Processing Speed Index Feat

Well this whole Feat is base on WMI Feat of Izuru Kamukura which would be explained more in detail here,
The conclusion made in WMI would rather be similar in PSI because it's literally both categories that would equal CPI but rather we would focus on how fast really did Izuru process the said information by recovering it.
It's a simple thing really, the moment Izuru woke up, his eyes, body moves, the information here gets recovered instantly it's an insane PSI Feat here's the basis of the PSI Feat and scan, at 0:02 and we get to confirm this by Izuru Kamukura himself at 4:40 timestamp which he affirms everything from on point within the document and it's validity and all as well as confirmation of the said feat itself being explained

Izuru Kamukura Compilation (SPOLERS AND GORE WARNING)

Pasting this scan from WMI Feat

Izuru had remember his talents that had consists with these particular talents not only that his past memories altogether, remember Izuru is an old man but I'm not yet to determine his age if I'm going to estimate it around 60 or 80 at least,

He obtained the talents of every single student to ever attend Hope's Peak Academy and every notable skills known to humanity that has been researched on, turning extraordinarily gifted in every parameter related to comment along with becoming the world's greatest absentee, affluent progeny, agitator, analyst, animator, art, archer, baseball star, blacksmith, biker gang leader, bassist, bear hunter, bodyguard, botanist, boxer, breeder, candlemaker, charcoal burner, children's literature writer, clairvoyant, confectioner, cook, detective, drama, discus thrower, essayist, falconer, fanfic creator, farmer, fashionista, folk story collector, gambler, gamer, gourmet, gymnast, hitman, homeroom, housekeeper, imposter, judo master, karate master, light novelist, literary critic, lucky student, martial artist, make-up artist, manager, mechanic, moral compass, marksman, murderous fiend/serial killer, musician, mystery fan, mystery maniac, nailist, neurologist, nurse, oral inheritor, pet groomer, pharmacist, photographer, physicist, idol, P.E, poet prince, programmer, pyrotechnician, rock climber, shougi player, sci-fi writer,

secretary, secret agent, social studies, soldier, street fighter, street performer, student council president/vice president/secretary, surgeon, suspense novelist, swimming pro, swordsman, tea ceremony club member, team manager, therapist, traditional dancer, weather forecaster, wrestler, writing prodigy, writer, yakuza, yo-yoer and other unmentioned talents that have been researched several hundred years before the events of the first Danganronpa series even started. His faculties are such that he is able to accurately predict every move his opponents would make, casually incapacitating an enemy armed with a handgun and a chainsaw in such a way that his assailant would fall upon his own weapon and he is also capable of adapting, mastering and learning fast to the point where if somehow an unknown language is spoken to him, he instantly understands and learns the language (he should also have known and is fluent in at least thirty, if not, all languages known to Earth with his talents), not to mention that he also has his analyst talent to make the learning even much easier. Due to his gaming talent, he excels at creating battle strategies and tactics, in game and for practical uses as well, along with his analyst talent, which makes predicting and creating strategies easier and more effective. Knows numerous top-secret information only known to police, investigators, few agents and officials. Can technically use any weapons that the Ultimates and most people were seen to be using, as he has complete mastery of the use of various and most weapons that were seen to be used due to having all talents, most notably military weapons as the Ultimate Soldier and Ultimate Prince, skilled at handling scalpels as projectile weapons by using them like throwing knives as the Ultimate Neurologist, master at using swords as the Ultimate Swordsman or being able to mimic others' skills of handling weapons as the Ultimate Imposter, Ultimate Chess Player“

-The process, Izuru had to process and calculate information stored onto his mindset and brain, past experience, past memories, past abilities.

-Izuru accurately knew this and was adapted to Hajime's body.

-Izuru remembered his memories the moment he woke up.

-0.00000000…1 MilliSeconds to be specific speed or lowest to lowest of the quantity of the number this is clearly an insane processing speed, very

overkill I'd say, It's very impossible to pull off not even LN Sora or Manga Dazai had done this.

Scans, https://www.quora.com/Is-0-00000000-1-1-at-infinity-exactly-equal-to-the-perfect-zero-or-are-they-still-unequal

I'm quite shocked how the WMI Feat and PSI connect to CPI Feat. That's that. Now then let's go over with the meaning to provide counter arguments.
"The PSI measures the speed of mental processing" Izuru processed his memories the moment he woke up.
"using visual stimuli and graphomotor skills" Visual Memories that he recovered instantly, and Monokuma states that Izuru can become the best Novel writer if he has written something.
"and is importantly related to the efficient use of other cognitive abilities" Same reasoning as before.
Categories that are set for determining his PSI, Memory Recovery, Long-Term Memory, Short-Term Memory, Memory Manipulation, Memory Processing, Memory Calculations, Memory Adaptability, Calculations, Processing Speed Index, Influence, Data Manipulation, Adaptability, Fluid Thinking, Overall Memory, Working Memory Index, Cognitive Proficiency Index, Emotional Management, Emotional Engagement, Emotional Understanding

Verbal Comprehension Index Feat

Literally all of his Talents which I already did list, which he had Ultimate Analysis and it's a talent that can analyze, comprehend information with ease, if not let's use Sonia's talent Ultimate Princess alright it may sound that but she comprehends different languages, economics, laws, that should be enough and as we might all know Izuru has all the talents of the Ultimate if you don't accept this I do have On-screen feats for Izuru myself for VCI, scans https://youtu.be/Pyqo4_rt4s0?si=S3aeiUXgKkGBcDcN Starts at 1:10 Izuru is fully comprehending the situations, and putting into simplified words that he fully understands each context that was given, and he gave a logical answer to Junko the entire conversation between Junko Izuru is fully comprehending each informations with ease if not complex since Despair in the Danganronpa

verse is a concept where Plot will decide it's the author whenever he wants to do something or not it's pretty bad but that's how Danganronpa works it follows as this was confirmed by Rantaro in Danganronpa V3 it's either Hope or Despair but this is where the Plot decides
VCI meaning for counterpart, explanations ahead,
Verbal comprehension "is the ability to interpret and apply words in instructions" Izuru directs the conversation between what logical conclusion can be in the talk between Junko and Izuru, he used his own interpretations what logical words that may come, and deductions, conclusions can form "and directions and verbally communicate ideas through words" Already explained, further explanations Izuru communicates just look at the scene he provides logical conclusions what he can easily perceive ideas from this 'Despair' is and the complex concept about it
Categories that are set for determining his VCI, Verbal Comprehension Index, Logical Thinking, Fluid Intelligence, Emotional Management, Emotional Engagement, Composure, Emotional Endurance, Data Analysis, Observation, Cold Reading, Tactical Analysis, Self Awareness

Afterword

Planning And Strategy Feat

Apparently there is a debunk in the doc here it would address this gladly, Debunk 1 With evidence CPI is valid check this out, Debunk 2
