Jinhyeok kangs Covenant arc strategy :

situation : after jinhyeok returned from the abandoned island (where he faced ancient dragons and a being from cthulu called tulzcha) he realised that there was an imposter who staged himself as player unknown, an alias of jinhyeok himself, and he also portraited to have same llevel of power and stats-abilities measured by awakening system, and player unknown utilises the fact of jinhyeok ending up winning against a god from cthulu and ancient dragons, making jinhyeok seem like spy setted by outer gods to take over other mythology and also earth,while player unknown also could convince others more ,he already had alliance with gandhara guilds 4 apostles of cheonsei mythology , who would also help in inducing the mass doubt toward jinhyeok, also pointing out a few points in jinhyeoks fighting method within his strategies when he divides enemy lines and tasks different thing to each one, with that gap even 2 people within jinhyeoks team ended up suspecting jinhyeok, and to shield his lies ,player unknown used an ability which was given by operators, eyes of chaos ,overally making others feel bias towards users(unknowns) words, making them more believable in the masses, now that doubt iis sowed the main parts operators orchestated plays in which is notification of covenant(condition:find fake jinhyeok and kill him within this week , in case of failure all floors restrictions in tower will be removed turning into lawless purely), and while jinhyeok was watching this happening in the live event, he suddenly gets ambushed in his hotel, realising the gandhara guild people & tower operators already on the move, trying to corner jinhyeok drawing him out while restricting any possible comunication method jinhyeok could use but jinhyeok still ends up escaping from there while making operators and gandhara people not letting follow him, although jinhyeok successfully stopped them, on his escape route he faced reinforcements of other groups , there were trackers too(tho it doesn't play part other than layering short term deception on fact that unknown could actually predict jinhyeoks escape route, becaz in next step unknown pulls it again), even when jinhyeok gets rid of trackers and deceiving the reinforcements ,on his next

route for jinhyeok performing a certain move to be able to escapr from previous hassle, the main trap of unknown activates ,it not only is offensive making it hardfrom jinhyeok to get out of the area , but also makes that area part undetectable, reason for making it undetectable is for next move of player unknown. now the president of awakening association finds jinhyeok destroying all satelite and trackers and also his whereabouts is not known while situation is dire due to covenant happening said by notification beforehand, entire humanity depends on it, due to jinhyeoks deeds , it would deem as jinhyeoks 'unco-operativeness' towards awakening association president, and on that doubt+current stress feeling situation ,unknown would his final move in making this guy into his puppet, he shows edited videos which r presented as "memory fragments" taken from most confidential storages of tower, player unknown mixes some fabrication with that information , making the president realise why there's many allies on jinhyeoks side still too who were helping him that time, with this he ends up identifyiing himself as jinhyeok and earns the trust and strikes deal to have a board meeting with other nations leades, player unknown will discuss things with them and persuade them (what he actually does is using stigma on them so that they end up maintaing his orders absolutely) and at same time the outbreak already started, many lower floor got slowly unrestricted first, and the estimated time of covenant fastened due to operators intervening.

in 1 day, the outbreak massly increased spreaded all over earth, various beings,monsters summoning , and inhyeok finally appears in the outbreak of seoul , from here on out jinhyeok anticipates all moves of player unknown(due to an hypothesis i'll say in next para, in short jinhyeok realised the imposter has same traits,abilities,thinking as him), jinhyeoks countering starts here, he comes here knowing that unknown would also realise jinhyeok would get out from previous trap and come here to tackle the situation, and unknowns goal here is make jinhyeok the center of attention , by anouncing all players to gather here, due to prev doubts they don't trust the real jinhyeok, also by anouncing the fact that killing jinhyeok would reward not only stop of covenant but also being apostle of gods and jinhyeoks powers also ,making it hard to resist and unknown also knows that they would think after they kill jinhyeok if coveant doesn't stop they would go after unknown, all the strongest rankers are here gathered in one place as we know, and unknown will take operators help to fasten covenant utbreak ,making it full fledged to trap all rankers+jinhyeoks troupe there , and jinhyeok sees through all of that . everything that is going to happen since jinhyeoks return to seoul place till everything that is going to happen is within jinhyeoks plans .

(First of all kangs hypothesis : due to unknown planning to attack jinhyeoks hideout perfectly, lure him out and even when jinhyeok escapes he knows whichever routes he'll choose and sets traps there, which lead to kang realising the opponent aka unknown got good grasp on jinhyeoks own thinking and whatever he's thinking right now might be being read as well, but there's one point missing

Jinhyeok whenever pulls this type of trap when he's not involved in fight rather pulling strings indirectly, it means jinhyeok is preparing for something or his trump card Isn't prepared yet, this pattern leads to guessing unknown might not have completely gained full form of himself
Which he confirms later)
After jinhyeok comes to seoul passes through orcs, deliberately making a big fight showing off his abilities and items making others deem toward thought of jinhyeok is at this place so unknown follows his plan(using publics attention towards kang and making them center around one place,prev explained),jinhyeok forcing the system to give an additional item which Isn't tradable(he would use that later, it's called incomplete bookmark), this offer could be held due to unknown placing bounty on jinhyeok while this covenant is also happening and jinhyeoks edited videos being exposed, which r confidential, since tower couldn't keep up it's regulations,broke laws restrictions this was additional compensation, so after that jinhyeok with coin exchange buys 3 items, with the items he makes yoosung have perfect disguise of kang, even mana flow,powers, speech tone all, and they would be able to share thoughts and weapons temporarily, this is to fool the gandhara & other guilds there who went there to kill kang and in this chance so that kang jinhyeok escapes and goes to Unknowns hideout since he can predict where It's hideout is(due to understanding on his own decision making).
First part of fight between jinhyeok & unknown was both predicting each others moves and in the end neither could put a scratch on other one, so jinhyeok pulled something very risky which was able to shaken the entire area and make it collapse almost where he confirmed his guess "It's not you Couldn't pull it, It's because your combat sense Isn't on that level yet"
So now that kang is confirmed in his hypothesis here the trap comes.

So after that ,player unknown also uses provocative and risky powers and fight gets to closer distance after both uses same swords as well, jinhyeok uses final genesis, making it 1 on 1 while making the user aka jinhyeok get buffed & unleash his capacity and unknowns powers getting nerfed,so here jinhyeok using final genesis Isn't just to nerf his powers, the matter is combat sense, the higher the skill the higher awareness, so he's attacking that awareness, using final genesis to getting unknown nerfed above that choosing an imaginary world where temp is "absolute zero", both osf this point attack the "sensory" part  i Don't think i need to explain why freezing cold can nerf ones sensory, jinhyeok targets unknown with everything he got, the 7 crowns, he fuses to get it to another level and used the buff reach another level of his own potential,in attack speed,magic,strength all. Unknown  could use his defensive abilities there like using glacial modeling,blessing,mabdala to making shields which gets interrupted by nihilism ability which can disrupt in magic circuit and nullify it, now Unknowns shield is gone, what does he do?using ancient barrier to deflect trajectories of magic bullets, & to that point jinhyeok also uses saggitarius barrier to buff "falling attacks" while he uses astraphe as falling attack on unknown and unknown while he defends all of that, gets his heart pierced by kang, who reached his behind instantly unknown dealt with those attack taking a gap, and this is what unknown wanted to do, to lure him to successful attack, so that unknowns blood is on jinhyeoks body, the blood drops on floor and kang were medium to the ability "space restraint" which was why unknown used ancient barrier to defend beforehand, since the conditions was to activation after 10 seconds, and on the points,unknown also uses maestar, overally reducing the range of

movement while showering bloody attacks while defensive skills like invincibility or blessing of stars cannot be used(maestar is only good in small range but has excessive damage dealing,but range wasn’t matter due to space restraint).
Here jinhyeok had to deliberately fall in this trap because the gap he wanted was to put the virus he created inside unknowns body, continuously targeting unknowns sensory was to not let him be aware of it at that moment of attack pushing the virus in altho the symptoms affects shows later, & eitherway jinhyeok had other methods to counter combination of maestar & space restraint so jinhyeok Falling in that trap Didn't matter, on other hand jinhyeoks virus trap makes unknowns update on reaching fruition stopped,operators not being able to find the fault, operators being busy in taking care of unknown trying to find the faults and fix it, unknown not being variable for a while in next part altho the affect of it hasn't started yet becaz unknowns next moves are also crucial for kangs own plan to execute.

and while this ongoes here , on the other part where forceful outbreak happended in seoul and jinhyeoks teammates are helping out other guild members taking care of the situation, it's orchestrated like this, due to fastened occurance of the outbreak,others doubt the identity of unknowm becaz jinhyeok wouldn't pull a move like this which also makes his friends fall in danger, and also awakening association not sending any reinforcement now ,who was allied with unknown and gandhara who supported unknown at first are missing too, which leads everyones suspicion towards unknown and utilizing the situation it was instructed to yoosung to use this moment to stop internal strive, and what else jinhyeok instructed was to resist for a while, it's not necessary they have to save other guilds, they themselves have to resist with their help and wait till a certain point where a mage will come and surrender themselves to that individual(it will be seen later ,who that mage is and how it alligns with what jinhyeok does in future). now back to the main fight, after unknown breaks through the final genesis ,estsblishes communication and teleportation bridge towards the cheonsei mythology apostles , so that all apostles together prsent can synchronie and use all in one ability, making the people within this area range shift to an image world ,recreating an mythology which is the floor of cheonsei gods, so that with direct presence of cheonsei gods, jinhyeok having no allies around, communication from outside cutout through any method, isolating jinhyeok for becoming prey of cheonsei gods, with this situation in mind jinhyeok had the need of that untradable item called incomplete bookmark,because it's the trump card in upcoming events and to counter their strategy .

it takes 10 min for incomplete bookmark to get casted it's effect, so within that time jinhyeok needs to hold onto the apostles powers since they successfully recreated myth and came to 45th floor, the gods of cheonsei will be here in a moment, as expected goddess of death kali comes there first, and as he wents up against 4 apostles and kali he was barely holding on, ganesha also intervenes adding more adversity, but the 10 mins had passed and incomplete bookmarks ability "forceful spatial transfer" makes demon king belial come there, and within the time jinhyeok convinces belial to hold on for a while and also inducing his hatred towards ganesha who's using divine power so that belial can hold onto for longer, and in the time

incomplete bookmarks 2nd transfer to happen, due to jinhyeok previously instructing peace treaty pact between olympus and norse after killing zeus, they were at a single place becaz of the meeting, leading both olympus and norse coming here at same time and for additional appendix jinhyeok could transfer angel gabriel here as well, due to spatial movement of norse, the entire yggdrasil came here, altho it helps buffing warriors, the divinities were angered since this is an important base point of jutenheim, a must protect place which was brought unnoticed and in chaotic situation as well, the gods were not pleased and wasn't in a mood for alliance with jinhyeok even if jinhyeok had helped them in prev arc, but jinhyeok had also prepared for this(previously when i said he bought several items through coin exchange ,it was not just for yoosungs disguise, it was items for mass manipulating this current situation to,shifting their favouritism and go on the war), jinhyeok takes out the items for convergence and alligning , goebbels microphone(hitlers aide, this microphone helps in increasing reliability and charisma in speech,best demagogue perk) but ofc it's not enough to make it effective since the masses here are divinities, so converges that with last album of master,magicians seven tool,watchmakers toolset these 3 relics, enhancing the main items level with rift+adaptation stat and tier skyrocketing+making the dazzling and agitation effects of the microphone increasing by those 3 relics, so after succesfully fusing he starts saying what he wanted(this item using purpose is to only catch their attention momentarily so that they r not ignorant on kang jinhyeoks main negotiation), jinhyeok says he has a suggeston while taking out a crown which was not in the 7 crowns of tower but had the same power level and more diverse abilities(it is due to jinhyeok had fused different crown and convergence into one), this unknown crown catches everyones attention, he says "he can create crowns even if it sounds absurd, in the end crown is also a relic, meaning someones creation so with right formula and materials he could also make crowns which was why covenant triggered and cheonsei, 50th floor in hurry to kill kang and kang also proposes on the fact he will share the formula of creating a crown to them" and they end up reasoning out the fact jinhyeok being able to creating crowns was logical due to series of events and along with the overall affect of prev said on microphone, adding it with the greed of the gods to get their hands on the crown to get access to higher power and authority, they agree on making alliance with jinhyeok and go against cheonsei mythology.

after the alliance completes, on jinhyeoks side it's olympus+norse+demon king belial+angel gabriel overally in the army there's 10,000 units, whereas cheonsei mythology alone had 100,000,000,000,000,000 units due to the vastness amount of gods number in their mythology, so to boost their motivation & obedience towards jinhyeoks leadership.jinhyeok established a wide area surveilance system to cover the field and record battlefield events occurances and jinhyeok said for the meantime he'll watch over others performance and to make it fair he won't make a leader of any troupe from them now ,only jinhyeok will lead now and through surveilance he'll see whoever achieved greater things in battlefield, and out of those chosen through this point system he'll give out the formula for crowns creation to them so for now they are bound to listen to jinhyeoks leadership. within that time , slowly main troupes of cheonsei gods had lined up including brahma,vishnu,rudra,garuda,shiva as well , as the war comes to start, the olympus and norse joins as vanguard, it was thor & hercules, passes through frontlines 500 cavalerymen of garuda & rudra, and those two also joins the battle and stands up

against thor & hercules, but hercules & thor were in sync due to prev motivation boost and due to jinhyeoks instructions overplaying garuda & rudras simulltanious play, and in an hour 4 of them were tired and at equal toes in that moment jinhyeok showed up(jinhyeok had used one of 12 constellation barier which has additional setting of same polar or polar opposite clashes within range, the barier will weaken the targets sensory, doing this in middle of their battle making it unnoticable to 4 of em) & jinhyeok who transferred through shadows taking rudras attention towards thor and hercules as a chance to strike him off making him out of position where he can continue the fight, (jinhyeok had to do this for gaining copy condition clearance too which was to intervene in vanguard battle after making them feel like a sense of comradeship & rivalry so that's why he putted thor & hercules to fight against those 2, by doing this he could copy an ability from one of 4 vanguards here) and jinhyeok used destructive mandala and nirvana mixing with blood magic in that attack so rudras inner QI gets disrupted when it's already a lot tired , making jinhyeoks poison effective, leading to unable to fight further,garuda fleed with rudra and jinhyeok successfully got one of rudras ability, call of thunderstorm, fusing with holy spear thunder god and abilities gained from guntaffers skill book(cloud catalyst & wind realm) and succeeding in getting holy lance surpassing wind god, jinhyeok gives out indication towards brahma by enhancing his level immediately and showing of hints of having power of zeus & rudra, (while at same time jinhyeok gaslights thor & hercules who were dissatisfied with jinhyeoks intervening in their battles,shifting their pride and honour in battle to shifting their thought towards collective victory and gain for their own myth as well as showing his priortism towards them for being vanguard by offering that at the end of war he'll give out materials as well as formula, while putting in the thought of playing villain role here not thinking of personal honour rather thinking of victory for their people etc making his villain role seem reasonable and keep up their favourability and motivation). unlike ganesha who fell for the signal jinhyeok gave out on having rudras powers after killing him making ganeshas anger towards garuda for not being able to shield rudra, brahma asks ganesha to be calm and brahma reassesses the situation, tellling the troupes to observe enemy line & spread the right wing to attack enemys flank and not to get immersed in fight and he'll be giving out instructions through telepathy if there's any changes in situation he gets notice of, this is becaz the right side of union where belial and gabriel were ,was the main powerplayer but the alliance is incomplete it's impossible to wash away the resentment between eden and demon realm in few minnutes so brahma had decides to utilize that loophole, indra leads the magic corps towards that line , but when demon belial and gabriel tried to counter they couldn't synchronise their formation as expected for polar opposite powers affecting each other, angels troupe showed their hostility towards the demons as well due to contradiction in each others battlestyle and ability hurting each other, thunder god indra instructed by brahma previously didn't let go of this chance and striked with his troupe on fullscale but brahma seeing the scene from afar was suspicious why everything went smoothly and had realised it could be jinhyeoks trap leading him to reassess situation and utilizing indras troupe to create loophole there and strike, but within that time brahma instructed to stop, they were already digging in the formation in fullscale, and result was ,the troupes of indra realised changes in ground and the weather (done by osiris who used wrath of great desert holy lance) while indras troupes were trapped in great deserts wrath under the ultimate firepower exceeding sun and sandstorm, anubis had launched his army of dead to take down the indras troupes quickly witout hassle, also the space movement and presence of

egypt myth was never noticed when the fight started or brahma tried to counter, it happended because the detached communication barrier which was created and maintained by unknown previously,player unknown had left with operators(the virus started to play it's part), and vishnu went to maintain the barrier, and since it was no longer unknown who has same knowledge and thinking as jinhyeok , vishnus maintanance can't kep up with jinhyeoks knowledge on exploiting that barrier so jinhyeok utilized the gap and had used heimdall for quick spatial movement to take egypt myth here , leading to this situation. brahma decides to send 10k more troupes to rescue indra alone this time and decides to communicate with yoru and asura, and jinhyeok watching brahmas calmness despite the situation realises brahmas next moves and he already had plan orchestrated for brahmas next steps.

so while vishnu,brahma,shiva goes to narak to make up with asura so that he can join in this war as well, jinhyeok went to different villages and places where achievements and honorary are kept of cheonsei mythology ,left for the worshipers to build faith towards the abstract existence of god, jinhyeok destroys all those honorary and achievements spreaded over to worshipers destroying temples,statues, takes the worshippers as hostage as well, it's because their rank and level are maintained and serialised due to the ruins and their worshipers, by crushing that making the shift of placement where war is occuring to here, so that they come here to kill jinhyeok,jinhyeok with tree branches drew the terrain,details & features of the whole area to instruct his next step to others, since jinhyeok knows asura is going to join soon but doesn't know when shiva or vishnu will join in direct fight, he needs to fight at a strategic point where he can have advantage and control his opponents next moves through that, while the news of jinhyeok bringing chaos in the ruins brahma sends the troupes immediately realising his prediction went wrong on the fact that jinhyeok would want to end it quick and return to earth to save humanity from the covenant occurance, but jinhyeoks moves indicate he's wishing for long term war fullscale, while brahma sends the troupe toward jinhyeoks place , 2 mages wo were in earth while causing chaos due to covenant ,came here while concealing the fact they had prisoners , not letting anyone notice while coming here, the prisoners were jinhyeoks comrades, the goinmul corporation members and brahma reading the style of mage and asked what they would do since they r not the type who would go fight jinhyeok, they said they want maximum benefit while securing maximum safety so they would stay here along with the prisoners, brahma affirms their condition and let them be here while he leaves for jinhyeok, as for how and who led to this capture and imprisoning of goinmul, it was operators and player unknown ,player unknown had planned to take jinhyeoks comrades as hostage after this fight had shifted to 45th floor first, with help of operators communicating with the 2 mage beforehand and instructing to use their extrasensory to detect a crack in the layer of earth which will lead to the path of 45th floor which will lead to brahma, making sure the crack wasn't noticed by alice befoehand(since she's also a divinity) unknown had used ancient barrier to conceal it but the mage could still detect it with their keen sense and intelligence. after brahma,shiva & vishnu leaves , the 2 mages releases restrains of goinmul corporation(as i said at start jinhyeok had instructed his teamates to surrender to this 2 mage, jinhyeok had anticipated the core of covenant apocalypse predicting it's nature, the outbreak,gathering of all floor bosses ,forcefully fastening outbreak all

of it, and even before unknown negotiated with the 2 mages ,jinhyeok had negotiated with them by sending pesis, a being who can freely travel through all floors, pesis,frey,wolyeong became a team and went through various floors gathering some ingrediants and reinforcements from start(the usage of the items collected will be shown later on jinhyeoks bases over the middle floor) and they went to set a build up at a different place(will be said later) , the 2 mage gave them draft of the map on places,terrains,structure in this area & giving out information whom they should be aware of before meeting jinhyeok and after that they conceal themselves until jinhyeoks next command, meanwhile brahma reaching out where jinhyeok was, palatamunsar gorge, one of the most notorious rugged place in cheonsei myth, due to it's nature it's impossible to deploy large force in the area, the cheonseis numerical advantage would fade, they can't even destroy the whole place because it was a grand cayon that marked the beginning of millenium ,the birth of the mythology, brahma realises jinhyeok chose this place thinking of that and he also suspects what types of traps has he setted , so brahma sends out asura who is leading yosu army (mainly keeping himself secured while trying to deal highest damage since asura is stronger than him, but later it will be realised that brahmas this decision was what jinhyeok had aimed for), the asura could detect all traps there, also sensing trough finding out illusion and concealment powers of loki who was setting up ambush with valkyire(this is just an act to stall time on asuras side by jinhyeok while jinhyeok successfully traps otherside of brahma and ganesha), and later in an hour , asuras troupe could take hostage thousands of armies of norse and olympus.

Jinhyeok was also within the hostages, he had disguised himself as an old man, a regular norse drunkard, he had purchased beforehand lupines disguise set & infimyeongu skill & also used a perfume for covering the reverberation of his magic powers concealing his aura, the reason the hostages Weren't killed yet was because in the end they are still people of other mythology, powerful ones & brahma wanted to utiluse them after destroying their mental magic resistance and inducing brainwashing, boosting the efficiency on his side, jinhyeok knew about that too due to completely seeing through brahmas moves from the start of war, while asuras soldiers were transfering captives, jinhyeok starts his next phase in his plan, while is disguise he used his different skills and ingredients to make foods which would induce the thinking of the soldiers which is they only see food as supplement and nutrition never having any thoughts of taste die to sense of warrior, but jinhyeok averted that and bring out their urge for the deliciousness of the food, making them like regular humans, and jinhyeok kept acting when the soldiers came here, jinhyeok was portraying himself as a chef in the alliance, jinhyeok disguised as old man convinces them to have some food, well even though they had send one soldier to eat first if there's case of any poison of drugs but it Didn't occur so the other soldiers join in as well, while they started eating the food he activated 10 star barrier "emotional flow"(one of the reasons for choosing this canyon beforehand, because the terrain was rugged & the energy of nature was abundant,Which made it easier to use the high level barriers,like this 10 star,while boosting It's power due to the nature of the place), Another reason for using emotional flow barrier was copy condition of soldiers(if jinhyeok succeeding in making their emotions flow recalling them about

their past peaceful times while being in the battlefield after fighting), Slowly the soldiers fell under jinhyeoks mind control. On otherhand, brahma was thinking on victory was settled, shiva had joined battlefield and odin, athena fleed while belial & gabriel were busy in defending themselves, and thor and hercules had lost to asura, even though arjuns troupe of 10k who went to santra cave lost contact & also another strong unit of 20k who went to the mountain also lost contact, the main gods of cheonsei Didn't bother since their 1% was barely damaged through that and powerholds of jinhyeok side had fell down, but brahma was still suspicious on why jinhyeok hadn’t intervened in asuras fight or helped odin athena to turn tide while jinhyeok could do that actually, brahma was thinking on if jinhyeok Didn't helped them because he looks at the bigger picture and thinking of striking somewhere big while they are offguarded, he was suspicious at the number of prisoners it was higher than expected and a few powerhouses were taken down,he was thinking if jinhyeok would utilise brahmas thinking on "utilizing enemy by brainwashing" and use it to infiltrate in main base of cheonsei when they r gathered to perform brainwash method,Brahma realised jinhyeok might also use their own enchantress who lost contact and brainwash them to surprise attack as well, And brahma becomes cautious while not letting ganesha realise what he's thinking caz he decides to act like he fell in the trap and in last moment counter it, he explains that to his bodyguards as well, Soon a group of yogis(asuras armies) took the captives here, seeing their absurd magical powers they also could realise It's not fake rather the major deities of the alliance, as ganesha and other gods reaches close to captives to perform brainwash after destroying mental resistance,the captives quickle gets out of the handcuffs, the concealed invisible weapons on their waist were drawn out and they were ready to attack as well as the yogis they also charged in towards ganesha,The response was too fast for ganesha and a few to counter at such close distance and they barely distance themselves after the attack,And as ganesha tries to prepare to attack and in the time the prisoners try to counter, brahma who had completed the array in the area uses his recreation ability Turning the soldiers into weapons and putting Against each other & his bodyguards also charged in from behind completely taking Down the yogu & prisoners, and finally after killing off everyone, brahma & other gods confused as a mask falls off from the deads faces whom they thought to goinmul members & other captives were asuras soldiers & the soldiers who went missing in mountain, jinhyeok had perfectly disguised their temporary powers through berserk,items to fake out the aura and disguise like he himself did on him. (This also leads to damage in main base but the main aim Isn't that, we'll see in jinhyeoks next step).

Jinhyeok realises, by now brahma would have killed of fake captives & was in a state of confusion on what jinhyeok is aiming for, jinhyeok after entering main base of asura and coming infront of him, removes his mask making asura aware of his presence, but ofc asura Doesn't come to him directly until jinhyeok shows of his abilities being same as his soldiers as well(previously copied) which makes asura suspectable of what he did to his soldiers and why is he here alone even if he's strongest ranker,jinhyeok can't take down armies of millions, jinhyeok reveals the lies he had prepared,he says cheonsei is using this chance to kill off asuras troupes as well, they r betraying asura, Jinhyeok reveals the clip which was recorded at ganeshas palace when they summoned the fake captives & brahma killed them off,precisely jinhyeok

edited the clip, showing the parts of ganesha summoning them & brahma killing them off, the recording was done in a way which could make asura see his soldiers(the recording method was done in a way which could record through the disguise of fake captives, not letting asura realise they were in disguise while brahma killed them off), asuras bloodthirst even though directed towards cheonsei after this he was still suspicious off how jinhyeok obtain this info & why is he showing this to asura, in answer jinhyeok reveals he found this from the drones he's using to surveil entire area for the battle & also says out cheonseis intent is still same, even tho they r allied with asura temporarily they r still enemies and releasing asura from jail could lead to their destruction even if they kill jinhyeok, so cheonsei had decided to use this chance to let asura fight in the dangerous places against jinhyeok alliance and slowly kill off asuras warriors as well, an efficient strategy, and this were logical which made sense to asura as well & asura realised he can't rebel now since his main forces r scattered and all over the canyon while It's also a complex area to enter, asura Doesn't know the insides but brahma does so cheonsei can kill them off anytime but asura still Isn't confirmed on why jinhyeok is showing this to him for that jinhyeok had orchestrated another clip, where it portrays a file where it shows all his comrades were used as sacrifice even after they were protecting others, alice getting betrayed by her clan, andrea getting ditch by her parents, teressa being used due to her goodwill & jinhyeok says he Doesn't like being taken advantage off abd then abandoned, & the goinmul was a group he formed for peoples who were at the lowest state & abandoned, with what asura felt a sense of sharing the sense of same pain,asura realises the reason why jinhyeok warned him is because of he shared the same fate as peoples sharing same fate can't have hatred between each other, while the process jinhyeok had also activated communion enhancing the rate of sympathy,And jinhyeok after that convinces asura in joining in this alliance(it's revealed from very start when jinhyeok attacked temples,drawing them out and leading brahmas judgement to send asuras troupe alone in the canyon was what jinhyeok had aimed for, having asura alone here would certainly there will be no one to stop jinhyeok from manipulating asura).

after that, brahma directly joined battlefield and he and his troupes are currently up against angel gabriels troupes which was most resistant, the zion sanctuary created by angels were reduced t nothing due to brahmas power of creation & destruction,making imagination into reality & his "10 seconds battleforesight" played a part in destroying angels side onesidely & just before they finished off gabriel, heimdall opens the gate and due to his superior spatial distortion & manipulation he succeeds in rescuing gabriel, even though other gods of cheonsei felt at a loss, Agni the fire god clarified he could get a glimpse of which place he came out from and returned too, he said about knowing that location, ishukura swamp, where numerous types of swamp monsters live in, it was the most neglected place of cheonsei so most gods didn't know about its inner features but agni reognised , ishukura swamp is a place where it's easy to hide in but if caught it's dead end, brahma was suspicious jinhyeok might did it purposely to lead them there & gabriel fell down faster than he thought so he must be reserving energy and there might be ambush and trap setted in ishakura swamp, brahma suspects after leading them here jinhyeok might take the chance to save his collegues who are trapped and around lesser guards, so he calls out indra for covering the temple, from jinhyeoks previous instructions giving

out by 2 mages, goinmul corporation comes to the temple & jinhyeok also finally reaches here explaining they have to infiltrate fast, the ishakura swamp jinhyeok delibarately showed through heimdalls gate, brahma will be suspicious but will have no other option but to go there, the temple was normal from outside but there's high security with barriers and defensive magic because inside there's main essence of their powers r here, jinhyeok who's present here now uses his ancient barrier using lost language(lang of cthulu mythos), he deciphers and broke through defensive lines that protect from others entering (this was one of jinhyeoks trump cards which brahma didn't know of), jinhyeok puts his hand on the crystal ball at entrance, rearranges the position of runes and arrays on it, the damaged temple shows it's true form, the aerial fortress vimana the strongest holy relic in their myth, jinhyeok leading them on separated sides, detaching them from this place and leaving faith in their barrier magic is what he wanted, to gain control of their one of main forces, jinhyeok adjusted and took vimanas power under control, he needs to utilise this fortress to secure first lotus which is the heart of cheonsei mythology, indra within that time had reached the fortress attacking jinhyeoks troupes, she harbored resentment since she was in charge of looking after this temple but failed and jinhyeok was also attacking her sore spot by using zeus powers who was her supposed rival and reminding her past mistakes throughout the fight, reason for maximizing her hatred and recalling her mistakes is needed for her abilities copy conditions, after jinhyeok defeats her and goes away she notifies to brahma that they should stop focussing on swamps fight, jinhyeok is aiming for first lotus, so brahma who decides to retreatt his troupes while they are immerged in defense didn't realise that belial & gabriel were conserving and waiting for their retreating moment to attack them from back, and cronos and odin also charged back , even though from the surprise attack cheonsei had a lot of damage they had no moment to counter since they had to protect first lotus, jinhyeok riding vimana finally reaches the temple where lotus is situated, jinhyeok was awaiting for pesis since to get inside to the place of lotus quickly he needs to know inner terrain the best where multidimensional map of pesis can help who is best at traveling through any place on any floors, jinhyeok leaves vimana to machine lord taemin and yoonhwa so that taemin an use it with his ability and stop the gods when they come here, yoosung will also be here and for reinforcements , there's troupe of asura. and jinhyek goes to temples entrance where gate gurdian is who asks question at entrance and if not answered within 3 sec the divine and phantom beasts circle around the individual, jinhyeok didn't answer in 3 sec purposely,so that he can face and tame the divine beasts through using mana crystals,mentra taming and comunion, making his reinforcement larger in number and after that he answers the question and enters temple .

previously when i said jinhyeok had trapped unknown ,i had a bit of misinterpretation ,i'm sorry for it, his trap wasn't perfect but he knew that would work due to sensing some inner faults inside unknown, a fault created by insider which would lead to higher amount of time to fix, (it was nyarlathotep himself who did it, to absorb data and abilities of jinhyeok for himself) , so for that jinhyeok had thought unknown wouldn't join the battle for a while becaz He had analysed the the level of mana growth and data storing in unknown, realising by any means it wouldn’t be restored to full form in this short time so his planning in these parts Didn't include unknown as variable & unknown Won't join in main fight (which will go wrong in next parts of jinhyeoks

planning)(also jinhyeok Didn't know it was nyarlathotep who pulled that on player unknown,only knows it as insider creators fault while making unknown)

After jinhyeok entered temples labyrinth with pesis, due to pesis ability they could find correct path between numerous infinite looped trap paths, while utilizing the divine beasts(previously tamed) to save their own energy while going through the traps with high speed, having no damage on themselves & suddenly jinhyeok faces player unknown and vishnu, Where unknown reveals he had predicted jinhyeok would aim fir this, while proving to vishnu what he saud was correct and asks to vishnu to hold jinhyeok off while he secures furst lotus totally, meanwhile jinhyeok Didn't calculate unknowns interference this fast, due to sensing his growth level previously he thought unknown wouldn’t interfere the fight and focus on regaining powers or else he might get in more danger, Jinhyeok realises It's either he still Doesn't have enough strength and looking for a different method to regain strength or someone might have stopped means of him getting magic power and gain fruition but eitherway jinhyeok could realise what unknown was aiming for, as unknown quickly gies away to the place of first lotus jinhyeok tries to talk through vishnu while fight, vishnu gets suspicious because talking this through will only consume time & it will be bad for jinhyeoks side eitherway so he decides to listen, jinhyeok used the statements of vishnu to question himself, when vishnu said I'll hold off jinhyeok till you seal the first lotus, using that jinhyeok questions, why did unknown interfere early, by what was going on till now he should be interfering after cheonseis fight is over, or why is he only interfering now not from before & adds seeing unknowns conditions he must have not gained his full state & if unknown is in a situation where he lacks magic power Due to some kind of incident, he would need a strong holy relic to fill that gap & at the same time he knows jinhyeok is coming here, so he tried to come here in name for securing lotus but his aim is to absorb it, and if unknown just wanted to let them know jinhyeoks moves he Didn't need to come here considering unknown is in a bad shape physically & jinhyeok proposes vishnu should directly get reasons from both parties, manipulating vishnus judgement leading vishnu to guide them towards lotus room, while jinhyeok goes towards the room he proposes if what jinhyeok said was true then jinhyeok asks it would be better to stop the war since the main enemy of them is not jinhyeok, rather unknown who is backstabbing them, as vishnu and jinhyeoks troupe got to the room they realised it had already turned into a different place, no longer heavenly fragrance, only demonic aura covering everything & unknown had already absorbed first lotus, unknown now reaches his prime state, it turned into an 1 on 1 battle between jinhyeok and unknown again, adapting to each others attacking countering & neither of them were scratched,unknown had already knew jinhyeok would be able to convince jinhyeok and in meantime made steps to call out 4 shade reaoers, the messenger of the end, they had surrounded everyone within the room and unknown already knew jinhyeok would think of a way to escape & utilize vishnu to stop the war he must've negotiated and have cheonsei on his side & then go against unknown, but that's why unknown had already summoned gates at the exit from where shub niguraths black goats were coming towards too,giving jinhyeok no chance to safely escape with vishnu. On otherside at middle level floors where jinhyeoks bases were made, tulzcha & some apostle of shub went their to take revenge for what happened in shub nigurath arc(the murim masters were in the fight too),

Tulzcha himself had come here with few apostles not just for revenge, also to destroy jinhyeoks other reinforcements to crush him totally, the empire & murim who had made peace treaty due to jinhyeok, had formed alliance and went against the troupes, but the thinking that it will be onesided changed after seeing empire & murims resistance and some could also deal big damages and by which tulzcha realised this must be jinhyeok had prepared beforehand, jinhyeok before this covenant arc when he faced tulzcha in abandoned Island, he found different ingredients there and mixing them rightly with another items, making an armament which could not only defend but also deal damage to lesser beings in cthulu, like apostles, goats & tulzcha himself, previously when i said jinhyeok sent pesis,wolyeoung & frey to gather ingredients and go to various place, it meant this. Within 10 hours of tulzcha Didn't get much result, the empire & murims hit & run tactic worked & they Didn't suffered much injuries, they had realised moorim & empire are using various pousons in their attacks too but analyzing those poisons, they can never affect any being or even ant of 50th floor and tulzcha still Couldn't comprehend, within those regular poisons jinhyeok had added tail of plague & corna in it, making it same as what he used to beat tulzcha previously.

Back to jinhyeoks fight, unknown showed how much damage was dealt by now, earth Was almost destroyed due to covenant and even 50th floor beings went to destroy jinhyeoks bases(well that's later realised that it failed as i said previously), jinhyeok says his priority Isn't to save earth rather It's to end this war and kill unknown, jinhyeok says to Alice that he will create an opening abd they should take this to take vishnu and convince cheonsei, making their target if hatred into unknown so that the war stops and they also come to jinhyeoks side, the apostles of shub & 4 shade reapers, knights of the book of revelation & unknown too, all rushed and surrounded and prepared to attack, jinhyeok who had fused crown of strength & speed, wore it and used it to boost his powers to peak, jinhyeok realising alice & teressas prep done in order to escape at full speed alongside oesis finding out most probable route for escape, teressa and vishnu worked together in sync to enhance vishnus field of rejection ability to resist against any upcoming attack from shubs apostles & black goats, while that jinhyeok who had wore crowns, breaking through 4 reapers and reaching unknown, jinhyeok using everytype of attack magic requiring swords while also using multiple tomb grave arms to handle different opponents all together to make chance of their escape higher, and jinhyeok finally uses the main ability he was about to use as trump card for their escape, first activating earthquake & using rift & adaptation stat on it to maximize It's level accordance to crown of strength as well, msking the whole temple shake and lava from under temple flowing out & then escaping unknowns surprise attack, jinhyeok reaches the ceiling & activates unique spear downfall, something that's not well for closedistance or small area battle cause it can take down everything alongside the user, activating Sagittarius barrier making himself strengthen while downfall ability shoots him down on floor, making the entire temple and everything collapse into ashes, jinhyeok had also successfully escaped, since before he striked the ground, took out his ancient spirit beasts, using gnome & earth spirit creating space for escape and wind spirit to catch flow of air to realise the fastest direction of escape route making & jinhyeok also escaped successfully, within the time vishnu got to the cheonsei mythologies base and convinced them to stop the war and

now everyone were having a meeting, jinhyeok who had previously asked for compensation within cheonseis negotiations had wanted golden orb, and by using it got into holy relics warehouse, deal was to get one weapon from there, jinhyeok correctly choose one weapon by which he will use it to fuse with his daggers which will be able to effective for upcoming battles (he calls orun & blacksmith from olympus, both working together to make jinhyeoks weapon built faster, making it according to the formula jinhyeok told them to).

From this point, since jinhyeok saw unknown taking It's prime state and outer gods intervening, he could predict their future reinforcements and aims and jinhyeok prepares throughly to kill unknown (the reason why jinhyeok from start Didn't focus on earth rather killing unknown, we'll see that when he kills unknown). Utilizing the largest blacksmith shop in cheonsei and using their resource of crafting hephaestus
& orun works together in combining crimeson lotus and vajra with jinhyeoks two daggers, (on otherhand, there were moles inside cheonsei who negotiated terms with nyarlathotep & made conspiracy to retrieve holy relics back and create internal conflict within alliance,while killing ganesha & fabricating wound to frame the alliance people of other myth too, also killing ganeshas other reason was vishnu needed ganeshas heart for a material & erasing evidence before nyarlathotep leaves so that jinhyeok Doesn't know about his presence), while the daggers were being prepared, a troupe of 10,000 with unknown leading it and troupe filled with goats of shub nigurath and other lesser monster in cthulu & one of main gods who is ghroth the harbringer, jinhyeok also called out to his troupe corresponding to counter unknown but he heard his trump card/ a device he was preparing hasn’t been made yet totally and he asks belial & artemis to move it to strategic advance point from where he will be able to affect entire area and gain most efficiency, unknown raised hand signaling his troupes to charge in the fortress while jinhyeoks alliance also got ready to defend the base, meanwhile Jinhyeok had thought of a way to survive in this showdown while also achieving overall victory, jinhyeok ran towards different direction after passing through the gate, and took out an box and a worn out fountain pen and wrote something using lost language which others Won't understand except ghroth,the fountain pen which hides "truth", and the old jewelry box which indicates clues to ouroborus labyrinth, indirectly hinting to positional shift of necronomicon, hinting jinhyeok has few clues which can be used to deduce place where necronomicon is now, since that book had information on cthulu mythos itself,if jinhyeok or anyone gets their hands on it there's chances of all other myth combining strength to stand up against them and use it to make strategies to kill them, so that's why outer gids prioritise in ceasing necronomicon, due to ghroth realising that & shifting his attention toward jinhyeok alone, the situation changed, where unknown Couldn't convince ghroth anymore, an outer god, even though a mid tier he still looks down on lesser species and takes pride & besides jinhyeok ran off alone, ghroth could see Through whole area where he was going there was nothing, unknown Couldn't stop ghroth from chasing jinhyeok and meanwhile goinmul & mythology alliance charge in unknowns troupe getting the loophole due to jinhyeok taking away main one in the unknowns team, everyone rushed to hold off unknown and others, not letting player unknown to become a 3rd variable in jinhyeok & ghroths

1 on 1,(It's understandable for ghroth to chase jinhyeok not only because of other reasons i told but also because in 1 on 1 jinhyeok is no match due to power difference where ghroth can literally obe shot,jinhyeok knows it too & jinhyeok did it for that,the trap will be ready soon,the device jinhyeok told to place in strategic points he instructed to belial & artemis before), jinhyeok Didn't use any unique abilities or coronation of napolean, because he's saving them for his last showdown or if a sudden variable interferes only for then, jinhyeok used residual moonlight, creating 10 clones of himself although they are not powerful like og one, they can fake their aura to deceive others not letting them realise the real one,  The decision was to escape & evade to buy time as much as possible but in a few minutes jinhyeok could sense ghroth had killed all the clones pretty fast & jinhyeok Couldn't detect ghroths position and realised he had activated one of his main powers "one eyed moon", Which could deal psychological attack inducing despair,madness,fear even making universal entity lose their mind and strings of reason, And the psychological attack was just side trait, it forecasts the "end of realm" making all lives,spirit,non living & living die from elementals missing & all types natural disasters large scale occurance, ghroth Was looking at jinhyeok very clearly due to the forest and everything rotting away leaving nothingness in the field,jinhyeok was distancing at max speed wearing crown of speed while activating tomb grave armor & unique spear of 12 tasks/body of demigod, shielding himself from disasters affects, Ghroth was also impressed by his resilience to keep himself calm and think even while facing affects of one eyed moon, and then activating Cheronosphere & primeval flame inducing on magic bullets targetting at ghroth.

Even though the 2 abilities maximized bullets destructive power, jinhyeok knew it was not enough so he correspondingly activated 8 swamp of poisons & plague(i said about this item while jinhyeok used it on tulzcha), making the flames from bullets turn sticky and covering mainly ghroths area instead of spreading and with deadly poisons for primeval beungs mixed in it, even though from little affect of it, everything in area reduced to ashes, while restraining ghroths position jinhyeok immediately used frost spear, the absolute temperature freezing everything but even with previous attacks combined with this ghroth was unscathed and ignorant (the purpose was not to land a critical hit rather maje it seem like jinhyeok used his main traits and attacked with his might and still Didn't make any damage, leading to thinking jinhyeok Isn't much, inducing ignorance and treating jinhyeok as plaything, so that jinhyeok can continue to buy time till the belial & artemis set up completes), jinhyeok Didn't want to use invincibility and blessing of stars defensive abilities, wanted to save them up, so summoned the undead monsters troupes, including death knights and dragon, the advantage of using death knights is they Won't be affected by one eyed moons psychological attacks since It's already dead and they'll charge in with full force without fear of death, jinhyeok moved in opposite direction, using mentra taming & red land riding to quickly get on abd adjust to dragon riding while it flies away with full speed, ghroth also realised that jinhyeok also chose flying away because his powers are most effective on ground rather than distant sky, but as i said previously he keeps on going with his plans because It's confident jinhyeok can't do anything to kill him & ghroth feels joy of 'toying enemies', ghroth uses light of destruction another trait of one eyed moon, a light that burns away base elements and reduces to nothingness, making concepts to nothingness, the death knights all evaporated without any moment to react, jinhyeok could

barely come away but the light was reaching near very fast, ghroth could detect various magical powers mixture and clouds in distant sky distorting & take different shape, the ancient beasts pried & hooded crane were in their manipulating the sky, their powers of weather and sky manipulation Couldn't deal with the light ofc but the small gap in  delaying gave goguma a chance to use void dragons breath sword of condemnation (before unknown came here jinhyeok made sure to extract magic crystals from cheonseis relic room since they Didn't mention anything he decided to extort to use later to buff goguma when It's time), with that blow it stopped one eyed moons attack & as he stopped it he used downfall(like he used on unknown previously at temple) used on the dragon he was riding to direct that attack towards ghroth, Due to the affect of downfall and dead dragons internal energy & overall mass while coming down with speed exceeding lights, the impact was destructive, but ghroth had defended his body using ancient shield and that downfall led to no damage just smoke, but only one incontinence which was exploited by jinhyeok who was wielding spear of zeus & dragon slayer sword balmung and in the gap jinhyeok used full power to penetrate at seven points on ghroths body, why seven points? Due to Jinhyeok previously knowing ghroths heart shifts places throughout the body, flowing in everyplace, before downfall he calculated the flow of magical powers in his body and pointed 7 possible places where heart would be, and using his best swordsman skill to boost powers of balmung to penetrate, but it only scratched his outer layer only not dealing that much damage, ghroth was terrified because realizing jinhyeok knowing about his inner System of heart movement but he thought it was all done since all reinforcements are gone now, but jinhyeok uptill now all he dud was to continue inducing his sense of ignorance and the pleasure of being in control, to buy time up this point because the set ups of The devices had been done, different lines drew from corners of the world, uptil now barriers were just covering specific area but due ro jinhyeoks devices It's range scaled upto covering the whole realm itself & the main ability of this device Was to allign all 12 constellation barrier created from lost language and create a 13th constellation barrier which has highest peak and ability to counter a divinity like ghroth, When the space distorted and one eyed moon apoeared, it was blocked immediately, The 13th constellation barrier which had the nullification ability at max all powers pointed towards it and cancelled it, Jinhyeok continued to use multiple attacks aligning it with other 12 constellation maximizing the effect(like using call of stars and using it with Sagittarius to make the starfalls destructive power increase, using pisces which alligns with waterpower using that to enhance frost spear etc).

While also the barrier affected in multiplication, increasing the number of attacks, making it unpredictable which direction It's coming from, due to libra barrier, the gap between opponent decreased since it buffs the users traits as well, all this combinedly use was possible due to having the device & the 13th constellation was able to recreate primordial snakes to assists, using his all to corner ghroth, making ghroth use his another holy lance shagais roots since one eyed moon is nullified, making the surface of the sword split horizontally and appearing a single eye portraying his Lance, Jinhyeok activated the assist of primordial snake which changed the area, turning the falling stars into serpants targetting ghroth, "the serpant that devours the

planet", the gaping mouth had no sign of beginning or end, even at ghroths vision, portraying It's vastness in size, in contrast, shagais roots also spreaded out It's full power, creating purple mist storm, stronger than the light if destruction trait in one eyed moon, the snakes of 13th constellation & tentacles of shagais roots clashed, ghroth unleashed his full power to break through & finish jinhyeok off, due to the affect countless single eye appeared covering whole universe, and jinhyeok finally succeeded in drawing out this situation, reason to induce 1 on 1, to have sense of ignorance & interest at same time leading to fullscale fight & drawing out battle of power, was to get those eyes cover the whole universe(conditions to copy one eyed moon, recall It's single eye It's unforgettable nightmare and induce mental damage at highest rate), activates final ability of barrier residual snake, Making everything penetrating through the eyes,even though the eyes had high offensive powers, it was vulnerable to illusions to due quantity, and through that jinhyeok used the snakes and illusionary & sensory distortion to portray It's trauma, this wouldn’t be effective on usual ghroth unless the opponent was same level as outer gods but due to disrupting It's primordial essence through using 13 constellations while boosting It's own power, the illusionary affect leading to trauma recreation succeeded, and after facing It's highest mental damage his attacks also slowed down leading jinhyeok to finally finish him off & successfully getting his one eyed moon ability. Due to impossible level of achievement in most adverse situation, the tower compensates jinhyeok with choosing out 2 item out of 6, where he chooses free access to enter 50th floor(he would use this to enter there and make preparations for next war after covenant) & choosing sss class random treasure box which had 1/1 million chance to drop something he desires but jinhyeok had ways to manipulate the probability and utilise this as his Trump card to overturn everything that will happen in future as he roughly pictures what unknown could do after this.

unknown prepared and came inside jinhyeoks base while concealed from all detection barriers set by jinhyeok, contacting belus who acts as alices butler from outside but an operator who is looking for moment to strike from inside while leaking info, (although that couldn't possible till now becaz jinhyeok never tells anyone about his plan,only tells the individual tasks ,giving no chance for info leakage), they team up to isolate alice and take her as hostage & prepared methods which could not only dispell their abilities but also alter their control of mind towards the user, unknown had used those potions on his daggers, waiting till it's their time to sleep and then ambush while detaching the space letting others not realising what's going on there,meanwhile jinhyeok went to 2 blacksmith,giving out shagai roots he got from ghroths sword & high level magic crystals made from ghroths heart, enhancing success rate and power level while giving the daggers ability more diversity ,overally making the new form of dagger to be prepared within short time while maintaining high development(previously when he gave out vajra to inject in it as well) & after getting the remastered daggers "first blade",he decided to make deal with high floor manager shylock, by gaining triumph in shylocks deal can jinhyeok get best items he needs for probability manipulation , although there are other ways(like in 1st floor labyrinth arcs one), but with items he can extort from shylock , the probability manipulations variables will be reduced while giving jinhyeok a way to get what he wants, so he summons shylock and participates in deal of infinite wheel led by shylock, so first in scales , jinhyeok

asked for the necessary items to get what he wants from sss random treasure box, jinhyeok knew no matter how much money he putted on otherside of scale it won't match up to equivalence for the items since it's shylock(this order follows shylocks deal in our history stories), but jinhyeok acts along , not to let him realise or make him sus that jinhyeok knows him throughly, so after putting down is weapons and coins ,he wrote down something on paper and putted on scale and it finally became heavy side, the scale moves on preference on what shylock desires, in that way, so what jinhyeok had wrote was no need for paying if after jinhyeok becomes his test subjects and throughout experiment time he dies (shylock is known as one of most heinous human experimenter and if the strongest ranker wanted to be his test sub,then ofc his interest would boost up), if jinhyeok survives through next 3 experiments he will get the item he desires, as the condition. shylock took out his collection of thousands of poisons & curses, seeing shylocks set jinhyeok realises he must have different level of poison and curses since he should know about jinhyeoks tier as a tower manager, and it seemed he even had the poison combo jinhyeok himself used against tulzcha, which confirmed jinhyeoks thoughts, jinhyeok says he'd take back his weapons as his sides scale is heavier ,needs to balance both side so shylock couldn't refute, (jinhyeok doesn't want to lose his weapons after getting out of this event) within the time shylock prepared new poisons using old ones and combining them with each others, making poisons which could kill gods, but jinhyeok could resist the poisons affects and keep his composure, so shylock moved on to next one,he tookout poisons and curses existed in 50th floor, like devils pain,cross of antichrist,curse of horizon, all types of demonic materials combined to make most heinious poison ,after shylock inserted this, the blood qi flow control through blood magic and heavenly demon arts was disrupted, all defensive magic jinhyeok set, poison resistance and barries were nullified and his inner body burned, started bleeding from eyes and nose and coughing out blood, before shylock prepares another poison jinhyeok takes out the item he prepared to overturn, before this started and while 2 blacksmith made the reinforced first blade inhyeok asked for a doll that can channel ones curses in it's vessel , name 109 curses,in reality it just channels the curses in users body and spreads throughout the area,since this area was restrained by barriers so others can't interfere their gamble, this cautiousness of them led them being victims of getting affected by those poison and curses which went in jinhyeoks body and the process will continue till user aka jinhyeok says to stop, although system confirmed that experimented party can't take offensive or deal attack or harm to shylocks side , this action of jinhyeok was counted as defense mechanism for survival so no rules were broken, not being able to withstand the curses and poison shylock admitted his loss and second experiment ended. at 3rd test shylock took out special relic gods faithful henchman [ Content: God’s faithful servant is a type of transaction that is made with the consent of the target and the approval of God. Once a confidant, one must obey God’s words absolutely and become a faithful servant at the forefront of everything he does.] ,using this to forcefully make jinhyeok shylocks slave, jinhyeok had made an item and left outside that barrier which would call out to rick henessy in half an hour, so jinhyeok didn't answer yet and acted he is in panic and drags time, rick judged shylock using cheats and unfair methods to corner jinhyeok since jinhyeok countered him badly in 2nd test, rick himself activates gods droplet, an ability polar opposite to henchmen one, something that nullifies unreasonable contract done in name of gods, due to nature of two relics they will cancel out each other and can also take out surroundings and since shylocks entire treasure set was here since he was looking for best

items to corner jinhyeok, which will be devastating resource loss but rick was ready to give that up for rescuing jinhyeok because in past it was jinhyeok who made his promotion as high floor manager possible by taking down hasting so yeah jinhyeok utilised essence of making him feel indebted and since rick is highly maintained and disciplined nature he won't turn back on his benefactor, and shylock could also detect rick was ready to lose that relic too ,it wasn't bluff so shylock admits defeat and restrains on jinhyeok gets removed as he passed through all 3 tests & he acquires the items needed for perfect probability manipulation for sss class treasure box, although he got his way with rick this time, he doesn't know his real motives & as rick left jinhyeok sensed faint translucent flow of energy on otherside of castle, realised unknown must've used his barriers to not let anyone sense the fight over there and he's fighting alice and teressa so he immediately goes there.
