Induction+VSI+Calculation+WMI+PSI+Strategy+Numerical Reasoning: Was able to control Romantica's attack by manipulating the air currents due to her focusing on power and speed, causing her to neglect control said air currents. Uses two simple spells, grease and fireball (Multi-casting requires acute concentration and calculation ability), as well as the law of action and reaction, to launch himself fast enough to catch up to Ajest. He even calculates the speed at which he is going, being 327 kilometers per hour. (Chapter 5 in the WN; Chapter 6 in the Manhwa)
