Michael Scofield doc

Made by: River/ratjoe

So I noticed how underrated Michael Scofield is. And I decided to make a doc to show his feats.The doc will mainly talk about Scofield's feats, I will only give as much information as is necessary about the other characters. I will not go into unnecessary details, I will always describe the situation enough to make Scofield's feats understandable.

Season 2 ep 12

We start the episode with a flashback showing how Scofield was treated cruelly by his father. Sara escapes from Paul, but the only way out is through the window. She jumps out and gets hurt.This is where Scofield gets information about the tape. In the desert, they meet Mahone, who shoots at them. They eventually manage to escape, but Scofield's father is shot in the gall.

Despite the death of his father, Scofield remains strong and is able to control his emotions and continue his journey.

(EM)

Mahone receives information from Coyote. He finds out that they want to go to Mexico by plane and heads to the airport. In the end, only Sucre gets on the plane. Scofield and Linc remain. Scofield's plan is to find Sarah, but they see a fighter jet in the sky and know they are going to shoot Sucre down.

Mahone notices the plane that goes to Mexico and he thinks Scofield is on the plane.

(Verbal Deception, Intuition, Decision Making, Risk Assessment, Lateral Thinking)

Scofield and Linc head to the nearest town to call Sarah. But they spot Mahone's car in the distance, so they start to go away. Mahone didn't notice them. Along the way, Scofield notices a radio tower in the pitch black.

(Observation)

They finally manage to call Sarah, but Mahone crashes into them from the side and their car explodes. Scofield and Linc don't have time to do anything before they get out of the car and Mahone pulls a gun on them.

Season 2 ep 13

Police arrive on the scene and ask Mahone to put the gun down. Sucre and the pilot spot the jet and jump out in the middle of the desert. Linc and Scofield return back to Fox River where we see the new principal. Linc is put on death row again and Scofield gets a life sentence. Mahone wants to take over the case, but that's not possible. Kim calls Mahone to kill Scofield and Linc.

One of the guards leaves the key in the prisoner transport car. Scofield notices and quickly deduces that it's a trap and they have nowhere to run and they will get shot. But Linc convinces them that they have no choice.

(Trap Evasion, Intuition, Deduction, Risk Assessment, Convergent Thinking)

They notice a door, but they don't know what's behind it. They take a huge risk, but it pays off in the end. Scofield and Linc are surrounded by Paul and Mahone. Paul shoots Mahone and helps them escape

Season 2 ep 14

They successfully escape, but Linc has a flashback and realizes that Paul wanted to kill him earlier. After a conversation, they get back in the car and continue their journey. Mahone survives the shot.

Paul takes Scofield and Linc to a plane. Linc is skeptical but Scofield convinces them they have no choice.

(Persuasion)

Mahone tells Kim that Paul was the one who shot him and that Scofield and Linc are still alive. Paul kidnaps Steadman. Scofield wants to take a photo to prove Linc's innocence, but Paul informs him that any evidence that could be used in court has been destroyed. (fingerprints, DNA, teeth)

Scofield calls Channel 11 to surrender to police. Paul pulls a gun on him, but Scofield doesn't put it down.

(Planning Risk Calculation, Cunning, Composure, Mental Fortitude, Determination)

Steadman takes Linc's gun and points it at Paul. Scofield reassures Steadman, arguing that he can end his suffering and imprisonment by telling the press the truth, but Steadman shoots himself and becomes an "unrecognizable corpse".

Although they fail to keep Steadman alive, Scofield's reasoning works in not shooting Paul.

(Direct Manipulation, Emotional Manipulation, Persuasion, FRI)

However, at the end of the episode, they run into a problem because the police arrive.

Season 2 ep 15

Scofield has to come up with a plan in a few seconds because there is only 1 exit from the motel, where the police are already waiting for them.

The plan: Paul shows his badge at the door and tells the police that he has taken Scofield and Linc into custody. As he takes them close to the police station, Linc and Paul draw their guns and take a hostage. They manage to get the car keys and drive away.

(Problem solving, Planning Aim, Planning Formulation, Planning Invincibility, Horizontal Thinking, Holistic Thinking, Application Thinking, Improvisation, Strategy Execution, Strategy Efficiency, Unpredictability)

Scofield uses the hostage to record a video in which they tell everything about "The Company" He explains what has happened so far and tries to explain his innocence. After that, the hostage is released, who goes to Channel 11 and broadcasts it on TV. Scofield exposes Mahone's secret of deliberately killing the inmates and Oscar.

(Negotiation, Information Control, Application Thinking, Synthetic Thinking, Strategy Building, Planning Aim, Planning Accuracy, Deduction)

Scofield intentionally tells the information that 720 kilometers must be covered in 6 hours. He knew that Mahone would find out that they wanted to get to Denver, where the president was giving a speech. And he was right.

(Intuition, Creativity, Deduction, Prediction, Analogical Thinking, Cunning)

Paul enlightens Linc and Scofield on the analysis of such recordings. Therefore, in the recording, they deliberately gesticulate as if they are lying. And Scofield hides the Morse code, which makes no sense to spend more time decoding the code. Everyone except Mahone falls into the trap.

(VCI, Setting traps, Non Verbal Deception, Acting Skills, Bodily Kinesthetic Intelligence)

Mahone, on the other hand, shows an insane feat of Cold reading and Psychological Analysis here, as he realizes that they don't want the president, they want Sara.

Scofield communicates with Sara using a code that only the two of them understand. Using the titles of the chapters of a book. Mahone is unable to decipher it on his own, so he visits Fox River, where Brad enlightens him about the book. Decoding the book chapters reveals where Scofield wants to meet Sara.

(VCI, Information Control, Planning Intricacies, Planning Coverage, Planning Versatility, Planning Invincibility)

What's really crazy is that Scofield easily recalled his memories about the book's chapter titles and contents.

(CPI)

Scofield and Linc discuss how they can't trust Paul at all because he might just need proof with Sara.
Scofield's intuition works and Sara deciphers the code. She calls Scofield and tells him that what his father left behind is a key.

(Intuition, Info Gathering)

Season 2 ep 16

The episode begins with Sara meeting with Scofield. Sara shows the key to Scofield. Paul receiving a phone call from the Prime Minister. Scofield asks Sara to work with Paul. Sara, on the other hand, tells him that Paul wanted to kill her before. Sara tries to kill Paul, but Linc and Scofield intervene in time.

The railway is blocked by police cars, but they successfully get into the control car. They put a gun to the driver's head so he crashes into the police cars.

(Problem Solving, Adaptability)

However, they find out that police will be waiting for them at the next station or the final station. So Scofield devises a plan to decept the police.
Scofield used 3 innocent people who are asked to jump off the train and start running towards the forest. The train conductor warns the police, so they go after the 3 innocent people. The plan succeeds and Scofield successfully reaches Chicago.

(Cunning, Decision Making, Creativity, Misdirection, Strategic Deception, Unpredictability, Strategy Shielding, Strategy Control, Planning Invincibility, Application Thinking)

Mahone brings Brad out of prison to investigate the escaped prisoners.

It turns out that Paul wasn't talking to the president, but to a woman who sounded like him and reported to Kim all along.

Season 2 ep 17

They finally reach the cigar club, but a stranger accosts Sara and Scofield sees a police car, so they run away. Scofield discovers that Pope is also a member of the cigar club, so they try to get him to go inside and open the lock.

Pope doesn't want to help and he wants to tell the authorities, but Scofield pulls a gun on him. Pope still doesn't want to help, so Scofield puts the gun on the table. Unarmed, he was able to get Pope to open the lock.

(Persuasion, Cold Reading, Psychological Analysis, Direct Manipulation)

Pope brings the flash drive, but Kim arrives and threatens him. Scofield improvises and hits Kim with the car. Pope successfully escapes, but Sara locks Paul out of the car.

(Improvisation, Risk Assessment)

The details are revealed here. Because Scofield formed a unity with Pope. "If Pope helps him, Scofield will turn himself in to the police." Linc wants to talk him out of it, but Scofield is completely disciplined and wants to keep his word.

(Empathy, Cognitive Discipline)

But Pope eventually lets Scofield go. This shows how good Scofield's negotiation skills are. The principal, who is basically on the side of the law, also lets him go.

(Negotiation, Persuasion)

Scofield looks at what's on the flash drive and finds an mp3 file. In turn, Miles gives up Scofield to Mahone for his daughter and wife

Season 2 ep 18

We don't know what's on the audio recording, but based on their reaction, it's decisive evidence. However, they cannot give it to the government because they would destroy the evidence as they have done so far. Linc, on the other hand, knows a person named Jane Phillips, who he thinks is honest and can help.

They want to give the flash drive to Jane, but Scofield foresees that they will follow Jane and he is right.

(Prediction, Trap Evasion)

.

It turns out that Scofield is not meeting the person he should be. Scofield, on the other hand, is cautious and sets a trap. It turns out that the person has asthma and Scofield asks what medicine he is taking for asthma, Abuterol Cortizaide or Prednizone. The fake Green answers Cortizaid. Apparently Cortizaid is a medicine which doesn't exist. But the other 2 medicines do exist. Scofield knows medicine well. And Scofield knocks out the fake Mr. Green

(VCI, Setting Traps).

Mr. Green looks at the flash drive and it turns out that it's just a copy, so the court won't accept it as evidence, especially since they don't know the exact date of the file. but Scofield wants to blackmail the president because she wanted to cover up the recording for a reason.

(Creative Thinking, Black Mailing)

Season 2 ep 19

(EM, Charisma)

And Scofield's plan succeeds and the president wants to talk to him privately. Scofield tells what's on the tape. The president looks completely disappointed.

Scofield claims there are 20 copies on the tape in 20 different locations. The president asks him to bring them here, but Scofield blackmails her that she will hear it on the news.

(Charisma, Bluffing, Blackmailing, Negotiation)

The president calls Linc to play the tape. Scofield asks the president to take off his handcuffs and let him go free, the president immediately goes in, but Scofield also asks for a presidential amnesty for himself and his brother. The President says that she will do anything, but Scofield realizes that paperwork easily disappears in this network, so he asks the President to announce the amnesty in live. The president asks back how she knows that Scofield won't release the tape after the amnesty is announced. Scofield says "you can't know". Finally the president lets Scofield go.

(Charisma, Persuasion, Blackmailing, Negotiation)

The president really wants to announce the amnesty, but Kim threatens that they also know about her secrets. The president is therefore lying that she has cancer and is resigning from the position of president with immediate effect. Which is a problem because if she is not the president, the tape is worthless.

Season 2 ep 20

Scofield wants to disappear so he gets up on a ship with Linc. Sara also heads towards the ship, but notices that she is being followed, so she gets out of the car and lets them arrest her.

1 week passes. Mahone is investigating Scofield. Most of all, he examines his tattoos and realizes that he planned everything precisely in advance. His tattoos are all hidden symbols arranged in the order of the Greek ABC.

(Long Term Strategy, Strategy Vision, Strategy Length, Long Term Planning, Tactical Complexity, Prediction, VCI)

(Empathy)

At the end of the episode, we see that it wasn't Sucre who wrote the message, but Mahone.

(Cunning, Trap Evasion, Intuition, Seeing Through People, Cold Reading, Information Gathering)

Scofield convinces Brad to put the gun away and let him control the plan.

(Negotiation, Persuasion)

Sucre wants to kill Brad, but Scofield calms him down and convinces him that there is no need to shed blood.

Linc runs into Mahone and they start fighting. Linc gets Mahone's gun.

It turns out that the people watching the house are not FBI agents. The "agents" are taped to the wall by Sucre. This is where Scofield senses something is wrong. They go into the house where T-bag fled. T-bag sets a trap for them and the police arrive. They manage to get out, Brad is shot in the leg by T-bag, who is arrested, the money goes to Sucre.

Scofield sends Sucre to get a car to stay away. Then, when he is alone with T-bag, Scofield says that this trap was a professional job and it is impossible that T-bag could have done it alone.

(Empathy)

A stranger pulls aside and helps him to save Sucre. Scofield goes after T-bag, whom he easily overtakes because of the bag full of money. T-bag walks into a house in the middle of the woods and grabs a knife. Scofield goes in then closes the door and breaks a bottle to use as a weapon. T-bag attacks Scofield, who blocks the stab with the money bag. He knocks the knife out of T-bag's hand and stabs him with it. Scofield ties up T-bag and out comes the Panamanian military. Scofield goes to the ship with the money bag but does not find Linc.

But Kim finds the ship and takes a gun on Scofield. Linc throws him the 5 million, but he doesn't need it. Kim kicks the 5 million into the water and Sara shoots Kim, who falls into the water and dies. The police arrive, so they have to run away. Scofield is forced to flee into a house where he is trapped. Scofield rescues Sara by pretending that Sara is his hostage. Sara is believed to be innocent and released.

Mahone also advises him to kick his kneecap with all his might.

He will be right, and this is a great opportunity to get out of prison for a while. With the help of a couple of people, they start digging to reach the cables. The prisoners are constantly watched by armed guards, but Scofield hides something underground that only Brad notices. Brad tells Lechero that Scofield is about to flee, so he goes outside to check. Mahone observes the driver of the card guard and deduces that he is a soldier who receives a very high salary. The team expands with a boy named Roland Glenn, who is a hacker and with his help they track down the driver. They follow the driver who goes to a fort. Motion detectors, alarms, armed guards. The hacker shows them a wireless hard drive that takes all data within 3 meters.

With the help of the device, you don't have to steal the scylla, just go near it. Sucre causes an accident on purpose and stops to argue with the driver, he has the device in his pocket, but they cannot measure any data. Scofield's plan is for Sara to throw the hard drive into the housekeeper's bag, and Scofield calls the housekeeper on the grounds that the alarm system is faulty. They successfully trick her into the library where Scylla is and steal the data.

(Cunning, Logical Manipulation, Planning Versatility, Planning Accuracy)

Mahone and Brad arrange to retrieve the hard drive from the bag, but cannot find it. Scofield visualizes what happened in the house and deduces that the house manager thought the hard drive belonged to the boss, so he left it in the house. If they find out that someone is hunting the scylla, they are finished, so they have to enter the estate.

(VSI, Deduction)

Just to give you an idea of the defense of the fortress: the alarms are activated in 1.2 seconds, immediately lock all units and a bunch of armed guards appear. Sucre activates an alarm that distracts the guards and Scofield and Mahone get in and find the scylla, then successfully get out.

(Planning Risk Calculation, Planning Invincibility, Linear Thinking)

However, after looking at the code, it turns out that the card does not contain all the data.

Linc tells Sara that their mother had a brain tumor, which caused her nose to bleed a lot. Scofield's nose began to bleed as well. Scofield figures out where Scylla is and leads T-bag away. (VCI)

Scofield collapses and is taken to the hospital. Sucre steps on a landmine. Mahone interrogates David Baker and obtains a decoder, but the Company's men show up at his place. Gretchen tries to dismantle the landmine, but Scofield and Mahone decipher that dismantling the landmine will set off the alarm, so Mahone, using information from Becker, disables the mine for 20 seconds and they rescue Sucre. They have to break through a steel wall where the Scylla is, there are no cameras because the company does not want photographic evidence of the Scylla's existence. However, if something heavier than 1 kg touches the floor, the alarm goes off immediately. Scofield's neurological exam comes in and reveals that he has a Hamatoma in the hypothalamus. He has to have an operation tomorrow or he could die.

Season 4 Ep 11

In the end, Scofield does not go to the hospital, because if the members of the team die and he alone survives, he would not be able to live with this.

They must enter the Scylla's room without touching the ground or making any noise.

Scofield plan: Breaking through two walls, one glass and the other concrete (all this with special drills that don't make noise.) In order for them to pass through, an electromagnetic field has to be created, in order for this field to be strong enough, several accumulators are needed. They throw umbrellas through the holes. Scofield uses nitrogen to trick the motion sensors. Sucre starts to build a ladder towards Scylla but trips, but luckily the alarm doesn't go off. Scofield goes to the ladder but gets another seizure, despite this Scofield is able to control the situation and take down the glass wall with suction cups. However, as soon as Scofield moves the Scylla, an alarm goes off that he was not aware of.

Scofield and the team go up to the general's office, and then the entire building is locked down. But the real twist comes now. It is impossible to get out of the general's office. Scofield, on the other hand, knew from the very beginning of the plan that this would be the final outcome and sent Sara to "take Lisa (the general's daughter) hostage". Scofield sees his memories clearly and writes the word "bargain" in his subconscious. Sucre and Linc find Self. They are disarmed, but the receiver Scylla escapes. Scofield's surgery is successful and he recovers. Scofield deduces that Scylla may not be the "Company's black box" but may be something else entirely and realizes that "Bargain" refers to the chemical presence of boron, argon, gallium, indium. Scofield realizes that, according to a theory, if you somehow put these elements together, you can use 100% of the sun's energy with a solar cell. This also explains why there are people willing to pay 100 million for Scylla.

(VCI, Deduction, Deductive Reasoning)

Scofield hands over Scylla to Paul, and thanks to Paul's connections, they are exonerated, so no one is a convicted person anymore. And four years later we can see that the general is arrested and sentenced to death and Scofield's grave and his born son.

Season 4 Ep 23

Scofield and Sara get married on the beach, but as they celebrate, the police arrive and arrest Sara for Christina's murder, which was caught on camera. Christina, on the other hand, is only a technical consultant on paper, there is no proof that she is a member of the Company. And the camera only recorded that Sara shot her, so she can't plead self-defense. Sara is beaten by the prison guards because of what happened in Fox River. T-bag and the general go to the same prison as Sara, only to the men's section and the general wants to see Sara dead. Gretchen is also in this prison and someone puts rat poison in Sara's lunch, but her stomach is washed out in time. None of them were successful. This prison is virtually escape-proof. Scofield makes blueprints and visualizes the only blind spot on the fence. He sends a coded message to Sara. (VSI, VCI, Information Gathering)

Scofield's visit is allowed and he makes sure in code that Sara has understood the message and is participating. However, Mahone betrays Scofield and informs an agent about the blind spot regarding the prison, which they begin to fix. Gretchen finds the message and realizes that Scofield is trying to escape Sara. Gretchen also wants to escape with Sara.

In order for Mahone to get his badge back and become a federal again, he has to give up Scofield, so he reveals that he has a plane and will fly to the prison. Scofield bluffs the police badly and throws a mannequin out of the plane while he's under the federal car. Unfortunately, Gretchen is arrested, but she doesn't give up on Sara. Sucre cannot transfer the money in time. Scofield knew in advance that T-bag was going to spit (He told him to start a fire in his cell) and predicted that the police would set off the fire alarm. However, they run into a problem because Scofield cannot overload the system to open the final door through which they can escape. The only way for Scofield is to stay to overwhelm the High Commissioner, but only Sara can escape. Scofield sacrifices himself by electrocuting himself and Sara is saved. The owl was a master of disguise, you would think it was looking at his face with big eyes, then it turned its head 180 and it turned out that it had been looking at the marks on its back the whole time, and now finally looking at its real face.

I know it's an unrealistic feat, but Scofield was able to perfectly memorize Poseidon's face, then tattoo it on himself so that neither he nor the programmer would notice it, and with this trick he is able to outwit the retina scanner while predicting that Poseidon will be at the zoo.
