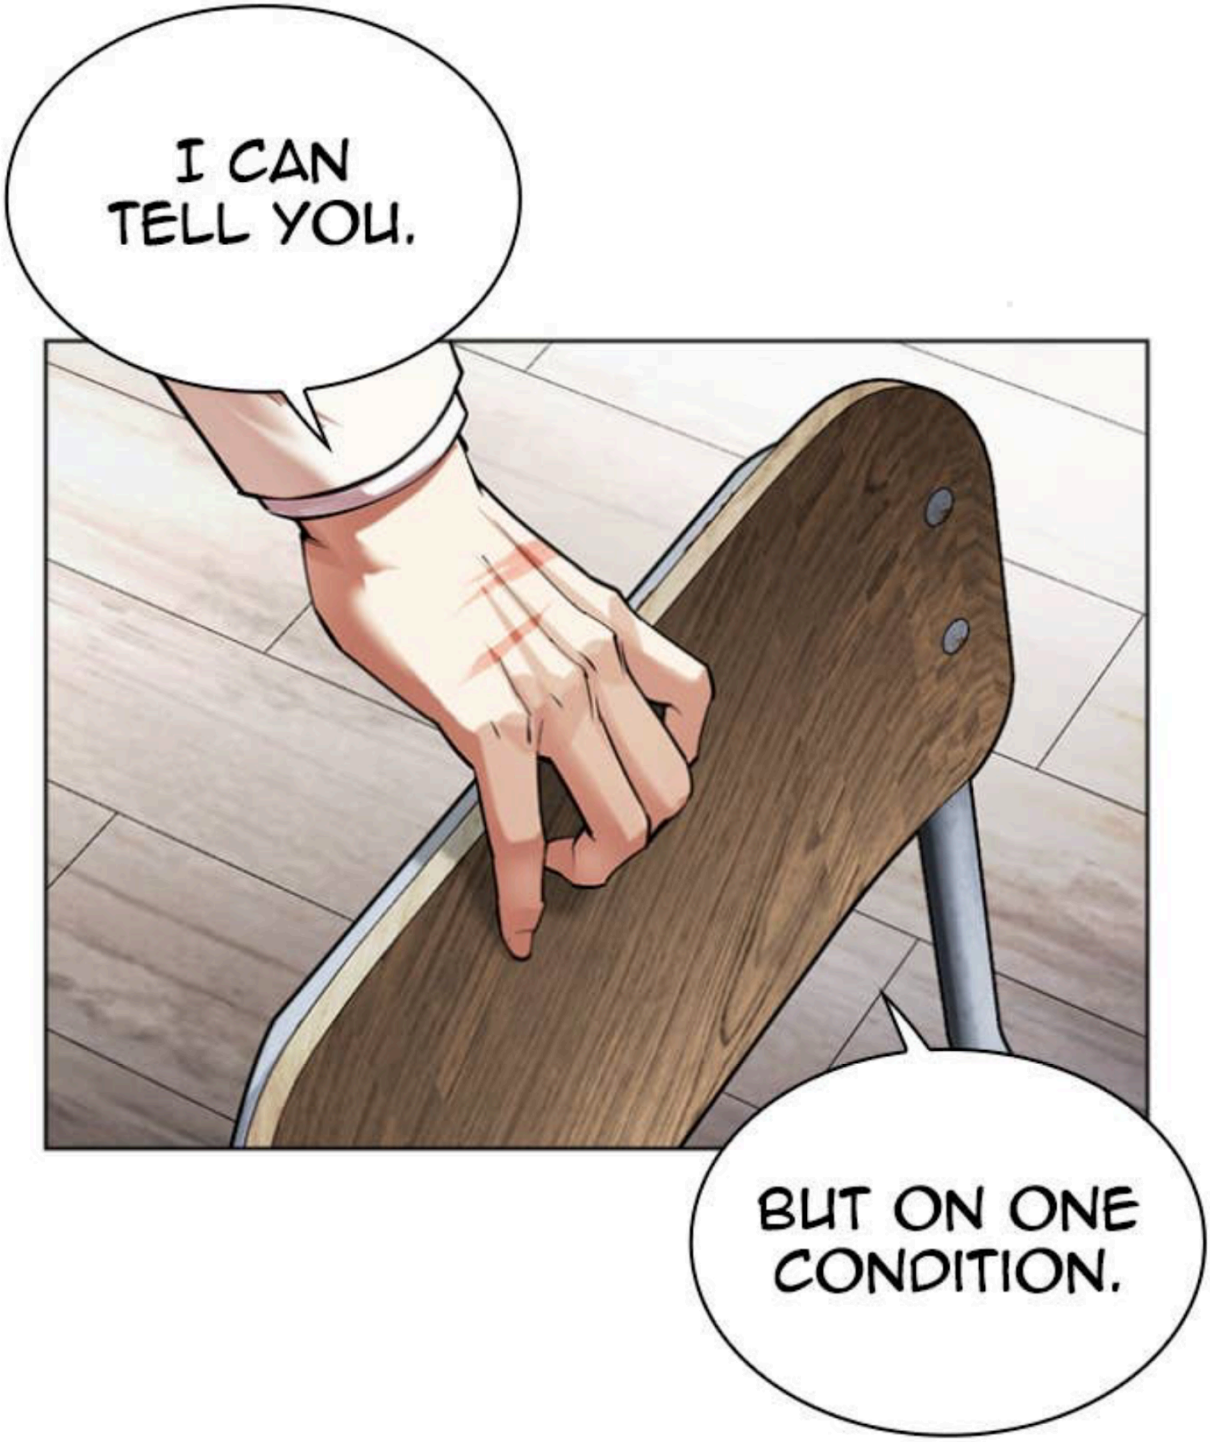

CHARLES CHOI IS FIRST?
WHAT ARE YOU TALKING ABOUT?
YOU'RE MISSING SOMETHING VERY IMPORTANT RIGHT NOW.

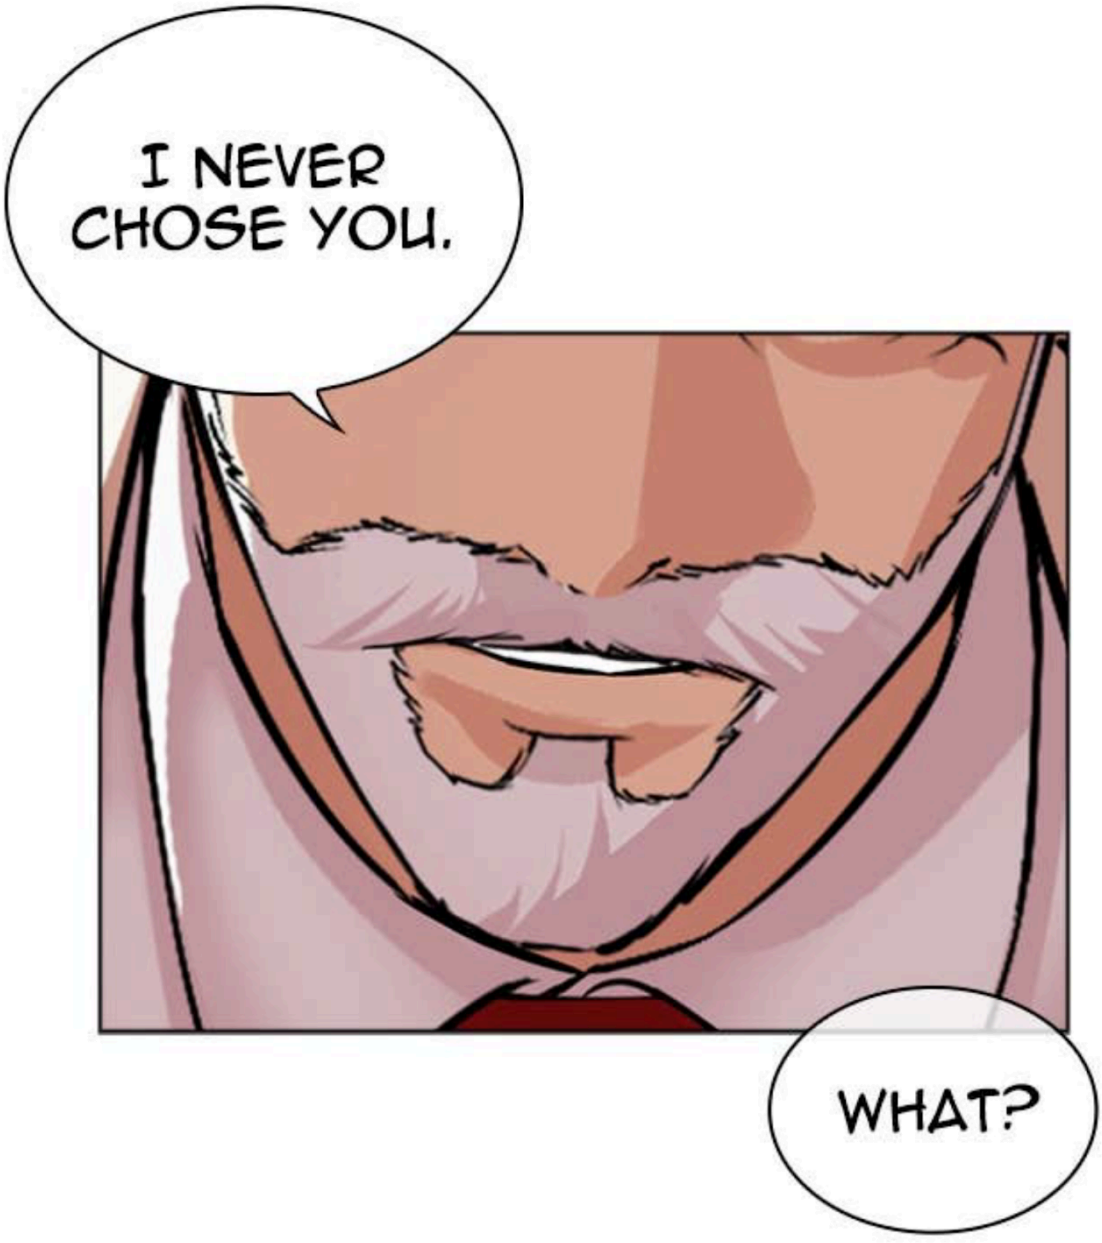

Charles Choi [Elite] completely understands the nature and working of the Two Body System. It's interpretable whether he developed it [Interpretation 1] and its sub interpretation or Studied it [Interpretation 2] .I will analyse both.

Scans [Elite awareness] :

HOW DID YOU CREATE THE TWO BODIES?

WHAT'S THE SECRET BEHIND THE TWO BODIES?
DID YOU REALLY CREATE MY SECOND BODY FOR ME?

I CAN TELL YOU.
BUT ON ONE CONDITION.

I NEVER CHOSE YOU.
WHAT?

This obviously means that Elite understands the mechanism behind the Two Body and that (at least) Daniel believes he made it. Also observe,that Elite doesn't contradict Daniel on his having developed it but does on Daniel having been chosen (By Elite).

I'd like to raise a point before proceeding further. A scientific phenomenon is a phenomenon that can be described and investigated scientifically. Under that real definition,relative to the fictional world of Lookism,the Two Body system is a scientific phenomena meaning that it (in some ways) operates on scientific principles and laws. (Btw PTJ is proven to be a sci-fi nerd). Now,it's evident that the common and scientific understanding of the scientific laws governing Lookism in Lookism is the same as our own. But the Two Body system contradicts als,on every known (major) scientific and psychological principle .

This phenomenon ,contradicts :

1	One consciousness exists across two bodies	Neuroscience, cognitive science	Consciousness is associated with the brain
2	Consciousness transfers between brains	Neuroscience	No known mechanism allows this

3	Transfer is instantaneous	Relativity, physics	Information cannot ordinarily propagate instantaneously
4	Transfer works regardless of distance	Relativity, information theory	Implies distance doesn't constrain information transfer
5	No apparent energy expenditure in consciousness transfer	Physics, thermodynamics	Physical information processing requires physical resources
6	Memories remain perfectly continuously between bodies	Neuroscience, information theory	Memories are physically encoded in neural systems

8	Two brains apparently share one mind	Neuroscience	Separate brains normally produce separate conscious processes
9	Daniel experiences both bodies as himself	Cognitive psychology	Humans develop the sense that their body is themselves. Total changes let alone new body can effect that sense and cause dysmorphia
10	No serious dissociation occurs	Clinical psychology, psychiatry	Beyond aforementioned Dysmorphia,two bodies can cause disassociation between one's body and one's mind

11	No identity fragmentation occurs	Psychology, psychiatry	Two bodies don't produce multiple sense of selfs
12	Immediate or near motor adaptation	Motor neuroscience	Each body has different proportions and physiologies. Especially,since OG was weak while SB is superhuman.
13	Continuous consciousness without Daniel subjectively sleeping	Sleep science	Humans require sleep and rest for normal neurological functioning
14	One brain sleeps while consciousness uses another	Neuroscience	Consciousness depends on the functioning of the brain
15	Starvation or overfeeding	Nutrition, metabolism	Growth requires nutrients and

	doesn't affect SB		energy. Overfeeding lead to development of adipose tissue
16	Medical interventions cannot normally alter SB	Medicine, pharmacology	Physical tissues should respond to physical agents
17	Consciousness survives when neither body can host it	Neuroscience	Consciousness exists without a brain
18	Daniel experiences and interacts with dream-like environment	Neuroscience, psychology	Structured consciousness and interaction exists without ordinary sensory input. Dreams are generated without necessary

			cerebral activity.
19	He interacts with an apparent future self	Physics, neuroscience	Implies communication across time
20	Future information reaches present Daniel via SB consciousness	Information theory, physics	Information apparently comes from the future
21	Future information can affect later events	Causality, physics	Causes Bootstrap Paradox
22	Communication occurs without normal sensory channels	Neuroscience, information theory	No known physical communication medium

Taken together it means that the current philosophical,scientific and psychological understanding in Lookism verse is false. But,Elite single handed managed to reach a level of revolutionary understanding in all those fields [Philosophy+Physics+Biology+

Pharmacology+Psychology+Information/Cognition/Communication+ Miscellaneous] to be able to explain and understand the phenomena of Two Bodies. This means that Elite advanced all those fields by centuries through scientific investigation and personal inference. Under the other interpretation,Elite managed to infer that the current scientific understanding in all of those fields was fundamentally flawed and through inference and investigation managed to advance it by centuries. And could even personally apply that understanding to create a revolutionary phenomena. All the while,dealing with the bias of the current understanding. Moreover,it can be interpreted that Elite create Daniel's SB using the king's body parts which merit a stupendous degree of creativity and associative thinking to artificially join together studying biological structures without deficiencies and moreover with a superhuman structure,making it evident that Elite surpassasses current (lookism) understanding in fields such as gene editing

This means that Elite stands far above all semi realistic,and even many unrealistic characters in Crystallised Intelligence,Fluid Intelligence,Psychology,InfoGathering,Thinking,Inferences,Intrapersonal , Knowledge Applications,Creativity, and associative thinking . [Last two specific to second interpretation while initial to apply to both]
