Friend's Feats Doc

Name: Tadonobu Katsumata
Titles: Faceless antichrist, The World's Christ, Faceless monster, The world's president, the devil who never existed, a 20th Century boy, The Imposter, Collins, Faceless antichrist, Friend.

Before starting:

This is the perfect edition of 20th Century boys, Perfect Edition Friend, and not Og version neither theory, this doc is based on the belief that Fukubei died as a Kid in 1971 and Katsumata replaced him after that. That Katsumata carried on Fukubei's legacy and actually caused NBOP to happen alongside with BOP.

The Og version ending left too much room for any theory about Friend's real identity, The reader is left with his imagination, but the most popular one is that Fukubei and Katsumata were taking the Role of Friend until Fukubei died in 2015 By Yamane on Ch 133.

Another popular theory suggests that Friend is Katsumata all this time and that Fukubei is a character Katsumata mass manipulated the entire verse into believing it existed, Fabricating the existence of Fukubei as a whole.

But again this doc is based on The Perfect Edition of the story, Katsumata took Fukubei's place after Fukubei died in 1971.

How would the categories function:

FSIQ, SQ, EQ: Understanding & Perception, Psychology - Blue

EQ: Management & Engagement - Red

Planning / Strategy / Tactics / Foresight / Info gathering - Yellow

Deception / Manipulation - Green

Thinking / Reasoning / Rest - Black (white if your using dark mode)

Context Will be black (white if you're using dark mode) coloured too.

Often used abbreviations:

BNYE = Bloody new year's eve
CA = Church assassination
TML = Tomodachi-Land
PV = Perfect Vision
SHV / EV= Shinjuku Visualization / Extended vision
CCM = Cult Creation Mechanism
BOP = Book of prophecy
NBOP = New book of prophecy
Kiri = Kiriko
Sada = Sadakiyo

Friend's Ideology:

Ever since his old 'friend' died, Katsumata decided to take revenge from Kenji {end of the doc} while hiding the fact that 'fukubei' died carrying on his legacy and dreams thus Katsumata shall IMPERSONATE Fukubei to perfection while constantly making use of the fact that people think he {Katsumata} is thought to be died

In order to do so Katsumata shifted his behavior completely as he was easily the shiest person ever, meanwhile Fukubei was the absolute opposite thus self regulating himself into developing charismatic leadership persona with completely different characteristics and behavioral patterns putting himself in the lead of everyone in nigh-all social contexts and a leader-like position thus concealing the fact that Fukubei died from his closest friends and relatives including Fukubei's very own family and Yamane etc whom spent increasingly MORE time than Katsumata with Fukubei reflecting all forms of Understanding regarding Fukubei despite spending with him way less time than all his close circle whom couldn't notice Fukubei's death. Thus adapting to such a nigh impossible novel complex situation in such a young age flawlessly leaving progressively bigger room for more unrevealed potential.

Via quite limited amount of observations on 'Fukubei' he still could have understood all his traits from high ego to the shizo acts up until his will to Join Kenji group including very complex emotions explained within Collins' similarity {end of the doc}

All that was done by 11~12 years old Katsumata

{ EQ: Engagement, EQ: Understanding, Perception, SQ: Self regulation, Social adaptability, Charisma, Leadership, Acting Skills, Concealment, Planning, Inductive Reasoning Observation}

Bloody New year's eve:

This is pretty long and unbelievably complex One due it Consisting of endless Sub-Strategies and tactics that seem "luck" from the first look.

making up to 2 / 5 (+) of the entire story.

At the end, there will be a summary of WHY all these strategies are part of this one big plan and some strategies are parts of another strategies that would together Formulate that plan

1. *Pawning Sada:*

{*From 1970-2000*}

Sada {known as Sadakiyo} is a very isolated person, he has been bullied by many students in his school, he is also known for his weird habits which include wearing a mask AND talking to "aliens" on the roof.

The Profiling would be, Sada is:

- *Shy*
- *Lonely and too Isolated*
- *Easy to Control*

Friend went to Kenji group's secret base, and heard footsteps coming from outside. After seeing him, he recognized him as Sada.

As we see Friend's inner thoughts. We can infer that he is managing his emotions WHILE talking to Sada, as he has Superiority Complex, he views himself as a person who is above Kenji and his group, being "Close" to Sada disgusts him.

Friend shows Sada what he has in his hands, and it turns out that it's a book that Kenji has been writing with his group, talking about the future. It contains Kenji and his group fighting an evil organisation which is willing to destroy humanity and end History in the 20th century. This would be Friend's plan later on.

Sada is getting less shy and shy, with each interaction with Friend. As he is used to being bullied by everyone and hit whenever he is close to someone. Hence due Friend simply talking to him without any form of Phisiqal or Verbal bullying, Sada feels happy, and decreases his defences slowly.

Friend asks him to take-off his mask, and Sada starts doing it. Friend is still managing his emotions here, as he can see his inner thoughts, how he views Sada and wants him to get Quicker.

After he took-off his mask. Sada asks Friend to be friends with him.

We see his inner thoughts again here, Friend says talking to himself "I will never be your friend", yet he never expresses it directly, showing how much he has NO interest towards Sada.

Sada asks him to call him with his first name, as Friend rages at that, then Sada asks if he can call him with his family name, as he says no again.

Friend Makes a huge decision now, saying "I will be your friend"

But doesn't Friend hate Sada? Due to his Superiority complex? Yes but he saw a huge opportunity and decided to not waste it, he has few good

reasons to do that too, which are:

1/ Weak persona; he will not reject whatever Friend asks
2/Isolated; he has no friends whatsoever thus

A/his time shall be facilitated to Friend
B/Would be fairly easy to Manipulate and hard to be "saved".
Now Friend shall start Pouring too much time and effort at Sada, love bombing him thus having almost abstract-like control on him.

But firstly, he asks Sada to Call him Friend and not with either of his names, and the reason here is quite interesting;

Usually in The Shonen Mangas/ Animes / Comics And Generally Entertainment MEDIA, Which Children Would Watch (Adults Were Children Obviously) the Hero is The one Who Uses the Power Of Friend-ship, Which Would Be the Reason They Are Winning,

They Are Doing it as Friends -----> they are the Heroes
They are cooperating -----> They are the Good Ones

Friend could have seen that Hole As We See in The Same Chapter Both in school and in his house he Had Many Mangas / Comics to read
After observing that abstraction and Comprehending it and how it affects humans and how they generally perceive it. He tried to Utilise it.

I am the One Using Friend-ship, Thus I Must Be True, I Must Be The Good Guy, The One Who WINS at the End, The One that People Like etc.

Now Friend would be comfortably able to infer that Sada is "Good" or at least tend to be good most of the time, he lived a hard-bullying filled life, this type of people are good, have higher empathy etc. Due to their past life. They know how it is to be frustrated, mad whatsoever more than anything, Hence after all that, He Asks Him To Call Him Friend, not only Manipulating him For the Short Run, as the burst effect will start showing in the form of "I have a Friend OMG! Me? No way", But Also For

the Long Run as He Would be a Good Pawn as Said earlier.

He also tells him that he will make a thing that actually happens {the new book of prophecy} which is Friend's copy of BOP.

And for the Rest of the time, Friend shall keep only and only keep Sada Isolated and love bomb him, listen to his problems and tell him Solutions for it etc.

We see what level that love bombing effect reached with Sada in ch 107, the only things he sent to his teacher were "happy new year" type of card AND messages talking about Friend, and I quote him saying "I am happy, very very happy" and "I have a Friend!" "I Found a good friend" {Remember the Friendship abstraction? Yea this is its effect}. Proving that Friend was indeed love bombing Sada.

Chronologically after this love bombing, Friend started making use of Sada, who would hold a significantly important Job for the Plan, as he was a very important part of Kiri's seduction.

{FSIQ: VCI, EQ: Understanding, EQ: Perception, Psychology, EQ: Management, Abstract thinking Non-linear thinking, Inductive reasoning, Planning, Strategy, Tactics, Foresight}

2. *Causing Yamane addiction:*

There is only One goal for this Strategy which is to make Yamane addicted to virus creation that he can't stop until it's too late.

1/ Friend puts Yamane in his close circle
2/ Allows him to Plan / Strategize with him in the book of prophecy
3/ Constantly shows him "Miracles" and that Friend is superior to Others, Why? To make him believe in Friend more and his prophecies.

We don't see stuff to infer anything else about this relationship thus it

caps here.

{SQ, EQ: Understanding, EQ: Management,, Planning, Strategy Tactics, Manipulation, Deception}

This is where Kid Friend's Role end on BNYE {besides Kiri's seduction}

3. *Manipulating Manjome Tactics:*

As We Saw From Friend's ChildHood he had Encountered Him {Manjome} Before.

In Shorts, Kid Friend Caught Manjome's Intention After Friend Bent Spoons Manjome Thought as "Un-Bend-Able", After That Manjome Pre-Lie Of 1971 Met Kid Friend.

Manjome Asked him Whether He Would Love to "Work" With Him Or Not, Friend Ignores the Offer, yet Manjome Gave him a Card that has his Information On It Before Leaving.

Kid Friend Later Tells Manjome That He is Indeed Capable, Of Performing a Performance in The TV Show Manjome Works as a Scout For Talented Kids at, Yet the Show Was Cancelled Due The Judges Believing Friend has "Cheated", Which Caused Both Manjome & Friend's Reputation lots of Damage.

For Manjome - His Truth-Ful-Ness Is GONE, Thus He Lost His JOB and His Name Is Everywhere Linked With Both Failure and Embarrassment.

The Rest is mentioned at the end of the doc since it doesn't serve a tactical will for this specific strategy.

Years Later, Friend Using the Very Same Card Manjome Gave Him Pre Lie Of 1971, Finds Manjome's Place, as He Enters and They Start Talking.

Keep In Mind That Manjome Shows Very Annoyed Face This Whole Meeting and Views Friend as a Childish Person, Stuck at His KID Version Delusions.

Friend After Saying Things Knowing that Manjome Can't Comprehend, Engages On The Topic.

Manjome's Business is not Going Well Lately, Using this Piece Of info, Friend starts trying to Make His Side Look Shinier, Better etc.

He says "The Production Manager Did Not Say It's Going Well, Did HE?"

Friend Begins With Making Manjome Look at the worse possible position trying to make him doubt his own job, He Tried To Give Him The Idea Of *YOU HAVE NOTHING TO LOSE AND A LOT TO GAIN*, Making The Current Value Manjome at as the 0 Point Which He will give The solution Of leaving it after.

"But, I don't Think It's a Bad Speech" - "I Think It Will Get a Quick Return On the Investment" - " Have You Forgot The Example-Project?"

After Making manjome Perceive The fact that he is at 0 Now, He Gives a Solution, Why not join His PLAN? Friend Abuses The Fact That Manjome Knows His Kid Version, He Knows How Motivated By Anger and Filled Of Hatred This Human is, Making Manjome so sure That Friend is Ready to go-all-in Here, Nor Its FAKE-Facade And That He Is 100% Going to Do His Best to Accomplish It.

This is FRIEND's Solution - Work With Me and Leave This Sinking Ship.

After That Meeting, Manjome Became Friend's 1st Assistant, and Gave Him the Trust After Witnessing The Success Friend Had Since the Very Beginning.

Friend Made Manjome a Believer in Him Even though He Viewed Him as a Kid in the Body Of an Adult early on at the beginning of the meeting.

Something to note here, Friend has Three masks, he takes them and puts them on Manjome's table in front of him (One is kid Hattori mask, the other is the traditional one eyed friend mask, the third is the mask shared by friend and Sada.). He takes one of the three masks (The Hattori mask) and wears it. He then explains to Manjome that that is his favourite mask.

Friend here was trying to influence Manjome. He knows that he will always stick to the One eyed friend mask, but he needs to wear the Hattori mask for future strategies and plans. He explains to Manjome that the Hattori mask is his favourite, so he could find an excuse to wear it in the future. We will say why this move and why this mask is important in future plans.

{Linear thinking, Planning, Strategy, Tactics, Direct Manipulation, Logical Manipulation, info control}

4.*Kiri's seduction:*

Notes to keep in mind:

A. Kiri is Kenji's sister
B. Kiri saved Kenji from dying Couple of times
C. Kiri was the one taking care of the shop after her dad died.
D. Kiri lived with Friend at the same area back when she was 12.

When they were kids:

Friend has studied Kiri and gathered info about her for the purpose of Profiling, through Observation, he could have known that Kiri is compassionate.

Compassionate ; which he would also abuse later, yet he also abused it now, sending Sada to her to gather about her even more info, forming a Friendship with Kiri, fabricating interest in Biology, following what

Friend told him to do, as Friend is making Sure she would suit his plans for the future.

After info Sada provided Friend, Friend can comfortably infer this info about Kiri:

1. Responsible ; whenever given a task, she would finish it.

2. Would keep going on Biology field: the reason why he needs this characteristic is that bloody new year's eve is centred around a virus.

This virus will be unleashed everywhere and Friend will give Kiri the task of developing a cure for that virus, abusing 1 AND 2.

The reason why Friend wants to make that cure is to appear as a saviour at the end, making a cure in no time for the virus that is causing horror everywhere would make him look like that saviour.

3. She is intelligent, which would qualify her to make that cure.

Years later after this, he would start executing her seduction attempt, which was in 1994 aka around 14 years AFTER the profiling.

Its 1994, Kiri has a BoyFriend, Friend has been observing both for a while

{not Friend himself, but other people he sent as he wants to appear suddenly for Kiri, he wants the burst instant novel effect}

He sent men too many times to spy on her and her bf, cracking a few patterns about their meetings, he obviously hasn't sent the same man over and over again, as they will suspect him, he sent different people yet to the same place after cracking the pattern.

He told these men to record conversations between Kiri and her Bf, Observed these tapes in detail, and could have profiled adult Kiri and her boyfriend.

Later he via the tapes could have known her Bf is going to leave the region. And wants to take advantage of that.

He sent a man, who would be sneaky, unnoticeable, and generally hard to detect, the purpose of that is to wait until the man is leaving {he could have known the man is leaving via train} and our sneaky d00d will push him out of the train-waiting area to the train's path, killing him.

BUT since our sneaky guy is hard to detect and swift as hell, no-one really could have seen him performing that assassination.

Friend through this move, mass manipulated the people in the area into reporting it as suiciding attempt, socially controlling the info that will reach Kiri at the end of the string.

And as he wanted it to happen it did, Friend got Kiri Vulnerable and started Directly Meeting her. As we see in ch 212.

Remember the tapes he had been observing? Yes these were analyzed By Friend, he could have known Through these which one was the Table she and her boyFriend used to sit on, and asked her to go to the same coffee and pick the same table.

How does this affect Kiri? Firstly she would view it as "Coincidence" It happens she would say, he can be lucky enough to pick the same coffee and the same table.

After that he doesn't pick the same chair, he switches it making her sit on the chair her boyfriend used to sit on.

Why is that? Well because our assassin who killed her bf is willing to see Friend in action.

Friend predicted that he will laugh when he sees this, why is that?

Because our Assassin already heard some of the tapes when Friend asked him to execute the assassination, when he sees Friend doing all these making them look like an accident he will surely laugh, thus Friend made that Chairs swap, to not allow Kiri to hear him.

Now in the meeting, what does Friend do? He picked a few lines which her boyfriend had been picking and Mixed them out with some similar words her bf used to say.

Her boyfriend basically had been trying to motivate her into keeping up with her dreams, to continue what she has been doing until now and I quote him saying:

"*Kiriko san, people can become whatever they want, the time is not over yet, you shouldn't forget about your dreams. I am ready to help you as much as possible to make this thing possible*"

Now, we look at what Friend says when he meets her

"*People can become whatever they want, the time is not over yet, you shouldn't forget about your dreams. I am ready to help* AS A *Friend as much as possible to make this thing possible*"

As we see how he copies it, mixes it out in his own way and reflects it.

Trying to make all of that look like a coincidence, causing Kiri to not make herself do the same mistake again, she would marry this guy, she learned from her old mistake, guilt tripping her into marrying him. And as you can imagine, Kiri instantly fell for him, and they secretly married shortly after.

And by that Kiri's seduction is done, Friend's goals from this seduction were:

A/ Make her develop the Cure we talked about
B/ Make a kid with her; which I shall explain why he needs him

Note: This kid turned out be a Girl named "Kanna"

Chronologically around that same time, Kiri, Due Friend's motivation for her to continue the study of biology, Had been developing a cure for bloody New year's eve, We don't know the Method used here however we can assume following the patterns we were given in Friend's narrative, that he made everything look like an accident and made her explore the virus through Indirect means.

After his Marriage With Kiri Friend started going Frequently to a "Club" without telling what type of a club that is.

At one time She asks him "what club" and he says "nothing, I have few friends I meet there that's all" Intentionally causing her to suspect him, leading her to a huge exploration. Friend who is her husband is part of a secret cult.

She most likely heard about it already as the cult started gaining popularity at that time.

She sees this d00d "Friend" Saying weird things like

"Humanity will END in 2000, yet you who are with me will be Safe!"

as Everyone shouts "FRIEND!" Doing a weird hand move, which shows to what level did the brainwashing reach the cultists.

{keep in mind Friend was wearing a mask here as he doesn't want Kiri to Know he is THE LEADER but rather just a cultist}

We know he attended that move, as we see in earlier chapters, Friend didn't wear a mask around almost exactly the same time Kiri Left Kanna on. {Example would be ch 1}

Out of fear, she takes her daughter and gives her to Kenji in the shop, begs him to take care of Kanna, after that Kiri disappears from the

Region.

Friend had indirectly caused her to do all these which were the final goals of the Rest of Kiri's seduction:

1/ start developing the Cure for bloody new year's eve.
2/ And put her Daughter with Kenji {we will know why Kanna is Important later on, in Double bombing + Other plans that are not BNYE}.

And by that Kiri's seduction ends.

{FSIQ: VCI, EQ: Perception, EQ: Understanding, SQ, EQ: Management, Non-linear thinking, Inductive Reasoning, Abductive reasoning, Planning, Strategy, Tactics, Info-gathering, Foresight, Mass Manipulation, Indirect Manipulation, Emotional Manipulation, Deception}

5.*Cult Creation mechanism*

The point of this is to basically brainwash as much as possible people gathering influence that can Qualify Friend into becoming a popular Figure who has recognition and known name in the political world, which would be the main pillar of Bloody New Year's eve.

S = Step.

S1. They Know About the Cult -

There is a Perception almost The Entirety Of Japan Has Over the Cult, Its Members are Weird People, Who Are Blindly Doing What Causes Their Pain And Annoy Others, And They Are Led By A Person Named FRIEND.

This Perception Makes The Average Person Greedy To Know What is Happening in the Cult, Why, When, Who is This FRIEND Dude, FRIEND

Controls The Info About the Cult In the Eyes Of the Public Making This Perception Stimulates Their GREED, Thus Making People T00 Interested in the Cult Start Seeking Answers For The Questions Given.

S2. They Look For It -

Once SomeOne is Interested at It, They Search It Up, They Find Only Surfaced Information, But They Are Left With Some Small Key Words, CURE, PURE, BANISH and Friend (True One) , And Some Other Values The Cult Pretends to Value.

As We See With Kenji and 13 in Chapter 9, 13 is Saying Weird Things Yet SMALL ones, Nothing About The Killing Going to Happen Whatsoever Just Values The Cult Preaches For.

S3. The Show -

As We See in Chapter (203) Manjome Lifts FRIEND-UP As The Audience, Who Should Know nothing about FRIEND, Are Fascinated, This is The Beginning Of The string FRIEND Created for the people who would be his cultists {pawns} later on.

FRIEND Knew What Society There is In That Particular Area, Since not everyone would be affected by these shows, Perceive Them, and Know How Will They Be Affected By It, Then Affecting them With These Shows.

S4. The Sessions -

As We See in Ch 2, FRIEND Had a Session With a Person, Who Seems Rather UNComfortable, FRIEND Amused Him With his Aura, Then FRIEND Asks The Man to Say “I Am Dead 10 Times”

After Repeating Friend Asks Him, What do you see? The Man Says “I See Light”.

FRIEND Through These Words + His Charismatic self And Aura, Managed

to Make This NON-Cultist See Something That is Not Actually Existing.

We Need to Keep in Mind While Measuring This Feat's Quality, The Words Source, FRIEND Did not Pick Them himself With His UN-Real Understanding Of Human Brain, depending on the person he is having the session with

These Words Were Formulated By Kenji's Group as a Way to REVIVE After Dying in a Game They Used to Play, FRIEND is Simulating That Game, This Time Instead Of a Knock Then Wake Up.

These NON-Cultists Are Experiencing a Fake Resection, They Are Being AWAKEN, Yet Alive, FRIEND Using The Words Made By Kids And Through His Mere Existence, Managed to Make Those See Those Who He Spoke With See UNSEEN Stuff, and Cry in Amusement, Which Means That FRIEND DOES NOT NEED More Than His Aura To affect People.

S5. The Prophecies -

Friend Will Tell Them That a Particular Thing will Happen on a Particular Day, And then Once It Happens, Their Believing in FRIEND Increases. FRIEND Is Showing That He "Can See The Future" Amplifying The Cultists Believing at Him.

S6. Activities -

Friend Has Released What is called "Morning" Music as well as Morning-exercises.

Where After The Process The Cultist Has Been Through By Now, FRIEND Will Start Attacking Their Unconscious Awareness And Nerf Their Mental and Intellectual Capabilities With These Activities.

Abuse Laziness Of The Brain Instead Of Thinking, It Would Keep Getting Orders, Rather then make decisions, IF they keep digging into the cult, which seems a fair offer for them after the time spent in the cult.

Thus BrainWashing Them To The EXTREME With These Routines FRIEND Picked Them.

S7. The Sense Of Belongingness & Excitement -

As We See in many Chapter Among 1st 20 Chapters Of The Story , The Cultists are Gathered Around FRIEND, He Made them Do Particular Hand Movements While Shouting His Name in Excitement, Adding to That The Feeling Of Belonging Itself Which Follows Love By Necessity.

Abusing Both Excitement Coming From Many things he created which are steps taken to amplify their trust:

1. FRIEND puts himself as a leader, who also helped them towards the way of guidance.

2. FRIEND gives the perception of “I Can see the Future” given in S5.

3. FRIEND tells them that They will be the ones who survive as the world would be destroyed.

4. They start shouting his name believing that he is their saviour who will protect them from being Killed

The Belonging feeling causes an emotion which Is LOVE, in This Case loving being part of a group, not any group but a chosen group who people laugh at, mock, and think its weird with all its activities and silly leader who wears a dumb mask and calls himself FRIEND, Any cultist would feel thankful towards FRIEND that he made them part of this “guided” group, at the same time would feel sorry towards other people who are not part of the cult, since they will face a bad ending.

The way FRIEND regulated the cult is very similar to most of the religions in real life.

Note: Chronologically, Friend would have had a decent amount of cultists already pre-Kiri's seduction, Yet the most of the mechanism is showcased after Kiri put kanna with Kenji, which means that he had brainwashed some without all the steps.

He also Killed few Other cults leaders, causing those who lost their leader into seeking other cults which increased his influence as well.

Exploring some of the effects of his manipulation in the cult showcasing how good his manip was:

In Chapter 24/25, Kenji goes to a party thrown by Friend. He did so to confront him and end this for good.

A lot of shows were done in this party, it consisted of an audience (Kenji is one of them.) and contestants doing shows on the stage.
We will use Kenji as an example of the normal person and the cultists as an example of a normal person who went through Friend's psychological manipulation.

The shows happen in order:

1-The comedy show:

A comedy show happens where two comedians start cracking jokes.
The jokes were terrible, and had little to no meaning (one of them was that some nigga had a fear of small and tight places so he went to space to be in a free big space but ironically, was stuck in a small tight space ship.)

Normal reaction: Would find this unfunny and normal.

After being manipulated BY friend reaction: The cultists started laughing hysterically, the entire stadium that was filled with hundreds started to laugh in unison. They were laughing so hard that some legitimately started to cry from laughter. Kenji (normal person.) was so shocked

(Since the joke was terrible yet the reaction was hella out of place.) that he became disturbed and reached for his gun. When the cultists asked him why he wasn't laughing, he pushed them and refused to elaborate. They were shocked and confused on why he wasn't laughing nor even smiling.

2-Rock band:

A rock band went up to the stage and started hitting bars.

Normal reaction: For context, Kenji is a musician who specialises in Rock and guitars since childhood, he knows everything about it (He is so knowledgeable about it in fact that he knows the age of death of rock musicians in general.). He said that, even though rock has no concrete definition, he can't call this show "rock". It was so bad in fact that he refused calling it bad rock, he just disregarded it and said that it's not even rock.

After being manipulated by friend reaction: The cultists started celebrating, they started singing along together, blushing, and then they stood up and started waving with the band to express their happiness, enjoyment and excitement. They started holding hands and went crazy. And again; they asked Kenji to join, which he obviously refused, which led them to become more confused and worried. They started to push him to join but he fought back.

3-Confrontation:

Kenji gets tired and loses patience, the cultists take him and force him to go up to the stage. He pushes them, goes up to the stage and takes out his Gun. He starts lecturing the audience, and explains everything friend did (He explains that Friend killed his childhood friend donkey, that Friend was the one that spread the viruses in San Francisco and the in London. He proves to them that friend killed millions.)

Normal reaction: Since there could be multiple kinds of people who joined the cult I'll explain the possible reactions of the people in the cult:

People who just joined to feel the warmth of the group and for The Sense Of Belongingness & Excitement (Check S7): They should generally feel extremely terrified and distressed and shocked, knowing full well that their leader, who they trusted and embraced as their literal trustworthy FRIEND and saviour turned out to be a global terrorist who just killed millions.
And after the shock, they would either start the first stage of grief, and deny aggressively these allegations OR they would start questioning Kenji's allegations and try to find a loophole to prove Friend's innocence OR the would start to have a panic attack, start to cry, start to feel extremely disturbed and can't handle this shocking reality. Even if they didn't believe him and thought that what he said was retarded, they would still give any small reaction.

People who participated in these horrifying acts of murder and terrorism: They should start to feel extreme shock from the distressing reality that someone found out about their scheme. They would generally start to feel terrified that they might get caught and try to take down and kidnap Kenji right then and there to keep his mouth shut. They also might start questioning each other. They also might get a reality check and start feeling extreme guilt and depression about what they did, and all of these emotions would be expressed severely in that moment.

After being manipulated BY friend reaction: Literally nothing. None of what I talked about above hardly even happened. No emotion of any cultist was shown whatsoever. They don't feel shocked, scared, surprised or bamboozled, mad or angry, terrified or mad, aggressive or in denial, they just stand there looking at Kenji. There is no emotion on Their faces. They didn't even bother to defend their leader or deny/justify his actions. They just stood there waiting for Kenji to finish yapping.
We will come back to this again later on.

4-Finale:

Friend shows up.

Normal reaction: Mostly nothing, or the person would feel surprised a little bit and starts to question friend and ask him whether he really killed people or not, or tell him about Kenji and how he is ruining his reputation.

After being manipulated BY friend reaction: The audience goes wild. Hundreds of people go Swifties mode. They start screaming violently and jumping as if they saw an angel. Friend just showed up, and the only thing that could be heard was “Here comes Friend!! Welcome him!”. The stages all go wild, expressing unreal emotions of excitement, joy and happiness and satisfaction (To the point that some start to tear up.) Friend starts talking to Friend, confronting him about the massacres he had made and even though the entire audience is listening to Kenji’s allegations and to friend’s lack of defence, they continue on cheering mindlessly, as if the only reason they live for was Friend.

This is one the many examples of Friend’s crazy manipulation, and the results of being exposed to him. Friend here basically took hundreds of normal citizens, then he took everything they had. He manipulated them so badly that they lost their morality, ability to think independently, human emotions and feelings and sensations, common sense and empathy etc. And then he changed all of that, warping them to his image. He gave them a new set of morales that they would follow no matter what (This is explored in other examples where Friend changed Yama san’s morales turning him from a justful hard working purely good cop into a serial murderer killing his best friend for friend’s sake, and manipulating 13 into becoming an assassination who risked his life on multiple occasions and waited decades to kill someone just for friend’s sake.). He also manipulates them into thinking and feeling and perceiving stuff differently from others, coding them to like and dislike what he wants them to like and dislike. Think of it as a puzzle that shows the picture of a normal person. Friend comes and takes some of the puzzle

pieces, and puts new pieces instead that he deems fit. And all of that with just his manipulation skills.

{ EQ: Understanding, SQ, EQ: Management, Abstract Thinking, Non-linear Thinking, Inductive reasoning, Indirect Manipulation, Mass Manipulation, Emotional Manipulation, Direct Manipulation, Deception }

6.*Reaching Kenji strategy*

Goals:

A/ Setting Kenji up for Bloody new year's eve night
B/get him as Much suffering as possible {we will know Why at the very end of the doc}

Through endless amounts of clues from their past, and Info Control, Friend Shall Manipulate Kenji Psychologically, Logically and Indirectly into being Ready for bloody new year's eve WHILE gathering his friends from the past who Would help him in his mission against Friend.
The effects of Kiri's seduction must be mentioned here however, as they are a main pillar of this strategy. Friend Made Kiri pregnant if you can recall correctly and got a kid with her named Kanna {who is a she} AND caused Kiri to run away leaving Kenji alone in the shop {Kiri's seduction notes (C) Point}

Indirectly Manipulating Kenji into doing 2 things:

A/ Working Regularly at the shop and leaving his dreams, Caging him in a small area

B/ Raise Kanna up as her mother Kiri asked them to take care of her, Since Kiri saved Kenji 3 Times already and had been taking care of the shop he felt obligated towards Kanna. This is without mentioning The fact that they have a blood relationship.

After this Friend puts "Friendship Symbolism" or his cult Symbol close

enough from Kenji's working area, That once Kenji sees it, he starts recalling slowly what these are.

Friend fed him a small clue that he will use too many times in the future to allow Kenji to make the Reasoning he wants and slowly to refresh his Memory eventually Figuring out about the Cult. but it doesn't stop there, we have another more important detail here.
Friend believed Shikishima {a Robotic engineer} was a loyal customer of Kenji's shop. This is why Kenji personally delivered goods to Shikishima's door and retrieved them, a service reserved only for regular customers. Anticipating that Shikishima would leave the bottles by the back door, Friend placed the symbol nearby to avoid detection by the police who were focusing on the inside of the house. Kenji, however, would notice the symbol WHILE collecting the alcohol bottles.

Friend then proceeds to eliminate Donkey, claiming it as suicide once again, Donkey sends a message to Kenji asking if he remembers the friend's symbol. This makes Kenji doubt the situation even more and start thinking that something is wrong. Friend is trying to slowly make Kenji discover the cult in a way that he believes he is connecting the dots himself, Without any Form Of Friend's knowledge, It's like Kiri's seduction again. Friend made everything look like an accident.

At Donkey's funeral, Kenji meets many of his childhood friends. They discuss the existence of the cult, and when Kenji shows them the symbol, Mon-chan remembers a detail about their past, which leads them to a place where they buried a box several years ago. This box contains multiple toys, but most importantly, it has the friend symbol on it. Friend had intended for the main cast to recall what they made up when they were kids, pre-attacking them later, again set up for later events.

After, Friend sends our assassin again, but this time for a different mission.

Friend is Filtering out his options to make the Robot, which is Tokyo's part of bloody new year's eve

Friend picked Professor Shikishima who is One of the MOST popular Robotics engineers in Japan and best one among Them, why would he pick him in particular?

1/ Second goal of the strategy, which is making Kenji suffer as much as possible, Friend picked Shikishima because he is One of the special Customers for Kenji.

2/ Kenji's Reasoning:

Given that Kenji and Friend are well acquainted, there is {for sure} no doubt that he would be able to find someone who is well known and popular, as he could easily connect the dots and realize eventually that Friend was the one who kidnapped him. As his disappearance and Profile matching {The Profile is almost empty, but it has the note that Friend will need a good robotic engineer} Actually, Kenji's job would be greatly facilitated in this ONE Specific Matter, because of his ability to profile his abductee and make deductions. Furthermore, Kenji's assumption that Friend would use him for the robot on bloody New Year's eve would be supported by the latter's involvement in creating it.
Shikishima is a well-known and highly esteemed engineer in Japan, and he is also considered to be one of the most talented individuals in the field. Given his renowned intelligence and kind-heartedness, it is likely that he would be kidnapped and forced to create the robot. However, considering that Kenji has known him for a while and has conducted a thorough profiling, he would be able to conclude that Shikishima would refuse to comply with Friend's Robot creation if asked. Again due Kenji's profiling he could have known that Shikishima is "Good" sided, Causing him eventually via a very long chain of actions to believe that Shikishima was indeed kidnapped.
Shikishima is one of the most renowned and successful engineers in Japan, with numerous accolades to his name, He is also a professor at Tokyo University and has several TV interviews under his belt where he provides Info about his career and Huge ACTs, If Friend were to research for the best engineers available {again due to his goal being Create a 50m

long robot that could kill people and be able to move}, he would Eventually End up seeing Shikishima's name, since he will be one of the main Options on any list in that regard.

All these Reasons Kenji would have to infer in order to Know more info about how the eve is going to happen and where to go etc.

Friend could have anticipated these IFs and used them for the kidnapping.

Now in order to make Kenji perform these Interferes, he needs to make him fully aware of what he wrote when he was a kid, Friend {ch 20} he while assassinating Donky picked 2 specific cultists to do the assassination:

1/ Too much brainwashed cultist:

His Code name is 13, he was also the one to kill a cult leader. As we know this guy is too brainwashed, thus would be perfectly fitting to insure the assassination will be successful.

Side note we will need later - Kenji met him After Donky's assassination, since he is a Student for Donky, he might be able to provide him some info about the incident. Since Kenji's profiling tells him that Donky WOULD NEVER kill himself. There must have been something Wrong. After he approaches him, Our cultist tries to Ignore, until Kenji shows him the Friendship symbolism, he says "you are 1 step away from Friend" and the scene ends. {we will need this later remember}.

2/ Less Brainwashed Cultist:

perhaps someone who didn't Experience the entirety of CCM {Cult creation mechanism} or any other reason that made him "Save-able" or

has the mental capacity to leave the cult

In shorts, Friend Picked option 1 to get the assassination done.
But why did he pick option 2?

He did it to make Kenji Can recall what happened.

Basically Friend understood the cultist and his Psyche and could have known what type of things would Donky say.

While killing him he was saying “What Friend is doing are things Kenji planned in the past” “open your eyes” etc, and since our cultist is “Save-able” and has a good side etc. he could have known that Donky is not lying, as he is literally about to die why would he lie?

How did Friend know that Donky will say these:

- Lie of 1971:

Friend fabricated a hang where he was roped-up and supposedly killed, waiting for someone to see him. Once this person sees the killed body, Friend will open his eyes and pretend to be “revived” and ask the one who saw that to tell the other.

However that failed, as the one who entered and saw that was Donky, Donky has a very strong logic and doesn’t accept “Miracles" whatsoever everything he believes in MUST be proven by science and such, thus refused to believe, Friend asks him “followers" {2 of his Friends} to banish Donky for that refusement. Yet Donky could have run away, and no-one mentioned that after.

- Donky Knew about the book of prophecy

He knew its content, when he sees what Friend has been doing alongside with some memory he will be able to deduce what is happening

With these in Mind {*knowing that Donky can recall lie of* 1971 AND *the book of prophecy*} Friend can comfortably know that Donky will try telling by any how that Friend is lying, he didn't predict anything nor he is a prophet whatsoever, he is following what Kenji wrote when he was a Kid {Again Book of Prophecy}

Mixed with the Life and death scenario Donky is having, Friend could have Predicted what type of Perception Our cultist will be having after, that his suspicious-ness shall keep increasing and will end up trying to leave the cult

Once he tries to do so, CCM or Cult Creation Mechanism will shine and Make other cultists Try to assassinate him, once they realize he is leaving the Cult.

Friend also limits the sorts of Weapons in his cultists hands, Blocking his instant death after the cultists try to assassinate him.

Thus our cultist would show some signs of him leaving the cult and disbelieving in Friend

—------->

CCM or Cult Creation Mechanism Takes a place and causes the other cultists to target him

—------->

Friend's control over sorts of weapons prevents the cultist from dying instantly

—------>

The Cultist Pre-Dying will head over to Kenji

The reason would be telling him About What Donky said and asking him to save the world From Friend, whom he believed was his Saviour.

And Eventually that is what happened, Kenji is facing the Cultist seconds before he dies, and tells him to save the world etc. {he told Kenji about the assassination Exactly before dying you can imagine how many Calculations Friend did here}
And Now from this moment, every second Kenji is Conscious, he shall feel guilty. Due Friend doing what he wrote as a kid, He believes that he is the reason why all this chaos is happening, thus upon this guilt Kenji hated Friend, As Friend Just Observes from afar causing Kenji all these, Kenji would Engage on hatred generated from what Friend is doing as Motivation for the task of Saving humanity from Friend.
Now. Remember Shikishima the professor? As I mentioned already, he was kidnapped by Friend. We already know that he is a professor in Tokyo University, { Point 2C which made Kenji} head to that specific place. {Place = Tokyo University}

There he found a student Of Shikishima's students, and asked him About someone, Who? 13, Who is 13? The 1st Cultist who Friend asked to Kill Donky {The note I talked about before}, We know that Kenji met 13 and 13 talked about Friend, and Kenji could have known that 13 is a cultist, now Kenji wants to get info about the Cult THROUGH 13, but unfortunately 13 is not there. However there were 100s of stickers sent to him, Kenji asks what they are {again Kenji KNOWs that 13 is a cultist} and once he is shown a sticker he is shocked.

The Sticker's content is basically a Party Friend will participate at, the Sticker also has place and date, and since Kenji's goal now is to save the world he will try to Kill Friend.

After going there, he finds brainwashed cultists laughing at un-funny Jokes, these Jokes are said by 2 "Clowns' whom stand on a stage, and doing weird moves with their hands, he is disgusted by the scene. Friend gave him a sample on how the World would look under his control. Refusing that future Kenji tries to tell them that Friend is fabricating all

his tricks etc.

As the time passes Kenji is called by the 2 Clowns and asked to climb to the stage, he does and using the Microphone he tries to again tell them Friend is not real etc. but at that moment Friend appears from behind him. {Pointless details happen here} Eventually Friend Reaches the main point.

Once Kenji points a gun at him he tells him that he can't kill Kanna's dad, Can he?

The info brain-stormed Kenji, and he ended up half Conscious and kicked out the "Party" with Just that Shocking info. Telling that in a 1 on 1 scenario is what Friend aimed for alongside showing Kenji samples of the Future.

After these, Kenji is invited to a "Class-re-gathering" type of party.

What happened is

1/ Friend predicted VIA psycho analysis Which chair Kenji is going to pick, and pre-sat in the right chair to him

2/ Friend shows a nice first impression despite knowing Kenji won't recognize him instantly to cause guilt

3/ Friend says that his wife was kidnapped by a Cult, his sources say that it's leader is named "Friend"

4/ Friend says that he though Kenji is "Friend" Aka the cult leader, due to Kenji being the one to write the book of prophecy, but he realised Kenji wasn't

5/ Friend starts eliminating the options in front of Kenji, Excluding those in the meeting, there are 2 Options

A/ Otcho; But this is not probable as He is known for being Well-hearted and a good friend, he might be possible depending on the Other option though

B/ Someone who Friend has shown him the BOP yet Friend is unable to recall who is that {or at least says he can't}

6/ Naturally, Kenji will assume B is Friend.

7/ Friend gets drunk

8/ VIA the 1st Well-like good Impression AND the guilt generated from writing BOP and his Compassionate-self, Kenji feels obligated towards Friend and carries him to a car

9/ Friend Causes Kenji more guilt after bringing up his kids being lonely and hungry While they are in the car

10/ They Reach the house {Friend is still drunk and Kenji is Carrying him}

11/ Kenji sees the children and again he feels guilty

12/ Friend due the drink he had falls half-counscoins on the ground

13/ Kids are hungry

14/ Due to the kids being hungry AND Friend losing Consciousness, Kenji feels obligated towards both

15/ The Obligation causes Kenji to put Friend in bed AND Make food for his kids

16/ Friend tells him that he recalls who is the one he showed BOP To, its Sada.

Thus Misdirecting him, as Kenji will try to Mentalize Sada WHILE looking for him, using the small amount of info he got From their childhood during his scanning for Friend shall be done with that Small Profile he has on Sada. which is exactly what Friend wants. As he will use that to forecast Kenji's actions and movements later on.

{*Mind you noticing that, the entirety of that apartment tactic was fabricated, from the kids to Friend's ownership-ness for the Apartment itself Friend Paid their mother to leave the house for a day and manipulated the Kids into acting in a way to conceal the truth. He doesn't really know who these are, their location was Perfect however as the things he wanted to say in the car needed such as distance from the Re-Gathering-party*}.
Chronologically After that happens, Kenji went back to the same student he found in the University last time.

But before that we see Friend's tactic of telling Manjome about the mask coming into play. When Kenji was told by friend that this person is Sada, he tried to recall any memories about his face. He didn't find any cus they barely interacted, and cus Sada always puts masks on to hide his identity. But he was able to find a memory regarding Sada, where Sada was wearing the Hattori mask.
Friend here was indirectly manipulating Kenji. After psychologically analysing both Sada and Kenji, he understood what mask Sada was in when spying on Kenji.
He then picked that mask, and was always wearing it.

Friend wanted here to awaken Kenji's memories, convincing him that Sada IS actually friend indirectly (Since when Kenji realises that both Sada and Friend wear the same mask, he would have evidence leading to Sada.). This will just make Friend more believable and trustworthy, manipulating Kenji into befriending and trusting Kenji even more.

Friend also manipulated Manjome. He lied and said that his Hattori mask is his favourite. This was actually just a bluff, Friend just said that so when he starts executing missions with the Hattori mask, he doesn't

want anyone to wonder why. They would just think he just wants to be comfortable in his masks when he was basically manipulating them AND Kenji. He had to do this cus he knew that the One-eyed mask will be the main mask.

Back to present day:

Kenji asks about Shikishima's daughter as the student tells him that All his {Shikishima's} Family Members disappeared, YET this student can recall a small detail.

Once they went to the beach with Shikishima and his daughter, and out of Lust they all looked at her....you know starts with B ends with B yea that.

And noticed that she has 2 moles on the "balloons" this is her sign.

Later this student and his friends were in a house of one of them, and he had a pornographic magazine that had a woman who looks so similar to Shikishima's daughter, however she was blocking her head in the picture YET the 2 moles were see-able.

Friend didn't allow Kenji to get more clues this time, he wants Kenji to keep scanning everywhere that Might have this woman in. as he wants to gather his other friends through indirect means again while Kenji is just searching for this woman.

FRIEND In Order To Make The Robot, Had to Find a Good Robotics Specialist Who Can Make a Robot For Bloody New Year's Eve, After Filtering The Options, FRIEND Picked Professor Shikishima, a Professor in the Geometry College, FRIEND In Order to Make him agrees on the Robot Observed Him, Found-out About How Much Does he Love His Daughter, Then Observed the Daughter Emotions, Found-Out that The Family In Depth and Detected The Emotions Of the Daughter Finding Out Her State.

Friend could have Known how she would feel under different situations, Like her family being in debt, And after she loses them all VIA Affective Forecasting could have known when is She easier to manipulate and under what circumstances should she be under.

Friend would isolate her, through kidnapping her father and killing most of her family.

After That Would Predict That If He Sent Someone with specific characteristics, who is good Enough socially and looks-wise, That person Can simply fill that emptiness, thus She Would Fall For Him.

Friend picks a specific day where SHE would have exams on, and gave her a script via the assassin. If Followed, he will succeed 100% {which happened}.

Through Making everything look like an accident Friend AGAIN could have socially influenced someone

Friend told the girl some info and made her a cultist, Easily Indirectly Manipulating him into (Kasumi Juicy) He Even Tells Her About Bloody New Year's Eve, And That Kenji Would Gather His friends.

Friend Made Her Pick Him Over Her Dad, Who is The Last Person Left at her Family, Keep in Mind That SHE KNOWS FRIEND is almost Enslaving him, He Still Could Have Made her Prefer Him Over Him.
Using Multiple Emotions Yet Mainly Admiration, Joy, Happiness Where he could have made her belongingness to the cult out-wightets hers towards her family's latest member, who is also her dad.

Friend Tells Her About Bloody New Year's Eve, And Some Other Details, Predicting that Kenji's Route Would Cross Here, due Friend's long chained manipulation tactics, and he Will Try Saving her, and She Would Tell Him That Information Leading him to a Place FRIEND Wants Kenji at.

Double bombing plan

part of reaching Kenji strategy

Keep in Mind:

—> Friend-ship Party Has Gained A Lot Of Political Power, the cult became a Political party which was the main point of the cult in the first place. Friend had been expanding it but we will know how later.

—> Thus Friend Has Influence Enough to Control Many Things Japan One Of Them is the AirPort Services

—> Friend Has Abstract Control On Many Employees There, One Of them is Narita AirPort's Boss.

—> There Are Two Main AirPorts In The City, Narita and Hanida.
During his Out-mapping {Friend}, Told Manjome to head into the Narita airport, Friend Also Told Manjome to go there With a suitcase Which contains a white powder.

Keep in Mind - a SHE named Yukiji Works in that airport, She was one of Kenji's old Friends.

Yikji could have seen the white powder in the suitcase. Her dog

{Of course there is a security dog in the airport to stop any drug leaking attempt etc.}

Attacked Manjome, Since the dog thought it was a type of drugs rather than a normal powder, Yukiji tried to Check out Manjome, Daly enough for Yukiji, all the suitcase contained was an average flour.

Once the Airports Boss Knew about That incident, he was So Mad to the point that he Ordered her to return her security dog.

He also said that Manjome was a quite important man and an

ex-journalist, and he Can pretty easily report this particular story to other journalists in his huge circle of connections, a thing that would absolutely destroy the airport's reputation, cause it lots of profit and possibly ruin it completely, Which would be ultimately Yukiji's fault.

Yukiji was so guilty and sad. She tried to apologise because she did something that was embarrassing. That might end the entirety of her Job and many jobs of other people.

She also felt compassionate with the dog, it might end up 💀 you know.

Friend's plan here consisted of Manjome going back to the airport with his suspicious suitcase, and finding Kenji there. But in order to do so he needed an alibi, someone who would stop Kenji from trying to take the suitcase from Manjome using force, and a reason for the airport to not suspect Manjome's suitcase. Here, Friend deduced that if Manjome went inside Narita's airport with the suitcase and white powder, Yukiji would suspect him and her dog would violently attack him.

He reasoned that if that happens, and the airport finds out that it was just flour, Yukiji will face multiple consequences for her actions and will feel extremely ashamed and embarrassed. She would then try to apologise, and would never suspect Manjome again. She would even try to defend him against accusations/allegations because she knows that he is an innocent man, and also a kind man since he forgave for her actions instantly.

Now, Kenji is investigating Sadakiyo, the man Friend made Kenji start suspecting.

He was trying to remember the stuff that he wrote in the book of prophecies

(reminder: Friend is trying to execute the stuff Kenji wrote in the book of prophecies).

He suddenly remembers his discussion with his childhood friends about a terrorist attack

(another reason for why friend told him about the attack at that exact time is for refreshing Kenji's memory, his Logic led him to believe that when Kenji knows about Sadakiyo a flow of old memories would come back to Kenji and like this Kenji will recall the airport attack thingy when friend wants him to. As when you get a small amount of info about a specific subject you forgot, the small info can help you recall more about that specific subject, Once again showing his psychological understanding Of their cognitive functions and how they work).

This attack should take place in the airport. Kenji heads to the Narita airport.

But we know that Friend could have known that Kenji will indeed eventually pick Narita airport, Why was he so sure about it?

Yukiji works there, this was the main point, Now Friend shall assume he is in Kenji's pov, what info does he have?

A/ Friend will bomb an airport
B/ Yukiji works in an airport
C - Friend will bomb Yukiji

Friend knows Kenji's cognition and thinking patterns and priorities, How his critical thinking works would naturally lead him to Yukiji's airport, which will eventually make him end up in Narita.

Logically, It's safe to assume that Friend would attack the Narita airport because it is linked to Kenji and the others, unlike the Haneda airport.

Friend had anticipated all of this, he predicted all of Kenji's Interferes and deduced that Kenji would show up at the airport.

Friend made an accurate prediction regarding the specific SECOND when Kenji's arrival would occur. Armed with this knowledge, Friend had sent our favourite cultist Manjome a day earlier to prepare accordingly, as part of a carefully laid plan.

Friend could have Known that Kenji would eventually see through his scheme and made precise arrangements for Manjome's second entry into the Narita airport.

Believing that Friend sent him with a bomb to out right explode the entirety of the Airport, Kenji had ran towards him as soon as he noticed him.

Friend reasoned that by keeping Yukiji within a particular vicinity at the right time, he could ensure she would notice him. And through Yukiji Friend shall take Kenji's attention in a polite way, since as we know, Friend is a very nice person.

Now, Manjome is in front of both Yukiji and Kenji, holding a very similar suitcase in looks to the one he held back when Yukiji met him before.

Kenji wants to take the suitcase by force BUT Yukiji is stopping him because of the move made by Friend earlier.

Manjome questioned whether the suitcase contained a bomb just like Kenji was claiming, or just flour just as Yukiji suggested. After some deliberation, Manjome confessed that the suitcase only contained flour.

Unfortunately enough, Friend wasn't as nice as we expected, The bomb in actuality indeed exists. BUT, there is a but, Friend had put it in the Other airport

Friend accurately predicted and accommodated all of Kenji's deductive reasoning and thought process, as we know he has enough Interpersonal intelligence to out-right mentalize through Kenji and predict his social, emotional and cognitive-mental Process, thus knowing his decision

making with the timing, despite not actively perceiving him nor reading his body language.

Throughout the entire ordeal. He entirely Flawlessly predicted Kenji's interferences and Reactions, carefully planned his actions in accordance with them. The Narita airport tactic was simply diversionary, Red herring and just a distraction tactic to conceal the main bombing.

Friend has planned to frame Kenji as the mastermind of the bombing by faking evidence and deceiving the judges and public into believing that he was the mastermind.

Again Socially controlling what is out and what is in to produce The Image of a terrorist in the public's head and stick that title to Kenji.

This plan has multiple objectives, including framing Kenji for the current bombing, baiting Kenji into a future attack, and setting up the grounds for future framing.

Yet this wasn't the actual goal, not JUST bombing The Airport, it didn't stop there, Friend wanted a deeper end he wanted a different goal, the entirety of the first part of double bombing was basically Layers upon layers of deception, More red herring Done to hide Friend's intentions and serve a secondary goal.

Manjome asks Kenji, "did This Airport even exist back when you were kids?" As Kenji realizes he missed badly you can clearly see it on his face, Manjome adds a small note too saying:

"*If you don't go home, a terrible thing will happen, I believe all of them are there to see Friend's loved daughter, Kanna*"

Now Manjome already gave him the ability to choose, Follow Manjome OR save Kanna, he will of course Save Kanna, its way more Important and do-able, Why?

1. his sister's daughter, Thus there is a blood relation between them.

2. His sister's promise, Kiri always took care of him, all the times she saved him from certain deaths {3 times}, he would of course feel he owes her his own life, and saving her daughter and raising her is not enough to pay for all his Old-Self Selfishness.

3. The Time They Spent Together, he Raised her up and sacrificed too much and Fought a lot for her, he will not just let her be taken.

4. Her future, what will Friend turn her into?

These 4 Reasons Stacked up Upon Each Other Made Kenji Goes to his House Rather then "Trying" To Stop the Bombing, Friend Indirectly Manipulated him to do so, Predicting all his steps along side With the timing, That Friend Matched Up The Timing Of the Bomb With Kenji's Arrival, as Once he is told by Manjome, Kenji will be so late to save the Airport since it Exploded at the very same second.

Regardless The Events Follow the Linear Path FRIEND has Drawn Them, As we know already, He Sent Few Cultists into the store and gave them a particular leader {Let's Say V}, and told them to bring the "holy-daughter", That's all he did.

Once they reach the shop, they conceal their true intentions and start acting like your average customers despite the large number, they try making it look like a coincidence.

Suddenly they start getting closer and closer to Kanna and her grandma as a mass, and once they have enough people around her, they take her from her grandma.

YET, once a cultist took her and put her carried her above him calling her "the chosen daughter", Kanna started screaming and crying.

Due to Friend calling her a holy daughter and showing care for her whenever mentioned, the cultist though that there is a type of "punishment" and a feeling of un-easy-ness went through him, causing him to through her away, he DOESN'T want to meet the Consequences of causing Friend's daughter herself to Cry.

Which is exactly why Friend called Kanna "the chosen daughter" in front of the leader he picked. He predicted how the other cultists would feel once they heard that, and how that would affect their social & emotional states.

Now back to the store, Kanna is thrown by the cultist and she ends up at the hands of a shop worker, but it seems like this worker doesn't have strong enough mental capacity to start running as she couldn't recognize how big of a deal this is.

Yet, she was told to run by Kanna's grandma as she opens the door and sprints as fast as she can.

Once she is back she says she ran around the entire town and that she can't keep running, but Kanna's grandma is surprised she came back, why would you come back here? It's like suiciding to come back to the same place when you have an entire city to hide in.

Yet there is another door for the shop, But they were so lucky that there was another worker WHO CLOSED that door thinking that the cultists will get in from there 🤣 instead of leaving from there they are trapped in front of the cultists whom will eventually break the door and get it and Take Kanna and maybe do what is worse

Kanna's grandma tries to close the door with a type of string as she saw the cultists JUST behind the worker and all they can do is watch the cultists who look like zombies due to CCM.

The cultists break through and JUST BEFORE they take Kanna, Kenji finally reaches.

Friend Psychoanalyzed Kenji As We Know, we see This Shining When Kenji Comes Back at Perfect time and saves Kanna, Proving FRIEND's ability to read his Mind.

The Foresight doesn't end on Kenji as Friend had to Mentalize through everyone in order for this specific plan to work, he had to Menatlize through the shop workers, know that A will run around the entire town and comeback buying Kenji enough time and knowing that they won't be able to Leave from the 2nd door despite it being EASILY reachable due the 2nd worker.

He had to also Mentalize through the grandma and forecast her ORDERs and MOVEs e.g: closing the shop, yet in a specific way that the cultists cant get in.

YET we know Friend could NEVER interact with those people yet he still could have known all these, PURELY through context Friend could have known how they would act under VERY specific circumstances and sat up in accordance.

And lastly Mentalize through the cultists themselves and know how would they get in the shop and their "deceptive" 1st impression and what acts would they do in response to Kanna is crying after perceiving her as "The holy daughter"

Of Course all these happened AFTER Friend perceived the physical stats of the 1st shop keeper and her stamina, And picked specific cultists with Physical stats who are JUST lower than her in that regard, that they can't out pace her whatsoever YET she can't completely gap them, thus buying a very specific time window for Kenji to interfere.

however This is not the Main Point to highlight here; this is just a premise in Friend's Reasoning.

Let's put it in Logical Form and see how the reasoning went

X = JUST before They catch Kanna | P = Premise | C = Conclusion

P1 - Kenji Will Reach at (X) Time
P2 - Kenji want to save Kanna
P3 - Kenji is superior to the cultists in terms of Mental and physical stats

C1 - Kenji Will Save Kanna —>Becomes a Premise
—————————————————————————
P4 - Kenji Saved Kanna
P5 - The mission in the cultists POV FAILs once Kanna is saved
C2 - Mission Will Fail —> Becomes a Premise
—————————————————————————
P6 - If The Mission Will Fail The Cultist I Sat as a Leader {Name = Y} Will Be Un-Stable
P7- The Mission Will Fail
C3 - The Cultist I sat as a Leader {Y} Will have a mental break-down —> Becomes a Premise
—————————————————————————
P8 - The cultist will have a mental break-down
P9 - The Cultists Are Chained Together Due the Belongingness I Created {CCM}
P10 - The Particular Cultist I Picked has a Weak Persona And Once the Mission Fails Won't Handle the Blame
P11 - He Will See the Gasoline
P12 - Another Cultist Will Try To Calm him Down Due the Belongingness

Now there are Few Possibilities, ONLY 1 Can be true, despite the others not being physically impossible, with some inductions. They can be excluded:

A/ Will Run away, BUT the cultist knows about the purefaction system, the other cultists will kill him if he tries to do so.

B/ Let the police Catch you, Again illogical to do

C/ Die here, Again illogical to do

D/ Go to Friend and admit it, The problem here is that The mission involved around the “Holy Daughter” something “The Universe” Itself values high, he Would induce the ending being DEATH here too.

E/ **Frame someone**. The only One that won’t end with the cultist dying is this one in particular, which he did, he framed someone.

C4 - The Particular Cultist I Gave Leader Role {Y}, WILL USE THE GASOLINE AND BURN THE ONE WHO TRIES TO CALM HIM DOWN AND MAKE IT LOOK LIKE IT WAS Their MISTAKE RATHER THAN {Y’s}. Framing him.

And This is the main reason why Friend Picked this one cultist in particular as a leader out of many, he saw what would happen IF This one was the leader and the outcome matched his will.

Indirectly Manipulating:

1. Kenji and His Family Into Leaving Due the Explosion:

This Was he will make their personality develops in a different path and live a hard life, Mainly to Shape and strengthen Kenji, Setting him up for Bloody New Year’s eve and The Life he will live before it, as well as Making him Hates Friend More, Since he made him and his family Jobless, eat Lower Quality Food, Made Kanna Raise in Streets ETC, Making Kenji Only Hates Friend More. Boosting his EQe.

2. The Cultist into killing another cultist + BOMBING Kenji’s house AND stimulating his fear {why the fear? We will know later}

Friend out-right Predicted everything, We Know That he indeed Wanted this Ending Because The Later Events prove it, For Example, If The House Never Happened to be Destroyed, The Strategy Would Never Developed, Due Tunnel ARC Never Happening, as well as the police would have

caught Kenji since FRIEND Destroyed his Reputation and Made him a Terrorist after.

Friend could have known the Specific Responses The Leader Will Do If Became a Leader, How Will The Group Interact With him ETC, Indirectly Manipulating him into Turning The Shop On FIRE, Indirectly Bombing the Shop.

Friends utilized a strategy in which he chose NON-armed and physically unfit cultists to steal Kanna, Why those in specific?

The purpose of this strategy was simply INVOKING Kenji's emotions and to further convince him that the cult was after Kanna.

Friend planned the timing and number of cultists required to burn the shop and to fail at kidnapping Kanna, and predicted the implications that would have on the police and Kenji.

An Important thing to keep in mind is that Friend sent a specific number of cultists, a number that could have matched the shop's free space, without actually going to the shop, showing good spatial awareness.

Friend's goal was to increase Kenji's emotional impact and to provide him with additional rationale to flee the police.

Easier Farming later and better Social Control over the public's view and Its PERCEPTION upon the next acts. Giving the world a Profile which will cause them DEFAULTING to suspect Kenji Whenever something happens. Which Friend Shall keep implementing more and more tactics later to save that profile in the society's mind and get them to sit-up for BNYE's play, Mentally, Socially and Psychologically Manipulating the Mass into believing that.

{ FSIQ: Spatial awareness {VSI} SQ, EQ: Understanding, EQ: Perception Psychology, EQ: Management, Linear thinking, Non-linear thinking, Deductive Reasoning, Abductive Reasoning, Inductive Reasoning,

Foresight, Strategy, Planning, Tactics, Info gathering, Indirect Manipulation, Mass Manipulation, Emotional Manipulation, Logical, Manipulation, Overall Deception }

7. *Getting Otcho Strategy:*

At The Same Time FRIEND directed Kenji to Places And Missing With his life setting him up for future events, He Was Setting Otcho Up As Well, How would he do so? Make him search the cult out and realize that there is a cult, that Friend is doing what they planned as kids etc. the world is in danger whatsoever, that once Kenji calls him he is already Motivated and Mentally + Emotionally engaged AND aware of what is happening as well as giving him the same goal as Kenji.

—> Othco Never Saw Kenji and his og friends since their childhood.
—> Othco does not remember the BOP and what they wrote etc.

Friend HAS TO remind him

Friend has gathered sufficient information about Otcho from his observations to determine his current mental state. The profile Friend could have made on Otcho suggests that Otcho is currently dealing with overwhelming loss and sadness from losing his son, who he always placed above everything else.

His previous "teacher" guided him through the process and helped him move past the grief. Thus developing a strong sense of compassion for Otcho, Which led him eventually into having a specific goal which is, helping as many people as possible in his reach.

Which caused him to create an agency that helps those who contact it. {keep in mind his location is in singapore}

Interestingly enough, Friend Could have caused a similar situation on double bombing if you recall correctly. Friend had chosen a weak-willed leader who could have sat a huge fire to his own Cult-mate in the shop.

Which will change him psychologically for a later use, a use that will ABUSE Otcho's state, but now we keep going with Otcho alone.

A "Japanese" Police Man Went to Bangkok | Thailand's Capital | to Investigate rainbow-factories, which are part of Friend's influence, its DRUGs-Factories that are used by friend to increase the cultists count, trying to reach the lower-quality life human in illegal-underhanded ways.

This Man Contacts Otcho's agency, as he is in a hotel close to them, he is poisoned-out and almost dead calling them for help.

Friend Could have known that the person sent MUST have a these specific characteristics for due

1. Otcho's "Boss" Psychology, He would be way more interested, Once he hears The Word Japanese Man, As We See his Reaction to The Phone Call, he would force Otcho to go Save him.

2. The man himself, His Curiosity And The Information he got, since he saw many things he shouldn't have seen, Friend Decides to USE him rather than normal Banishing Punishment he used to give to people like Yama. {Yama is a detective who knew too much about the cult, thus Friend "banished" him through indirect means}

After Picking this One Guy, Friend Sat Him Up, he Purified him Using the Virus, and Fed him a bit More Info About His Plans Mentioned in NBOP and BOP {i.e Earth's Destruction}, As Well as added to his SuitCase a Symbol That Has the Friend-ship Party Symbolism on it, This is an Important Detail. ReFresh Otch's Memory, Reminding Him Of BOP and their childhood plans, people and generally give him a key to start from. {Doesn't this remind you of Reaching Kenji start?}

Friend Knew how Much Mental Power will this one police man have after facing the virus, and the Communication limitation etc, And That He Would Tell Just What he should before dying, Indirectly Manipulating

Otcho into Looking up what is happening More, What's wrong with The Symbol, Who is Friend ETC, Re-Doing the Same Process he made Kenji Experience, Anticipating That One of the MAIN people Kenji would love to ask for help Is Otcho, Knowing That They Were Closest Friends, that Otcho Made the Symbol etc.

Now, Otcho Ends up with one of the people who he saved, as “she” slips Mid-Talking and Says that one of the girls he saved recently is kidnapped by the gangs in her area, Friend Controlled the Media There to spread her news, that Otcho Ends Up knowing, even if he never Read Newspaper / Watched TV ETC On That Particular Day, Indirectly Manipulating him into saving her, which will also follow a series of events end up with him sat up for kenji’s call.

Friend Knew How will the info of “She is Kidnapped" Stimulate Otcho and Push him into going to save her, Making him go via Compasion, Now Once Otcho is there He encounters The Girl, he saves her and formulates a bond with her, Friend knowing Otcho would be affected the MOST by someone who he has saved before and assumed “her" having a better life, kidnapped her again and made her a Slave again, Pushing Otcho Harder Than Anytime before, Mainly through good Judgment and analyzing The Current Context, Now after the saving, Manjome makes an Appearance and asks one of the gang members help, as the man runs away, Friend Knew how will Otcho percive this scenario, That he will trust Manjome more after he sees that etc, and not consider him part of the “evil” side in the story, Gaining his Trust in Order to use this for a later purpose.

Manjome says he is from the Friend-ship Democratic Party, and he asks both Otcho and the woman whether they Would Like him to take them to closest Bus, They Both agree, Showing how Good does Friend sees their perception and how should things be executed in front of them to gain their Trust.

As they are back, Otcho sees the women dying in front of his house, Friend Waitied Them To split in order to attack Otcho as much

emotionally as possible, YET with perfect Resources Utilization.

Friend had to let The Women Remember. Now what was the method?

Manjome is well known in the gang, Friend knew she must have seen his face and would remember eventually, Knowing That she in particular, would remember after they split, {Due Coginitive causes, knowing that she will be tunnel visioning on leaving the area soon etc.} he made the cultists attack her almost instantly after splitting, yet not kill her, attack her in away that she could reach Otcho, yet with the biggest amount of damage possible, That She Dies in his hands, making Otcho angry about the cult, as she would tell Otcho Mid-Dying That She Saw Manjome and they attacked her because of all she knew, Knowing how will Otcho deal with the current situation, Friend Caused her to live such as ending Making OTCHO ENGAGED upon Anger on Manjome.

Friend understood her Cognitive and Mental limits as well as perceived her physical conditions thus picked a specific way to kill her, Predicting how much will she last.

Before dying she says that she ran as fast as possible and died thus Friend could have indeed known her physical stats.

Knowing That Kenji would Bring up Manjome at the phone call, IF double bombing happened, Friend Made Manjome do all these tactics, as Friend Made them Both Encounter him Mid-searching what is the cult, Giving them 1 Same Person to Hate, since Friend couldn't have interacted with Otcho himself sadly, To Make Friend Himself this 1 Hated enemy, again for a later purpose, he abused Manjome's Existence and made him perform what he performed in Double Bombing, and made Manjome a good reason for Otcho to answer Kenji's Call, and have an idea that Kenji is not crazy whatsoever, ReDirecting Their Hate to Manjome.

Otcho says he will be busy for a bit and closes the phone. Why? Due the compassion his teacher induced inside Otcho, He shall take the girl's body to her family out of respect which Friend planned perfectly.

Once Otcho goes there, The Girl's mother during her madness screams about how dumb she was to sell her daughter to that drugs seller, Otcho asks the family if they knew where "rainbow factories" are which are the factories that sell the drug.

Friend could have engineered the society in a way that it leaks some basic-surface level info about the factories that Otcho is indeed aware of, yet doesn't know where exactly, that he ends up being forced to ask those people where, thus leading him there at this specific time. WHY? Because reaching Kenji strategy before that time didn't develop enough whatsoever, Friend wants the events to happen, yes, BUT he wants them to happen in a specific order , he wants them ready for bloody new year's eve and not before it. Nor after it His mentalizing is so perfect, we will know this at the end of BNYE, But for now, things MUST go in this way and in this order at this specific timing.

Now to summarize what Friend did on getting Otcho start he:

1/ Socially engineered the society into revealing Rainbow factories' names.

2/ Socially controlled the info about the girl thus making Otcho aware of her kidnapping.

3/ Sent the Japanese man, almost dead AND caused him to have the Friend-ship symbolism in his bag, Refreshing Othco's memory.

4/ Killed the girl in front of Otcho.

5/ Matched {4}'s timing With Kenji's calls.

6/ Otcho goes to the girl's parents house and gives them the body and asks if they know the location of Rainbow factories.

We are at point 6 now, Otcho heads to the location the family members

described, as he finds people who try to warn him, one of them says “are you looking for "R.F "? Which are rainbow factories, he asks for money and when Otcho pays the man tells him the location and a warning.

Otcho reaches a temple and finds THE SAME d00d Friend picked as a leader on double bombing in that temple.

Our cultist has a Media player and a few clips. One of them is the Robot Friend is making at the moment. {Very important detail keep in mind}

After he shows a clip of the Friend-ship symbolism as Otcho says that he made that symbol.

The cultist gives him a sort of drink {which contains a poison/ drug} as Otcho drinks, the cultist tells him that there is a virus that is spreading. As He starts naming the locations of the places the virus has spread on, Otcho names the place after, the cultist believes that Otcho read the news BUT Otcho says he hasn’t read these for over 10 years, yet he knows what he is talking about.

The cultist seems nervous as Otcho is keeping up with what he is saying while drinking the poison, despite these being shocking and huge events Otcho seems rather cold towards them.

The cultist eventually breaks down asking him how he is not affected by all these and acts like nothing happened, as Octho says, the poison and drugs CANNOT affect his body whatsoever.

The cultist is at a state of disbelief and mental break-down as Otcho asks him to keep his eyes open, Quoting his teacher and applying similar teachings Otcho could have broken through CCM. Saying that Friend won’t save him {save the cultist} anyways. Asking him to show him where R.F is in return.

They went there of course, Those who work there are the same people this d00d led at double bombing, as he asks them to leave, they do, they

trust him since he is a fellow Cultist, or so they though as he tells them to save themselves they instantly got the place empty

At the same time Otcho opened the loads of drugs and their containers and burned them, causing a huge radiance of explosion and turning the factory on fire. Thus deleting it from existence.

Now, Why did Friend "cause" all these to happen or are they just anti-feats?

We will know why at the tunnel strategy.

But for now, Otcho After these events is back in Japan. And will find Kenji.

{EQ: Perception, EQ: Understanding, SQ, Psychology, EQ: Management, Non-linear thinking, Inductive Reasoning, Abductive Reasoning, Planning, Strategy, Tactics, Info gathering, Indirect Manipulation, Mass Manipulation, Emotional Manipulation, Logical Manipulation, Overall Deception}

8. *The Tunnel Strategy*

Kenji and Otcho end up meeting as Friend Planned, Now they are looking for the Robot They Drew 30 Years Back, Otcho and Kenji are indeed aware that Friend is Making it UnderGround For 2 Main Reasons Which are Indirect Manipulation on Friend's Side, Haven't I already said we will Know why the did Friend want Otcho to search R.F? Well this is why

1. Otcho's BackStory:

When he was in the Process Of Destroying RainBow Factories, he encountered The double bombing leader Cultist, However he was Under Friend's Manipulation still, One Of the things He had at the Temple he is

at were a Tape and a Media Player, He Played Many things on it but what we want to keep in mind here is THE ROBOT IMAGE, The BackGround Of it was see-able as it was UnderGround. Friend caused all these events in Otcho's backstory about R.F to make him see that and make everything look like an accident Exactly as he did everytime.

2. Kenji and Shikishima's Daughter:

FRIEND Brainwashed her and made her a Cultist after making our 2nd most favourite cultist or the assassin Seduce her.

Friend as we know Gave her a Speech to tell Kenji, after Friend Indirectly manipulated Kenji there via Influencing his Reasoning and thought process with fake profiling etc, One Of the Sentences Shikishima's daughter mentioned was UNDERGROUND-KING, as a title FRIEND Gave to Kenji Mid-Telling her about him, Since She Has Good Enough Acting Skills to fool him, and a Perfect Script Given By Friend Which allows her easily to do so, This is how Kenji Perceived it:

—-> This Girl Hates the Cult Even Though She Thinks Otherwise

{She Says There is no place for her to go back towards and a lot of other things Making Kenji Thinks she is awaken now, not brainwashed whatsoever}

—-> The Girl Understood. Now She Will Tell Me What She Knows trying to avenge her father and save humanity since she realizes how big of a deal this is.

—-> The Girl Leaked Me What Friend Told Her

—-> FRIEND Called Me Underground king, Thus There is Something Will Make Me Look Like a Terrorist again, That is being done Underground Just like any other plan Friend made

{according to the profiling Kenji had already done about Friend, he will make him look like a terrorist through a thing that is underground}.

Friend matched their Cognitive functions and Deductions. {Otcho and Kenji} and Made them both So Sure about them finding Some Type Of Hole, Friend have slipped! We must abuse that. When we all know that again, he makes it look like an accident as every time.

They only know 1 place that would allow Kenji to sneak *without* being detected while entering the underground {we know he is a terrorist by now in the media's pov}.

Once They Reach The Place Otcho Saw, They Are Certain That the robot was built here after viewing the place, and they also find a mini TV and a Tape, Which After They Play They Find a message FRIEND recorded especially for them, Asking them (Mainly Kenji) to Gather the Others, as the robot stars appearing, Friend Asks Kenji to Gather the NINE, picking this one number for a later purpose, as the robot disappears, a ball is thrown at them reminding them of their past, they played here one and at that one time the ball entered the Sanitation, yet it was Thrown at them mysteriously, Friend again KNOWs Their cognition and can read their thought process, he knew they will recall the incident and sat a very nice small side indirect manipulation, again, plays on their Reasoning Skills, and Past profiling He Expects them to think like:

→ Fukubei said its sada

→ Sada is a Weirdo Who is alone the whole time
→ Sada likes less popular Places {e.g school top}

===> Sada is the One Who threw the ball at us when we were kids.

He Shows them the Robot, as a Direct Manipulation To SHOW THEM how big of a threat this one is, Clearly using the 2 Emotions Compassion and Fear, Especially when he says

“IF THE 9 ARE NOT GATHERED, IT WILL START”

Making Their Job Faster, Making them Engaged More ETC.

This is where the 2 Strategies Reaching Kenji and getting Otcho stop overlapping, they can be labelled as one strategy up to here, Making it 2 Strategies in 1 bigger strat, its goal is to get them here. IF Kenji’s reaching Older steps never happened, Double bombing wouldn’t, and IF double bombing didn’t happen. Otcho wouldn’t have seen the Robot Underground.

Now, Once Kenji and Otcho are Gathering the Other “9” Friends, They Invite FUKUBEI, Sending a Message to the Apartment he Shown Kenji Before, in Reaching Kenji Strategy: Appretment Tactic, Predicting That Things Will lead to this Context Eventually, FRIEND Used The Appretment Tactic as a Shielding, He Used The Excuse Of his Children as a Cover That Does Not get Suspected when he Leaves the Tunnels / Comes again, He has Children Who are so Young and With NoOne to Feed Them and Kenji Can Back This up, Abusing the Emotion: Compassion for the #983008 Time, We See him utilising the tactic on EXTREME Basis

For Example:

FRIEND Told Kenji that his Kids Liked his Rice and Would love to Eat it again, Lying thus Directly Managing Kenji’s Emotions Amplifying his Motivations ETC.

(*This happened When Kenji Remembers Fukubei after he died on* BNYE)

Now FRIEND is in the Tunnels With Them Perceiving Them and Deceiving Them as he likes.

BUT this is not his goal, he doesn’t need to actively observe them as we saw by now, his real goal is something else we will explore later.

We don't see how FRIEND Manipulate the twins so we default to The Cult Creation Mechanism, as we see the Effects on them even if they are not facing a Cultist. Thus not acting and actually Brainwashed.

This is Why FRIEND Told Them to Gather "9" People:

P1 - If They Need to Gather 9 People They Have to Get The Twins.
P2 - They Have to Gather 9 People.

C - They HAVE TO get the twins.

Why is P1 correct? They Lived With them Their ChildHood, They Know About BOP, Thus They Will Understand it Easier + Faster Than Anyone else, Also They Have Good Influence, getting them on his side will be a huge Buff for Kenji and his group.

Now, Kenji Sent Them Invite, yet they Never Responded {Friend Told them to not as he wants a The Twins to get Particular Info From Them in a 1 On 2 Session}, Friend in the Tape Called Out the Fact That IT MUST Be 9 People, since they won't ignore the warning due to the robot they saw, Kenji sends Yushi.

Since FRIEND Made his face popular as a Terrorist he can't go himself, As Yushi Goes, the 2 Twins encounter him with a warm smile, Yushi Tries Explains the Situation as They Say They Understood, They get that Kenji is the same Kenji They Know, gets in a Trouble whenever he can, and generally Comfort Yushi That They WILL HELP.

Later They Meet Up With Manjome and Have Food With Him Calling him Their Teacher and showing Respect {*Manjome is above them at the Cult Ladder, Thus CCM: S7 Takes a Place*}, They Give him the Invite and it has Kenji's Location and Some Other Details, But, Why Does FRIEND Need All That? Doesn't he literally Live with them? It's not like he lacks their location, Neither NOR he needs any form of details, Why did he waste all this time?

What follows is Insane Strategy Shielding:

1. Friend Tells Kenji to Gather 9 People forcing him to get the twins

2. Friend already Brainwashed The Twins, Thus Any Contact They Have With Kenji is already Under Friend's Control

3. Friend Can't Instantly get the Police to Kick Kenji's group, since he was not close enough from them when they were kids, WHILE those people were in Kenji's group, The one Friend is acting as {aka Fukubei} Never was, he breaks the pattern, they can Induce he was the reason for the police's acknowledgement of their location IF the police ever found it.

- Reaching Kenji Strat is not enough Cover For Him Since They Are Already Few People Who Live Together, they trust each other WAY more then they trust him, who only has Kenji on his side.

4. Kenji is Forced to Reveal His Location to the Twins If he wants to contact them {He MUST contact them}

5. If The Police Attacked Kenji and his group under Ground AFTER their Location being Exposed to the TWINs, Especially That The Timing is INSTANTLY after revealing Kenji's location, They will have all Fingers of betrayal aimed at them for leaking the Group's location.

FRIEND Predicted the Current Situation TOO LONG Before it Happened, and Sat up For it Shielding Himself Before Kenji even started Thinking about the UnderGround Life, ever since Double bombing Friend could have seen up to this point.

Indirectly Kicking Them From the Tunnels.

Keep in Mind:

- Since The Very Beginning Of This Strategy, Friend Had Been Fabricating many emotions such as Compassion, Anger, Frustration,

Attachment Trust etc, Showing UN-Real Acting Skills, Managed both His And Their Emotions, Mainly Their Fear, compassion and ANGER, as Each Time They Tried something he flipped it against them.

- He Always Had Been Taking Pictures For Them, Making it Look Completely Fine at Their Perspective After.

Since They Will Think **"Well, He is taking Pictures Just As Always"** When He Tries doing it Later, Removing Any Suspicious-ness That May Take a Place Later When He Wants to Take a Picture at a Crucial Time.

This is the reason why he made this arc happen in the 1st place. All the time he poured in this arc took place was to put this piece of info at their Profile about him.

- He Adapted to 3 Main Roles Simultaneously, {"Old-Fukubei " —> Cult leader —> FRIENDSHIP Party President}.

Lastly, Friend Destroyed the national diet building, Emotionally and Indirectly Manipulating The Mass into Thinking That Kenji and his Group Did it, Again Confirming Their Image Of Being Terrorist Pre-Bloody New Year's Execution, Since The World Will Need to be Ready to Perceive "Enemies Of Humanity", He Used This as a Quick Set Up.

From The Other Side, Friend Gave a Warning to Kenji's Group, They Know That Bloody New Year's Eve is 1st Day Of The Year, Yet They Wrote in BOP That there is a Warning That Will Happen Before It Takes a Place, Making Them Engaged More Once again Before Bloody New Year's Execution *{Direct Manipulation}*

{EQ: Understanding, EQ: Perception, Psychology, EQ: Management, Deductive Reasoning, Inductive Reasoning, Abductive Reasoning, Linear Thinking, Non-Linear Thinking, Direct Manipulation, Emotional Manipulation, Mass Manipulation O. Deception}

Bloody New year's **Eve:**

==========

As the Time Passes, The eve is here, Friend Unleashes the Virus in Capitals Of Many Countries, Since Capitals Have Highest Population, Spreading it there would be the MOST effective, He Also Made The Virus {More like Manipulated Yamane to make it}, in a way that is very Horrifying, Their Blood Leaves Their Body, As They are shouting before Dying, Making it even More Scary, And By The Way, This is Why It Was Called bloody new year's eve, Friend Already Called it Bloody New Year's eve before that night took a place, yet he never shared its name, and after Using That Particular Virus, the World Called it Bloody New year's eve Mass Manipulating the Whole World to Name it Like That, even the Name Itself is Mass Manipulation For the Perception of the Next Generations which is

"FRIEND Saved Us, Our Parents and Our GrandChildren and Generally Human Kind, From Bloody New Year's Eve"

Would Help in Manipulating These Younger People Who did not Experience The Actual Eve, Now How will Humans All Over The World Feel?

They Will Be SCARED and would not bother leaving their homes, will wear a Mask ETC, Friend Controlled Their Behavior and Mental State at this Point, That Once He Appears as a Saviour, They Will Be Attached To Him, Will Feel They OWE him a lot ETC.

Note: Friend has been making a Profile in The Main cast's mind if you can remember, let's break it down as a reminder:

A/ Wears a Mask
B/ Targets Kenji's close Friends {He broke that pattern on double bombing}

So Kenji is only left with A

On the night of bloody new year's eve, the main cast goes to the city to fight back against friend's giant robot. **The Main Cast Spreads into 2 Groups, Kenji Runs in a Direct Line Saying That "If This was the same robot I Dreamed of as a Kid, there must be a Remote Control, and Since Remote Control Will Be Used, It Would be More Logical To be ON TOP of a Building"**

Kenji reasoned that info on the spot. The Robot he dreamed of as a kid was influenced by the robots he was exposed to in the media.
Premise 1-In the 70s, robots were always controlled via remote controllers.
Premise 2-His robot was imagined and designed in the early 70s when he was a kid.
Conclusion-His robot is controlled remotely.

Also, he deduced that since the person will be remotely controlling a robot as big as the one in the city (50 meters.), he must be controlling it from a high place where he can't be seen yet he can see everything including the robot.

FRIEND Predicted That And Ran With Him in a Straight Line. We Know That he Indeed Predicted Him Due the Building Scene Later.

But this means that the Profile is updated with 2 Characteristics and is now:

A/ Wears a Mask
B/ On a Building
C/ Has a remote by some Kind

Group 1:
Shogun & Yukiji & Mon:
—----------

When Those Three Were in The Friend-ship Party Room, There was Many Monitors Screens, all aiming at the robot, One of them however, was aiming at the roof of a specific building, The Screen has Shownsomeone who wears a mask and has a laptop, which fits the profile Kenji described earlier,
They Got Into The Room Fairly Easily With-out Facing Any Guards Whatsoever.

FRIEND did not Put Any Guards For 2 Reasons Here:

1. is Trying To Make Them Feel Safe here, "He Did not Expect Us Coming Here" is the Idea he is Trying to Grow Up at their Minds, He is Doing that In Order To make The Info Provided To Kenji Smother, and the Source Being "Calm" as Much as Possible That No One Among All Of them "Mon & Shogun & Yukiji" Suspect Anything, FRIEND Gave them That Sense Of Calmness "How Would They Be That Neglecting?" Never Came Through their Mind.

2. His Psychological Analysis On The Main cast, Friend Read Kenji's Mind and Thought Process Knowing Where Would he be at a Particular Time And Put a Camera On Top Of That Particular Building's roof, which Kenji would position at in X time, at That Particular Point, Where Yukiji Mon and Otcho Match the Timing Of Kenji Reaching That Camera.

He also Put Around 15 people Spectating in the Monitors Room For 2 Reasons:

1. They Will Switch to the Camera Next to Kenji, If they didn't be like "Oh, we have A camera on X building" Otcho wouldn't be able to Tell Kenji where is the Profiled Man, FRIEND Is Amplifying That Calmness Again He Did not Expect Us Coming Here is what he is Establishing, It Should Look Like Their Mission is So Smooth That FRIEND Missed Up and They Are Going Well and Perfectly.

2. To Piss Our Trio Of and Make Them Try Harder and show them What

The Standard Human Will Become under FRIEND's Control, Since Those 15 Cultist Weren't Normal, They Are Laughing at People Getting Stomped, They Are Mocking Kenji ETC, It's Like Looking at what world would exist under Friend's Control, Making Our Trio Engaged More, We Don't Want this Future Is What They Say, They are Disgusted and Angry About This Possible OutCome.

They Had No Weapons Of Any Sort Again Forcing This "Easy-Going-Way" Type Of Idea In Our trio's Mind.

Otcho via wireless reports that Man to Kenji and his location.

Group 2:
Kenji & Fukubei {Friend}:
—----------

Once Otcho tells Kenji about the masked man, Kenji Sprints as fast as possible to reach the building Otcho told him about, as Kenji reaches he finds that Friend and the Profilied Man are already there.

Friend asks Kenji whether to shoot or not, as Kenji tells him to not shoot, as This is literally Kanna's dad and he doesn't want him dead.

Friend says {talking with the "Profiled" person trying to deceive Kenji} **Is my Wife Fine?** {He told Kenji that his wife is Kidnapped by the cult at Reaching Kenji strat}, **My kids are crying everyday waiting for her** {Friend showed Kenji Kids who Friend claimed to be his own on Reaching Kenji strat} **You are Sada, No?** {Friend told Kenji that he has shown BOP to Sada on Reaching Kenji strat} **You seduced Kenji's sister because of Me?** {Friend told Kenji that he was the father of Kanna on Reaching Kenji strat}

He cries mentioning these and starts climbing to the Profilied man, **As**

there was a form of Metal-Chain between him and the Profilied man.

Friend ends up falling out with the man, The cast is sad due that, yet the robot is still on going despite the Remote / Laptop being broken.

Otcho tells Kenji as he realizes it is still going, he Orders to bring the Van and explosions. As he will go ON-TOP of the Robot, as there is a 2 possibilities here:

A/ it's not driven by a remote and this was a trap, but rather inside-manual control VIA a pilot.

In this case, Kenji will climb on top of the robot and force the pilot to stop saving the night from the Robot.

B/ It was programmed, which means that it has a pre-sat route, unchangeable nor stoppable unless violently forced to do so. In that scenario Kenji will bomb the hell out of the Robot through explosions

In this case, Kenji will bomb the Robot, from its top or down, doesn't really matter, BUT We can infer that logically he IF KNEW this is the possibility which is gonna happen. He would have bombed it from its down-side to not risk himself, destroying the Wheels / legs and stopping it from moving.

——————>

Otcho was told that A is true, yet Kenji took the explosions as a back up plan.

Keep in mind that around this time. The Japanese government sent aircrafts trying to destroy the Robot BUT Friend anticipated that and used ATOMIC power as energy to move the robot, Shielding the Robot with that. How did the Government realize that There is atomic power? Friend put the atomic symbol energy on the Robot's back, in a visible way for the aircrafts.

AT the time The gang uses a van to drive to the robot. Manjome reaches the government meeting where many politicians and officials are discussing what to do in this situation. Manjome says that Friend had already found a solution.

Manjome says that Friend and his party had already developed a vaccine. Friend predicted that the government would ask for context, so he made Manjome explain that the Friend group party had studied the virus when it broke out globally 3 years prior and discovered a cure. And made Manjome explain that it was already shipped to all over the world and was designed in Thailand, so that the politicians don't suspect that the cure was completed where and when the virus started spreading.

This proves Friend's abilities even further and explains why Friend started with the viruses in 1997. Not just to alarm Kenji and prove to him the existence of the cult (since the virus is breaking out in the places that Kenji had predicted.) or to break Kenji mentally from the early beginning to motivate him more to play the game and to spread despair (Kenji thinks that it was his idea but it was Otcho who told it to him, but he remembers that he wrote the concept so he'll still feel emotionally disturbed because of this. We discover in CH125 that the viruses were an idea created by Friend , and Friend told Yamane to tell this idea to Otcho, knowing that He'll tell Kenji this idea..), but also as a preparation for this plan.

Friend's goal is to frame Kenji, and to seem like the hero. So he planned to find a cure for the virus, calculated when and where he should spread it, and where and when he should design a cure for it.

Back to Kenji and the Robot

Once the Van is brought someone tries to check Friend and the Profilied Man's bodies, yet Kenji stops him.

Friend could have known that Kenji would stop anyone from checking

and stick to the play.

Friend gave the robot a cockpit. And as anticipated, Kenji goes to the robot. The cockpit was designed in a way that is easy to discover. Otcho proposes that they make a plan but Kenji jumps anyway.

Kenji here was facing multiple emotions and feelings, such as emotions coming from Fukubei's death, the casualties done by the robot and virus, feeling despair, etc. All of these are emotions that Friend pushed, emotions that were caused by Friend's plans. Here, Friend is able to exactly predict these emotions and what they would cause. He is able to predict the actions done by Kenji such as recklessly climbing the robot, via reading through him and analysing him. He predicted that Kenji would climb the ladder (who was hanging from the cockpit.) and reach it. And Kenji does that.

Kenji climbs to the top, enters the cockpit, and finds that the driver and the controls were all fake. He drops some dynamite that is meant to explode in 3 minutes. But to his surprise, Friend is calling him through a monitor.

A few seconds later, Friend shows up. He's on top of another robot designed by the friendship regime.

Kenji at the moment is very emotionally disturbed and confused. He Could have finally understood that he fell in Friend's Web, that his being there was Friend's plan, realizing that fact that Friend didn't die, meaning that Fukubei died for nothing. Friend indirectly intensified Kenji's emotions, and predicted their trajectories and causes. This was done in order to make Kenji extremely mad and sad so that he confronts Friend, and tries to force him into revealing himself. Normally Kenji wouldn't do such a thing because he might die from the dynamite, But this time, due to the Emotional Manipulation Friend did on him, he picks Seeing the fact instead of trying to escape whatsoever. This was all predicted by Friend.

Friend then reveals himself to Kenji, moments before the explosion.

This Explosion however Happened at a very specific time. - Keep this one in mind

After the attack, the Friendship party presenters had an appointment in the UN. Yes, What Friend did on BNYE boosted their reputation to the roof. Their plans succeeded, and they are now seen as heroes for humanity because they were able to stop the virus with a cure and stop Kenji's robot with their own robot. IN NO TIME, They give a speech that emotionally manipulates the audience which contains people from all over the globe, giving them more trust in Friend after seeing a small sample of his followers, then they show a video of Friend in his hospital bed. He Recorded it especially for them, He's saying "Let us join hands... And walk together..; My loving friend..". Friend here is making sure that the UN recognizes him as the true saviour, this image is the exact image that he drew in his cult. The manipulation shown in this chapter isn't important, but Friend's narrative is.

Friend's goal to become the world's leader has a multi-faceted plan associated with it, including taking steps which will cause him gaining universal recognition and authority. YET, his strategy is also intertwined with his desire to conceal his identity, keeping his face hidden from the public eye. This is an essential part of his will, he poses a dilemma here, where he needs to build trust amongst common people , at the same time maintaining secrecy and anonymity.

So how would Friend succeed in gaining such trust and authority, whilst keeping his face hidden? He could adopt a strategy of carefully mapping out his actions and operations that slowly will build his name and reputation, but since there is always that sense of "You can't trust what you don't see". So friend wrote the narrative that:

- **I'll fight Kenji and his terrorist group/robot, this is an extremely heroic act.**

- My face will get damaged from the fight.

- I'll put on a mask because my face is deformed.

Friend here could have made a perfect bluff in which he will be able to conceal his face whenever asked. He can keep on his mask and They won't suspect his reaction due their knowledge that he isn't lying, since he did actually go to the fight and was actually injured. They would feel ashamed of asking him this question because of his physical state. This would give Friend the opportunity to take over the world without having the need to actually take off the mask.

Now, do you remember the last thing I asked you to keep in mind, well "that specific time" was the timing of the Explosions, which was exactly at 12 AM or 0:00 or Midnight. What does this mean?

In shorts, Friend in order to execute the plan had to Visualize Shinjuku and run a simulation of Kenji and the main cast moving around it Inducing Endless buildings on a huge Radiance WHILE forecasting how would they move, simulations so complicated to the level of Replicating a 50m complex Robot and applying ub-believably complex maths and Physics laws getting PERFECT timing like how would the gravity get Kenji back AND the vehicles speed, how long each door open will take etc.

matching his narrative. Which is being a Superior creature and a god in the eyes of the public who got rid of Kenji and his group exactly on the 1st second of the new year.

This is City-scale Visualisation that wasn't JUST an Image but an entire Simulation that had to keep into account couple DOZENs of things in order to be accurate i,e the explosions speed, he needed to Simulate Kenji, the Main cast, the cars and their speeds, the monitors and mentalize through Otcho Yukiji and Mon knowing WHEN will they detect and what Monitos in specific to use, the Cultists, Literally everything in

the night, Inducing endless buildings on Shinjuku's huge domain, This is just different level VSI. Mentioning everything will take a long time so you can go yourself and Read BNYE and start counting how many things he had to keep in account to perform this feat. Even a Random object that can delay Either of Kenji's group, Friend or the robot counts here.

Friend Needed BY NECESSITY to run that simulation if he wanted to get perfect timing and pick a specific speed for the Robot, Specific people in the Friend-ship party Monitors room, specific lies to tell Kenji, Specific place to plant the camera at, JUST to get the specific timing he wanted.

{I Can elaborate on The Visualizing and how it happened but its pretty long, feel free to ask me about it tho}. *This is what is called* "SHV" *or* "EV" *Shinjuku visualization or Extended Vision feat.*

This is how the eve went, Friend in 1 night could have gathered more influence than any human could do in a lifetime, which he will use later on too.

Remember the Photos Profile Thingy? Friend took another one Pre-BNYE execution where they are looking at the Robot, Friend used that Image in the books of history to amplify the fact that Kenji and his group were indeed controlling the Robot during the eve.

{ FSIQ: VSI, EQ: Understanding, EQ: Perception SQ, Psychology, EQ: Management, Non-linear thinking, Linear thinking, Abstract Thinking, Inductive Reasoning, Abductive Reasoning, Deductive Reasoning, Planning, Indirect Manipulation, Emotional Manipulation, Mass Manipulation, Direct Manipulation, Logical Manipulation, Deception }

Now, Why are the strategies connected to this plan?
{Skippable if you got it already}

1/ Pawning Sada:

A/ He needed Sada to Profile Kiri

B/ push her into Biology more.

2/ Causing Yamane addiction:

Getting the Virus {he will need him later too just wait}

3/ Manipulating Manjome:

A/ Served a Significant help in CCM

B/ Reaching Kenji: double bombing + Getting Otcho where Friend used him to match Their thought process {Kenji and Otcho}

C/ On BNYE where he told about the Cure

4/ Kiri's seduction:

A/ Forcing Kenji to stay in the shop {important for Reaching Kenji strategy}

B/ Making the Virus; without that, there is NO BNYE at all.

C/ getting Kanna {Needed Her for Double bombing, Shield himself on BNYE and in reaching Kenji at one point, he will use Kanna later too}

5/ Cult Creation Mechanism {CCM}

Gather Influence, Like c'mon do I have to elaborate here? How could he ever Kill Donky and Make the man who told Kenji he wrote what Friend is doing look like an incident? All what Friend did up to now needed this one. Inducing Kiri's seduction.

6/ Reaching Kenji:

A/ Set our Hero up Mentally for the eve

B/ Make him aware of what will happen and set up in advance

C/ Cause him to Gather the Rest of his old Friends as he needs them to execute his strategy

D/ Tell him he is Kanna's father to shield himself IN the strategy AND on the eve

7/ Getting Otcho

A/ Bring him back to Japan

B/ Make him help Kenji

C/ Give him same goal as Kenji

D/ Set him up mentally

E/ show him where is the Robot being built

8/ Tunnel Strategy:

A/ Decrease their Resources as they are more than what Friend wants

B/ Re-Engage them

C/ adding "Takes so many Photos" to his Profile that they don't suspect him on the eve.

D/ framing Kenji and his gang even more.

Reminder: Getting Otcho and Reaching Kenji can be considered ONE strategy, as getting Otcho needed Reaching Kenji {Double bombing} and their endings overlap When Friend matches their thinking Patterns on hating Manjome and underground tape tactics.

Tomodachi Land

14 years after Bloody New year's eve, Friend created a form of Amusement Parks, but this one is quite special.

Before breaking into it we need to know a small piece of info about It. It contains "Dream-hunters" who search for gifted people and those who are seen to have potential and take them to the facility.

Kyoko is a girl {teenager} who wanted to write a paragraph about Bloody New year's eve, once those "Dream-hunters" Knew about it, They sent a invitation for her to go to TML {again TML = Tomodachi land}

She ends up forced to go anyway and now we start exploring the mechanism behind TML

1/ **The Bus**: The bus had friend-ship symbol on the 4 sides, and on its way there to TML, the tour guide gives all of those in the bus a spoon and asks them to touch it, as it bends at their hand.

If you will ask What's the point? What was metal seconds before they re-touched it became bent without any effort, suggesting a form of supernatural abilities, Later we will know why is Friend inducing this sense of Supernatural stuff.

2/ **The 1st Game**: The students are supposed to shoot at Kenji and his group or shall die {aka lose the game} as the game gets harder and harder psychologically with every kill.

Friend is amplifying and Re-Uniting the hatred towards Kenji in the minds of the young ones, Despite them not actively witnessing BNYE's set up, From terror Friend framed Kenji with {Eg: double bombing, bombing the Government Hall Just before BNYE} back when it happened, They will Feel hate unconsciously regardless due this one game, adding to that the stories they are told by their parents and the media, this game helps these generations to further more SENSE the danger the world sensed back on Pre-BNYE.

3/ The 2nd Game: The students are on a train and will live an accurate simulation of the events happening on BNYE, Including the auditory and Visual Info anyone experienced near the Robot. As well as a deeper dig in the profiles of Kenji's group. And ofcourse told that Friend defeated them and saved human kind

Do I have to elaborate on this? TML {up to this point} is a sensory experience for those who weren't there back When BNYE and its set up happened, a summary for 2-3 decades ago, Causing those who were unable to actively experience these past decades to perceive it subconsciously and to feel it physically, in a sense.

They also spy on people and don't allow them to take images nor record voices nor allow them to use already recorded info out of the facility.

Neither people are allowed to leave the facility whatsoever, as they are dragged back there.

Its stated so many times in the manga, that those who survive TML are sent to an extremer version of it named Tomodachi World, and since one named a Land and one named World you can assume the gap between both in terms of Brainwashing

LAND is a small part of a TOWN
TOWN is a small part of a CITY
CITY is a small part of a COUNTRY

COUNTRY is a small part of a *CONTINENT*
CONTINENT is a small part of a *WORLD*

By this progression, the gap between **LAND** and **WORLD** becomes progressively more significant, The Complexity And the methods should differ too despite them sharing the very same core. Although the gap may not be measurable via an obvious metric, It's pretty CLEAR how big of a diff this is.

But from here and after, The Popular feat starts, The late games's best players shall be presented to another form of Virtual Attraction.

Is a perfect Replication of Friend's Mind, His childhood in particular, {Stated by the Author himself on ch 158}.

What does this mean?

According to the statement it's out right a copy of his mind, which means it's his pure MIND.

But, There are many things that he can't find in his memory, or simply the machine can't process them and make values out of them PURELY via the info his memory provides.

One of the things this machines can't simply Process is emotions, Machines don't have any form of ability to recognize the emotions and characteristics and regulate them for the character, Yet we see that they are literal perfect replicas of real world {will be proven later} but for now you can assume what does this mean.

Friend had to input very specific values for the machine.

Give the emotions themselves causes and trajectories, How do they

function etc.

He had to Fully understand All the characters we see in TML with all their emotional, Mental physical and social states, up to the abstractions they have in their mind and perception. He also could have known specific info they memorise as well as habits and general behaviour. Which requires insane observation, EQu + EQp, Abstract Thinking Analytical skills etc.

He also had to visualize so many things in here. He has a perfect memory due this yes, but he couldn't have seen everything, could he?

We see many times from Sky View the tops of the buildings, The insides of houses, endless things Friend needed to ACTUALLY Visualize with his own cognition yet without relying on His memory.

So basically everything Friend couldn't have seen BUT sensed in a way or another or Just had spatial awareness of its existence was actually Visualized.

This is VSI not just due this Visualisation, but also Due the attention to details and evaluating them. As well as the spatial acuity.

He Can Glance at objects and know how much their length, sharpness etc.

And likely enough, there were newspapers in the area which are actual perfect replicas as well, including the date {this one was fabricated 1st time Kyoko entered the game} Dozens of info about Economy, Sports, As well as Lives of popular people. Thus general cultural info.

This feat expands into endless Categories like VCI, VSI, Knowledge, Memory, EQu, Abstract Thinking, Analysis....*Keeps going.*

Now let's start proving these people are actually perfect replications. We have 3 main proofs about it.

{note: you can name it VA or VR, through the story it was named VA and VR}

1/ Yushi's leadership:

—————————————

Yush Was Pretending to not be the coward, he is the LEADER whenever Kenji and Otcho are not there, he is the one to take care of The Base, Solve others problems ETC. {he was literally gaslighting himself at one point into thinking he was a good leader, we see that on ch 156.

The Present:

Kyoko Meets With Yush as an adult and she Enters the VA Game, Adult Yush however is not acting the same as The Past Yush, he is not that leader, he says that he is not a Capitan, he is useless etc and that the Leader Characteristics are not there any more.

in the VA Yush is acting like that leader, BUT Once an actual Scene Happened, || Kyoko going to danger || he asks her to run away, The Leadership Left the Chat Basically, he is not the dude he is acting to be, FRIEND Could have seen through his fake pretending as a Kid || HE never revealed that until the ACTUAL Thing happened in the real timeline Which is bloody new year's eve That Exposed his fake persona || As We See the VA Tracked That And Could have known that he indeed deep in his mind not the one he is pretending to be, Even Kyoko realised that after Meeting the Older Version of Yush, the difference is that FRIEND Rarely interacted with him, and he never interact with his adult version AFTER Bloody New year's eve to see that was a fake persona

2/ Mon incident:

—————————————

Mon Died As an adult

Friend Never Interacted with him, Since Friend's Group was different from Kenji's as Kenji's Had a Secret base and was 7 Other people, FRIEND Spent His Time With Completely different people.

Friend Still Without Interacting with Mon Directly BUT Through The people he spends his time with and Places he visits, and generally through CONTEXT, Could have Profiled him that once Yushi Met him in the VA He Talked with him a bit could have known that this is ACTUALLY literally same person he knew as a kid. YUSHI Cried after meeting a person he can't talk with in real time,(again Mon Died at the time) Friend With barely any info could have known how his daily Interactions go like.
—————————

The Timeline:
—————————
Add to these that He Was not there the whole day overhearing Every Conversation, But the machine still could have produced EVERY Conversation WITH THE TIMING, as When Yushi was in the VA Following the Cast as they are re-doing what happened back then, He Noticed NO different But Rather Saw the past Re-Happening again, AKA The TimeLine Is 100% Accurate, Not JUST VIA Memory, as FRIEND Is not omni-presence to know what happened the Whole time but also VIA his own Interpersonal intelligence Could have Known Everything INCLUDING FACIAL Expression, You Can Make sure ur self if u want and go read ch 140-160 In the Manga.

—————————————

There are also Flashbacks that we saw Pre-TML From the character's past. When Friend wasn't there OR wasn't able to see what happened, the VA still had the exact same stuff we saw back in those flashbacks.

—————————————
Mind you that, Friend didn't actually exist As much as many people think

around the city, Since this is perfect edition Friend, we know that Fukubei spent his entire childhood there, BUT not Katsumata, Katsumata went to the area on the year 1971, witnessed Fukubei's death and copied his identity, mass manipulating the verse into believing he existed. YET he didn't spend as much as Fukubei, nowhere near as much as he spent there.

—————————

Keep in mind that some studies believe that Even Photographic memory doesn't last forever, despite It providing Perfect detailed Recalling, it doesn't by necessity mean it lasts forever, Friend could have recalled sensory detailed newspapers, magazines and Endless Visual info, flawlessly at the age of 50-55 {*We don't know when did he exactly make TML, But on 2014 we see it 1st time*}

—————————————

Friend knew their memories as well, how do we know? Their behaviour and vocabulary, as well as a bigger proof. In 21st Century boys, there is ch 5 we see Kenji talking to his very own Child version in the VA, as Adult Kenji asks him about a thing, he mentions it was from a specific manga, and elaborates on that Regard, And Adult Kenji could have recalled that very same Info

—————————————

Keep in mind that the VA didn't Just have the main cast's Personalities, but people Friend NEVER interacted with, like the one guy who sees the Future, As well as a worker in a bar whom Manjome went to etc. He could have understood them simply via context and those who they meet on regular basis yet his understanding was so good that he knew their exact wording and interactions with little to no information with nigh perfect understanding

———————————

{FSIQ: VSI & VCI EQ: Understanding & Perception, Psychology, SQ Non-Linear Thinking, Abstract Thinking, Inductive Reasoning, Abductive

Reasoning, Mass Manipulation, Indirect Manipulation, Emotional Manipulation, O. Deception}

Church Assasination

Simply, BNYE has caused a very very very long and complex chain of reactions, and what we call CA refers to all the events that caused Kanna to reach the church and the mafias with her.

Friend had written on the book of prophecy a weird prophecy, it says

In 2014, There will be a gathering at a Church in Shinjuku. At that gathering a saviour of humanity will arise in the name of justice, but be assassinated. And then a nightmarish world will begin ONCE MORE.

You can imagine what this means.

Friend has written this in the new book of prophecy, Who wrote that book? Kid Friend did

{We see it many times like ch 176, Or ch 232, where they reached UP TO the world president, Specifically Mars colonisation which is 2018, After the ReBirth, we also have a proof about the ReBirth itself which is after CA We will know that when the ReBirth time comes though}

If I wanted to actually start explaining how Kanna reached the church with detailed analysis. I will need around 20 pages at the very least, so I

will try to summarize as much as possible.

Now we are After the BNYE in 2014, Kenji is dead and we have Kanna who JUST started living in Tokyo. We don't know where she came from exactly, but we know that she hasn't been in the same house as she stated "I am moving here today" on the same day she started working at a Restaurant in Shinjuku.

There are Mafias around the area of Shinjuku and we have a d00d whom Kanna pays for his very own food, since he has NO money.

This d00d {we will keep naming him a d00d} saw a cop having a fight with a citizen and killed him, and our d00d tried to hide but the cop still saw him.

Thus Kanna due her strong sense of Justice felt obligated towards the d00d's own safety and tried to protect him from the Cops. As they went to a place to hide

Before the murder the cops said something in chinese, which is a language the d00d can't comprehend YET Kanna is fluent in chinese thus asked him to recite what the cop said

After hearing what the cop said on the tongue of our d00d Kanna translates it to "Pope's assassination"and eventually the Word "Friend" came in with these words.

Another Cop heard them as they started running but this one cop is not actually evil whatsoever and he comforted them and said he is not Influential whatsoever, but he has allies who hold good influence.

They trust our cop and he goes to tell his ally, who? It's the detective who killed the best detective in the world on the BNYE arc. And after he is told these words {Pope assassination, Friend} Etc. He asks the very same cop who killed a random person in the street to banish the "good" cop.

Later, the “bad” cop follows the “good” Cop to the place Kanna and the d00d are in. As he kills the d00d and tries to kill the good cop, Kanna hits him from the back with a metal bar and they run away.

Now, we need to look at the year 1996, which is 18 years ago. Friend has some form of supernatural powers (e.g: bending spoons) as Friend gave Kanna (through BIOEngineering) powers too.

Kanna’s thought process led her into believing that the best way to defeat Friend and avenge her uncle Kenji is to gather as many Mafias as possible.

What would be the most efficient way to do so in her perspective? Yes, Money (via Gambling), Thus Kanna shall go to a casino and start gambling VIA the powers She has (she doesn’t know her dad is Friend though, and thinks she was gifted these powers by a way or another.

Eventually she did that and managed to actually win a huge sum of money due to that, and could have asked the mafias in a very charismatic and leadership manner to give her their power {aka support her during her war against Friend who wanna assassinate the pope according to her}. And they agreed she has tons of influence now, despite it being NOTHING compared to Friend’s. She still had more than enough to try stopping the pope’s Assissination, or so she thought.

She asks a specific christian priest To allow her to use the Shinjuku church, where She will start telling the mafias about more details and tries to motivate them

At the same time at the police station, the bad cop heard other police officers talking about huge gatherings in the area, as he took his gun and headed towards the church in Shinjuku.

At the very same time, Yukiji talks with her Friend about the new book of prophecy, before she mentions CA is written in the book, her Friend tells her that she heard there will be TODAY a gathering at Shinjuku church ,

then Yukiji recites the prophecy, As her Friend is shocked and asked Yukiji "was this written in the NBOP?" Yukiji says yes.

Wait what? How did those people know about it? (Yukiji and her Friend) here we go on a Quick flashback where Yukiji is with Mon in a hospital, he tells her he found what so called "New book of prophecy" (keep in mind that we are talking about the year 2002 now) As he gives her the book or at least some pages of it it contains 3 prophecies,

1/ *In 2014, There will be a gathering at a Church in Shinjuku. At that gathering a saviour of humanity will arise in the name of justice, but be assassinated. And then a nightmarish world will begin* ONCE MORE.

2/ *Long live the Expo Long live the Expo! Progress and harmony for manKind!*

3/ *And then, a new World President will be born.*

As we see, one of these prophecies is literally CA. Despite Yukiji knowing about it, she could have never linked the dots and realised Kanna is the one who is going to lead people in the name of justice whatsoever. Showing how the shift happened in NO TIME to the point that Kanna's family didn't even notice it while KID friend knew about it 50 years before it happened

Kanna went there and started giving a Lecture about moral values and that they should unit against Friend bla bla bla no-one cares about what she said, Just then, Just THEN, The bad cop takes his gun and aims at Kanna, AT THE VERY SAME TIME, Otcho appears from nowhere and jumps in front of Kanna, in an attend to Tank the bullets.

BUT, 13 appears from nowhere too, and shots the bad cop, saying that the prophecy is done this way. But how? Wasn't Kanna supposed to actually die? That the prophecy is complete?

Yea NO, before dying the bad cop started realising what happened, HE IS

THAT SAVOIR, Friend made the saviour who was assassinated on his team rather than Kanna's.
Otcho runs towards 13 as he from a helicopter recites a specific prophecy in the new book of prophecy

When the Holy Mother descends, she will bring with her either heaven or hell.

13 can't understand what that means, but after seeing Otcho he did understand. IT'S KIRI, the holy mother aka Kiri will be back.

And here, just here CA ends. Friend hadn't bothered doing anything after BNYE as he knew this chain would happen. But we need to keep in mind Few stuff:

1/ This plan needs BNYE to happen BY NECESSITY for it to happen, and here when I Say BNYE I Mean last plan, not the strategies under it, BUT since the plan could never happen without the strategies, it needed the strategies to happen as well.

2/ Kiri's seduction Needed to happen since NO KANNA without Kiri's seduction

3/ Reaching Kenji needed to happen by necessity too since Kanna wouldn't have went against Friend neither nor would have had the motivation without Kenji raising her up

4/ Getting Otcho Needed to happen by necessity since he must be aware of what happened ETC, If he wanted to be back and save Kanna as we saw.

Basically, this Plan involved everything Friend had done until now, since everything he did came and played a main role during BNYE Which is a necessary element for CA.

{keep in mind that 13 was in a prison with Otcho and told him that Kanna

might die}

Friend basically forecasted the chain of reactions and mentalized through everyone to some extent, But Kanna and Yukiji and Otcho and The bad Cop in particular, finding out when will Kanna have enough Motivation, Charismatic-leadership Manner and where + What will she do with these.

{ EQ: Understanding, Psychology, EQ: Management, Inductive Reasoning, Linear Thinking, Abductive Reasoning, Planning, Foresight, Mass Manipulation, Indirect Manipulation, Emotional Manipulation, Info control }

The ReBirth

As we know in the new book of Prophecy There is a prophecy which says

And then, a new World President will be born.

Which is Friend in the process of executing it now, 1stly we need to keep in mind a specific detail, which is {ch 126}Kid Yamane told Kid Otcho that there will be a book, which shall never be borrowed in the library, Through that Otcho {after CA} Went there and scanned through the library and found a note which says

"There will be a Meeting of the secret society on the 1st night of 2015 the place is the science Lab"

Following that Otcho went there and found Yamane waiting, Yamane says that Friend will be here to kill him due his will of letting the lie of 1971 a secret and that Yamane could tell.

Why did Friend change his opinion about Yamane all of a sudden? Yamane tells us the story, but I will try to summarise it as much as possible, I Will be talking as If I Was Yamane though:

1/I wanted to finish by Re-Search, I Would have made a virus and we would have made a cure, we would make a virus and we would make a cure etc.

2/ This is what I wanted, to make a virus and make a cure for it.

3/I would have kept going in these researches IF Kiri didn't visit me on 2003

Basically what happened in 2003 is that Kiri visited him in his lab and viewed some of the viruses he made as he tells her she will need at least 10 years to get a cure for this virus.

She reads in the virus review that there will be 1% of the human race who have a natural immunity against the virus.

She asks him if he knows about NBOP, as he says yes, She asks him how many people will vote for the world's president in the elections, he says 60 Million WITH, NOONE AGAINST, she quickly calculates how much is 1% compared to 60 Million, Finding out that 1% OF 5.960 Billion Is approximately 60 million, thus she realises that there will be 5.840B people who are supposed to die via Yamane's Virus.

Yamane ran away from the lab after. Friend could have still Identified each one of his locations and new addresses, Thus Yamane knew it's POINTLESS to run away. Knowing that Friend will be there in the secret society meeting, Yamane went there armed with the Will to finish everything once and forever.

Now What happened in the secret society meeting was simply Yamane Shooting at Friend, as Friend dies Just like that, yes the story ends here, Friend died what a fodder

Why did Friend allow himself to die here? Well basically ladies and gentlemen THIS WASN'T FRIEND.

Friend anticipated his own death, and sat this scenario too long before it happened, predicted the psychological war Yamane will be having, Predicted The meeting itself and how it would affect Yamane, Proofs of that would be what we see in 21s Century boys. Yama could have known that "Fukubei" would die and Katsumata would replace him during the ReBirth. As Friend wanted to Label the dead guy as "Fukubei" And not himself, thus giving that d00d the very same face.

Friend gave that one guy a script which contained things about the secret base as well as Collins similarity which Kid Fukubei found

Now what we are left with until now:

1/ Yamane will be addicted to Virus creation, the addiction I caused him to have shall be very good to the point it blinds him out from the evil acts he has been doing.

2/ Kiri will realise eventually that it's not her brother who made the virus but rather Yamane's virus, and go visit Yamane.

3/ Kiri will approach Yamane and ask him about a few things, and will end up mentioning humanity would end etc.

4/ Kiri's meeting will have a huge effect on Yamane and he will start running.

5/ I will keep finding Yamane until he realises that he can't run. Thus he will stop running and make a Decision about my existence.

6/ Yamane will feel guilty due creating the virus, after Kiri Woke up his Compassion he will try to kill me as an atonement for making a virus that will kill too many people.

7/ I Will send my very own fake Version whom will have Fukubei's face too thus fabricating my death in every's eye

8/ Otcho will be there; due the note Yamane left when we were kids, Why do I need Othco to be there? Since Friend is in need of someone from Kanna's team to report the Incident or else none of the main cast will believe Friend actually died.

Friend forecasted all these TOO LONG before they happened, Again Yama Being able to Find out about Fukubei's death proves that.

After Friend's "death", there is still a mystery, in the main cast's perspective at the very least alongside Manjome. Thus they enter the VA again.

Otcho saw his Face, which was Fukubei's face who "helped" them during BNYE, Thus when he reported it, Kanna's camp believed that It was indeed Fukubei who was Friend all along. Misdirecting them completely and concealing his true identity.

——————

As we know the VA is an actual perfect replication of Friend's Old hometown, They should be able to have a better Understanding of what was going through Friend's mind if they saw the past.

The game was set in the year 1971 when they got in. Regardless of all the events they had, They eventually saw what so called "Lie of 1971" which is when Fukubei's reBirth failed.

Why did Friend allow them to see that In particular? Because What Friend is about to do after, is the Rebirth as well, he is about to successfully execute it however, What Fukubei Failed on when he was a kid. Shall be Re-made by Friend and would work this time.

Friend forces Manjome out via a violent way which was simply hanging Kid Fukubei, Thus destroying the Structure of the Game.

Friend is concealing his existence from the world. Thus in order to make the pope appear in front of his body and be actually able to tank 13's bullet, he needed Manjome's influence thus he asked via Manjome's own "Remote" Whatever the way he can communicate and give orders from, The pope to pray in front of his body.

Friend abuses the fact that it's midnight and people are not staring at his body the whole day, goes and changes the Body in the coffin with his own, and starts AFK-ing for the rest of the time.

The time is stated to be 2 whole days, Friend hasn't eaten or drunk during these 2 days, just waiting for the pope to come and start praying.

At the same time. The main cast via an inductive process, could have known that 13 Will try to assassinate the pope. As he is the one to kill every time {CA, Killing a cult leader etc.} they try to scan the entire stadium trying to Find 13.

Manjome also wanted to stop 13 and gave orders to NOT ALLOW him to be there whatsoever

However, Friend didn't bother either of those people as he knows 13. He is aware of 13 and his capabilities. He will be able to outsmart all these people, the best security in the world as well as Kanna's team. Shall fail in front of 13's concealment and Wits.

<u>Average Human POV After FRIEND's Death:</u>

The Man Who Saved Me, My Parents, My Kids and My Entire Bloodline From The Virus On Bloody New Year's eve is dead, The One Who Helped Humanity Move From 20th Century Towards the 21st, that person who I owe him my life, is now gone.

The amount of Sadness There, which is everywhere is UnReal, People are Coming All Over the World To See Friend's Body, which is placed in a

coffin. As They Are Crying in Despair and Some are Starting the Acceptance Phase.

FRIEND Predicted Humanity's Reaction and Wrote a Small Guide About What Should the Friendship Party Do {IF I Died Do X Y Zetc.}, They Would make few preparations, as the people all Over the World are Coming, As well as make a Huge Celebration, Knowing that huge figures will come to that party, Friend Predicts the Pope's Appearance, And That 13 Will try killing the pope.

As the pope starts praying in front of Friend's body, Friend stands up, as the whole world gets quite looking at the scene, thinking Friend revived himself, YET all of a sudden they hear bullets coming from nowhere and see that both Friend and the pope are on the ground drawing in blood.

Just for the security to take the pope leaving Friend alone laying in blood, what exactly happened?

Friend predicted 13's arrival, Mentalized through him, as well as the main cast, could have known that they won't be able to stop him, and could have mentalized enough through 13 Knowing WHEN and WHERE and WHAT GUN will he be using.

He knew when and where, which proves that is the fact that he managed to tank bullets that were coming out of a literal Sniper, a sniper that can kill someone instantly without even noticing they were shot.

And since Friend is not Hyper-sonic whatsoever. He must have visualised the Stadium, and then Mentalized through 13 and could have known his decision making and cognitive process which will lead him to the top of the wing, thus he could have known where 13 would be, when he would shoot, and jumped before 13 pressed the sniper and could have tanked the 4 bullets via non-vital Part of his body.

In fact he tanked it with his right hand. If you read the story, you will know why he would do so. Basically his hand move {which is Drawn on

the Friend-ship symbol} needs you to move your shoulder above and aim with one finger up towards the sky.

If that one hand was shot, people won't bother the pain coming from using it to perform the move, would they? Well this is not the case with Friend, Friend could have known how would people around the world perceive him doing that hand move, despite being shot with a sniper {3-4 bullets stated by Kanna} and how much would it affect everyone Psychologically, how much is the reward compared to the risk, boosting his manipulation during the ReBirth even more.

This one hand move, held so many abstract means in the eyes of the public and Friend's followers on a global scale, affecting them Mentally, emotionally and Socially. Despite how hurtful it would be to perform the move after all these and with that age, Friend still could have done it. Brainwashing the entirety of the world into believing he is an immortal god in human form AFTER brainwashing them into believing he was a Christ.

Keep in Mind that Friend through this process hasn't made a sound {not counting when he asked the security guards to leave him} he didn't shout whatsoever after the shots nor after the hand move.

Friend had no food for a long time, no water, under a mask, thus the breathing as you can imagine un bearable for that long time. Just to tank 4 sniper bullets after and keep moving and enduring the pain.

Friend Tanked all these bullets with no Hesitation whatsoever, Without Even Shouting, Even though he knew what was coming he still Jumped like its nothing, he had been thinking about it in the coffin, the psychic war he had during the coffin time frame was almost nothing.

People Thought He Died After Being Resurrected, Instantly Died After These Shots, Because He Was On The Ground and Not Moving, why was he not moving? because he wanted them to take the Pope away.

Predicting that if he stayed down, they will take the pope away, as he is "more important" in their eyes for the meantime.

After That Instantly, Once They Take the Pope Away, all left is Friend in the stadium, all these people are not worried about the pope once he is In a safe place, all the focus On Friend which is exactly The ending he was looking for here, **HE BECAME A GOD** is what they are Saying, Emotionally and Directly and on a mass global-scale Manipulating All Those In The World For Not Just This Moment, But For Generations to Come, As He Will Be Known as The Savior Forever, how the manga described it is saying "**the World's Christ became its GOD**" ,describing how was humanity's perception of its new leader, finishing the GOD Image establishment and saying that for sure he is being worshipped. From now and on.

Now, all of this wouldn't have worked if kanna and her group were not aware about the NBOP. The prophecy "the pope will fall in the east"

{ FSIQ: VSI, EQ: Understanding, Psychology, EQ: Management, Abstract Thinking, Inductive Reasoning, Non-Linear Thinking, Planning, Foresight, Mass Manipulation, Indirect Manipulation, Emotional Manipulation, Logical Manipulation, O. Deception }

Keep in mind that The ReBirth plan to be executed NEEDs CA, as Otcho wouldn't have met Kanna nor known about NBOP.

Done, From now and on These will be random feats and not follow chronological order. As the connected plans and tactics stop here

God Image establishment

Friend through these 169 Chapters Established the image of him being a christ then a devine at the end of the rebirth plan, in the eyes Of The Public & Cultists & The main cast as well through consistently giving the

same characteristics described in the monotheistic religions, which will be explained In the form Of points:

(Most Of These Methods Are Attacking The Unconscious awareness Of the Human Brain)

1. LOVING + Mercy-Full:

—> FRIEND Shows in Between His Cultists, When He Makes Them Work With Each Other, When He Talks With Them in a Calm Tone, When He Has No Problem Sharing With them his Tears, When he Makes Them Regulate With Each Other, When He Tells them to Be True Friends, When He Says in the Morning Activities "If You Wanted TO KNOW, Open Your Heart", "If You Want To Know Entrust Your Heart"

—> Making The Cultists Act Good and Stick to Moral Values He Created Like Helping Old People Pass the Road, And General Good-Sided Work {Even Boosting the Idea Of friendship Friend Preaches For, Again since I am using the power of friendship, I AM THE GOOD ONE I AM THE ONE WHO WILL WIN, Etc (Explained at Kid FRIEND Sada Manipulation) {*Chapters 6 + 8 + Double Bombing + 39 + 21st Century Boys CH:12*}

2. Omniscient / All Knowing

—> FRIEND Has Shown this in the same Meeting at Ch 6, Where he Answers Questions Showing Knowledge That a Regular Human Should Not Have, This is Applied On Most Of The Values FRIEND Preaches For as Well (CCM: S2).

—> When He Says {Ch 203} "We Can Be SuperHuman" ,"But We Should Not Be in a Hurry, Because in order to be SuperHuman, You need to be THE-UNIVERSE", Growing at the Mind Of Those Cultists That He Has Understood the Universe (Idk what is bro yapping about 💀).

and That He Can Break the Laws Of Physics When He Floats {CH 1 + 203}, Even though it Should be Absolute and applied On Everyone equally, How

He Approached it Is By { I Know —> I Can }, and since he broke the laws of physics, he CAN'T be a normal human.

The cultists would remember these Physics-breaking acts later, once he does other things that are beyond human limits, and would start connecting the dots even IF this didn't affect them instantly.
{ Chapters 1 + 6 + 203 }

3. Compassionate / Suffers With Others's Suffering

The End Of Bloody New year's Eve, Where FRIEND After Going With a Big Robot to "Save HumanKind" He is Damaged By the Explosion, And Sends a Record From the hospital to the UN Hall Where The Other FRIENDSHIP Party Members Get Admiration, he is not ready to let someone face the danger himself, FRIEND is saving people, even those who work for him, thus went himself to tank the robot with all its Atomic power.

The Rebirth is a good example of it too, where he hadn't heistate while jumping to save the pope, despite the pope being shot at through a literal sniper, and FRIEND being 60 years old by then.
{Chapter 79 + 80}

4. Infinite / has no End
The ReBirth. {Should I really elaborate? 👽}

5. Power-Full:

Saving the World From Kenji's Terror Group In Bloody New Year's Eve, Kenji Having (He Made Him Look Like) a Gigantic Robot That Is 50m Height, Yet FRIEND Could Have Stopped Him.

6. Sees The Future:

Prophecies Section in Cult Creation Mechanism. Even later at the aliens invasion, and Many Others "Planning Doc Basically".

There are also many Prophecies he told about, which are stated to happen off-screen in the end of the world arc.

7. Has a Solution to Each Problem:

—> An Instant Cure For the Virus On Bloody New Year's Eve.
The Virus seemed like UNSolvable Problem That Will Destroy Humanity, and That it Supreded Everywhere already, From Sanfransisco Until Moscow, FRIENDSHIP Party However in NO TIME comes With a Cure That Has 100% Curing Chances and NO SIDE Effects Whatsoever, The Timing For Those Who Manjome Talked to Trust in the Party, making a Very Huge Jump for FRIEND's Influence.

This is Added to another thing in the same night which is

—> a Solution For Kenji's Robot Case
The 2nd Problem on Bloody New Year's Eve Was The Robot, Even If it Was Only in Japan, Which is Way Smaller Scale then the Virus, The Timing Still Could Have Made it Relevant to it in Importance, What Adds to This Up is The Fact that Kenji was on top of the robot, and it had atomic engine, FRIEND Instead Of Making Someone does the Job For Him, He Would do it himself, Amplifying the Trustworthy He Would Get from the cure he made, by this "Sacrifice" That Would Move Many Emotions: Happiness, Sad "VIA Seeing This (Good) Human Dies", Happiness again "After Knowing he did not Die", Cultist Would Feel Proud, and Every Human in general will Feel He Owes FRIEND Something Since he saved his Life.

15 years later

—> a Solution For The Pope's Murder
Endless Emotional Transition Happened Here Will Be Talked About in the ReBirth Section, But The KeyPoint That Should be Highlighted here is that FRIEND Saved the Pope From The Problem That Came From Nowhere, 13 Was Completely Unpredictable "In the eyes Of the Public"

FRIEND Saved them From a Shock That They Never Imagined it Happening.

9. Omni-Presence + Judges People:

How FRIEND Shows this one is Through his Cultists and Supporters, as We See in Chapter 14 Where The Detective is Killed, Because he Was doing Activities "In this Case Searches" That Go Against FRIEND's Will, We See this Confirmed at the Beginning of The World Arc where SM1 Is Assassinated VIA Disbelieving in FRIEND.

Tomodachi Land: We see a Kid Getting Drugged and Taken Away From the Facility VIA Trying to Leave, FRIEND Having Eyes Everywhere.

Prison Arc: We see The Man Who Othcu Helped him Running Away, Being Thrown to the Top 1 Most Secure Prison In the World Because He ONLY Written a Manga, Where the Events Happening Seem like a Copy Of What is FRIEND Doing, Making Disasters Himself, and Let Someone else Take the Blame Instead Of Him, That he looks like a Hero at the End. He Does not Have to Necessarily Be There, His Will Will Happen Either Way, through One of his Followers, And there is ALWAYS one of his Followers around, which gives that sense of "omni-presence-ness".

10. Omnipotent -

Almost literally every point above, but also his influence, his influence is so broken that he has an anti-proton bomb that could delete the earth as a whole, and this is just 1 bomb, in the end of the world arc (which is when we see his Manipulation's effectiveness) he has abstract control over every human on earth, IF they were in his influence's range, which is basically Any place has Human population.

11. Has no Features + Mysterious -

Him wearing the mask the whole time, him not showing any part of his body, 0 info known by the public about his life etc.

{ FSIQ: VCI, Abstract Thinking, Non-Linear Thinking, Mass Manipulation, Indirect Manipulation, Deception }

Keep in mind he tried to look like an immortal god in human form.

Yama & Shou

We need to keep in mind that Yama is having a very bad RelationShip with the rest of his family due to his philosophy of "JOB > ANYTHING" Including family which caused him InConsistent relationship with his family

Shou Is acting like he cares, even though in the bottom Of his heart he hates Yama more than anything.

Friend through Observation Saw Through Shou's acting {*Keep in mind Yama despite being a detective who spent so much time with Shou had 0 awareness of the envy, yet Friend could have done so Just like that, due his EQp, and him being him*}and could have known the Envy Shou Has Towards Yama and pushed him a bit More Into killing him Indirectly, how?

Friend After Seeing The Envy Shou, Went to Make Him a Cultist.

He then makes Them Both go on a session in the coffee.

Friend could have known that Yama is Investigating Him, Also could have known That he will address The Cult-Out in the Session, Abusing the abstract fact that no matter how hard Shou tried, Yama was simply always better, Friend using the envy generated from Shou gave Shou a second layer of "Reasons" to kill Yama. Which is simply him knowing too much about the cult, thus purifying him seemed an obligation for Shou, Using the cult defending mechanism Friend sent him an indirect message which says loudly:

“This Person Knows More than he Should, PURIFY HIM”

Giving Shou an excuse and pushing him into committing the Murder, which by the way, Never actually witnessed, Shou Smiling Needles Yama At his neck as he goes somewhere else after Using the poisoned Needle on him, Reporting his assassination to one Of The people in the Cult saying that he knew a lot.

Furthermore, Shou is completely ALONE IN A ROOM, takes off his shirt, as a new shirt appears under it, a One which has the Friendship Symbol, showing the admiration he has towards Friend For Giving Him That Moment and allowing Him to perform the Murder.

{ FSIQ: VCI, EQ: Perception, EQ: Understanding, SQ, EQ: Management, Abstract Thinking, Linear Thinking, Abductive Reasoning, Indirect Manipulation, Emotional Manipulation, Logical Manipulation }

The End Of The World Arc’s Mass manipulation

Friend Has Social and abstract control over the whole world, his next prophecy to accomplish is

“60 Million With and No-one against”

Which refers to the overall votes Friend would have in the “President of the world elections” as he predicted that those would take a place after the Rebirth

Back when Kiri was with Yamane in the Secret labs, she could have

known that the virus Yamane recently developed in 2003 gives only 1% of humankind Natural protection, thus killing the remaining 99% of human population IF spreaded all over the world.

FRIEND Obviously gave orders to spread it everywhere, causing fear all over the world, he in order to make sure that people would die for sure, sends all those people who are in any city which was affected by the virus, in trains, into Un-inhabited places, as groups, abusing the fact that Fukubei loves the expo and that there was an expo took a place years earlier, Friend Regulated all of these groups in a way which he made only 1 Expo participant per group, then gave a Cure to every one of those Expo participants, Indirectly forcing the rest of the group into trying to attack the one guy with a cure, indirectly Manipulating Humanity into cleansing each other.

Causing all these people to die made anyone who got more cures, VIA killing different groups members, start selling cures for money making what seems like a Wide-Ranged Black market, Which made people consider that as a Job and started killing anyone with a cure in order to sell it to those who have no Cure, Then those people who bought the Cure would join themselves.

The black market's prices would increase with time as Overall Cures would keep decreasing since people are using it, and even those who use it are dying despite being cured as victims of the black market.

Those events caused humanity's population to decrease in NO TIME which made it easier for Friend to control humanity as people he needs to care about are less, and even those who will be born later, are not in need of active manipulation as they will be born and brainwashed passively FRIEND is worshipped as a LIVE-GOD there is no need to apply any techniques to influence anyone

{EQ: Understanding, SQ, Abstract thinking, Linear Thinking, Non-Linear Thinking, Deductive Reasoning, Planning, Foresight, Mass Manipulation, Emotional Manipulation, Indirect Manipulation }

Collins Similarity

In Chapter 6, Someone asks FRIEND Where Did We Come From? FRIEND Asks Everyone to Close Their Eyes as he starts Describing a Place, however Regarding The Word Picking here we want to Focus on his sentence

"I am Collins, From My Location on the Moon Orbit I saw ArmStrong and Eldon Walking on the Moon, I was Close But I went Back With-out....I am Collins"

Very Late in The Story Friend Says this again, In his old classroom In Chapter 132 This time he Completes it "I Sat Spinning around it WATCHING".
The Verbal Abstract Reasoning and the Complexity And the Similarity in this Scene is Undescribable.

The Limits:

Both Couldn't Join Sub-Groups, Both Are In the a main group with Their Relatives, YET Neither of them Could have Reached what is Beyond that, Join the MORE important group, the one that SHALL be remembered and which they were looking for.

- For FRIEND

He Couldn't have Joined {The Kenji group}, he tried to get their attention Few times yet always was that one background Character, the one who No-one wanted to Talk with, the one who has inner thoughts about Others in that Group, yet couldn't have made them care enough to look for him

back, He has been watching Kenji's group laughing, chatting, and enjoying Together, and all he could have done was spectate from a far, he never wanted to ask Directly, But get their attention Through Indirect means.

- For Collins on the other hand

He Couldn't have joined the Group which consists of {Astronauts who walked on the moon} he tried to get there, yet could have not reach that far, he couldn't leave the Realm of BackGround Character, he didn't get the same popularity, fame nor Relevancy as his relatives, like Armstrong for example, he obviously had inner thoughts Mid-flying around the moon, while watching the Others walking on it and having expectation for the Future from his Current position.

BOTH couldn't reach their goal; Because of their conditions which they couldn't control.

The Emotions:

A/ *Anger; the Frustration generated from the fact that they were so close, it literally Few more steps and they are in, but again there are extreme conditions that stopped them from reaching.*

B/ *Sadness; this one is quite obvious, for FRIEND, he managed to Observe all the fun they are having, Tried to make them notice him, but failed, he never got the Recognition he seek-ed for, While Collins, Was Few steps away from getting his name written in book of history, from popularity, success, yet now, no-one knows bro, did you know who is Collins before reading this feat even?*

C/ *Disappointed; The Expected has Failed, It should have been me too! type of Sentence at their minds once they see the line between them and the Groups they Wanted to Get in.*

D/ *Shame; feelings of , distrust, pain, exposure, powerlessness, and worthlessness Were generated in side both FRIEND and Collins in their contexts, as FRIEND Saw that all his tries to get in the Group faced ignorance, Collins saw that all the effort he spent to become an astronaut faced a huge Fail compared to what was possible.*

{ I Want to say Compassion too tbh (: but Idt Collins by necessity felt it}.

The Conclusion:

- FRIEND: None of his classmates could have remembered him, neither nor cared about him in the first place, those who he wanted to Join were too busy enjoying each other, to look at him and realize that there is someone trying to get our attention, eventually he was left in the images taken and was forgotten

- Collins: Do I really have to Elaborate how his life goes compared to The Other two who could have walked on the moon? Those who got their names in books of history as Humans who walked on the moon, were way way more Known famous etc. the success they had absolutely Topped and Covered his existence, Just like FRIEND, he was forgotten, d00d did you even know who Collins even before?

- Both Were Forgotten, FRIEND Was Forgotten, And Collins Was forgotten.

Friend Could have seen these Similarities and broke it down in 1 Sentence, "I Am Collins".

In Case You Didn't Know Already, Friend Back Then Was 9 "Might be 8 years old" And The Transition From a 9 To 18 is Around 3 Times Higher IQ {It Can Be Higher} Which Means that 21 Years Old FRIEND Should Be Way Better At Similarities, Regardless It's Great Feat.

{ FSIQ: VCI, EQ: Perception {Intra, yes this exists}, EQ: Understanding, }

The Symbol

He was able to come up with a meaning and definition for his symbol (aka the friendship symbol), even though its original creator had made it without any specific meaning nor symbolism, Otcho made it when he was a kid {friend's cult symbol} and said

"Anyone who knows this symbol is a true friend"

Just for Friend then to come from nowhere, flips the symbol into his cult's logo and gives it an abstract existence in the minds of all those who saw it, some view it as evil {parents who lost their kids for the cult} some view it as the path for guidance {The cultists themselves}, Friend could have gave it a meaning VIA his understanding of human perception, to those around him despite it being a drawing from a kid that is supposed to serve Zero purpose, as it became 1st Step in CCM Later on.

{ Abstract Thinking, Mass Manipulation, Indirect Manipulation }

Friend's EQe:

First Time:

Friend Is walking next to the same shop Kenji stole the space badge from, The Shopkeeper spots him, catches him, and starts hitting him, ripping off his mask and both emotionally and physically Hurt Him.
He Was in the sightline of many students thus Embarrassed and Hurt , Friend Upon The Hate generated from This scene engages on the goal of taking revenge from Kenji.

Second time:

Friend as a Kid was looking for recognition, in order to Facintae Yamane, He took a spoon that is stated by Manjome to be unbendable, Friend could have bended it, however not the only impressed person was Yamane, But Manjome as well, upon that Manjome searched for Friend later, Found him and Gave him a Card That has his Contact Info and Left.

Friend was supposed to be introduced in a TV Show That Manjome Manges, Friend Should bend spoons IN front of cameras, yet the show owners say its a lie and fabrication, Without actually seeing anything whatsoever. Destroying both Friend and Manjome's reputation.

Friend's entire School Starts Calling Him "Kid A" As an Insult, Call Him a Fraud and Many Other Mean Things.

Out Of Embarrassment he gets angry, Which is amplified Further More by Manjome later who approached Friend and Insulted him as well and says he is a Lier.

Friend ***ENGAGES*** On Anger generated from all that for one purpose he mentions instantly after which is "Destroying Humankind"

We have 2 good metrics to see how good his EQe was:

1. Adapted roles:

A. Cult Leader:

Someone that deals with hundreds of people everyday, Manipulating them and Motivating them the whole time and Changing Their Perception on reality and their behaviour, Etc.

B. Friend then a Husband Of Kiri:

as he 1stly love bombed her and acted like a Friend Growing the relationship until Seduction Was available, yet This Was not as Easy As it looks, he had to act like her BF Literally Re-Simulate him In Order to Satisfy Kiri and guilt trip her

C. Being a Friend of Kenji and his group:

Mid Executing BNYE, He had to Cry, bluff, lie Etc. All Those are Necessities in his Acting On Order to Deceive Kenji and his Group*

D. Friend-ship Party Leader:

Someone who had endlessly tons of influence and meetings with popular figures regularly and has many speeches

E. World Leader:

After The Rebirth basically FRIEND Had To Be Under the entire World's Watch, as he is the President Of the world now, how can he have any Privacy Whatsoever?

F. Fukubei:

He (Katsumata) had to Mass manipulate everyone in the entire verse into believing he was Fukubei for a very long time. Since he is impersonating him.

All Those Were Roles he had to adapt to that are for the most part Different From The Other, And Require Instant Change In the Persona Body lang and Aura etc. Which requires Endless amounts of focused application and Mental effort through this entire Process.

This is simply inhuman, He didn't hesitate one second while doing all these. He tanked sniper bullets atomic like explosions almost Bombed by Kanna at one point and he kept going despite his age and how far his goal

was

2. The time It pushed Friend:

How long did that last? Over 50 years, Friend had engaged as a 9 yo {and as a 12 as well} and it was his only motivation through this entire time, any other person would have collapsed trying to take 2 roles or seeing how far he is from the goal / how hard is it to accomplish, yet Friend VIA his EQe, He kept going regardless.

Perfect Vision:

In Shorts On Ch 177 we see Friend Being chained to a machine , a machine that is stated to READ and SAVE any READ, What will it read though? Readable things, what would be readable? Friend's Consciousness Or Conscious awareness.

Now what we see on-screen what is flooding in Friend's consciousness during this time, we see images of "Friend-related" stuff that happened Since the year 1971 {Lie of 1971 Basically} Up to the year 2015 {Suitcases Image} Which means that Friend low balling had went through 44 years at worse during his being chained

Now what can the images we see be categorised at? What is the pattern? There is no obvious pattern, BUT they share one similarity, They all are "Friend-related" stuff.

Why is Friend performing this? Later on ch 231 We see Mitsuyo is pregnant {ofc from Friend} Doing form of Tests on her body and the doctor says

"*It might work once we are on mars*"

then later she says

“*Friend has found a way to live forever*”

Friend gained immortality? But we see him dying VIA Ufo later at the end of the story. What does this mean?
What is the connection between Ch 177 and Ch 231? Well in simplest words possible, Friend got Mitsuyo Pregnant, and sent all info regarding him into a machine which saved everything up to that moment WITH THE WILL to redirect all these memories the machine saved into that newborn Mitsuyo is pregnant with. And from that point onward Friend’s Kid shall do the same when he gets old and close from death, and same does his Kid Etc. Insuring Friend’s name immortality and matching the Narrative books of history will Acknowledge him {which is again being an Immortal god}.

Now back to Ch 177, The images we see are kinda weird if you notice them, NON of them {excluding lifting Kanna AND 1st Image} Are events Friend’s wasn’t present at.

Events Friend could have NEVER seen but Knew they happened, As he literally caused him and they are connected to his legacy by any means, thus will send them to the machine anyways.

But What does this mean? Friend could have never Seen Those BUT we literally see them in his Consciousness, Yeah there is only one explanation for this process. HE VISUALISED THEM, but it doesn’t end there. We see words on these Images, And we see the same event in multiple images. What does that mean?

Friend sent alongside the Visual info, Audios to help his kid understand, and these are not JUST images with Sounds in addition, But also actual Simulations of what happened back then. Friend, despite not seeing the event, could have known how it went and simulated it with all the auditory info it had, and sent it to the machine.

Now, does this mean that ALL the info he had was a mix of simulations and auditory creation? No, There were few events Friend could have seen, but from the samples the author gave us, These don't make more than 10% of what Friend did.

Now, regarding the rest of the images (such as the clips where friend saw and was present in.), We see Friend basically pouring everything that he saw and witnessed in the machine. If you see the TML (Tomodachi Land) section, you'll realise that friend is gifted with perfect visual/audible memory. He is able to recall every single little detail of two years worth of events easily; and can even use those memories to perfectly analyse the characters (proving how perfect his memory is.).

As we already explained, Friend in this feat wasn't just pouring visualisations into the machine. Some of the clips were memories. And we established (in the next section, the **The Info's Importance section.)** That any info that has ANY relation to friend or his legacy is poured into the machine. This means that Friend was scanning through his memories (the fact that he is half a century old and the memories he's scanning started from the time he was nearly 10, and the fact that he has perfect memory that didn't get altered even after decades extremely buff this feat.) and perceiving every memory, reading/scanning it then choosing whether to pour it alongside the visualisations or not WHILE visualising like half of the manga. He connected his LTM to his WMI, where he was manipulating his LTMs AND forming millions of visualisations in fractions of a second.

The Info's Importance:

The info we see in the samples hold significant and in-signifanct values regarding their connection with Friend's legacy. We see Random and main events, on one side, we see BNYE's Robot and from the other side we see Friend lifting Kanna, in which One absolutely out-whitges the other one pretty badly in impotency, as The Robot was Insanely huge plot point while Lifting Kanna is very random thing to add. But this tells us how much is Friend willing to send to his future kid. He will send him

least related-to-Friend Legacy materials as well as Main points about him. Which means, that the amount of "Main" points we didn't see (took place of screen during this feat) Such as CA, TML, The ReBirth, The phone ringing, Kiri letting Kanna with Kenji All these absolutely enormous events which took a place in the story were done off screen.

Now we know from when to when {1971-2015} And we know how much {every main event alongside with endless non-main events} and we know that it contained visual and auditory info. Thus we can Imagine how CRAZY of a thing this is to do.

Time-Frame:

Due the fact that Its 2 images and 45 Years, as well as the fact that The Scientist was standing and could have instantly reacted to the error, we can via basic abduction get the conclusion that it was QUITE SHORT Time frame, 2 panels for 45 years and a scientist standing and able to instantly React is what would allow us to assume a time frame. How long would you be staring at Friend's body without sitting whatsoever? Yeah Quite a short time, since he wasn't expecting to wait for a long time, he didn't bring a chair whatsoever. It MUST have been expected that Friend will be able to finish the task quickly.

For context, he was creating and perceiving all of this info simultaneously. In the visualisations, Friend and Donkey said simple phrases like 'open your eye-' and 'Bye bye.'. This audio would take like 2 seconds or less to be said. All of the other visualisations were created simultaneously, meaning that the feat would realistically take 1~2 seconds to achieve.

By this progression, Friend had to recall Couple DOZENs of Millions of info to his consciousness, Info like "I asked X person to Kill Donky 30 Years ago at night" And then through his Insanely high EQu and Psychology, he can simulate their actions and voices thus re-creating the very same scene that happened YEARs ago perfectly. This process is done on ENDLESS amounts of info simultaneously.

This is basically it. Things that might help imaging how good of a feat it is would be looking at the panels and assuming 100 more panels like it done off-screen in a small time frame.

Common Misconceptions:

CM1: What we see is not his consciousness whatsoever but Rather it show that he indeed sent 40 Years to the machine

—> In the Next few panels Friend recalls one of these scenes, and it was from the very same pov we saw mid execution, ensuring that it was indeed his consciousness.

—> The Info must be readable. Or else how would the machine access it? Where would it be readable? His consciousness, else the machine might detect everything Friend's Eye went by.

CM2: This is a reading system that was attached to Fukubei's mind. It's not Friend willing to send his entire legacy to a kid.

—> There is no other reason for Mitsuyo to say Friend found a way to live forever.

—> There was no Fukubei after the year 1971 in Perfect edition

—> There was no Fukubei at all in Theory form Friend

—> There was no Fukubei after the year 2015, specifically after the ReBirth In og version, and we see the suitcases scene in the panels. Which happened literally 3-7 pages after the Rebirth {ch 169}. Hence assuming This is Fukubei's Mind is Objectivly Wrong.

CM3: Friend saw these, its pure LTM

—> According to Hitchen's Razor, the burden of proof falls on the one saying this statement to prove it

—> As we see in ch 13 & 14, Friend had no way to see the detective's death, his killer himself didn't let alone Friend, and in the newspaper they didn't use the image of his death whatsoever.

—> Friend had no way to see Kiri's partner being pushed. The Examples keep going

—> Even assuming its LTM {again it's not} the ability to Simultaneously recall such long memories in no time needs tons of mental effort and PSI. To pick what to send and what not.

{ FSIQ: VSI & PSI & WMI, EQ: Understanding, Psychology, Abstract Thinking, Non-Linear Thinking, Inductive Reasoning Abductive Reasoning}

Best categories ranked:

1. Foresight:

His CA feat easily gives him predictions over ridiculous amounts of characters without any forms of difficulty, generally speaking his NBOP and BOP are pretty broken in that regard.

For Anticipation, His BNYE is pretty strong in that regard and not bad by any means, but the forecasted chain of reactions on CA is too OP for any other category.

2. Planning:

His BNYE Plan, being part of other 2 plans, AKA CA and The ReBirth Plan, Making More than 5/8 Of the Manga planned since Years before easily gave him LTP, Aim, coverage and Preparation process over Most of realistic and semi realistic characters in these categories.

While for invincibility and accuracy BNYE and the ReBirth do a really good Job in Predicting the entire night, with every interaction alongside with the cognitive-mental tasks done by the main cast, as well as the timing of their actions, getting Perfect 0:00 O'clock. And layers of protection thanks to Kiri's seduction and Reaching Kenji. The protection is provided by Kanna, which was a win coin he made from scratch. AND OR the shielding done on 13 to stop the random friend worshipers from killing the pope via manipulating Kanna's gang via social engineering

3. Manipulation:

A. Indirect - Basically the entire story was indirect and it's not that close to Mass. If you ask me. The effectiveness and complexity behind his actions and how they always look like an accident gives him an edge over almost every realistic SCs in that regard.

B. Mass - every feat is basically mass manipulation, he spams it everywhere, his mass manipulation in the God-Image creation feat and CCM as well as double bombing and getting Otcho strategy is unbelievably good. His ability to engineer the society in a way to leak specific amount of info to a specific individual via social engineering is also Key factor he utilized a lot during the Manga

C. Emotional - His emotional Manipulation on Kenji, how he causes

him guilt via pure existing and how he got him in a specific place of emotional regulation, Now too far where he suicides nor too low that he is not effected, but in a place Kenji can actively engage on and make use of. Yet he still has the huge burst damage emotional manipulation as after he spent 4 years making Kenji the bravest man alive, he in few minutes during BNYE broke him down and insanity induced him into losing his memories and stormed him with Intuitive fear

D. Logical - It might be one of his overlooked categories, his Manipulation during BNYE itself was pure logical, how he got Kenji on top of the robot, making Kenji his very own reasoning without Kenji realizing nor the Main cast. His manipulation On Kenji during the Shikishima abduction was also very good logical, alongside with the ReBirth invincibility

E. Direct - He posses some but not the best feats in that regard, going by the definition

Direct Manipulation is when the manipulated party knows they are being Manipulated, yet can't counter it *This doc categoriezed direct manipulation using this definition*

Since Friend is deception-centred and spams fabrication and misdirection. He has some nice feats here and there though.

Keep in mind, Friend doesn't rely on HUGE psychological effects most of the time, despite using that a few times {Double bombing's leader for example} Friend relies on accuracy, He understands those against him and gets them to do very specific actions {again double bombing leader} Making everything look like an accident without getting his name close let alone being seen whatsoever. He only walks down to the field when he has no influence to abuse info control. Like Kiri's seduction, pawning Sada And manipulating

Manjome, Or wants to add a detail in the profile {BNYE's Camera}.

4. Emotional Quotient:

EQu > EQm > EQe > EQp for Friend.

His CA gave him too many feats in affective forecasting, he could have mentalized someone who is not born yet and gave them powers knowing what they will do years before they were born.

His Inter EQm is way better then his Intra, but his intra is not bad by any means. For inter it's mentioned in the emotional manipulation section, for intra the rebirth had too much intra EQm, every moment since the coffin scene until aiming his hand in the sky had lots of Emotional exhaustion. As well as his death which showcased regulation of nigh-all emotions

His EQe is obvious, how long it pushed him, how badly he kept going despite knowing how far he was from his goal.

EQp is not Friend's best category, but this doesn't mean he lacks it. Its due the simple fact that his other 3 EQ cats are so broken, anyways for his Inter EQp he could have seen through Shou's acting and detected the Envy he has towards Yama, as well as his feat during Kiri's seduction, where he perceived Kiri's emotional states and their changing after her boy Friend said specific lines, how did she become after hearing them etc, and then perceived the boy Friend himself WITHOUT visual materials could have known his expressions and body language. Thus Re-simulating him in front of Kiri, Purely VIA Auditory causes could have known Visual info. Which is insane EQp.

Intra EQp {again yes this exists EQp involves self as well} is basically Collins similarity. As well as his ability to express perfect expression when needed.

5. Social Quotient:

Social skills needs no elaboration, For social awareness his ability to forecast hours of interactions during BNYE and how would the cultists effect each other is really good, as well as him being able to engineer the society into revealing specific info for a specific individual {Reaching Kenji and Getting Otcho strat} Reflect very high Social Awareness.

Self regulation would be despite seeing his closest Friend {Fukubei} experiencing death and dying in front of him, he could regulate his behaviour in a way that he wasn't affected by that scene, and actually copied Fukubei's behaviour without anyone noticing the difference. Including teachers and Fukubei's very own friends and family. As a 10 yo.

6. Deception:

He spams all forms of deception in every strategy and plan, if you noticed this doc specified what form of deception in categories section only one time, which was info control {during CA}, due him using every method of deception through the entire process.

7. Strategy:

The Mixture of reaching Kenji and getting Otcho strategies as well as Kiri's seduction hold all means of good strats.

He is generally busted in every strategy category excluding Resilience & Efficiency, His categories on strat ranked would be:

Foresight >= Tactical complexity >= Effectiveness > Execution >= Shielding >= Alignment >>> Resilience >=< Efficiency

8. FSIQ:

With PV: WMI >= PSI > VSI >= FRI > VCI

Without PV: VSI >= VCI = FRI > PSI = WMI

9. Thinking:

Using the cats Linear, non-linear, abstract and Critical, his Thinking is superior to his Reasoning, Ranked:

1. Non-Linear { TML / PV }
2. Abstract { Almost everything, TML is T1}
3. Critical {Reaching Kenji Strat / Pawning Sada}
4. Linear { The ReBirth / Double bombing / Manipulating Manjome}

10. Reasoning:

Ranked:

1. Abductive {Church assasination}
2. Deductive {The ReBirth >>> Double bombing > Tunnel >= BNYE}
3. Inductive {Reaching Kenji / Getting Otcho / Church assassination}

Not Mentioning things like Memory and perception ofc.

Best Situations:

FS & NFS:

NFS > FS Mid-high diff, Due the gap between his planning compared to his strategy and having heavy-foresight based wits moves, NFS gives him proper time to forecast too much and anticipate accordingly.

RLS With and Without Influence:

RLS With Influence > RLS from scratch, High diff.

This one is close, despite Friend having an Anti proton bomb that can delete the planet and fly away to mars and make a machine to save his legacy and re-send it his son brainwashing him into becoming another Friend thus gaining immortality.

Friend's Influence building is beyond crazy, CCM, god image creation and the ReBirth are insanely good Influence building, as well as his leadership and thanks to his very high SQ and Mass manipulation as well as Social engineering, His influence building is on the same par as his influence at the end of the world arc.

Cat and mouse situation:

Despite Friend being a cat during the story, surprisingly enough his mouse stats are way better than his Cat, due the fact that he is not a detective like the majority of the cats, he claimed his way to get influence through deceptive and manipulative means, Thus becoming a cat at the end.

Due to the fact that his Planning, Deception, Manipulation, EQ and

SQ are superior to his Reasoning, Perception Cold reading and Thinking skills, he would be able to perform as a mouse far better then him being able to perform as a Cat.

AFTER WORD:

This is basically the end of the Friend feat list document now I am aware it is quite long compared to the source material, and that almost 100 chapters weren't brought up, But this is due to the End of the world arc not containing any impressive feats that are worth mentioning. There are some feats however, that weren't brought up at all even if they were impressive, these will have separated docs in the future.

But if you read it all congratulations you realise how good Friend's Feats are.

If you Disagree with the interpretation or agree with it, Reading this is pretty enough to get a good view on Friend.**This doc was made by** **Zladerz** & **Asinsiofr** & *Amin*.

Kanna is the best waifu 😇
