Verbal Comprehension Index

1. Comprehensions

Comprehension Subtest Measures Conceptualization and Verbal Reasoning, Verbal Expression and Verbal Comprehension.

FRIEND has shown many times What Level did he Reach In Establishing Moral Values Verbally in his Cultists, for Example:

Back in Chapter 8 Kenji is Walking With a Cultist in the Street, he asks him Some Questions Regarding Some of the Cult's activities, the man Tries Ignoring Yet Kenji is Still Going, The Man Is Mad and he starts Saying things Like "If You Want to Know, Open Your Heart" "If You Wanted To Know Entrust Your Heart", and Other Sentences in the Same Context Kenji Couldn't Understand, Once Kenji Shows the Cult Symbol the man says "If You Reached Here Then You are 1 Step away from FRIEND", "It's one Small Step for Man, One Giant Leap For humanity".

One Chapter After "Chapter 9" FRIEND is Gathered With Some Cultists, he Says "One VanGuard of Hersey Was Purified", "Many People Who Preach False Doc-Trines Shall be Purified", "The Cosmos Have Began to Chose Their {True Friends}" again Correcting Mistakes / FRIENDSHIP Concept this is SOCIAL-KNOWLEDGE FRIEND Has Complete Understanding Of.

Another Time FRIEND Was Talking to one Of his Close Followers "Chapter 212", FRIEND Asks Him to Reject/Purify /Banish Him, The Follower tells FRIEND "This is EVIL isn't it?" FRIEND Answers "There is no GOOD or EVIL in My Universe".
FRIEND Has his very Own Moral Values That he Made Himself, Even though They Existed Before Him Like FRIENDSHIP, Good / Evil, Aggressiveness and Competition as We see in Chapter 186, 187 And Too Many Other Examples Of Another Social Situations FRIEND Caused its happening Showing us how deep his Understanding Of those Has Reached.

Having enough understanding of Particular Concepts I.e FRIENDSHIP , CURE , PURE *to the point of redefining them:*

A. FRIENDSHIP:

The Most Important Concept that Friend the Whole Time is trying to Establish in almost Every time he or One of His Cultists Appear They Mention , In one Scene at Chapter 9 We See Friend in a hall With A lot of People with him in a Meeting he says

"*One of the Heretics Were Purified , We (The Cult) are not done Yet we will Purify The Entire Existence , The COSMOS have began to Pick Their True Friends*"

How he Uses The FRIENDSHIP here Maximisation of the WORD Again, is around understanding Of He Manages his Cultists Using This One Word Greatly through the Manga.

The COSMOS have begun to Pick their New Friends is what we want to Focus On here.

He says to the Audience That The Existence Has its OWN friends "The Cult" and its Finally starting to Tendencies towards Them Re-Confirming the Concept In Everyone's Mind and Giving it a meaning From His Own Too to a Huge Extent yet Effecting everyone with-it who are also Understanding This Concept he Re-Made.

B. Purification:

As For What does FRIEND preach for its meaning, It's About Making the WORLD CLEANER By Simply PURING "Killing" Those Who are Not CURED "Cure is for Later" We see that Many Times

Where one of the Cultists is speaking with a detective who has been deducting about Friend and the Cult.

After The detective tells Our cultist about how far has he gone at his work the Cultist feels it's his Job to "Purify" the Deductive due the defending mechanism Friend Made in each member of the cult

Our Cultist kills the Deductive with a type of nails that had a poison in it , after the cultist KILLS The Detective he makes a call and says that he killed the Deductive due his knowledge about the cult and Friend saying that he PURIFIED him.

C. Curement:

Friend uses this concept to his Cultists as a Sign of them Going the Correct path by joining the cult.

In a cultist POV a Cured person is

Someone who was guided by FRIEND towards the correct path, a person who is a Friend with the Universe, someone who brushes his teeth etc. Every "Friend" is a Cured person.
In one scene he is In a 1 on 1 Secession he had with a Commoner he asks him to say he is dead 10 times , the man does that once he does he looks-Up and Friend asks him what does he see , just for the man to say "I see light"

Friend has "Cured" the man.

How Do We Know that, since later When a GROUP Of People are Sitting With FRIEND As they ask him
"What does being CURED mean?"
He says " to be With me."

All of the three above are Concepts FRIEND Re-made for his Cultists Which understand differently when they hear it from him, and they were completely abstract existence which he observed, understood and utilised, After Understanding how to make people Perceive in the way he

wants which requires lots of Verbal Reasoning.

2. Similarities

Known Also as "Fluid VCI" the subtest measures the Individual's ability to Think Logically, Verbal Concept Formation and Most Importantly Verbal Abstract Reasoning.

Abstract Reasoning Follows Similarities By Necessity, Therefore Any Similarities Feat is Abstract Reasoning Feat.

(Verbal deception Requires Similarities Yet It Will be More Focused on in Deception Doc).

FRIEND Has Shown this Both Himself in his Speeches and Generally Directly Talking to Someone and Through the Cultists /Followers.

Ch 236
FRIEND Is talking to the Whole World. He says "Hey Everyone, Good day people of the World" "Do You all Remember...The Bloody New Year's Eve?...2015? Which is the last Year of AD, a lot Of People Died From the Virus it all Went according to my (Prophecies), and now aliens are invading, all Exactly as My Prophecies, The World Never Recognized My Genius I AM NECESSARY, this world is NOT." "All the Prophecies are Lies, I Did them all" "GOD Made this World in one Week, So I will End it in one Week" "FareWeel Everyone"

This Whole Speech Consists Of All Similarities Elements Yet the GOD Sentence "GOD Made this World in one Week, So I will End it in one Week" This Sentence in Particular Has The Most Amount Of It.

If You did not Understand What I mean, FRIEND Since the Very Beginning Of the Manga is Establishing the Image Of him being a God, he has Shown "Or Tried To" Show the Same Characteristics Of Monotheistic Religions God, Here is a Quick Break Down:

1. All Knowing / Omniscient

Through the Prophecies, He Planned Them Yes, but For the Audience in the 20th Century Boys verse people were told that he just predicted them, They Did Not Fully Realise That he caused them.

2. Self-Sufficient / does not need Resources to Exist

Like We See in the ReBirth he was in the "Grave" all that time Shown To People YET Never Were Fed Nor Drank He Just Sat there Everyone Thinking he is dead.

3. Omnipotent / All Powerful

Bloody New Year's Eve Were he Stood Against the Robot, We Know That Kenji Has Used Dynamites But, How Did The People in the Verse Perceive It? They Had No Way Of Knowing Kenji Had Used Dynamites They Just Had A NON-CLEAR Information About FRIEND Being The One To Stop The Robot As Well As The Viruses.

4. Omnipresent / Everywhere

FRIEND Never Shown this directly yet He Shows it through his Followers, since they are everywhere anything Would Happen around them that they see deserves Telling they Would Tell.
"This one is again not Shown greatly also its done passively yet it gives the same feeling of "He Will Know If I did it""

5. Wisdom

This one is related to the Cultists More than Anything, Back in Chapter 6 One Of the Cultists Tell ask him about What Does being Cured Mean, he answers "To Be With Me" Here anyone Who sees FRIEND Answering the Questions Easily Would Report if asked Or in any general discussion that

FRIEND is Wise.

Note - These are also Really Good Manipulation Feats, Establishing the Image Of God in everyone's Mind Of the Public is Really Good direct And Mass Manipulation Feat yet the Abstract Reasoning Part is Heavily Shown in The Speech.

{This is Explained better in the Manipulation Doc}

He Knows how people perceive him, and shows this understanding Of that perception through this Similarity, Just like God created the earth in 1 week, he would end it in one week, announcing himself as the god of destruction and an antichrist.

Furthermore In Chapter 6, Someone asks FRIEND Where Did We Come From? FRIEND Asks Everyone to Close Their Eyes as he starts Describing a Place, however Regarding The Word Picking here we want to Focus on his sentence

"**I am Collins, From My Location on the Moon Orbit I saw ArmStrong and Eldon Walking on the Moon, I was Close But I went Back With-out....I am Collins**"

Very Late in The Story FRIEND Says this again, In his old classroom In Chapter 132 This time he Completes it "I Sat Spinning around it WATCHING".

The Verbal Abstract Reasoning and the Complexity And the Similarity in this Scene is Undescribable.

The Limits:

Both Couldn't Join Sub-Groups, Both Are In the a main group with Their Relatives, YET Neither of them Could have Reached what is Beyond that, Join the MORE important group, the one that SHALL be remembered and which they were looking for.

- For FRIEND

He Couldn't have Joined {The Kenji group}, he tried to get their attention Few times yet always was that one background Character, the one who No-one wanted to Talk with, the one who has inner thoughts about Others in that Group, yet couldn't have made them care enough to look for him back, He has been watching Kenji's group laughing, chatting, and enjoying Together, and all he could have done was spectate from a far, he never wanted to ask Directly, But get their attention Through Indirect means.

- For Collins on the other hand

He Couldn't have joined the Group which consists of {Astronauts who walked on the moon} he tried to get there, yet could have not reach that far, he couldn't leave the Realm of BackGround Character, he didn't get the same popularity, fame nor Relevancy as his relatives, like Armstrong for example, he obviously had inner thoughts Mid-flying around the moon, while watching the Others walking on it and having expectation for the Future from his Current position.

BOTH couldn't reach their goal; Because of their conditions which they couldn't control.

The Emotions:

A/ *Anger; the Frustration generated from the fact that they were so close, it literally Few more steps and they are in, but again there are extreme conditions that stopped them from reaching.*

B/ *Sadness; this one is quite obvious, for FRIEND, he managed to Observe all the fun they are having, Tried to make them notice him, but failed, he never got the Recognition he seek-ed for, While Collins, Was Few steps away from getting his name written in book of history, from popularity, success, yet now, no-one knows bro, did you know who is Collins before reading this feat even?*

C/ *Disappointed; The Expected has Failed, It should have been me too! type of Sentence at their minds once they see the line between them and the Groups they Wanted to Get in.*

D/ *Shame; feelings of , distrust, pain, exposure, powerlessness, and worthlessness Were generated in side both FRIEND and Collins in their contexts, as FRIEND Saw that all his tries to get in the Group faced ignorance, Collins saw that all the effort he spent to become an astronaut faced a huge Fail compared to what was possible.*

{ I Want to say Compassion too tbh (: but Idt Collins by necessity felt it}.

The Conclusion:

- FRIEND: **None of his classmates could have remembered him, neither nor cared about him in the first place, those who he wanted to Join were too busy enjoying each other, to look at him and realize that there is someone trying to get our attention, eventually he was left in the images taken and was forgotten**

- Collins: **Do I really have to Elaborate how his life goes compared to The Other two who could have walked on the moon? Those who got their names in books of history as Humans who walked on the moon, were way way more Known famous etc. the success they had absolutely Topped and Covered his existence, Just like FRIEND, he was forgotten, d00d did you even know who Collins even before?**

- Both Were **Forgotten**, FRIEND Was Forgotten, And Collins Was forgotten.

FRIEND Could have seen these Similarities and broke it down in 1 Sentence, "I Am Collins".

In Case You Didn't Know Already, FRIEND Back Then Was 9 "Might be 8 years old" And The Transition From a 9 To 18 is Around 3 Times Higher IQ {**It Can Be Higher**} *Which Means that 21 Years Old FRIEND Should Be Way Better At Similarities, Regardless It's Great Feat.*

3. Information

This Subtest measures general cultural knowledge, long-term memory, and acquired facts

FRIEND Studied under a Religious Cult For Quite Some Time, As We see at Chapter 13 From the Detective Attempts to know about FRIEND and his Cult He Encounters Someone "a Boss Of a Cult FRIEND Caused the Death Of Its Leader" He Says that Both the Cult Leader and FRIEND Studied under The Very Same Cult, Which Means that they Both Completed their Education There.
Also at the same Chapter a Woman Mentions That FRIEND Has Studied at Either a College or a Special High School.

Adding to that we see at Tomodachi Land's Newspapers, which Matched the very same newspapers back then, they held dozens of cultural info, such as how much was the yen's price compared to the american dollar, life's of popular people and their last developments, as well as many other categories such as sports and world-wide news which would be in ANY average newspaper, Which Means he has Been Reading newspapers regularly, through his perfect memory this adds up alot to his stock.

Tomodachi Land is also a Great Example To Show FRIEND's Perfect Memory "Chapter 147" and Memory is One Of the Main Factors in

Information Subtest.

His Successful Experiments on Kanna Before Her Birth Is Bioengineering to a good extent.

4. Vocabulary

This Subtest Measures Word Usage, Verbal Concept Formation, Word Knowledge and Verbal Fluency.

For Word Knowledge adding to what is there in Information subtest, We see on Chapter 104-106 an accurate Replica {Stated} of FRIEND's old house, which contained couple hundreds of books that expand to many fields, lots of it is mangas however there is a huge portion that is about scientific subjects and so on, we see FRIEND reading some of those ON-Screen on chapter 232, and since he has perfect memory, we know that he for-sure memorised all of those to smallest detail.

He said that he will get a book translated, a book that contained his "prophecies" into 7 Different Languages, which means that he at the very least knows FEW dozens of words in these languages. {ch159} these languages are English, Frech, Spanish, Italian,German And Chinese.

For Word Usage and Verbal Fluency We See At Chapter 212 Absolutely Gorgeous Example Of It

What FRIEND Did Was:

Get multiple records of a girl named Kiriko and her ex partner chatting.

Get rid of her partner for good.

Seduces Her.

Now, How did he Seduce her via the records?

Friend basically played every record, and picked which sentences the partner said that left the biggest emotional reaction on Kiriko. In order to do so, he had to perceive the entirety of her emotions, but only using sound recordings. This means he had to read her tone of voice, when and where she stops her sentences, how she formulated them and what specific words she used. He had to balance out his words too, because she might suspect him and feel like there's something wrong if he used all of the partner's script, but if he didn't use it to the maximum limit his plan would be useless. We can see the visible reactions she had when he said specific words and phrases that she heard before from her partner like:
"People can become what they want to become." "It's not too late even now, you have to keep your motivation going."

We can see her emotions change once he says similar words, he is fluently using specific words that he reasoned to have a specific emotional impact on Kiri, abusing her insecurities and struggles (abusing the fact that she is extremely sad about because her partner just left her, etc), but of course he changed many sentences for multiple reasons. One of these sentences was "I"ll do anything in my power for you.", adding the words "as a friend.". He was enforcing his philosophy and concept of friendship into her subconscious while also reassuring that his words wouldn't come out suspicious since he is changing them to a certain degree.

For Verbal Concept Formation

FRIEND Has Shown many Things in that Regard, Like his Redefining Of FRIENDSHIP "after Understanding How People Perceive it OfCourse" Redefining Banishing To Killing / Purifying To "Make the world PURE Place" Which Is Empty From NON-Pureed Creatures Who Don't Accept Being FRIENDs With The Universe, By Banishing them, And Many Other Concepts.

Adding His OWN Date "3rd Year Of FRIEND" - Chapter 177, Making it the Official Calendar For Everyone, Instead Of AD Using his "Resurrection" as New Point Where History Restarts From.

Also the Ability to Link Concepts Plays a Part at Verbal Concept Formation, Not Only FRIEND Could Have Made His Very Own Definitions Of these Concepts and Make People All Over The World adapt to it, He Managed To Create a Compelling System Out Of them Like The Mechanism the Cultist Goes Through.

1. Sick "Needs Curing"
2. Being Cured "Opens Two Possibilities"
A. Cured "Joins the Cult"
B. Needs to get purified "Went against the Cult / Did not Join"
3. A - Pawn like those used at Double Bombing Plan "Ch30"
3, B - Pured / Banished Or Needs to Be Killed "Like Donky at the Science Lab / Any Example Of a Cultist Went against the Cult"

This System Was Created Since he was a Kid, Changed After Forming the Cult, Changed Again after The Bloody New Year's Eve and Changed again after the ReBirth and Everytime The System Grows Better FRIEND Managed to Create this Flexible System Of Concepts as a Kid {proven By Yamane at Chapter 132} That they Used to Use These "WORDS", Which Gives Potential For The Existence Of Another Concepts That Happened Off-Screen.

There is some Off-Screen Concepts Yet We don't see them Enough to get a Clear Picture Of What do they Represent
Or Simply
Not Impressive.
